State Street Global Advisors Luxembourg SICAV

Prospectus

Valid from 20th October 2025

Important Information

Prospective investors are advised to review this Prospectus (including the Relevant Supplement(s)) and the PRIIPs KID(s) or KIID(s) (as applicable) carefully and in their entirety and, before making any investment decision with respect to an investment in a Fund, should consult a stockbroker, bank manager, lawyer, accountant or other financial adviser for independent advice in relation to: (a) the legal requirements within their own countries for the purchase, holding, exchanging, redeeming or disposing of Shares; (b) any foreign exchange restrictions to which they are subject in their own countries in relation to the purchase, holding, exchanging, redeeming or disposing of Shares; (c) the legal, tax, financial or other consequences of subscribing for, purchasing, holding, exchanging, redeeming or disposing of Shares; and (d) the provisions of this Prospectus.

This Prospectus comprises information relating to the Company, an open-ended umbrella fund authorised pursuant to the 2010 Law. The Company is authorised in Luxembourg by the *Commission de Surveillance du Secteur Financier* (CSSF) as a UCITS for the purposes of the 2010 Law. The Company is structured as an umbrella fund in that different sub-funds may be established with the prior approval of the CSSF. The authorisation of the Company is not an endorsement or guarantee of the Company by the CSSF nor is the CSSF responsible for the contents of this Prospectus and any Supplements. The authorisation of the Company by the CSSF does not constitute a warranty as to the performance of the Company and the CSSF shall not be liable for the performance or default of the Company. In addition, each Fund may have more than one Class allocated to it. A Class within a Fund will not have a separate investment portfolio. The creation of any class must be notified to and cleared in advance with the CSSF.

The Board has taken all reasonable care to ensure that the information contained in this Prospectus is, to the best of its knowledge and belief, in accordance with the facts and does not omit anything material to such information. The Board accepts responsibility accordingly.

No person is authorised to give any information or to make any representation other than those contained in this Prospectus, the PRIIPs KID or KIID (as applicable) and the annual reports and any subscription and/or purchase made by any person on the basis of statements or representations not contained in or inconsistent with the information contained in this Prospectus, the PRIIPs KID or KIID (as applicable) and the annual reports shall be solely at the risk of the subscriber/purchaser. Furthermore, the delivery of this Prospectus or any issue of Shares shall not, under any circumstances, create any implication that the affairs of the Company have not changed since the date of this Prospectus.

Subscriptions are not valid unless they are based on this Prospectus or the PRIIPs KID or KIID (as applicable) in conjunction with the most recent annual report and the most recent semi-annual report where this is published after the annual report.

Investors should be aware that the price of Shares may fall as well as rise, and investors may not get back any of the amount invested. Risk factors for investors to consider are set out in the "Risk Information" section. Risks of particular relevance to the Funds are described in the Relevant Supplement.

In cases where an investor invests in the Company through an intermediary which invests into the Company in the intermediary's own name but on behalf of the investor, it may not always be possible for the investor to exercise certain Shareholder rights directly against the Company. Investors are advised to take advice on their rights.

The distribution of this Prospectus and the offering or purchase of Shares may be restricted or prohibited by law in certain jurisdictions. This Prospectus does not constitute and may not be treated as an offer or solicitation by or to anyone in any jurisdiction in which such offer or solicitation is not lawful or in which the person making such offer or solicitation is not qualified to do so or to anyone to whom it is unlawful to make such offer or solicitation. It is the responsibility of any persons in possession of this Prospectus and any persons wishing to apply for Shares pursuant to this Prospectus to inform themselves of and to observe all applicable laws and regulations of any relevant jurisdiction.

As Shares in the Company are not registered in the United States in accordance with the U.S. Securities Act, or the securities laws of any of the states or possessions of the United States, and the Company is not registered under the U.S. Investment Company Act, they may neither be offered nor sold nor delivered directly or indirectly in the U.S., or to or for the account or benefit of any U.S. Person (as such term is defined in Regulation S under the U.S. Securities Act). A prospective investor will be required at the time of acquiring Shares to represent that such investor is not a U.S. Person or acquiring Shares for or on behalf of a U.S. Person or acquiring the Shares with the assets of an ERISA plan (as defined below).

Shares may not be acquired or owned by, or acquired with the assets of:

i. **any retirement plan subject to Title I of ERISA; or**
ii. **any individual retirement account or plan subject to Section 4975 of the United States Internal Revenue Code of 1986, as amended;**

which are hereinafter collectively referred to as "ERISA plans".

Shareholders are required to notify the UCI Administrator, immediately in the event that they become U.S. Persons, will no longer meet the eligibility criteria or otherwise hold Shares which might result in the Company or the Management Company incurring any liability to taxation or suffering pecuniary disadvantages which the Company or the Management Company might not otherwise have incurred or suffered, or requiring the Company or the Management Company to register under the U.S. Investment Company Act, or register any Shares under the U.S. Securities Act.

Where the Board becomes aware that any Shares are directly or beneficially owned by any person in breach of the above restrictions, they may direct the Shareholder to transfer his Shares to a person qualified to own such Shares or request the Company to redeem the Shares, in default of which the Shareholder shall, on the expiration of thirty (30) days from the giving of such notice, be deemed to have given a request in writing for the redemption of the Shares. The Shares will be redeemed in accordance with the provisions of the Articles.

As of the date of this Prospectus, the Company is a "recognised scheme" for the purposes of Section 264 of the UK's Financial Services and Markets Act 2000. The UK left the EU on 31 January 2020 and entered the transition period agreed as part of the Withdrawal Agreement between the UK and the EU. It is anticipated that following the end of the transition period, the Company will be marketed

in the UK under temporary permissions regime followed by a formal application for recognition under Section 272 of the UK's Financial Services and Markets Act 2000 or its recognised replacement.

The Prospectus and PRIIPs KIDs/ KIIDs may be translated into other languages. Any such translation shall only contain the same information and have the same meaning as the English language Prospectus and/or PRIIPs KID/KIID. To the extent that there is any inconsistency between the English language Prospectus and/or PRIIPs KID/KIID and the Prospectus in another language, the English language Prospectus and/or PRIIPs KID/KIID will prevail. All disputes as to the contents of this Prospectus and related PRIIPs KIDs/KIIDs shall be governed in accordance with the laws of Luxembourg.

1. Glossary

The following summarises the principal features of the Company and should be read in conjunction with the full text of this Prospectus.

1915 Law	the Luxembourg law of 10 August 1915 on commercial companies, as may be amended from time to time.
2010 Law	the Luxembourg law of 17 December 2010 relating to undertakings for collective investment, as may be amended from time to time.
Access Programme(s)	existing or future "access" products or programmes such as QFI, Stock Connect, the CIBM Direct Access Programme, Bond Connect or any other investment programme through which a Fund may access PRC Investments.
UCI Administrator	the central administration agent, registrar and transfer agent, principal paying agent, and domiciliary and corporate agent appointed by the Management Company, with the consent of the Company, in accordance with the requirements of the 2010 Law and pursuant to an administration agreement, as identified in the "Directory" section of this Prospectus.
AML/CFT	anti-money laundering and countering the financing of terrorism.
AML/CFT Rules	the Luxembourg law of 12 November 2004 on the fight against money laundering and terrorist financing, as amended, (the "**2004 Law**"), the Grand-Ducal Regulation of 10 February 2010 providing details on certain provisions of the 2004 Law, as amended, the CSSF Regulation N°12-02 of 14 December 2012 on the fight against money laundering and terrorist financing, as amended, ("**CSSF Regulation 12-02**"), relevant CSSF Circulars in the field of AML/CFT as well as the set of rules formed by European Directives on the preventions of the use of the financial system for the purpose of money laundering and terrorist financing, as amended from time to time and the Financial Action Task Force (FATF) recommendations, as amended from time to time.
Application Form	form used to establish an account for purchases of Shares.
Articles	the articles of association of the Company, as may be amended from time to time.
Auditor	a firm of chartered accountants as may from time to time be appointed as auditors to the Company, as identified in the "Directory" section of the Prospectus.
Authorised Participant	with respect to ETF Shares, a Market Maker or a broker-dealer entity, which has entered into an Authorised Participant Agreement for the purposes of directly subscribing and/or redeeming ETF Shares in a Fund with the Company (i.e. primary market).
Authorised Participant Agreement	The agreement entered into by the Company with each Authorised participant in respect of a subscription and/or redemption of ETF Shares.
Authorised Participant Operating Guidelines	the operating guidelines with respect to ETF Shares for Authorised Participants setting out details for the procedures for directly subscribing and/or redeeming ETF Shares in a Fund with the Company (i.e. primary market) and which is available to Authorised Participants only from the Investment Manager.

Base Currency	the currency in which a Fund is denominated, as specified in the Relevant Supplement.
Benchmark Regulation	Regulation (EU) 2016/1011 of the European Parliament and Council of 6 June 2016 on indices used as benchmarks in financial instruments and financial contracts or to measure the performance of investment funds.
Board	the board of directors of the Company as identified in the Directory.
Board of Directors	the directors of the Management Company as identified in the Directory.
Bond Connect Authorities	the exchanges, trading systems, settlement systems, governmental, regulatory or tax bodies which provide services and/or regulate Bond Connect and activities relating to Bond Connect, including, without limitation, PBoC, the HKMA, HKEx, CFETS, the CMU, CCDC and SHCH and any other regulator, agency or authority with jurisdiction, authority or responsibility in respect of Bond Connect.
Bond Connect Securities	any bonds tradable in the PRC through Bond Connect.
Business Day	a day on which banks are scheduled to be open for non-automated business in Luxembourg, United Kingdom and the country (other than Poland) in which the Investment Manager and the relevant Sub-Investment Manager is located, provided that each exchange or market on which a substantial portion of the relevant Fund's investments is traded is also open and/or such other day or days as the Directors may determine and notify in advance to Shareholders. See also: Dealing Calendar.
CBI	The Central Bank of Ireland.
CCASS	The PRC's Central Clearing and Settlement System.
CCDC	China Central Depository & Clearing Co., Ltd.
Central Securities Depositary/CSD	A recognised clearing system, which is a national settlement system for individual national markets. For Funds that issue ETF Shares through an ICSD, Central Securities Depositaries would be Participants in the ICSD.
CET	central European time.
CFETS	China Foreign Exchange Trading System (also known as the National Interbank Funding Centre).
China A Shares	shares of companies incorporated in the PRC and listed on the Shanghai and/or Shenzhen Stock Exchanges which are quoted in RMB.
China Connect Securities	any securities and/or UCIs listed and traded on the SSE or SZSE which may be traded by Hong Kong and international investors under Stock Connect.
CIBM	the China interbank bond market.
CIBM Direct Access Programme	direct access programme under People's Bank of China Announcement [2016] No.3. facilitating access to the China interbank bond.
Class	shares of a Fund representing an interest in that Fund but designated as a share class within such Fund for the purpose of attributing different proportions of the NAV of the relevant Fund to such ETF and/or Non-ETF Shares to accommodate different characteristics including in relation to subscription, switching, and redemption charges, dividend arrangements, currencies, currency hedging policies, minimum investment and ongoing holding requirements and/or fee arrangements specific to such ETF and/or Non-ETF Shares.

Clearstream	Clearstream Banking Société Anonyme, Luxembourg.
CMU	Central Moneymarkets Unit of the HKMA.
CNH	RMB which is traded within the PRC's offshore market.
CNY	RMB which is traded within the PRC's onshore market.
Company	State Street Global Advisors Luxembourg SICAV.
CRS Law	the Luxembourg law dated 18 December 2015 implementing Council Directive 2014/107/EU of 9 December 2014 as regards mandatory automatic exchange of information in the field of taxation, as may be amended from time to time.
CSDCC	China Securities Depository and Clearing Corporation Limited.
CSRC	China Securities Regulatory Commission.
CSSF	*Commission de Surveillance du Secteur Financier*, the Luxembourg supervisory authority of the financial sector.
Daily Quota	The daily quota to which each of SHHK Stock Connect and SZHK Stock Connect is subject.
Data Protection Legislation	(i) the Luxembourg law of 1 August 2018 on the organisation of the National Data Protection Commission and the general data protection framework, as may be amended from time to time, (ii) the General Data Protection Regulation (Regulation (EU) 2016/679 of the European Parliament and the Council of 27 April 2016) and any consequential data protection legislation applicable in Luxembourg and (iii) any guidance and/or codes of practice issued by the Luxembourg Data Protection Authority (CNPD) or other relevant supervisory authority, including without limitation the European Data Protection Board.
Dealing Calendar	the calendar of all non-Dealing Days for the Funds as available on the Website.
Dealing Day	every Business Day other than days during which normal dealing has been temporarily suspended.
Dealing Form	form used to subscribe for or redeem Shares in a Fund.
Depositary	the depositary bank appointed by the Company in accordance with the requirements of the 2010 Law and pursuant to a depositary agreement, as identified in the Directory.
Dilution Adjustment	the Swing Pricing Adjustment or any other anti-dilution technique, as may be described in section "**Dilution Adjustment**" and detailed in the Relevant Supplement in respect of ETF and Non-ETF Share Class(es).
Directors	the directors of the Company for the time being and any duly constituted committee thereof.
Distributor	any person or entity appointed by the Global Distributor to distribute or arrange for the distribution of Shares.

Duties and Charges	in addition to those fees, costs and expenses as set out under section 7. ”Fees and Expenses” below and with respect to the ETF Shares only, all stamp duties and other duties, taxes, governmental charges, imposts, levies, exchange costs and commissions (including foreign exchange spreads), depositary and sub-custodian charges, transfer fees and expenses, agents' fees, brokerage fees, commissions, bank charges, registration fees and other duties and charges, including any provision for the spread or difference between the price at which any asset was valued for the purpose of calculation of the Net Asset Value per ETF Share of any Fund and the estimated or actual price at which any such asset is purchased or expected to be purchased, in the case of subscriptions to the relevant Fund, or sold or expected to be sold, in the case of redemptions from the relevant Fund, including, for the avoidance of doubt, any charges or costs arising from any adjustment to any swap or other derivative contract required as a result of a subscription or redemption, whether paid, payable or incurred or expected to be paid, payable or incurred in respect of the constitution, increase or reduction of all of the cash and other assets of the Company or the creation, acquisition, issue, conversion, exchange, purchase, holding, repurchase, redemption, sale or transfer of Shares (including, if relevant the issue or cancellation of certificates for Shares) or investments by or on behalf of the Company.
Eligible State	any EU Member State, any member state of the Organisation for Economic Cooperation and Development, any member state of the European Economic Area, and any other state which the Board deems appropriate with regard to the investment objective of a Fund.
Embedded Costs	any costs indirectly incurred by each Fund as a result of its investment in underlying funds in which the Fund invests (which may be payable to the Investment Manager or its affiliates).
ERISA	the United States Employee Retirement Income Security Act of 1974, as amended.
ESG	investment methodology incorporating environmental, social and governance criteria into the relevant investment technique.
ESMA	European Securities and Markets Authority.
ETF Share(s)	a Share or Shares of an exchange traded Class in the capital of the Company (other than the Non-ETF Shares) entitling the holders to participate in the profits of the Company attributable to the relevant Fund as described in this Prospectus.
EU	European Union.
EU Member State	a member state of the EU.
Euroclear	Euroclear Bank S.A./N.V.

Exclusion List Methodology for screened Funds in SSGA Luxembourg SICAV	the methodology outlining the criteria for the assessment of the adherence of the Fund's securities to certain ESG criteria as laid out in the Relevant Supplement when applying a negative and/or norms based ESG Screen to the Fund, as further described in the section "ESG Investing" of this Prospectus. The Exclusion List Methodology for screened Funds in SSGA Luxembourg SICAV can be found on the Website under: https://www.ssga.com/ie/en_gb/institutional/ic/library-content/products/funddata/mf/emea/exclusion-list-methodology.pdf. Additional information regarding State Street Global Advisors ESG investment approach can be found on the Website at ssga.com/esg.
FATCA	the provisions of the United States Hiring Incentives to Restore Employment (HIRE) Act of 18 March 2010 commonly referred to as the Foreign Account Tax Compliance Act as well as any related regulations or official interpretation thereof.
FATF	Financial Action Task Force on Money Laundering.
Fund	a portfolio of assets established by the Directors (with the prior approval of the CSSF) and constituting a separate fund represented by a separate series of Shares and invested in accordance with the investment objective and policies applicable to such portfolio of assets, as set out in the Relevant Supplement.
Global Distributor	State Street Global Advisors Europe Limited[1] or such other entity as may be appointed as global distributor from time to time, as identified in the Directory.
HKEx	Hong Kong Exchanges and Clearing Limited.
HKMA	Hong Kong Monetary Authority.
HKSCC	Hong Kong Securities Clearing Company Limited.
ICSD	an International Central Securities Depositary. International Central Securities Depositaries for the Funds are currently Euroclear Bank S.A./N.V. and Clearstream Banking, Société Anonyme, Luxembourg, and any successor entity thereto.
Index	any financial index which a Fund will use, whether to track, outperform, as a performance comparator or otherwise reference (including where the financial index is referenced by a financial derivative instrument held by a Fund), as specified in the Relevant Supplement.
iNAV	means on each Dealing Day and with respect to ETF Shares, an indicative net asset value calculated and published on the basis of changes in the prices of the securities composing the relevant Fund.
Institutional Investor	institutional investors as referred to in articles 174 to 176 of the 2010 Law and defined by the administrative practice of the CSSF. Further detail on the definition of an Institutional Investor can be found "**Classes**" section of this Prospectus.

[1] State Street Global Advisors is now State Street Investment Management. Effective June 30, 2025, State Street Global Advisors began operating under the marketing name State Street Investment Management. This change does not affect the legal name or structure of the management company, global distributor and the investment manager - State Street Global Advisors Europe Limited, the sub-investment managers – State Street Global Advisors Limited and State Street Global Advisors Trust Company or the management of the Company.

Investment Manager	State Street Global Advisors Europe Limited[2] or such other company as may from time to time be appointed to provide investment management services to the Company in accordance with the requirements of the CSSF, as identified in the Directory and also known as the Management Company. For the avoidance of doubt, the term "Investment Manager" shall include, where the context permits, any sub-investment manager appointed from time to time by the Investment Manager pursuant to its authority under the Management Company Agreement.
KIID	the key investor information document in respect of any Class within the meaning of the 2010 Law, the UCITS Directive, and Commission Regulation (EU) No 583/2010 of 1 July 2010 implementing the UCITS Directive as regards key investor information and conditions to be met when providing key investor information or the prospectus in durable medium other than paper or by means of a website, as updated from time to time.
Listing Stock Exchange	SIX Swiss Exchange and Borsa Italiana as well as any such further selected exchanges as the Directors may determine from time to time in respect of a Share Class and which are specified on the Website.
Management Company	the management company appointed by the Company in accordance with the provisions of the 2010 Law and pursuant to a Management Company Agreement, as identified in the Directory. Pursuant to the terms of the Management Company Agreement the Management Company also provides the investment management services and in this context is also known as the Investment Manager.
Management Company Agreement	means the Agreement dated 15 December 2017 between the Company and the Management Company, pursuant to which the Management Company was appointed as manager of the Company, as may be further amended from time to time.
Market Maker	certain Authorized Participants or non-Authorized Participants who are financial institutions and a member of the Listing Stock Exchange and who have signed a market making contract with the Company, the Management Company or that are registered as such with the Listing Stock Exchange.
MiFID II	the Markets in Financial Instruments Directive (recast) (2014/65/EU) together with the Markets in Financial Instruments Regulation (Regulation (EU) no. 600/2014).
NAV	the net asset value of a Fund calculated as described in the "**Valuation and Calculation of the NAV**" section of this Prospectus.
NAV per Share	the net asset value of a Share in any Fund, including a Share of any Class issued in a Fund calculated as described in the "**Valuation and Calculation of NAV**" section of this Prospectus.
NAV Hedged Class	any Class where the Base Currency NAV is hedged against the Class currency, together with Portfolio Hedged Class, the "Hedged Classes".
Non-ETF Share	a share of any Class in the capital of the Company (other than the ETF Shares) entitling the holders to participate in the profits of the Company attributable to the relevant Fund as described in this Prospectus.

[2] State Street Global Advisors is now State Street Investment Management. Effective June 30, 2025, State Street Global Advisors began operating under the marketing name State Street Investment Management. This change does not affect the legal name or structure of the management company, the global distributor and the investment manager - State Street Global Advisors Europe Limited, the sub-investment managers – State Street Global Advisors Limited and State Street Global Advisors Trust Company or the management of the Company.

OECD	Organisation for Economic Cooperation and Development.
Participant	An accountholder in the ICSD, which may include Authorised Participants, their nominees or agents, who hold their interest in ETF Shares of the Funds settled and/or cleared through the ICSD.
PBoC	the People's Bank of China.
Portfolio Hedged Class	any Class where the currency exposure of the underlying assets is hedged against the Class currency, together with NAV Hedged Class, the "Hedged Classes".
PRIIPs KID	Packaged Retail and Insurance-based Investment Product key information document in respect of any Class within the meaning of the Regulation (EU) No1286/2014 of the European Parliament and of the Council of 26 November 2014 on key information documents for packaged retail and insurance-based investment products (PRIIPs), as amended.
PRC	the People's Republic of China (except, where the context requires, and for the purposes of this Prospectus and its related documents, references to PRC or "China" do not include Hong Kong, Macau and Taiwan).
PRC Investments	investments that create exposure to (i) issuers from the PRC, or other issuers associated with the greater China region, such as Hong Kong, Macau or Taiwan and/or (ii) issuers which may be listed or traded on recognised or over-the-counter markets located both inside and outside of the greater China region, such as the United Kingdom, Singapore, Japan or the United States.
PRC Listco	a PRC incorporated company which is listed on a stock exchange in the PRC.
PRC Sub-Custodian	HSBC Bank (China) Company Limited or any other entity appointed to act as such sub-custodian and the interbank bond trade and settlement agent for the relevant Funds for the purposes of the investments made through CIBM Direct Access Programme and/or the QFI.
Primary Market	A market on which the ETF Shares of a Fund are subscribed for or redeemed (off exchange) directly with the Company.
Privacy Statement	the privacy statement adopted by the Company as amended from time to time. The current version is appended to the Application Form and available via the website under https://www.ssga.com/global/en/legal/terms-and-conditions-global.html.
Prospectus	this document, the Relevant Supplement for any Fund, the SFDR Annex (as applicable) and any other supplement or appendix designed to be read and construed together with and to form part of this document as updated from time to time.
QFI	Qualified Foreign Investor, which shall include QFII and RQFII.
QFII	Qualified Foreign Institutional Investor.
Qualifying Agreement	an investment management agreement or other arrangements entered into between certain Institutional Investors and the Investment Manager or any of its affiliates, in each case in a format satisfactory to the Directors for the purpose of considering eligibility for Class B Shares.

Redemption Price	the price (exclusive of any applicable Dilution Adjustment) at which the Company may redeem Shares as determined for each Fund or Share Class on the basis of the NAV per Share as at the Valuation Point on the relevant Dealing Day.
Regulated Market	a market as defined in item 14) of article 4 of the European Parliament and the Council Directive 2004/39/EC of 21 April 2004 on markets in financial instruments, as well as any other market which is regulated, operates regularly and is recognized and open to the public in an Eligible State.
Relevant Supplement	a document containing information specific to a Fund.
Remuneration Policy	the remuneration policies, procedures and practices to which the Management Company and the Investment Manager are each subject and which comply with the UCITS Directive.
RQFII	the Renminbi Qualified Foreign Institutional Investor,
SAFE	the PRC's State Administration of Foreign Exchange.
SC Securities	China Connect Securities invested through Stock Connect (as defined below).
Secondary Market	A regulated market on which ETF Shares may be traded via a Recognised Market or OTC market.
Securities Lending Programme	the securities lending programme, as described in the "**Financial Techniques and Instruments**" section of the "**Financial Derivative Instruments**" section, in which certain Funds are enrolled.
SEHK	the Stock Exchange of Hong Kong Limited.
Settlement Deadline	5.00 p.m. CET on the second business day in Luxembourg after the relevant Dealing Day, or such later date as may be determined by the Company and notified to Shareholders.
Severe ESG Controversies	screening topic considered by the Investment Manager and/or Sub-Investment Manager for assessing whether the companies are involved in incidents/events that may pose business or reputational risk due to the potential impact on stakeholders, the environment, or the company's operations. Severe ESG Controversies refer to exceptionally egregious corporate behaviour, high frequency of recurrence of incidents, very poor management of ESG risks, and a demonstrated lack of willingness by the company to address such risks.
SFDR	Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector and related delegated acts, as may be amended from time to time.
SFDR Fund Classification	Article 8 SFDR – means a financial product that promotes, among other characteristics, environmental or social characteristics, or a combination of those characteristics, provided that the companies in which the investments are made follow good governance practices. Article 9 SFDR – means a financial product that has a sustainable investment as its objective.

SFDR Sustainable Investment	an investment in an economic activity that contributes to an environmental objective as measured, for example, by key resource efficiency indicators on the use of energy, renewable energy, raw materials, water and land, on the production of waste, and greenhouse gas emissions, or on its impact on biodiversity and the circular economy, or an investment in an economic activity that contributes to a social objective, in particular an investment that contributes to tackling inequality or that fosters social cohesion, social integration and labour relations, or an investment in human capital or economically or socially disadvantaged communities, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices, in particular with respect to sound management structures, employee relations, renumeration of staff and tax compliance.
SFO	the PRC's Securities and Futures Ordinance.
Share or Shares	a share or shares (including both ETF Shares and Non-ETF Shares) of any Class in the capital of the Company entitling the holders to participate in the profits of the Company attributable to the relevant Fund as described in this Prospectus.
Shareholder	a person registered in the register of shareholders of the Company as a holder of Shares.
SHCH	Shanghai Clearing House.
SHHK Stock Connect	Shanghai-Hong Kong Stock Connect.
SPSA	special segregated account in the CCASS to maintain holdings in SC Securities.
SSE	Shanghai Stock Exchange.
SSGA European Valuation Committee	the committee tasked with assisting the State Street Global Advisors business in EMEA in carrying out its fiduciary valuation responsibilities.
Stock Connect	the Shanghai-Hong Kong Stock Connect and/or the Shenzhen-Hong Kong Stock Connect.
Sub-Investment Manager	any entity appointed as sub-investment manager of a Fund by the Investment Manager or any Sub-Investment Manager pursuant to a sub-investment management agreement and specified in the Relevant Supplement. Where such an appointment has been made, and where appropriate, references to Investment Manager herein will refer to the Sub-Investment Manager.
Subscription Price	the price at which investors may subscribe for Shares as determined for each Fund or Class on the basis of the NAV per Share as at the Valuation Point on the relevant Dealing Day subject to any applicable Dilution Adjustment.
Substantial Shareholder	a shareholder holding 5% or more of the total issued shares, aggregating its positions with other group companies of a PRC Listco.
Sustainability Risk	means an environmental, social or governance event or condition that, if it occurs, could cause an actual or potential material negative impact on the value of the investment.

Swing Pricing Adjustment	In respect of the Non-ETF Shares only, an adjustment of the NAV of the relevant Fund by an amount not exceeding either 2% or 3% of the NAV per Unit under normal market conditions (the "Swing Factor") depending on each Fund's investment policy as detailed in the Relevant Supplement. However, whilst the adjustment is normally not expected to exceed the threshold set out in each Relevant Supplement, the Board or the Board of Directors may decide to increase the Swing Pricing Adjustment limit in exceptional circumstances to protect Shareholders' interests. The Swing Pricing Adjustment is used to reflect the dealing costs that may be incurred in relation to a Fund and the estimated bid/offer spread of the assets in which the Fund invests. It generally will be applied on any Dealing Day when aggregate total of subscriptions, switches or redemption of Shares of all Classes of a Fund result in a net capital inflow or outflow which exceeds a pre-determined threshold, as determined and reviewed by the Management Company from time to time for that Fund. In addition, the Management Company may agree to include anticipated fiscal charges, trading costs, market impact and related expenses in the amount of the adjustment. The Swing Pricing Adjustment will be an addition when the net movement results in a net capital inflow from all Classes of a Fund and a deduction when it results in a net capital outflow. As certain stock markets and jurisdictions may have different charging structures on the buy and sell sides, the resulting adjustment may be different for net inflows than for net outflows. A periodical review will be undertaken in order to verify the appropriateness of the Swing Factor in view of market conditions. In certain circumstances, the Management Company may decide that it is not appropriate to make such an adjustment. The volatility of the NAV of the Fund might not reflect the true portfolio performance (and therefore might deviate from the Fund's benchmark, where applicable) as a consequence of the application of swing pricing as further described in the "**Dilution Adjustment**" section of this Prospectus.
Switch	switch of all or part of an investor's holdings from one Class of a Fund into Shares of another Class of the same Fund provided the Shareholder is eligible to invest in the requested Class. Switch of Non-ETF Shares into ETF Shares and vice versa is not permitted.
Switching Form	the form used to switch from any Class of one Fund into Shares of a different Class of the same Fund.
SZHK Stock Connect	Shenzhen-Hong Kong Stock Connect.
SZSE	Shenzhen Stock Exchange.
Taxonomy Regulation	Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on the establishment of a framework to facilitate sustainable investment, and amending Regulation (EU) 2019/2088 and related delegated acts, as may be amended from time to time.
TER	the total expense ratio as described in the "**Fees and Expenses**" section of this Prospectus.
UCI	an undertaking for collective investment.
UCITS	an undertaking for collective investment in transferable securities within the meaning of the 2010 Law and UCITS Directive.

UCITS Directive	Directive 2009/65/EC of the European Parliament and of the Council of 13 July 2009 on the coordination of laws, regulations and administrative provisions relating to undertakings for collective investment in transferable securities, as may be amended from time to time.
US Investment Company Act	the United States Investment Company Act of 1940, as amended.
US Securities Act	United States Securities Act of 1933, as amended.
Valuation Point	the point on each Dealing Day for a Fund at which the assets are valued as detailed in the Relevant Supplement.
Website	https://www.ssga.com/ic/fund-finder on which the NAV per Share, the portfolio holdings and any other relevant information relating to any Fund will be published and on which this Prospectus, the PRIIPs KIDs/KIIDs, the Remuneration Policy, ESG matters and any other information in respect of the Company, including various Shareholder communications, may be published.

3. General Information about the Company

3.1. The Company

The Company is an open-ended public limited company (*société anonyme*) with variable capital (*société d'investissement à capital variable* or SICAV), which was incorporated in Luxembourg on 22 September 2008 under registration number B141.816 and is authorised by the CSSF as a UCITS. The Company has been structured as an umbrella fund, with segregated liability between Funds.

The object of the Company is the collective investment in transferable securities and/or other liquid financial assets of capital raised from the public, operating on the principle of risk spreading in accordance with Part 1 of the 2010 Law.

The capital of the Company is expressed in euro. It is determined by converting the total net assets of all Funds into euro.

The Board may from time to time, with the prior approval of the CSSF, create different Funds representing separate portfolios of assets with each Fund comprised of one or more Classes. The investment policy and risk profile of each Fund will be determined by the Board in consultation with the risk management team established within the Investment Manager and any changes with respect to, *inter alia*, a Fund's investment restrictions, policy or objective must be approved by the Board. The portfolio of assets maintained for each Fund will be invested in accordance with the investment objectives and policies applicable to such Fund as specified in the Relevant Supplement.

In accordance with article 181(5) of the 2010 Law, each Fund is considered to constitute a single pool of assets and liabilities; therefore the rights of Shareholders and creditors concerning each Fund are limited to the assets of that Fund. However, there can be no assurance that, should an action be brought against the Company in the courts of another jurisdiction, the segregated nature of the Company and the Funds will be respected.

Further information with respect to Shares and Classes is outlined in the "**Shares**" section below.

3.2. Management and Administration

3.2.1. The Directors

The Board is responsible for managing the business affairs of the Company in accordance with the Articles. In particular, the Board is responsible for determining the corporate and investment policy for each Fund, based on the principle of risk spreading. Further, the Board is responsible for the overall supervision of the management and administration of the Company, including the selection and supervision of the Management Company and the general monitoring of the performance and operations of the Company.

The members of the Board are elected by the general meeting of Shareholders, subject to the prior approval of the candidate by the CSSF. In the event of a vacancy on the Board, the remaining directors may elect a replacement to act as director until the next general meeting of Shareholders. For the current composition of the Board please refer to the Directory.

The Articles provide that a director may have an interest in any transaction or arrangement with the Company or in which the Company is interested provided that (s)/he has disclosed to the Board the nature and extent of any material interest which (s)/he may have. The Company has granted indemnities to the directors in respect of any loss or damages that they may suffer, save where this results from the director's gross negligence or wilful misconduct.

3.2.2. The Management Company

The Board has appointed State Street Global Advisors Europe Limited[5] to be responsible for the day-to-day management of the Company's affairs subject to the overall supervision of the Board. The Management Company is responsible for the investment management of the assets of the Company, the administration of the Company and the implementation of the Company's and Funds' distribution and marketing policy.

The Management Company is a private company limited by shares, which was incorporated in Ireland on 4 December 1974 under registration number 49934 and is authorised by the CBI under:

-the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (S.I. No. 352 of 2011), and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2015, as amended as a UCITS management company; and

- European Union (Alternative Investment Fund Managers) Regulations 2013, (S.I. No. 257 of 2013) in respect of MiFID services specified in Regulation 7.

For the current composition of the Board of Directors of the Management Company please refer to the Directory.

3.2.3. The Depositary

The Company has appointed State Street Bank International GmbH, acting through its Luxembourg Branch as its Depositary. State Street Bank International GmbH is a limited liability company organized under the laws of Germany, having its registered office at Brienner Str. 59, 80333 Munich, Germany and registered with the commercial register court, Munich under number HRB 42872. It is a credit institution supervised by the European Central Bank (ECB), the German Federal Financial Services Supervisory Authority (BaFin) and the German Central Bank. State Street Bank International GmbH, Luxembourg Branch is authorized by the CSSF in Luxembourg to act as depositary and is specialised in depositary, fund administration, and related services. State Street Bank International GmbH, Luxembourg Branch is registered in the Luxembourg Commercial and Companies' Register (RCS) under number B 148 186. State Street Bank International GmbH is a member of the State Street group of companies having as their ultimate parent State Street Corporation, a US publicly listed company.

The Depositary has been entrusted with following main functions:

- ensuring that the sale, issue, repurchase, redemption and cancellation of Shares are carried out in accordance with applicable law and the Articles;
- ensuring that the value of the Shares is calculated in accordance with applicable law and the Articles;
- carrying out the instructions of the Management Company unless they conflict with applicable law and the Articles;
- ensuring that in transactions involving the assets of the Funds any consideration is remitted within the usual time limits;
- ensuring that the income of the Company is applied in accordance with applicable law and the Articles.
- monitoring of the Fund's cash and cash flows;
- safe-keeping of the Fund's assets, including the safekeeping of financial instruments to be held in custody and ownership verification and record keeping in relation to other assets.

Depositary's liability

In carrying out its duties the Depositary shall, at all times, act honestly, fairly professionally, independently and solely in the interests of the Company and its Shareholders.

In the event of a loss of a financial instrument held in custody, determined in accordance with the 2010 Law, and in particular Article 18 of the Commission Delegated Regulation No

[5] State Street Global Advisors is now State Street Investment Management. Effective June 30, 2025, State Street Global Advisors began operating under the marketing name State Street Investment Management. This change does not affect the legal name or structure of the management company, the global distributor and the investment manager - State Street Global Advisors Europe Limited, the sub-investment managers – State Street Global Advisors Limited and State Street Global Advisors Trust Company or the management of the Company.

2016/438, the Depositary shall return financial instruments of identical type or the corresponding amount to the Company without undue delay.

The Depositary shall not be liable if it can prove that the loss of a financial instrument held in custody has arisen as a result of an external event beyond its reasonable control, the consequences of which would have been unavoidable despite all reasonable efforts to the contrary pursuant to the 2010 Law and other applicable rules.

In case of a loss of financial instruments held in custody, the Shareholders may invoke the liability of the Depositary directly or indirectly through the Company provided that this does not lead to a duplication of redress or to unequal treatment of the Shareholders.

The Depositary will be liable to the Company for all other losses suffered by the Company as a result of the Depositary's negligent or intentional failure to properly fulfil its obligations pursuant to the 2010 Law and other applicable rules.

To the extent permitted by applicable law the Depositary may not be liable for consequential or indirect or special damages or losses, arising out of or in connection with the performance or non-performance by the Depositary of its duties and obligations.

Delegation

The Depositary has full power to delegate the whole or any part of its safe-keeping functions subject to the terms of the depositary agreement but its liability will not be affected by the fact that it has entrusted to a third party some or all of the assets in its safekeeping. The Depositary's liability shall not be affected by any delegation of its safe-keeping functions.

Information about the safe-keeping functions which have been delegated and the identification of the relevant delegates and sub-delegates are contained in Appendix 2 to the Prospectus. The latest version of the list of the relevant delegates can be consulted on the Website.

Conflicts of Interest

The Depositary is part of an international group of companies and businesses that, in the ordinary course of their business, act simultaneously for a large number of clients, as well as for their own account, which may result in actual or potential conflicts. Conflicts of interest arise where the Depositary or its affiliates engage in activities under the depositary agreement or under separate contractual or other arrangements. Such activities may include:

(i) providing nominee, administration, registrar and transfer agency, research, agent securities lending, investment management, financial advice and/or other advisory services to the Company;
(ii) engaging in banking, sales and trading transactions including foreign exchange, derivative, principal lending, broking, market making or other financial transactions with the Company either as principal and in the interests of itself, or for other clients.

In connection with the above activities the Depositary or its affiliates:

(i) will seek to profit from such activities and are entitled to receive and retain any profits or compensation in any form and are not bound to disclose to, the Company, the nature or amount of any such profits or compensation including any fee, charge, commission, revenue share, spread, mark-up, mark-down, interest, rebate, discount, or other benefit received in connection with any such activities;
(ii) may buy, sell, issue, deal with or hold, securities or other financial products or instruments as principal acting in its own interests, the interests of its affiliates or for its other clients;
(iii) may trade in the same or opposite direction to the transactions undertaken, including based upon information in its possession that is not available to the Company;
(iv) may provide the same or similar services to other clients including competitors of the Company;
(v) may be granted creditors' rights by the Company which it may exercise.

The Company may use an affiliate of the Depositary to execute foreign exchange, spot or swap transactions for the account of the Company. In such instances the affiliate shall be acting in a principal capacity and not as a broker, agent or fiduciary of the Company. The

affiliate will seek to profit from these transactions and is entitled to retain and not disclose any profit to the Company. The affiliate shall enter into such transactions on the terms and conditions agreed with the Company.

Where cash belonging to the Company is deposited with an affiliate being a bank, a potential conflict arises in relation to the interest (if any) which the affiliate may pay or charge to such account and the fees or other benefits which it may derive from holding such cash as banker and not as trustee.

The Investment Manager or the Management Company may also be clients or counterparties of the Depositary or its affiliates.

Potential conflicts that may arise in the Depositary's use of sub-delegates include four broad categories:

(i) conflicts from the sub-delegates selection and asset allocation among multiple sub-delegates influenced by (a) cost factors, including lowest fees charged, fee rebates or similar incentives and (b) broad two-way commercial relationships in which the Depositary may act based on the economic value of the boarder relationship, in addition to objective evaluation criteria;

(ii) sub-delegates, both affiliated and non-affiliated, act for other clients and in their own proprietary interest, which might conflict with clients' interests;

(iii) sub-delegates, both affiliated and non-affiliated, have only direct relationships with clients and look to the Depositary as its counterparty, which might create incentive for the Depositary to act in its self-interest, or other clients' interests to the detriment of clients; and

(iv) sub-delegates may have market-based creditors' rights against client assets that they have an interest in enforcing if not paid for securities transactions.

In carrying out its duties the Depositary shall act honestly, fairly, professionally, independently and solely in the interests of the Company and its Shareholders.

The Depositary has functionally and hierarchically separated the performance of its depositary tasks from its other potentially conflicting tasks. The system of internal controls, the different reporting lines, the allocation of tasks and the management reporting allow potential conflicts of interest and the Depositary issues to be properly identified, managed and monitored. Additionally, in the context of the Depositary's use of sub-delegates, the Depositary imposes contractual restrictions to address some of the potential conflicts and maintains due diligence and oversight of sub-delegates to ensure a high level of client service by those agents. The Depositary further provides frequent reporting on clients' activity and holdings, with the underlying functions subject to internal and external control audits. Finally, the Depositary internally separates the performance of its custodial tasks from its proprietary activity and follows a standard of conduct that requires employees to act ethically, fairly and transparently with clients.

Up-to-date information on the Depositary, its duties, any conflicts that may arise, the safe-keeping functions delegated by the Depositary, the list of delegates and sub-delegates and any conflicts of interest that may arise from such a delegation will be made available by the Depositary to Shareholders on request.

3.2.4. The UCI Administrator

The Company and the Management Company have appointed State Street Bank International GmbH, Luxembourg Branch to further act as the Company's UCI administration agent, domiciliary and corporate agent, registrar and transfer agent and paying agent and to procure or provide services ancillary thereto. As UCI Administrator, State Street Bank International GmbH, Luxembourg Branch is responsible for the registrar function, the NAV calculation and accounting function and the client communication function as defined in CSSF Circular 22/811. Agreements have been entered into with various affiliates and agents to perform certain administrative or representative services or to facilitate the payment of Share distributions in relevant jurisdictions.

3.2.5. The Investment Manager

State Street Global Advisors Europe Limited[6] also serves as the investment manager of the Company, subject to the supervision of the Board.

The Investment Manager provides investment management services to the Funds and has established a Polish Branch through which it may also provide these services.

The Investment Manager is authorised by the CBI in respect of these services and its investment management business includes but is not limited to management of other Irish authorised undertakings for collective investment.

The Investment Manager has the discretion to delegate to sub-investment managers all the powers, duties and discretions exercisable in respect of the management of the relevant percentage of such of the Funds as the Investment Manager and any Sub-Investment Manager may from time to time agree. A Sub-Investment Manager may further delegate. Any such delegation will be in accordance with the requirements of the CSSF. Details of sub-investment managers appointed to any Fund will be available to Shareholders on request and will be disclosed in the Fund's Relevant Supplement. Fees payable to any Sub-Investment Manager appointed by the Investment Manager shall be paid by the Investment Manager out of the Investment Management fees.

3.2.6. The Sub-Investment Managers

The Investment Manager has appointed the following discretionary sub-investment managers in respect of certain Funds, as indicated in the Relevant Supplement including, without limitation:

- State Street Global Advisors Limited, a private limited company regulated by the Financial Conduct Authority;
- State Street Global Advisors Trust Company, a Massachusetts trust company;
- State Street Global Advisors Singapore Ltd, a Singapore limited liability company, regulated by the Monetary Authority of Singapore.

3.2.7. The Global Distributor and distributors

State Street Global Advisors Europe Limited[7] has also been appointed to act as the Global Distributor of the Company and to promote and market Shares. The Global Distributor is responsible for the marketing and distribution of the Shares in Luxembourg and other jurisdictions approved by the Board.

The Global Distributor is authorised to appoint other Distributors, sub-distributors and intermediaries and enter into other similar agreements relating to the distribution of Shares. The Global Distributor is authorised to appoint its group companies, including those set out in the "**Directory**" section of this Prospectus to carry out all or any of its duties and functions upon terms which are substantially similar to the terms of the distribution agreement.

3.2.8. Conflicts of interest

The Company is committed to maintaining and operating effective organizational and administrative arrangements to identify and manage any potential conflicts of interests. The Management Company adopted written procedures with respect to conflicts of interest. In formulating the conflicts of interest policy, the Management Company has taken into account the fact that it is a member of the State Street Corporation group. Once identified, potential conflicts are referred to the relevant governance body, as appropriate.

[6] State Street Global Advisors is now State Street Investment Management. Effective June 30, 2025, State Street Global Advisors began operating under the marketing name State Street Investment Management. This change does not affect the legal name or structure of the management company, the global distributor and the investment manager - State Street Global Advisors Europe Limited, the sub-investment managers – State Street Global Advisors Limited and State Street Global Advisors Trust Company or the management of the Company.

[7] State Street Global Advisors is now State Street Investment Management. Effective June 30, 2025, State Street Global Advisors began operating under the marketing name State Street Investment Management. This change does not affect the legal name or structure of the management company, the global distributor and the investment manager - State Street Global Advisors Europe Limited, the sub-investment managers – State Street Global Advisors Limited and State Street Global Advisors Trust Company or the management of the Company.

The Board, the Management Company, the Depositary, the UCI Administrator and other service providers of the Company, and/or their affiliates, members, employees or any person connected with them may be subject to various conflicts of interest in their relationships with the Company. In such event, each will at all times have regard to its obligations under any agreements to which it is party or by which it is bound in relation to the Company. In particular, when undertaking any dealings or investments where conflicts of interest may arise, each will respectively endeavour to ensure that such conflicts are resolved fairly. The risk warning headed "**Conflicts of Interest Risk**" in the "**Risk Information**" section of this Prospectus provide further details regarding the risks described above.

As further described in the Articles and in section "**The Directors**" of this Prospectus, any director of the Company who has, directly or indirectly, an interest in a transaction submitted to the approval of the Board which conflicts with the Company's interest, must inform the Board. The director may not take part in the discussions on and may not vote on the transaction.

The Management Company has adopted and implemented a conflicts of interest policy and has made appropriate organisational and administrative arrangements to identify and manage conflicts of interests so as to minimise the risk of the Company's interests being prejudiced, and if they cannot be avoided, ensure that the Company is treated fairly and that such conflicts are resolved fairly taking into account investors' interest.

3.3. General Meeting of Shareholders

The annual general meeting of Shareholders of the Company takes place in Luxembourg every year at 11.00 a.m. (CET) on the fourth Thursday of April or, if this date does not fall on a business day in Luxembourg, the next following business day in Luxembourg. Other extraordinary general meetings of Shareholders of the Company or meetings of individual Funds or their Classes may be held from time to time.

Notices to the annual general meeting and other meetings are issued in accordance with Luxembourg law. The notices contain information about the place and time of the general meeting, the requirements for attending the meeting, the agenda and, if necessary, the quorum requirements and majority requirements for resolutions.

The requirements as to quorum and majorities at all general meetings will be those set out in the Articles and in the 1915 Law. All Shareholders may attend general meetings in person or by appointing another person as his proxy in writing or by other communication mediums accepted by the Company.

3.4. Rights of Shareholders

Voting rights: Each Share entitles the Shareholder to one (1) vote at all general meetings of the Shareholders of the Company and at all meetings of the Fund or Class. Fractions of Shares do not entitle their holder to vote.

Right to receive a share of the profits: The Shares issued are entitled to participate in the net assets allocated to the relevant Fund or Class as of the Dealing Day on which they are purchased and up until the date on which they are redeemed.

Shareholder rights directly against the Company: The Company draws the Shareholders' attention to the fact that a Shareholder will only be able to exercise its rights directly against the Company, notably the right to participate in general shareholders' meetings, if such Shareholder is registered in his own name in the Shareholders' register. In cases where an investor invests in the Company through an intermediary who invests into the Company in its own name but on behalf of the Shareholder, it may not be possible for such investor to exercise certain Shareholder rights directly against the Company. Investors are advised to seek advice in relation to their rights.

Shareholder rights directly against the service providers: Generally, absent a direct contractual relationship between the Shareholders and the service providers mentioned in the "Management and Administration" section, Shareholders will have no direct rights against service providers and

there will only be limited circumstances in which a Shareholder can potentially bring a claim against a service provider. Instead, the proper claimant in an action in respect of which a wrongdoing is alleged to have been committed against the Company by a service provider is, prima facie, the Company itself. As an exception to this general principle, the Shareholders should be able to invoke claims relating to the liability of the Depositary directly provided that this does not lead to a duplication pf redress or to unequal treatment of Shareholders.

3.5. Financial year and statements

The Company's financial year ends on 31 December of each year. The Company will publish an annual report and audited annual accounts, which will be approved by the Board, within four (4) months of the end of the financial period to which they relate. Unaudited semi-annual reports will also be available no later than two (2) months after the end of the half year in question. Copies of these reports may be obtained, free of charge, from the national representatives and at the Company's registered office.

3.6. Liquidation

3.6.1. Termination and liquidation of Funds or Classes

The Board may, having notified the Shareholders concerned in writing, compulsorily redeem all, but not some, of the Shares of any Fund, and may decide to subsequently terminate and liquidate the Fund or keep it dormant, in the event that, for any reason, the Board determines that:

- the NAV of a Fund has decreased to, or has not reached, €100,000,000 or equivalent in the relevant Base Currency, the minimum level for that Fund to be managed and/or administered in an efficient manner; or
- changes in the economic or political circumstances would justify such liquidation.

The liquidation of a Fund associated with the compulsory redemption of all affected Shares for any other reason may only be carried out with the prior agreement of the Shareholders in the Fund to be liquidated at a meeting of Shareholders of the Fund in question, convened in accordance with the Articles. The notice will explain the reasons and the process of the termination and liquidation. Such resolution may be passed with no quorum requirement and with a simple majority of the Shares attending/represented and voting.

Generally, if a Fund is liquidated, all Shares redeemed will be cancelled. Redemption proceeds which have not been claimed by former Shareholders upon the compulsory redemption will be deposited in escrow at the *Caisse de Consignation* in Luxembourg in accordance with applicable laws and regulations. Proceeds not claimed within the statutory period will be forfeited in accordance with applicable laws and regulations.

The termination and liquidation of a Fund will have no influence on the existence of any other Fund. The termination and liquidation of the last Fund of the Company will result in the liquidation of the Company.

The Board may also, at its sole discretion and at any time, close a Class.

3.6.2. Dissolution and liquidation of the Company

The Company is incorporated for an unlimited period. However, it may be dissolved at any time by a resolution passed at a general meeting of Shareholders adopted in compliance with applicable laws.

If and when for any reason the capital of the Company falls below two-thirds of the minimum capital set out in the 2010 Law (*i.e.* €1,250,000), the Board is required to submit the question of liquidation of the Company to a general meeting of Shareholders within forty (40) days. The general meeting may resolve the question of liquidation with a simple majority of the Shareholders present/represented (no quorum is required).

If the capital of the Company falls below one-quarter of the minimum capital set out in the 2010 Law (*i.e.* €1,250,000), the Board of the Company is required to submit the question of liquidation of the Company to a general meeting of the Shareholders, which must be called within the same period. In this case, a

liquidation may be resolved by one-quarter of the votes of the Shareholders present/represented at the general meeting (no quorum is required).
The compulsory dissolution of the Company may be ordered by Luxembourg competent courts in circumstances provided by the 2010 Law and the 1915 Law.
As soon as a decision to dissolve the Company is taken, the issue, redemption or conversion of Shares in all Funds will be prohibited.
In the event of a dissolution of the Company, the liquidators appointed by the general meeting of Shareholders, in accordance with the CSSF, will realise the assets of the Company in the interests of the Shareholders and will subsequently distribute the net proceeds of liquidation (after deducting all liquidation expenses) among Shareholders of each Fund in proportion to their holding of Shares in such Fund. Liquidation proceeds which have not been claimed by Shareholders at the time of the closure of the liquidation will be deposited in escrow at the *Caisse de Consignation* in Luxembourg. Proceeds not claimed within the statutory period will be forfeited in accordance with applicable laws and regulations.
A liquidation of the Company will be carried out in accordance with the provisions of the 2010 Law and 1915 Law.

3.7. Merger of the Company, a Fund or a Class

The Board may decide to proceed with a merger of one or several Funds with one or several other Funds within the Company, or with one or several other Luxembourg or foreign UCITS or sub-funds thereof. In such event, notice of the merger will be given in writing to the Shareholders of the relevant Fund and each Shareholder shall be given the possibility, during a period of at least 30 days before the effective date of the merger (it being understood that the effective date of the merger normally takes place five business days after the expiry of such notice period), to request either the repurchase or switching of his Shares of the Fund, free of charge (other than the cost of disinvestment).
In accordance with the provisions of the 2010 Law and the Articles, a merger does not require the prior consent of Shareholders except where the Company is the absorbed entity, which thus ceases to exist as a result of the merger. In such case, the general meeting of Shareholders of the Company must decide on the merger (and its effective date) of the Company with another Luxembourg or foreign UCITS before a notary. No quorum is required and the decision shall be taken at a simple majority of the Shareholders present or represented and voting. The general meeting of Shareholders will decide by resolution taken with the same quorum and majority requirements as stipulated in the Articles for a change to the Articles. In any case, the merger will be subject to the conditions and procedures imposed by the 2010 Law, in particular concerning the common draft terms of the merger to be established by the Board and the information to be provided to Shareholders.
The Board may also decide, subject to at least 30 days' prior notice to the shareholders in the Class, merge such Class with another Class of the same or another Fund.

3.8. Applicable Law and Jurisdiction

The Company's application form (the "Application Form") shall be governed by and construed in accordance with the laws currently in force in Luxembourg. It contains a choice of international competence of the courts of Luxembourg.
There are no legal instruments in Luxembourg required for the recognition and enforcement of judgments rendered by a Luxembourg court. If a foreign, i.e. non-Luxembourg court, on the basis of mandatory domestic provisions, renders a judgment against the Company, the rules of the Regulation (EU) No 1215/2015 of the European Parliament and of the Council of 12 December 2012 on jurisdiction and the recognition and enforcement of judgments in civil and commercial matters (recast), (regarding judgments from EU Member States) or the rules of the Convention of Lugano of 30 October 2007 on jurisdiction and the

enforcement of judgments in civil and commercial matters or of the private international law of Luxembourg (regarding judgments from non-EU Member States) concerning the recognition and enforcement of foreign judgments apply. Investors are advised to seek advice, on a case-by-case basis, on the available rules concerning the recognition and enforcement of judgments.

3.9. Remuneration policy

The Management Company is subject to remuneration policies, procedures and practices (together, the "Remuneration Policy") which complies with the UCITS Directive. The Remuneration Policy is consistent with and promotes sound and effective risk management. It is designed not to encourage risk-taking which is inconsistent with the risk profile of the Funds. The Remuneration Policy is in line with the business strategy, objectives, values and interests of the Management Company, the Company and of the Shareholders. It includes measures to avoid conflicts of interest.

The Remuneration Policy applies to staff whose professional activities have a material impact on the risk profile of the Management Company or the Company and ensures that no individual will be involved in determining or approving their own remuneration.

The Remuneration Policy shall include an assessment of performance set in a multi-year framework appropriate to the holding period recommended to the Shareholders in order to ensure that the assessment process is based on the longer-term performance of the Funds and their investment risks and in order to ensure that the actual payment of performance-based components of remuneration is spread over the same period.

In accordance with Luxembourg law, the Remuneration Policy shall appropriately balance fixed and variable components of total remuneration, where the fixed component represents a portion of the total remuneration which is sufficiently high so that a highly flexible policy may be applied with regards to the variable remuneration, including the possibility that no variable component may be paid at all.

The Remuneration Policy will be reviewed annually. Details of the up-to-date Remuneration Policy are available on the Website. The Remuneration Policy will also be made available for inspection and may be obtained, free of charge, at the registered office of the Company.

The Management Company, with the consent of the Board, has delegated certain activities, in respect of the investment management and risk management of the Funds, to the Sub-Investment Managers. The global State Street remuneration policy applies to the Sub-Investment Managers' employees. Such remuneration policy is consistent with and promotes sounds and effective risk management and does not encourage risk taking that is inconsistent with the risk profile of the Funds managed by the Sub-Investment Managers.

Pursuant to article 5 of SFDR, the details of how the Remuneration Policy is consistent with the integration of sustainability risks can be found on the Website.

4. Risk Information

This section provides information regarding some of the general risks applicable to an investment in the Funds. Additional risk information specific to individual Funds is specified in the Relevant Supplement. This section is not intended to be a complete explanation and other risks may be relevant from time to time. In particular, the Company's and each Fund's performance may be affected by changes in market, economic and political conditions, and in legal, regulatory and tax requirements.

References to the Investment Manager in this section shall incorporate references to the Sub-Investment Manager as may be applicable to a particular Fund and disclosed in the Relevant Supplement.

Investors should be aware that an investment in a Fund is not in the nature of a deposit in a bank account and is not protected by any government, government agency or other guarantee scheme. Before making an investment decision with respect to an investment in any Fund, prospective investors should carefully consider all of the information set out in this Prospectus and the Relevant Supplement, as well as their own personal circumstances, and should consult their own stockbroker, bank manager, lawyer, accountant and/or financial adviser. An investment in the Shares of any Fund is only suitable for investors who (either alone or in conjunction with an appropriate financial or other adviser) are capable of evaluating the merits and risks of such an investment and who have sufficient resources to be able to bear any losses that may result therefrom.

The price of the Shares of a Fund can go down as well as up and their value is not guaranteed. Shareholders may not receive, at redemption or liquidation, the amount that they originally invested in a Fund or any amount at all.

Although the Company will do its utmost to achieve the investment objectives of each Fund, there can be no guarantee to which extent these objectives will be reached. Consequently, the NAV of the Shares may increase or decrease and positive or negative returns of different levels may arise.

Cash Position Risk: A Fund may hold a significant portion of its assets in cash or cash equivalents at the Investment Manager's discretion. If a Fund holds a significant cash position, its investment returns may be adversely affected, and such Fund may not achieve its investment objective.

Concentration Risk: An actively managed Fund may focus its investments in companies or issuers in a particular industry, market, or sector. When a Fund focuses its investments in a particular industry market or sector, any financial, economic, business or other developments affecting issuers in that industry, market, or sector will have a greater effect on the Fund than if it had not focused its assets in that industry, market, or sector, which may, in turn, increase the volatility of the Fund. Any such investment focus may also limit the liquidity of a Fund. In addition, investors may buy or sell substantial amounts of a Fund's Shares in response to factors affecting or expected to affect an industry, market, or sector in which the Fund focuses its investments, resulting in extreme inflows or outflows of cash into or out of the Fund. Such extreme cash inflows or outflows might affect management of the Fund adversely.

An index-tracking Fund's assets will generally be concentrated in an industry or group of industries or sector to the extent that such Fund's underlying specified index concentrates in a particular industry or group of industries or sector. When a Fund focuses its investments in a particular industry or sector, any financial, economic, business or other developments affecting issuers in that industry, market, or sector will have a greater effect on the Fund than if it had not focused its assets in that industry, market, or sector, which may, in turn,

increase the volatility of the Fund. Any such investment focus may also limit the liquidity of the Fund. In addition, investors may buy or sell substantial amounts of the Fund's shares in response to factors affecting or expected to affect an industry, market, or sector in which the Fund focuses its investments, resulting in extreme inflows or outflows of cash into or out of the Fund. Such extreme cash inflows or outflows might affect management of the Fund adversely.

Conflicts of Interest Risk*:* An investment in a Fund may be subject to a number of actual or potential conflicts of interest. Subject to applicable law, a Fund may engage in transactions that may trigger or result in a potential conflict of interest. For example: The Investment Manager or its affiliates may provide services to the Fund, such as securities lending agency services, depositary, custodial, administrative, bookkeeping, and accounting services, transfer agency, and shareholder servicing, and other services for which the Fund would compensate the Investment Manager and/or such affiliates.

A Fund may enter into securities transactions with the Investment Manager or an affiliate of the Investment Manager where the Investment Manager or an affiliate acts as agent for a Fund in connection with the purchase or sale of securities, or as principal, where the Investment Manager or an affiliate sells securities to a Fund or buys securities from a Fund for its own account.

The Investment Manager on behalf of the Fund may enter into repurchase agreements and derivatives transactions with or through Investment Manager or one of its affiliates. A Fund may invest in other pooled investment vehicles sponsored, managed, or otherwise affiliated with the Investment Manager in which event the Fund may not be charged subscription or redemption fees on account of such investment but will bear a share of the expenses of those other pooled investment vehicles. Those investment vehicles may pay fees and other amounts to the Investment Manager or its affiliates, which might have the effect of increasing the expenses of the Fund. It is possible that other clients of the Investment Manager will purchase or sell interests in such other pooled investments at prices and at times more favourable than those at which the Fund does so.

There is no assurance that the rates at which a Fund pays fees or expenses to the Investment Manager or its affiliates, or the terms on which a Fund enters into transactions with the Investment Manager or its affiliates or on which a Fund invests in any investment vehicles sponsored, managed, or otherwise affiliated with the Investment Manager will be the most favourable available in the market generally or as favourable as the rates the Investment Manager makes available to other clients. There will be no independent oversight of prices, fees or expenses paid to, or services provided by, the Investment Manager or its affiliates. Because of its financial interest, the Investment Manager may have an incentive to enter into transactions or arrangements on behalf of a Fund with itself or its affiliates in circumstances where it might not have done so in the absence of that interest. Transactions and services with or through the Investment Manager or its affiliates will, however, be effected in accordance with the applicable regulatory requirements.

The Investment Manager and its affiliates serve as investment manager to other clients and may make investment decisions for their own accounts and for the accounts of others that may be different from those that will be made by the Investment Manager on behalf of a Fund. For example, the Investment Manager may provide asset allocation advice to some clients that may include a recommendation to invest in or redeem from a particular issuer while not providing that same recommendation to all clients invested in the same or similar issuers.

Other conflicts may arise, for example, when clients of the Investment Manager invest in different parts of an issuer's capital structure, so that one or more clients own senior debt obligations of an issuer and other clients own junior debt of the same issuer, as well as circumstances in which clients invest in different tranches of the same structured financing vehicle. In such circumstances, decisions over whether to trigger an event of

default or over the terms of any workout may result in conflicts of interest. When making investment decisions where a conflict of interest may arise, the Investment Manager will endeavour to act in a fair and equitable manner, in accordance with its conflicts of interest policy, as between the relevant Fund and other clients. Subject to the foregoing, (i) the Investment Manager and its affiliates may invest for their own accounts and for the accounts of clients in various securities that are senior*, pari passu* or junior to, or have interests different from or adverse to, the securities that are owned by a Fund; and (ii) subject to applicable law, the Investment Manager may, at certain times, simultaneously seek to purchase (or sell) investments for a Fund and to sell (or purchase) the same investment for accounts, funds or structured products for which it serves as investment manager now or in the future, or for other clients or affiliates and may enter into cross trades in such circumstances.

In addition, the Investment Manager and its affiliates may buy securities from or sell securities to a Fund, if permitted by applicable law. These other relationships may also result in securities laws restrictions on transactions in these instruments by a Fund and otherwise create potential conflicts of interest for the Investment Manager.

The Investment Manager, in connection with its other business activities, may acquire material non-public confidential information that may restrict the Investment Manager from purchasing securities or selling securities for itself or its clients (including a Fund) or otherwise using such information for the benefit of its clients or itself.

There is no prohibition on dealing in assets of a Fund by the Depositary or Investment Manager, or by any entities related to such parties, provided that such transactions are carried out as if effected on normal commercial terms negotiated at arms' length and are in the best interest of Shareholders. Permitted transactions between a Fund and such parties are subject to (i) a certified valuation by a person approved by the Depositary (or the Directors in the case of a transaction involving the Depositary) as independent and competent; or (ii) execution on best terms on organised investment exchanges under their rules; or (iii) where (i) and (ii) are not practical, execution on terms the Depositary (or the Directors in the case of a transaction involving the Depositary) is satisfied conform to the principles set out above.

There is no prohibition on the Depositary, the UCI Administrator, the Investment Manager or any other party related to a Fund acting as a "competent person" for the purposes of determining the probable realisation value of an asset of the Fund in accordance with the valuation provisions outlined in "**Valuation and Calculation of the NAV**" section of this Prospectus. Investors should note however, that in circumstances where fees payable by a Fund to such parties are calculated based on the NAV, a conflict of interest may arise as such fees will increase if the NAV increases. Any such party will endeavour to ensure that such conflicts are resolved fairly and in the best interest of the Shareholders.

The Investment Manager is required to provide best execution when executing orders or transmitting orders on behalf of the Fund. The Investment Manager will take all sufficient steps to obtain, when executing orders or transmitting orders on the Fund's behalf, the best possible result for the Fund, taking into account price, costs, speed, likelihood of execution and settlement, size, nature or any other consideration relevant to execution of the order. When executing or transmitting orders on behalf of the Fund, the Investment Manager will take into account any specific instruction from the Board or its duly authorised delegate regarding execution of the order.

A Director may be a party to, or otherwise interested in, any transaction or arrangement with a Fund or in which a Fund is interested, provided that he has disclosed to the other Directors prior to the conclusion of any such transaction or arrangement the nature and extent of any material interest of his therein. The Directors shall endeavour to ensure that any conflict of interest is resolved fairly.

The foregoing does not purport to be a comprehensive list or complete explanation of

all potential conflicts of interests which may affect a Fund. A Fund may encounter circumstances, or enter into transactions, in which conflicts of interest that are not listed or discussed above may arise.

Costs of Buying or Selling ETF Shares Risk. Investors buying or selling ETF Shares in the Secondary Market will pay brokerage commissions or other charges determined and imposed by the applicable broker. Brokerage commissions are often a fixed amount and may be a significant proportional cost for investors seeking to buy or sell relatively small amounts of ETF Shares. In addition, Secondary Market investors will incur the cost of the difference between the price that an investor is willing to pay for ETF Shares (the **"bid"** price) and the price at which an investor is willing to sell ETF Shares (the **"ask"** price). This difference in bid and ask prices is often referred to as the "spread" or "bid/ask spread." The bid/ask spread varies over time for ETF Shares based on trading volume and market liquidity, and is generally lower if a Fund's ETF Shares have more trading volume and market liquidity and higher if a Fund's ETF Shares have little trading volume and market liquidity. Further, increased market volatility may cause increased bid/ask spreads. Due to the costs of buying or selling ETF Shares, including bid/ask spreads, frequent trading of ETF Shares may significantly reduce investment results and an investment in ETF Shares may not be advisable for investors who wish to trade regularly in relatively small amounts.

Counterparty Risk*:* Each Fund will be subject to credit risk with respect to the counterparties with which such Fund enters into derivatives contracts foreign exchange, currency forward contracts and other transactions such as repurchase agreements. A Fund's ability to profit from these types of investments and transactions will depend on the willingness and ability of its counterparty to perform its obligations. If a counterparty fails to meet its contractual obligations, the relevant Fund(s) may be unable to terminate or realize any gain on the investment or transaction, or to recover collateral posted to a counterparty, resulting in a loss to such Fund(s). A Fund may experience significant delays and expenses in obtaining any recovery in an insolvency, bankruptcy, or other reorganization proceeding involving its counterparty (including recovery of any collateral posted by it) and may obtain only a limited recovery or may obtain no recovery in such circumstances. If a Fund holds collateral posted by its counterparty, it may be delayed or prevented from realizing on the collateral in the event of a bankruptcy or insolvency proceeding relating to the counterparty. Contractual provisions and applicable law may prevent or delay a Fund from exercising its rights to terminate an investment or transaction with a financial institution experiencing financial difficulties or to realize on collateral and another institution may be substituted for that financial institution without the consent of the impacted Fund(s). If the credit rating of a derivatives counterparty declines, an impacted Fund may nonetheless choose or be required to keep existing transactions in place with the counterparty, in which event such Fund would be subject to any increased credit risk associated with those transactions.

Under applicable law or contractual provisions, including if a Fund enters into an investment or transaction with a financial institution and such financial institution (or an affiliate of the financial institution) experiences financial difficulties, the Fund may in certain situations be prevented or delayed from exercising its rights to terminate the investment or transaction, or to realize on any collateral and may result in the suspension of payment and delivery obligations of the parties under such investment or transactions or in another institution being substituted for that financial institution without the consent of the Fund. Further, the Fund may be subject to "bail-in" risk under applicable law whereby, if required by the financial institution's authority, the financial institution's liabilities could be written down, eliminated or converted into equity or an alternative instrument of ownership. A bail-in of a financial institution may result in a reduction in value of some or all of its securities and a Fund that holds such securities or has entered into a transaction with such a financial security when a bail-in occurs may also be similarly impacted.

OTC derivatives have similar risks as described above and may also be subject to the risk that a contract will be cancelled, for example due to bankruptcy, subsequent illegality or a change in the tax or accounting regulations since the conclusion of the OTC derivative contract.

Currency Hedging Risk: The Company may offer Portfolio Hedged Classes in a Fund which seek to reduce the impact of exchange rate fluctuations between the Class currency of the Portfolio Hedged Class and the currency in which Fund's underlying assets are denominated and NAV Hedged Classes in a Fund which seek to reduce the impact of exchange rate fluctuations between the Class currency of the NAV Hedged Class and the Base Currency of the Fund. When a derivative is used as a hedge against a position that a Fund holds, any gain generated by the derivative generally should be substantially offset by losses on the hedged investment, and vice versa. While hedging can reduce or eliminate losses, it can also reduce or eliminate gains. Hedges are sometimes subject to imperfect matching between a derivative and its reference asset. While a Fund is designed to hedge against currency fluctuations, it is possible that a degree of currency exposure may remain even at the time a hedging transaction is implemented. As a result, the Fund may not be able to structure its hedging transactions as anticipated or its hedging transactions may not successfully reduce the currency risk included in the Fund's portfolio. The effectiveness of the Fund's currency hedging strategy will also generally be affected by the volatility of both the securities included in the portfolio, and the volatility of the base currency of the Fund relative to the currencies to be hedged. Increased volatility may reduce the effectiveness of the Fund's currency hedging strategy and may impact the costs associated with hedging transactions. The effectiveness of the Fund's currency hedging strategy and the costs associated with hedging transactions may also in general be affected by interest rates. There can be no assurance that the Fund's hedging transactions will be effective. Significant differences between a Fund's base currency interest rates and foreign currency interest rates may further impact the effectiveness of the Fund's currency hedging strategy. The Fund will bear the costs associated with any such hedging transaction, regardless of any gain or loss experienced on the hedging transaction.

Where Classes denominated in different currencies are created within a Fund and currency hedging transactions are entered into to hedge any relevant currency exposure, each such transaction will be clearly attributable to the specific Class and any costs shall be for the account of that Class only. It is intended that all gains/losses and expenses arising from such hedging transactions will be borne separately by the Shareholders of the respective Hedged Classes and accordingly, all such gains/losses and expenses will be reflected in the NAV per Share of the applicable Hedged Class; however, as there is no segregation of liabilities between Classes of a Fund, there is a risk that, under certain circumstances, currency hedging transactions in relation to Hedged Classes of a Fund could ultimately result in liabilities which might affect the Fund as a whole.

As there is no segregation of liabilities between Classes of a Fund, there is a risk that, under certain limited circumstances, the liabilities of a particular Class might affect the NAV of other Classes. In particular, while the Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy used for the benefit of particular Hedged Class will accrue solely to this class and will not be combined with or offset with that of any other Class, there can be no guarantee that the Investment Manager will be successful in this. In addition, over-hedged or under-hedged positions may arise unintentionally due to factors outside the control of the Investment Manager but the Investment Manager will ensure that over-hedged positions do not exceed 105% of the NAV of the relevant Hedged Class and under-hedged positions shall not fall short of 95% of the portion of the NAV of the relevant Hedged Class. The Investment Manager will monitor hedging and such monitoring will incorporate a procedure to ensure that positions materially in excess of or below 100% will not be carried forward from month to month. For Portfolio Hedged Classes, to the extent that hedging is successful, the performance of the relevant Portfolio Hedged

Class is likely to move in line with the performance of the underlying assets. The use of currency hedging may substantially limit holders of the Portfolio Hedged Class from benefiting if the Share currency falls against the Base Currency and/or the currency in which the assets of the Fund are dominated.

There can be no guarantee that the Investment Manager will be successful in such hedging activities and unsuccessful hedging activities may have a material impact on Shareholder's returns. Recent regulatory changes in a number of jurisdictions require that certain currency transactions be subject to collateral requirements. These changes could increase the costs to a Fund of entering into currency transactions.

Currency Risk*:* Investments in issuers in different countries are often denominated in currencies different from a Fund's Base Currency. Changes in the values of those currencies relative to a Fund's Base Currency may have a positive or negative effect on the values of a Fund's investments denominated in those currencies. The values of other currencies relative to a Fund's Base Currency may fluctuate in response to, among other factors, interest rate changes, intervention (or failure to intervene) by national governments, central banks, or supranational entities such as the International Monetary Fund, the imposition of currency or capital controls, and other political or regulatory developments. Currency values can decrease significantly both in the short term and over the long term in response to these and other developments.

Cybersecurity Risk*:* With the increased use of technologies such as the Internet and the dependence on computer systems to perform business and operational functions, funds (such as the Company) and its service providers (including the Investment Manager) may be prone to operational and information security risks resulting from cyber-attacks and/or technological malfunctions. In general, cyber-attacks are deliberate, but unintentional events may have similar effects. Cyber-attacks include, among others, stealing or corrupting data maintained online or digitally, preventing legitimate users from accessing information or services on a website, releasing confidential information without authorization, and causing operational disruption. Successful cyber-attacks against, or security breakdowns of, the Company, the Investment Manager or the Depositary, a sub-custodian, UCI Administrator, or other affiliated or third-party service providers may adversely affect the Company or its Shareholders. For instance, cyber-attacks or technical malfunctions may interfere with the processing of Shareholders' or other transactions, affect a Fund's ability to calculate its NAV, cause the release of private Shareholder information or confidential Company and/or Fund information, impede trading, cause reputational damage, and subject the Company to regulatory fines, penalties or financial losses, reimbursement or other compensation costs, and additional compliance costs. Cyber-attacks or technical malfunctions may render records of Company assets and transactions, Shareholder ownership of Company Shares, and other data integral to the functioning of the Company and each Fund inaccessible or inaccurate or incomplete. The Company may also incur substantial costs for cybersecurity risk management in order to prevent cyber incidents in the future. The Company and its shareholders could be negatively impacted as a result. While the Investment Manager, Depositary and UCI Administrator have established business continuity plans and systems designed to minimise the risk of cyber-attacks through the use of technology, processes and controls, there are inherent limitations in such plans and systems, including the possibility that certain risks have not been identified given the evolving nature of this threat. The Company relies on third-party service providers for many of its day-to-day operations, and will be subject to the risk that the protections and protocols implemented by those service providers will be ineffective to protect the Company from cyber-attack. Similar types of cybersecurity risks or technical malfunctions also are present for issuers of securities in which a Fund invests, which could result in material adverse consequences for such issuers, and may cause the Fund's investment in such securities to lose value.

Depositary and Custodial Risk: There are risks involved in dealing with the Depositary, sub-custodians or brokers who hold a Fund's investments or settle a Fund's trades. The Depositary will hold assets in compliance with applicable laws (including but not limited to the UCITS Directive and Commission Delegated Regulations) and such specific provisions as agreed in the depositary agreement. Such requirements are designed to safe keep the assets and provide certain protections against losses including losses from the insolvency of the Depositary or any-sub-custodian but there is no guarantee they will successfully do so.

In certain circumstances, it is possible that, in the event of the insolvency or bankruptcy of a sub-custodian or broker, the Fund would be delayed or prevented from recovering its assets from the sub-custodian or broker, or its estate, and may have only a general unsecured claim against the sub-custodian or broker for those assets.

Depositary Receipts Risk: A Fund may invest in American Depositary Receipts ("ADRs"), Global Depositary Receipts ("GDRs") and European Depositary Receipts ("EDRs"). ADRs are typically trust receipts issued by a U.S. bank or trust company that evidence an indirect interest in underlying securities issued by a foreign entity. GDRs, EDRs, and other types of depositary receipts are typically issued by international banks or financial institutions to evidence an interest in underlying securities issued by either a U.S. or a non-U.S. entity. Investments in depositary receipts may be less liquid and more volatile than the underlying securities in their primary trading market. If a depositary receipt is denominated in a different currency than its underlying securities, an investing Fund will be subject to the currency risk of both the investment in the depositary receipt and the underlying security. There may be less publicly available information regarding the issuer of the securities underlying a depositary receipt than if those securities were traded directly. Depositary receipts may or may not be sponsored by the issuers of the underlying securities, and information regarding issuers of securities underlying unsponsored depositary receipts may be more limited than for sponsored depositary receipts. The values of depository receipts may decline for a number of reasons relating to the issuers or sponsors of the depository receipts, including, but not limited to, insolvency of the issuer or sponsor. Holders of depositary receipts may have limited or no rights to take action with respect to the underlying securities or to compel the issuer of the receipts to take action.

Debt Securities Risk*:* The values of debt securities may increase or decrease as a result of the following: market fluctuations, increases in interest rates, actual or perceived inability or unwillingness of issuers, guarantors or liquidity providers to make scheduled principal or interest payments or illiquidity in debt securities markets; the risk of low rates of return due to reinvestment of securities during periods of falling interest rates or repayment by issuers with higher coupon or interest rates; and/or the risk of low income due to falling interest rates. To the extent that interest rates rise, certain underlying obligations may be paid off substantially slower than originally anticipated and the value of those securities may fall sharply. A rising interest rate environment may cause the value of a Fund's fixed income securities to decrease, a decline in the Fund's income and yield, an adverse impact on the liquidity of the Fund's fixed income securities, and increased volatility of the fixed income markets. If the principal on a debt obligation is prepaid before expected, the prepayments of principal may have to be reinvested in obligations paying interest at lower rates. During periods of falling interest rates, the income received by a Fund may decline. Changes in interest rates will likely have a greater effect on the values of debt securities of longer durations. Returns on investments in debt securities could trail the returns on other investment options, including investments in equity securities.

- **Credit Risk*:*** Credit risk is the risk that an issuer, guarantor or liquidity provider of a fixed-income security held by a Fund may be unable or unwilling, or may be perceived (whether by market participants, ratings agencies, pricing services or otherwise) as unable or unwilling, to make timely principal and/or interest payments, or

to otherwise honour its obligations. It includes the risk that the security will be downgraded by a credit rating agency; generally, lower credit quality issuers present higher credit risks. An actual or perceived decline in creditworthiness of an issuer of a fixed-income security held by a Fund may result in a decrease in the value of the security. It is possible that the ability of an issuer to meet its obligations will decline substantially during the period when the Fund owns securities of the issuer or that the issuer will default on its obligations or that the obligations of the issuer will be limited or restructured.

The credit rating assigned to any particular investment does not necessarily reflect the issuer's current financial condition and does not reflect an assessment of an investment's volatility or liquidity.

Securities rated in the lowest category of investment grade and securities rated below investment-grade and unrated securities of comparable credit quality (commonly known as "high-yield bonds" or "junk bonds") typically lack outstanding investment characteristics and have speculative characteristics and are subject to greater credit and market risks than higher-rated securities. The lower ratings of junk bonds reflect a greater possibility that adverse changes in the financial condition of the issuer or in general economic conditions, or an unanticipated rise in interest rates, may impair the ability of the issuer to make payments of interest and principal. If this were to occur, the values of such securities held by a Fund may become more volatile and the Fund could lose some or all of its investment. Investment-grade investments generally have lower credit risk than investments rated in below investment grade, however such investments may share some of the risks of lower-rated investments, including the possibility that the issuers may be unable to make timely payments of interest and principal and thus default. Consequently, there can be no assurance that investment grade securities will not be subject to credit difficulties leading to the loss of some or all of the sums invested in such securities.

If a security held by a Fund loses its rating or its rating is downgraded, the Fund may nonetheless continue to hold the security in the discretion of the Investment Manager.

In the case of asset-backed or mortgage-related securities, changes in the actual or perceived ability of the obligors on the underlying assets or mortgages to make payments of interest and/or principal may affect the values of those securities.

A Fund will be subject also to credit risk with respect to the counterparties with which a Fund enters into derivatives contracts and other transactions.

- **Extension Risk:** During periods of rising interest rates, the average life of certain types of securities may be extended because of slower-than-expected principal payments. This may increase the period of time during which an investment earns a below-market interest rate, increase the security's duration and reduce the value of the security. Extension risk may be heightened during periods of adverse economic conditions generally, as payment rates decline due to higher unemployment levels and other factors.

- **Income Risk:** A Fund's income may decline due to falling interest rates or other factors. Issuers of securities held by a Fund may call or redeem the securities during periods of falling interest rates, and such Fund would likely be required to reinvest in securities paying lower interest rates. If an obligation held by the Fund is

prepaid, the Fund may have to reinvest the prepayment in other obligations paying income at lower rates. A reduction in the income earned by the Fund may limit the Fund's ability to achieve its investment objective.

- **Interest Rate Risk:** Interest rate risk is the risk that the securities held by a Fund will decline in value because of increases in market interest rates. Debt securities with longer durations tend to be more sensitive to changes in interest rates, usually making them more volatile than debt securities with shorter durations. Falling interest rates also create the potential for a decline in a Fund's income and yield. Interest-only and principal-only securities are especially sensitive to interest rate changes, which can affect not only their prices but can also change the income flows and repayment assumptions about those investments. Variable and floating rate securities also generally increase or decrease in value in response to changes in interest rates, although generally to a lesser degree than fixed-rate securities. A substantial increase in interest rates may also have an adverse impact on the liquidity of a security, especially those with longer durations. Changes in governmental policy, including changes in central bank monetary policy, could cause interest rates to rise rapidly, or cause investors to expect a rapid rise in interest rates. This could lead to heightened levels of interest rate, volatility and liquidity risks for the fixed income markets generally and could have a substantial and immediate effect on the values of the a Fund's investments.

- **Below Investment Grade Securities Risk:** Securities rated below investment-grade and unrated securities of comparable credit quality (commonly known as "high-yield bonds" or "junk bonds") lack strong investment characteristics, are considered predominantly speculative with respect to the issuer's continuing ability to make principal and interest payments, and are subject to greater levels of credit, liquidity and market risk than higher-rated securities. Such securities can involve a substantially greater risk of default than higher-rated securities, and their values can decline significantly over short periods of time and some of a Fund's investments in such securities may be in default. The lower ratings of high-yield bonds/junk bonds reflect a greater possibility that actual or perceived adverse changes in the financial condition of the issuer or in general economic conditions, or an unanticipated rise in interest rates, may impair the ability of the issuer to make payments of interest and principal. If this were to occur, the values of such securities held by a Fund may fall substantially and the Fund could lose some or all of the value of its investment. Lower-quality debt securities tend to be more sensitive to adverse news about the issuer, or the market or economy in general, than higher quality debt securities. The market for lower quality debt securities can be less liquid than for higher quality debt securities, especially during periods of recession or general market decline, which could make it difficult at times for the Fund to sell certain securities at prices used in calculating the Fund's NAV. These securities may have significant volatility.

- **Call/Prepayment Risk:** Call/prepayment risk is the risk that an issuer will exercise its right to pay principal on an obligation held by a Fund earlier than expected or required. This may occur, for example, when there is a decline in interest rates, and an issuer of bonds or preferred stock redeems the bonds or stocks in order to replace them with obligations on which it is required to pay a lower interest or dividend rate. It may also occur when there is an unanticipated increase in the rate at which mortgages or other receivables underlying

mortgage- or asset-backed securities held by a Fund are prepaid. In any such case, a Fund may be forced to invest the prepaid amounts in lower-yielding investments, resulting in a decline in the Fund's income.

- **Variable and Floating Rate Securities:** Variable or floating rate securities are debt securities with variable or floating interest rates payments. Variable or floating rate securities bear rates of interest that are adjusted periodically according to formulae intended generally to reflect market rates of interest and allow the Fund to participate (determined in accordance with the terms of the securities) in increases in interest rates through upward adjustments of the coupon rates on the securities. However, during periods of increasing interest rates, changes in the coupon rates may lag behind the changes in market rates or may have limits on the maximum increases in coupon rates. Alternatively, during periods of declining interest rates, the coupon rates on such securities will typically readjust downward resulting in a lower yield.

  If indicated in the Relevant Supplement, the Fund may also invest in variable or floating rate equity securities, whose dividend payments vary based on changes in market rates of interest or other factors.

Derivatives Risk: A Fund may use derivative instruments for both efficient portfolio management and for investment purposes. Each Fund's Relevant Supplement will indicate if and how the Fund intends to use derivative instruments. A Fund's use of derivative instruments involves risks different from, and possibly greater than, the risks associated with investing directly in securities.

A derivative is a financial contract the value of which depends on, or is derived from, the value of an underlying asset, interest rate, or index. Derivative transactions typically involve leverage and may have significant volatility. It is possible that a derivative transaction will result in a loss greater than the principal amount invested, and a Fund may not be able to close out a derivative transaction at a favourable time or price. Risks associated with derivative instruments include potential changes in value in response to interest rate changes or other market developments or as a result of the counterparty's credit quality; the potential for the derivative transaction not to have the effect the Investment Manager anticipated or a different or less favourable effect than the Investment Manager anticipated; the failure of the counterparty to the derivative transaction to perform its obligations under the transaction or to settle a trade; possible mispricing or improper valuation of the derivative instrument; imperfect correlation in the value of a derivative with the asset, currency, rate, or index underlying the derivative; the risk that the Fund may be required to post collateral or margin with its counterparty, and will not be able to recover the collateral or margin in the event of the counterparty's insolvency or bankruptcy; the risk that a Fund will experience losses on its derivatives investments and on its other portfolio investments, even when the derivatives investments may be intended in part or entirely to hedge those portfolio investments; the risks specific to the asset underlying the derivative instrument; lack of liquidity for the derivative instrument, including without limitation absence of a secondary trading market; the potential for reduced returns to the Fund due to losses on the transaction and an increase in volatility; the potential for the derivative transaction to have the effect of accelerating the recognition of gain; and legal risks arising from the documentation relating to the derivative transaction.

Directed Trading Risk. Investors transacting on the Primary Market only may request the execution of a transaction, including, without limitation, the sale or purchase of securities on their behalf, in accordance with specific terms, which may include, without limitation, the use of a particular broker, counterparty or market or in any way other than in accordance with the standard terms on which the Investment Manager executes transactions for the Company generally, having regard to its

obligation to provide best execution to the Company. Where such a request is agreed to, neither the Company nor its agents, including, for the avoidance of doubt, the Investment Manager, shall be liable for any loss, damage or delay, including any delay in effecting or failure to effect a subscription or redemption, caused by any omission, error, failed or delayed trade or settlement on the part of the investor or the designated broker or other counterparty. Should the investor or the designated broker or other counterparty default on, or otherwise fail to complete, any part of the relevant transaction, the investor shall bear all associated risks and costs and the Company shall have the right to amend the terms of the transaction (including the choice of broker) and the investor's subscription or redemption, to take into account such default and/or failure and in order to complete the transaction.

EMIR and OTC derivatives contract risk: As a result of the European regulation commonly referred to as the European Market Infrastructure Regulation or "EMIR", OTC derivatives markets have been and will be subject to significant regulation, potentially including, without limitation, increased margin requirements, mandatory reporting, centralised clearing and execution of transactions. These regulations may result in increased costs, reduced profit margins and reduced investment opportunities, all of which may negatively impact the performance of the Funds.

EMIR imposes certain requirements to collateralise derivative transactions that are not cleared through a clearing house or traded on an exchange, including FX forward transactions. As a result, collateral may need to be exchanged between a Fund and trading counterparties to cover daily mark-to-market exposures of either party under an FX forward transaction. This may necessitate the amendment of the Company's existing OTC derivative contracts which would result in additional costs. The variation margin rules will also require certain haircuts to be applied to collateral received for OTC derivative contracts, which will vary depending on the issuer, credit rating, currency and residual maturity of the collateral. As the variation margin rules are likely to result in an increase in the level of its assets which a Fund will be required to retain in cash or very liquid assets in order to have available for use as collateral, this could result in a reduced proportion of the Fund's assets being available for allocation to the Fund's investment policy and, consequently, an increase in the potential tracking error for the Fund.

While some of the obligations under EMIR have come into force, a number of the requirements are subject to phase-in periods. As a consequence, it is as yet unclear how the derivatives markets will adapt to the new regulatory regime. Accordingly, it is difficult to predict the full impact of EMIR on the Company, although this may include an increase in the overall costs of entering into and maintaining OTC derivative contracts.

Emerging Markets Risks: Investments in emerging markets are generally subject to a greater risk of loss than investments in developed markets. This may be due to, among other things, the possibility of greater market volatility, lower trading volume and liquidity, greater risk of expropriation, nationalisation, and social, political and economic instability, greater reliance on a few industries, international trade or revenue from particular commodities, less developed accounting, legal and regulatory systems, higher levels of inflation, deflation or currency devaluation, risk that the country will limit or prevent the conversion or repatriation of amounts denominated in that country's currency, risk that it may not be possible to undertake currency hedging techniques, greater risk of market shut down, and more significant governmental limitations on investment policy as compared to those typically found in a developed market.

In addition, issuers (including governments) in emerging market countries may have less financial stability than in other countries. The securities of emerging market companies may trade less frequently and in smaller volumes than more widely held securities and may have significant price volatility and thus the accumulation and disposal of holdings may be more expensive, time-consuming and generally more difficult than in more developed markets.

Further, given the lack of an adequate regulatory structure, it is possible that securities in which investments are made may be found to be fraudulent.

Market disruptions or substantial market corrections may limit very significantly the liquidity of securities of certain companies in a particular country or geographic region, or of all companies in the country or region. In some cases, emerging markets may restrict the access of foreign investors to securities. As a result, certain equity securities may not always be available to a Fund because, for example, the maximum permitted number of or aggregate investment by foreign shareholders has been reached. In addition, the outward remittance by foreign investors of their share of net profits, capital and dividends may be restricted or require governmental approval. A Fund may be unable to liquidate its positions in such securities at any time, or at a favourable price, in order to meet the Fund's obligations. There is also the potential for unfavourable actions such as embargo and acts of war. As a result, there will tend to be an increased risk of price volatility in investments in emerging market countries, which may be magnified by currency fluctuations relative to a Fund's Base Currency.

Settlement and asset custody practices for transactions in emerging markets may differ and may be less developed than those in developed markets. Standards may not be as high and supervisory and regulatory authorities not as sophisticated. Such differences may include possible delays in settlement and certain settlement practices, such as delivery of securities prior to receipt of payment, which increase the likelihood of a "failed settlement". Failed settlements can result in losses. Custodial services are often more expensive and other investment-related costs higher in emerging countries than in developed countries.

For these and other reasons, investments in emerging markets are often considered speculative and losses may be incurred.

Equity Investing Risk: The market prices of equity securities owned by a Fund may go up or down, sometimes rapidly or unpredictably. The value of a security may decline for a number of reasons that may directly relate to the issuer, such as management performance, financial leverage, non-compliance with regulatory requirements and reduced demand for the issuer's goods or services. The values of equity securities also may decline due to general industry or market conditions that are not specifically related to a particular company, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates or adverse investor sentiment generally. In addition, equity markets tend to move in cycles, which may cause stock prices to fall over short or extended periods of time. A Fund may continue to accept new subscriptions and to make additional investments in equity securities even under general market conditions that the Investment Manager views as unfavourable for equity securities.

ETF Liquidity Risk. Any decrease in the liquidity of the investments of a Fund may, for a period, affect a Fund's own liquidity. As a result the relevant Fund may trade less frequently on exchanges and its price may be more variable. This may in turn impact the ease and price at which an investor is able to buy or sell the Fund's Shares in the Primary or Secondary Market.

Whilst it is anticipated that the investments made by a Fund will enable it to satisfy redemption requests, in exceptional circumstances, where the sales of certain securities are not possible or would materially harm existing Shareholders, the Directors of the Fund may impose restrictions on the size and/or timing of redemptions, as described in the **"Determination of Net Asset Value – Temporary Suspension of Dealings"** section.

Failure to Settle – ETF Shares. If an Authorised Participant submits a dealing request and subsequently fails or is unable to settle and complete the dealing request, as the Authorised Participant is not a registered Shareholder of the Company, the Company will have no recourse to the Authorised Participant other than its contractual right to recover such costs. In the event that no recovery can be made from the Authorised Participant and any

costs incurred as a result of the failure to settle will be borne by the Fund and its investors.

Fluctuation of Net Asset Value and Market Pricing Risk. The Net Asset Value per Share will generally fluctuate with changes in the market value of a Fund's securities holdings. The market prices of Shares will generally fluctuate in accordance with changes in a Fund's Net Asset Value and supply and demand of ETF Shares on the Listing Stock Exchange. It cannot be predicted whether ETF Shares will trade below, at or above the Net Asset Value per Share. Price differences may be due, in large part, to the fact that supply and demand forces at work in the secondary trading market for ETF Shares will be closely related to, but not identical to, the same forces influencing the prices of the securities of an Index trading individually or in the aggregate at any point in time. The market prices of ETF Shares may deviate significantly from the Net Asset Value per Share during periods of market volatility. However, given that ETF Shares can be created and redeemed in large volumes, large discounts or premiums to the Net Asset Value per Share should not be sustained. While the creation/redemption feature is designed to help make it likely that ETF Shares normally will trade close to the Net Asset Value per Share, disruptions or suspensions to creations and redemptions may result in trading prices that differ significantly from the Net Asset Value per Share. Losses may be incurred, or profits reduced, if ETF Shares are purchased at a time when the market price is at a premium to the Net Asset Value per Share or sold at a time when the market price is at a discount to the Net Asset Value per Share.

Foreign Exchange Risk. The Company on behalf of a Fund may enter into a variety of different foreign currency transactions, including, by way of example, currency forward transactions, spot transactions, futures contracts, swaps, or options. Most of these transactions are entered into "over the counter," and the Fund assumes the risk that the counterparty may be unable or unwilling to perform its obligations, in addition to the risk of unfavorable or unanticipated changes in the values of the currencies underlying the transactions. Over-the-counter currency transactions are typically uncollateralized, and a Fund may not be able to recover all or any of the assets owed to it under such transactions if the counterparty should default. Many types of currency transactions are expected to continue to be traded over the counter even after implementation of the clearing requirements under the Dodd-Frank Wall Street Reform and Consumer Protection Act. In some markets or in respect of certain currencies, a Fund may be required, or agree, in the Company's discretion, to enter into foreign currency transactions via the Depositary's relevant sub-custodian. The Company may be subject to a conflict of interest in agreeing to any such arrangements on behalf of a Fund. Such transactions executed directly with the sub-custodian are executed at a rate determined solely by such sub-custodian. Accordingly, a Fund may not receive the best pricing of such currency transactions. Recent regulatory changes in a number of jurisdictions may require that certain currency transactions be subject to central clearing, or be subject to new or increased collateral requirements. These changes could increase the costs of currency transactions to a Fund and may make certain transactions unavailable; they may also increase the credit risk of such transactions to a Fund.

ESG Risk: A Fund's incorporation of ESG considerations in its investment process may cause it to make different investments than funds that have a similar investment universe and/or investment style but that do not incorporate such considerations in their investment strategy or processes. In applying ESG criteria to its investment decisions, a Fund may forgo higher yielding investments that it would invest in, or suffer increased tracking error, absent the application of its ESG investing criteria. A Fund's investment process may affect its exposure to certain investments, which may impact its relative investment performance depending on whether such investments are in or out of favour with the market. The Investment Manager relies on available information to assist in the ESG evaluation process, and the process employed for a Fund may differ from processes employed for other funds. A Fund will seek to identify companies and/or issuers that it believes meet its ESG criteria based on the data provided by

third parties. In evaluating a company and/or issuer, the Investment Manager is dependent upon information and data that may be incomplete, inaccurate or unavailable, which could cause the Investment Manager to incorrectly assess a company's ESG characteristics. A Fund may invest in companies and/or issuers that do not reflect the beliefs and values of any particular investor. See also **Sustainability Risk**.

Frequent Trading/Portfolio Turnover Risk: A Fund may engage in active and frequent trading of its portfolio securities. Fund turnover generally involves a number of direct and indirect costs and expenses to the trading Fund, including, for example, brokerage dealing commissions, dealer mark-ups and bid/asked spreads, and transaction costs on the sale of securities and reinvestment in other securities. The costs related to increased portfolio turnover have the effect of reducing the Fund's investment return and the sale of securities by a Fund may result in the realisation of taxable capital gains, including short term capital gains. Frequent trading can also result in increased tax liability for the trading Fund.

Futures Contracts and other Exchange Traded Derivatives Risks: Certain Funds may purchase futures contracts and other exchange-traded derivatives. The ability to establish and close out positions in futures contracts and other exchange-traded derivatives will be subject to the development and maintenance of a liquid secondary market. There is no assurance that a liquid secondary market on an exchange will exist for any particular futures contract or other exchange-traded derivative or at any particular time. In the event no such market exists for a particular derivative, it might not be possible to effect closing transactions, and a Fund will be unable to terminate its exposure to the derivative. If a Fund uses futures contracts or other exchange-traded derivatives for hedging purposes, there is a risk of imperfect correlation between movements in the prices of the derivatives and movements in the securities or index underlying the derivatives or movements in the prices of the Fund's securities that are the subject of a hedge. The prices of futures and other exchange-traded derivatives, for a number of reasons, may not correlate perfectly with movements in the securities or index underlying them. A Fund will incur brokerage fees in connection with its exchange-traded derivatives transactions. A Fund will typically be required to post margin with its applicable counterparty in connection with its transactions in futures contracts and other exchange-traded derivatives. In the event of an insolvency of the counterparty, the Fund may not be able to recover all (or any) of the margin it has posted with the counterparty, or to realise the value of any increase in the price of its positions.

Geographic Concentration Risk: A Fund that invests its assets in a small number of countries, or in a particular geographic region or regions will be more closely tied to market, currency, economic, political, environmental, or regulatory conditions and developments in the countries or regions in which such Fund invests, and consequently its performance may be more volatile than the performance of a more geographically-diversified fund.

Index Licensing Risk: It is possible that the license under which the Investment Manager or the applicable Fund is permitted to replicate or otherwise use an index will be terminated or may be disputed, impaired or cease to remain in effect. In such a case, the Investment Manager may be required to replace the index with another index which it considers to be appropriate in light of the investment strategy of the applicable Fund. The use of and/or transition to any such substitute index may have an adverse impact on such Fund's performance. In the event that the Investment Manager is unable to identify a suitable replacement for the relevant index, the Fund may be closed.

Index Risk*:* As set forth in the Relevant Supplement, certain Funds are managed with an indexed investment strategy, attempting to track the performance of an unmanaged Index of securities. Such Fund will seek to replicate Index returns regardless of the current or projected performance of the Index or of the actual securities comprising the Index. The Fund generally will buy and will not sell a security included in the Index as long as the security is part of the Index regardless of any

sudden or material decline in value or foreseeable material decline in value of the security, even though the Investment Manager may make a different investment decision for other managed accounts or portfolios that hold the security. As a result, an index tracking Fund's performance may be less favourable than that of a portfolio managed using an active investment strategy. The structure and composition of the Index will affect the performance, volatility and risk of the Index (in absolute terms and by comparison with other indices) and, consequently, the performance, volatility and risk of the relevant Fund. Such Fund's performance may not match that of the Index. This differs from an actively-managed Fund, which typically seeks to outperform an Index.

Index Error Risk: If a Fund has the investment objective to seek to track the performance of index as published by the relevant index provider, there is a risk that the index provider will not compile or calculate the index accurately. Although the index provider provides descriptions of what the index is designed to achieve, the index provider does not provide any warranty or accept any liability in relation to any error relating to the index, including any error in respect of the quality, accuracy or completeness of index data, and does not guarantee that the index will be in line with the described index methodology. The Company does not provide any warranty or guarantee for index provider errors and does not have any responsibility for the identification or correction of such errors. Errors in respect of the quality, accuracy and/or completeness of index data may occur from time to time and may not be identified and corrected for a period of time. Gains, losses or costs associated with index provider errors will be borne by the Fund and its investors. For example, during a period where the index contains incorrect constituents, a Fund tracking such published index would have market exposure to such constituents and would be underexposed to the constituents that should have been included in the index. Therefore, such errors may result in a negative or positive performance impact to the Fund and its investors. Any gains from index provider errors affecting the Fund will be kept by the Fund and its investors and any losses resulting from such index provider errors will be borne by the Fund and its investors.

Index Tracking Risk*:* The investment objective of certain Funds will be to track the performance of a specified index. While the Investment Manager seeks to track the performance of the index (i.e., achieve a high degree of correlation with the index), a Fund's return may not match the return of the specified index for a number of reasons. For example, the return on the sample of securities purchased by such Fund to replicate the performance of the index may not correlate precisely with the return of the index. Each index tracking Fund incurs a number of operating expenses not applicable to the index, and incurs costs in buying and selling securities. In addition, each of these Funds may not be fully invested at times, either as a result of cash flows into or out of the Fund or reserves of cash held by the Fund to meet redemptions. Changes in the composition of the index and regulatory requirements also may impact an index tracking Fund's ability to match the return of the specified index. The Investment Manager may apply one or more "screens" or investment techniques to refine or limit the number or types of issuers included in the index in which a Fund may invest. Application of such screens or techniques may result in investment performance below that of the index and may not produce results expected by the Investment Manager. Index tracking risk may be heightened during times of increased market volatility or other unusual market conditions.

Inflation Risk: Inflation risk is the risk that the value of assets or income from investments will be less in the future as inflation decreases the value of money. As inflation increases, the value of a Fund's assets can decline.

Inflation-Indexed Securities Risk: The principal amount of an inflation-indexed security typically increases with inflation and decreases with deflation, as measured by a specified index. It is possible that, in a period of declining inflation rates, a Fund could receive at maturity less than the initial principal amount of an inflation-indexed security. Depending on the changes in inflation rates during the period a Fund holds an inflation-indexed security, such Fund may earn less on the security than on a

conventional bond. In relation to actively managed strategies in particular, changes in the values of inflation indexed securities may be difficult to predict, and it is possible that an investment in such securities will have an effect different from that anticipated by the Investment Manager. The principal amounts of inflation-indexed securities are typically only adjusted periodically and changes in the values of the securities may only approximately reflect changes in inflation rates and may occur substantially after the changes in inflation rates in question occur.

Investment in Multiple Countries: Investments in securities of companies from multiple countries and/or securities of companies with significant exposure to multiple countries can involve additional risks and costs. Political, social and economic instability, the imposition of currency or capital controls or the expropriation or nationalisation of assets in a particular country can cause dramatic declines in that country's economy and affect a Fund's investments exposed to such country. Investing in multiple counties creates operational risks due to different systems, procedures and requirements in a particular country, different accounting, auditing, financial reporting, legal standards and practices and varying laws regarding withholding and other taxes. Enforcing legal rights can be difficult, costly, and slow in some countries and can be particularly difficult against governments.

Markets in different countries have different clearance and settlement procedures and in certain markets there have been times when settlements have been unable to keep pace with the volume of transactions. Delays in settlement may increase credit risk to a Fund, limit the ability of the Fund to reinvest the proceeds of a sale of securities, hinder the ability of the Fund to lend its portfolio securities and potentially subject the Fund to penalties for its failure to deliver to on-purchasers of securities whose delivery to the Fund was delayed. Delays in the settlement of securities purchased by the Fund may limit the ability of the Fund to sell those securities at times and prices it considers desirable and may subject the Fund to losses and costs due to its own inability to settle with subsequent purchasers of the securities from it. The Fund may be required to borrow monies it had otherwise expected to receive in connection with the settlement of securities sold by it, in order to meet its obligations to others. Limits on the ability of the Fund to purchase or sell securities due to settlement delays could increase any variance between the Fund's performance and that of its Index.

In some countries, transaction costs such as brokerage commissions and custody costs may be high.

A Fund invested in multiple countries will be exposed to such risks in more than one country.

Investment Risk: Investment risk includes the possible loss of the entire amount of capital that a Shareholder invests. The value of securities and other investments held by the Fund may increase or decrease, at times rapidly and unexpectedly. Shareholder's investment in a Fund may at any point in the future be worth less than his/her original investment. Accordingly, it is important that each Shareholder periodically evaluate his/her investment in a Fund.

Investment Style Risk – Geographic Focus:

Asia: Certain Funds will concentrate investments in companies in Asia Pacific and, consequently, such Fund's performance is expected to be closely tied to the social, political, and economic conditions within that region, and its exposure to related risks could make its performance more volatile than the performance of more geographically diversified funds. Certain Asian economies have experienced high inflation, high unemployment, currency devaluations and restrictions, and over-extension of credit. Many Asian economies have experienced rapid growth and industrialization and there is no assurance that this growth rate will be maintained. During the recent global recession, many of the export-driven Asian economies experienced the effects of the economic slowdown in Europe and the United States and certain Asian governments implemented stimulus plans, low-rate monetary policies and currency devaluations. Economic events in any one Asian country may have a significant economic

effect on the entire Asian region, as well as on major trading partners outside Asia. Any adverse event in the Asian markets may have a significant adverse effect on some or all of the economies of the countries in which the Fund invests. Many Asian countries are subject to political risk, including corruption and regional conflict with neighbouring countries. In addition, many Asian countries are subject to social and labour risks associated with demands for improved political, economic and social conditions. These risks, among others, may adversely affect the value of the Fund's investments.

PRC and Greater China Region Risks: One or more Funds may make PRC Investments through Access Programmes. By using these Access Programmes, the Fund may be subject to new, uncertain or untested rules and regulations promulgated by the relevant regulatory authorities. Moreover, current regulations governing a Fund's investment in PRC companies may be subject to change. There can be no guarantee that the PRC regulatory authorities would not provide a requirement in the future affecting the relevant Fund's ability to achieve its investment allocation, for example, introducing a mandatory investment allocation requirement under the relevant PRC regulations (e.g. a minimum percentage of the PRC Investments should be invested in a particular type of asset). There can be no assurance that the Access Programmes will not be abolished. Any Fund investing in securities issued by issuers from the PRC or the greater China region using an Access Programme may be adversely affected as a result of such changes. In addition to the risks pertinent to investment in emerging markets, investors in such Funds should also consider also the following risks.

PRC Foreign Shareholding Restrictions Risk. There are limits on the total shares held by all underlying foreign investors and/or a single foreign investor in one PRC listed company based on thresholds as set out under the PRC regulations (as amended from time to time), and the capacity of the Fund (being a foreign investor) to make investments in China A Shares will be affected by the relevant threshold limits and the activities of all underlying foreign investors. It will be difficult in practice to monitor the investments of the underlying foreign investors since an investor may make investment through different permitted channels under PRC laws. Should the shareholding of a single foreign investor in a China A Share listed company exceed the above restrictions, the investor would be required to unwind his position on the excessive shareholding according to a last-in-first-out basis within a specific period. The SSE/SZSE and the SEHK will issue warnings or restrict the buy orders for the related China A Shares if the percentage of total shareholding is approaching the upper limit of the aggregate foreign investor shareholding limit. Such restriction may affect the Funds in making investments in China A Shares, Stock Connect or the QFI regime.

PRC Short Swing Profit Rule Risk. According to PRC securities law, a Substantial Shareholder has to return any profits obtained from the purchase and sale of shares of such PRC Listco if both transactions occur within a six-month period. In the event that a Fund becomes a Substantial Shareholder by investing in China A Shares, the profits that the Fund may derive from such investments may be limited, and thus the Fund's returns may be adversely affected depending on the Fund's size of investment in China A Shares.

PRC Disclosure of Interests Risk. Under the PRC disclosure of interest requirements, in the event a Fund becomes a Substantial Shareholder of a PRC Listco it may be subject to the risk that the Fund's holdings may have to be reported in aggregate with the holdings of such other persons mentioned above. This may expose the Fund's holdings to the public. Under Hong Kong law, where a PRC incorporated company has both H Shares listed on SEHK and A Shares listed on the SSE or SZSE, if an investor is interested in more than a certain threshold (as may be specified from time to time) of any class of

voting shares (including China A Shares) in such PRC Listco, the investor is under a duty of disclosure pursuant to Part XV of the SFO.

Suspensions, Limits and Other Disruptions Affecting Trading of China A Shares Risk. In order to mitigate the effects of extreme volatility in the market price of China A Shares, the SSE and SZSE currently limit the amount of fluctuation permitted in the prices of China A Shares during a single trading day. The daily limit governs only price movements and does not restrict trading within the relevant limit. However, the limit does not limit potential losses because the limit may work to prevent a liquidation of any relevant securities at the fair or probable realisation value for such securities which means that the relevant Fund may be unable to dispose of unfavourable positions. There can be no assurance that a liquid market on an exchange would exist for any particular China A Share or for any particular time.

Best Execution Risk*:* Pursuant to the relevant PRC regulations, securities trades under Access Programmes may be executed through a limited number of PRC brokers / trading and settlement agents and accordingly may affect best execution of such trades. If, for any reason, the Investment Manager is unable to use the relevant broker / trading and settlement agent in the PRC, the operation of the relevant Fund may be adversely affected. The Fund may also incur losses due to the acts or omissions of any of the PRC broker(s) / trading and settlement agent in the execution or settlement of any transaction or in the transfer of any funds or securities. However, the Investment Manager shall, in the selection of PRC brokers / trading and settlement agent, have regard to factors such as the competitiveness of commission rates, size of the relevant orders and execution standards. It is possible that a single PRC broker / trading and settlement agent will be appointed and the relevant Fund may not necessarily pay the lowest commission available in the market. There is a risk that the relevant Fund may suffer losses from the default, insolvency or disqualification of a PRC broker/ trading and settlement agent. In such event, the relevant Fund may be adversely affected in the execution of transactions through such PRC broker/ trading and settlement agent. In addition, the broker may aggregate investment orders with its and its affiliates' own orders and those of its other clients, including the Funds. In some cases, aggregation may operate to the Funds' disadvantage and in other cases aggregation may operate to the Funds' advantage.

Effect of PRC Regulations on Subscriptions, Redemptions and Conversions*.* The ability of a Shareholder to redeem Shares of a Fund depends, inter alia, on the PRC laws and practices affecting the Fund's ability to liquidate investments and to repatriate the proceeds thereof out of the PRC. Any repatriation restrictions as may be applicable under PRC regulations in the future, where applicable, could restrict the Fund's ability to satisfy all or any redemption requests in respect of any particular redemption day and accordingly, the Fund may have to manage the liquidity challenges through the maintenance of high cash balances and limiting, deferring or suspending redemptions, as described in the **"Shares – Redemption – Redemption limits"** and the "**Valuation and Calculation of NAV – Temporary Suspension of NAV Calculation and Dealings**" sections of this Prospectus respectively. Investors should not invest in the Fund if they have need of greater liquidity than that offered by the Fund.

Applications for subscription and/or conversion of Shares may be subject to sufficient available capacity for a Fund under the relevant Access Programme as combined with the relevant Fund's investment policy and restrictions. Applications received during a period when there is insufficient available capacity for the relevant Fund under the QFIs for example may be suspended and processed for subscription and/or

conversion of Shares at the next following subscription date at which sufficient capacity is again available for the Fund. In addition, the Directors (or their duly authorised delegate(s)) may refuse applications and to temporarily or permanently suspend or limit any applications received during a period when there is insufficient available capacity for the relevant Fund under the QFI/CIBM Direct Access Programme.

Notwithstanding the above, the Directors (or their duly authorised delegate(s)) may decide to temporarily suspend the issue, subscription, redemption, conversion, payment of redemption proceeds and/or valuation of Shares of the relevant Fund, as described in the **"Shares – Redemption – Redemption limits"** and the "**Valuation and Calculation of NAV – Temporary Suspension of NAV Calculation and Dealings**" sections of this Prospectus respectively, during any period when the Fund is unable to transmit subscription proceeds to or from the accounts of the Fund, or dispose of holdings or to repatriate the proceeds of such disposals, subject to certain quota or limits imposed by any regulatory or supervisory, governmental or quasi-governmental authority, any fiscal body or self-regulatory organisation (whether of a governmental nature or otherwise), for example when subscription proceeds cannot be remitted to the account of the relevant Fund due to the Fund being unable to dispose of holdings in the relevant Access Programme, or to repatriate the proceeds of such disposals.

Counterparty Risk to the PRC Sub-Custodian and other Depositaries for PRC Investments. Any PRC Investments acquired through an Access Programme will be maintained by the Sub-Custodian, in electronic form via the securities account(s) and any cash will be held in Renminbi cash account(s)) with the Sub-Custodian. Securities account(s) and Renminbi cash account(s) for the relevant Fund in the PRC are maintained in accordance with market practice. Such account may be in the name of a nominee (for example, the QFI/ applicant under the CIBM Direct Access Programme) and not in the name of such Fund, and the assets within such account may be held for and on behalf of clients of the nominee including but not limited to such Fund. PRC interbank bond investment of a Fund will be registered in the joint names of the Investment Manager (as the applicant under the CIBM Direct Access Program) and the relevant Fund, or in another name for the sole use and benefit of the relevant Fund as permitted or required pursuant to the relevant regulations. Even though the Chinese regulators have affirmed their recognition of the concepts of nominee holders and beneficiary owners and applicable PRC rules, regulations and other administration measures and provisions generally provide for the concept of a "nominee holder" and recognise the concept of a "beneficial owner" of securities, these concepts are relatively new in the Chinese legal system and remain untested under the QFI scheme. Hence, the assets of such Fund held within such account may be subject to a risk of being treated as part of the assets of the nominee and be vulnerable to claims by creditors of the nominee in the event of the insolvency of the nominee. Whilst the assets held in such accounts are segregated and held separately from the assets of the nominee and belong solely to the relevant Fund, it is possible that the judicial and regulatory authorities in the PRC may interpret this position differently in the future. In addition, the assets of the Fund may not be adequately segregated from the assets of other Funds, funds or clients investing through the nominee. The relevant Fund may also incur losses due to the acts or omissions of the Sub-Custodian in the execution or settlement of any transaction or in the transfer of any funds or securities.

Cash held by the Sub-Custodian in the RMB cash account(s) will not be segregated in practice but will be a debt owing from the Sub-Custodian to the relevant Fund as a depositor. Such cash will be co-mingled with cash belonging to other clients of the Sub-Custodian. In the

event of insolvency of the Sub-Custodian, the relevant Fund will not have any proprietary rights to the cash deposited in the cash account opened with the Sub-Custodian, and the Fund will become an unsecured creditor, ranking *pari passu* with all other unsecured creditors, of the Sub-Custodian. The Fund may face difficulties and/or encounter delays in recovering such debt, or may not be able to recover it in full or at all, in which case the relevant Fund will lose some or all of its cash.

Counterparty risk to PRC Broker(s) / Trading and Settlement Agent. Pursuant to the relevant PRC regulations, securities trades under the Access Programme may be executed through a limited number of PRC brokers / trading and settlement agent that may be appointed for trading in any PRC stock exchange or interbank bond market for the relevant Fund. If, for any reason, the relevant broker / trading and settlement agent in the PRC cannot be used, the operation of the relevant Fund may be adversely affected. The Fund may also incur losses due to the acts or omissions of any of the PRC broker(s) / trading and settlement agent in the execution or settlement of any transaction or in the transfer of any funds or securities. However, the selection of PRC brokers / trading and settlement agent, should have regard to factors such as the competitiveness of commission rates, size of the relevant orders and execution standards. It is possible that a single PRC broker / trading and settlement agent will be appointed and the relevant Fund may not necessarily pay the lowest commission available in the market. There is a risk that the relevant Fund may suffer losses from the default, insolvency or disqualification of a PRC broker/ trading and settlement agent. In such event, the relevant Fund may be adversely affected in the execution of transactions through such PRC broker/ trading and settlement agent. A Fund may be adversely affected, whether directly or indirectly, by (i) the acts or omissions by the broker/trade and settlement agent in the settlement of any transaction or in the transfer of funds or securities; (ii) the default or bankruptcy of the broker/trade and settlement agent; and (iii) the disqualification of the broker/trade and settlement agent from acting in such capacity either on a temporary or permanent basis. Such acts, omissions, default or disqualification may also adversely affect a Fund in implementing its investment strategy or disrupt its operations, including causing delays in the settlement of any transaction or the transfer of any funds or securities in the PRC or in recovering assets, which may in turn adversely impact its NAV. Furthermore, regulatory sanctions can be imposed upon the broker/trade and settlement agent if it violates any provision under the Access Programme regulations. Such sanctions may adversely affect a Fund's investments in PRC Investments.

Risks Associated with Investment through Access Programmes

- **Risks related to the Stock Connect Daily Quota and Inclusion or Exclusion as China Connect Securities**. Each of SHHK Stock Connect and SZHK Stock Connect is subject to a Daily Quota. The Daily Quota limits the maximum net buy value of cross-boundary trades under the relevant Stock Connect each day. SEHK will monitor the usage of the Northbound daily quota ("Northbound Daily Quota") for each of SHHK Stock Connect and SZHK Stock Connect and publish the remaining balance of the Northbound Daily Quota on HKEx's website. SEHK may include or exclude securities as China Connect Securities (as defined in the rules of exchange of the SEHK) and may change the eligibility of shares for Northbound trading on Stock Connect, the SHHK and SZHK Stock Connect. Once the remaining balance of the Northbound Daily Quota drops to zero or the Daily Quota is exceeded during the opening call session, new buy orders will be rejected on the relevant Stock Connect (though investors will be allowed to sell their cross-boundary securities

regardless of the quota balance) and during the continuous auction session (or closing call auction session) for SZSE, no further buy orders will be accepted for the remaining of the day. The quota limitations may restrict a Fund's ability to invest in China Connect Securities through Stock Connect on a timely basis. The Daily Quota may change from time to time without prior notice and investors should refer to the SEHK website and other information published by the SEHK for up-to-date information.

- **Stock Connect Suspension risk**. It is contemplated that SEHK, SSE and SZSE would reserve the right to suspend Northbound (for investment in PRC shares) and/or Southbound (for investment in Hong Kong shares) trading if necessary for ensuring an orderly and fair market and that risks are managed prudently. Where a suspension in the Northbound trading through Stock Connect is affected, a Fund's ability to access the PRC market will be adversely affected. Securities (including the China Connect Securities) traded through Stock Connect may also be more volatile and unstable if suspended from trading. Such suspension may prolong for a considerable period of time and volatility and settlement difficulties relating to the China Connect Securities may also result in significant fluctuations in the prices, and may adversely affect the value, of the China Connect Securities.

- **Differences in Trading Day**. Stock Connect will only operate on days when both the relevant PRC and Hong Kong markets are open for trading and when banks in the relevant markets are open on the corresponding settlement days. By investing through Stock Connect, the Fund may be subject to a risk of price fluctuations in China Connect Securities during the time when the relevant Stock Connect is not trading as a result.

- **Stock Connect Operational Risk**. Stock Connect is premised on the functioning of the operational systems of the relevant market participants. Market participants are able to participate in the relevant programme subject to meeting certain information technology capabilities, risk management and other requirements as may be specified by the relevant exchange and/or clearing house.

  Stock Connect requires market participants to configure and adapt their operational and technical systems. Further, it should be appreciated that the securities regimes and legal systems of each of the PRC and Hong Kong markets differ significantly and in order for the trial programme to operate, market participants may need to address issues arising from the differences on an on-going basis.

  Further, the "connectivity" in Stock Connect requires routing of orders across PRC and Hong Kong. The SEHK has set up an order routing system to capture, consolidate and route the cross-boundary orders input by exchange participants. There is no assurance that the systems of the SEHK and market participants will function properly or will continue to be adapted to changes and developments in each market. In the event that the relevant systems fail to function properly, trading in each market through the programme could be disrupted. In such a case, the Fund's ability to access the China A Share market (and hence to pursue its investment strategy) through Stock Connect will be adversely affected.

- **Restrictions on Selling Imposed by Pre-Trade Monitoring**. PRC regulations require that before an investor sells any share, there should be sufficient shares in that investor's account; otherwise the SSE or SZSE will reject the sell order concerned.

SEHK will carry out pre-trade checking on China Connect Securities sell orders of its participants (i.e. the stock brokers) to ensure there is no over-selling.

If a Fund wishes to sell certain China Connect Securities it holds, it must transfer those China Connect Securities to the respective accounts of its brokers before the market opens on the day of selling. If it fails to meet this deadline, it will not be able to sell those shares on the trading day. Because of this requirement, the Fund may not be able to dispose of its holdings of China Connect Securities in a timely manner. PRC regulations may impose certain other restrictions on selling and buying which results in a Fund not being able to dispose of holdings of Connect Securities in a timely manner. This also raises concerns as to counterparty risks as securities may need to be kept by brokers overnight.

To facilitate investors whose SC Securities are maintained with custodians to sell their SC Securities without having to pre-deliver the SC Securities from their custodians to their executing brokers, the SEHK introduced an enhanced pre-trade checking model in March 2015, under which an investor may request its custodian to open a SPSA. An investor will only need to transfer all relevant SC Securities from its SPSA to its designated broker's account after execution and not before placing the sell order. If the Fund is unable to utilise this model, it would have to deliver SC Securities to brokers before the trading day and the above risks may still apply.

- **Recalling of Eligible Stocks**. When a stock is recalled from the scope of eligible stocks for trading via Stock Connect, the stock can only be sold but will be restricted from being bought. This may affect the investment portfolio or strategies of a Fund, for example, when it wishes to purchase a stock which is recalled from the scope of eligible stocks.

- **Stock Connect Clearing and Settlement Risk**. As the national central counterparty of the PRC's securities market, CSDCC operates a comprehensive network of clearing, settlement and stock holding infrastructure. Should the remote event of CSDCC default occur and CSDCC be declared as a defaulter, HKSCC's liabilities in Northbound (for investment in China Connect Securities) trades under its market contracts with clearing participants will be limited to assisting clearing participants in pursuing their claims against CSDCC. In such an event, affected Funds may suffer delay in the recovery process or may not be able to fully recover their losses from CSDCC. Under Stock Connect, the relevant Funds which have acquired SC Securities should maintain such SC Securities with their brokers' or custodians' stock accounts with the CCASS operated by HKSCC.

- **Risks associated with Investment in the ChiNext Market and/or the Science and Technology Innovation Board ("STAR Board")**. A Fund which invests in China A Shares listed on the ChiNext market and/or the STAR Board are subject to risks including the following:

  (i) Operating risk: listed companies on the STAR Board and/or ChiNext market are usually of emerging nature with smaller operating scale. They are usually smaller in scale, have less stable operations, and are less resilient against market risks and industry risks. Although they may have higher growth potential and leverage more on technical innovations, their future performance particularly those without a profit track record is

susceptible to great uncertainty.

(ii) High fluctuation on stock prices and liquidity risk: listed companies on the ChiNext market and/or STAR Board are subject to wide price fluctuation limits, and due to higher entry thresholds investors may have limited liquidity, compared to other boards. Companies listed on these boards may be subject to higher fluctuation in stock prices and liquidity risks and have higher risks and turnover ratios than companies listed on the main board of the SSE and SZSE due to changing market conditions, investor speculations, inconsistent financial results, etc. The unstable financial result also adds the difficulty to the company valuations.

(iii) Over-valuation risk: stocks listed on the ChiNext and/or STAR Board may be overvalued and such exceptionally high valuation may not be sustainable. The price of such stock may be more susceptible to manipulation due to fewer circulating shares.

(iv) Differences in regulation: the rules and regulations regarding companies listed on the ChiNext market and STAR Board are less stringent in terms of profitability and share capital than those in the main board.

(v) Delisting risk: it may be more common and faster for companies listed on the ChiNext market and/or STAR Board to delist. This may have an adverse impact on the relevant Fund if the companies that it invests in are delisted.

(vi) Technical risk: there is higher degree of uncertainty whether a company listed on the STAR Board and/or ChiNext is able to convert its technical innovations into physical products or services. When the industry is experiencing rapid technological development and replacement, its products or services may be obsolete and may not survive in the market.

(vii) Concentration risk: STAR Board is a newly established board and may have a limited number of listed companies during the initial stage. Investments in China A Shares listed in the STAR Board may be concentrated in a small number of stocks and subject the relevant Fund to higher concentration risk.

(viii) Risk disclosure statement: risks set out in this sub-section (*Risks associated with investment in ChiNext market and/or the Science and Technology Innovation Board*) are for reference only and not exhaustive. You are advised to refer to, in the case of STAR Board, the standard Risk Disclosure Statement in the Investor Eligibility Implementing Measure of STAR Market (in Chinese only), in the case of ChiNext market, the Investor Eligibility Implementing Measure of ChiNext Market, which Mainland investors are required to acknowledge before trading on STAR market and/or ChiNext market, as the case may be.

Investments in China A Shares listed in the ChiNext market and/or STAR Board may result in significant losses for the Fund and its investor.

- **Investor Compensation**. For defaults occurring on or after 1 January 2020, the Hong Kong's Investor Compensation Fund covers investors' losses in relation to securities traded on a stock market operated by the SSE or the SZSE and in respect of which an order for sale or purchase is permitted to be routed through the northbound link of a Stock Connect arrangement. However, a Fund's investments in SC Securities under SHHK and SZHK Stock Connect are not covered by the China Securities Investor Protection Fund. Therefore, a Fund is exposed to the risks of default of the broker(s) they engage in their trading in China Connect Securities through the respective programme and the investors will not benefit from compensation under such schemes.

- **Beneficial Ownership**. The precise nature and rights of the Hong Kong and overseas investors (including the Fund) as the beneficial owners of PRC Investments through nominees is less well defined under PRC law and the exact nature and methods of enforcement of the rights and interests of such investors under PRC law are not free from doubt.

  In particular, China Connect Securities are held in CSDCC. HKSCC is a participant of CSDCC and China Connect Securities acquired by the Fund will be (i) recorded in the name of HKSCC in the nominee securities account opened by HKSCC with CSDCC, and HKSCC is the "nominee holder" of such China Connect Securities; and (ii) held under the depository of CSDCC and registered in the shareholders' register of the listed companies on the SSE and SZSE.

  HKSCC will record interests in such China Connect Securities in the CCASS stock account of the relevant CCASS clearing participant such that a Fund shall exercise its rights in relation to the China Connect Securities through the CCASS clearing participant and HKSCC as the nominee holder. With respect to certain rights and interests of China Connect Securities that can only be exercised via bringing legal actions to PRC competent courts, it is uncertain whether such rights could be enforced since under the CCASS rules, HKSCC as nominee holder shall have no obligation to take any legal action or court proceeding to enforce any rights on behalf of the investors in respect of the China Connect Securities in PRC or elsewhere.

- **RMB Liquidity Risk**. RMB is currently not a freely convertible currency. The purchase of SSE/SZSE stocks is funded by CNH. The demand for CNH may increase and when there is a net drain of offshore RMB, the liquidity of offshore RMB could tighten. This could lead to the rise of CNH funding cost. Funds seeking to invest through the SHHK and SZHK Stock Connect may not able to secure sufficient CNH to execute their transactions or may only be able to do so at significant cost. Also, should the PRC government tighten the foreign exchange controls, such Funds may be exposed to greater liquidity risk of offshore RMB and may not be able to effectively pursue their investment strategies.

- **Risks associated with the Offshore RMB Market**. RMB which is traded within the Onshore Market (i.e. the CNY) may trade at a different rate compared to RMB which is traded within the Offshore Market (i.e. the CNH). The Funds' investments may be exposed to both the CNY and the CNH, and the Funds may consequently be exposed to greater exchange risks and/or higher costs of investment (for example, when converting other

currencies to the RMB at the rate of exchange prevailing in relation to the CNH).

Funds whose Base Currency is not RMB may also be exposed to currency risk due to the need for the conversion into RMB for investments in SC Securities. During any such conversion, a Fund may also incur currency conversion costs. The currency exchange rate may be subject to fluctuation and where RMB has depreciated, a Fund may incur a loss when it converts the sale proceeds of the SC Securities into its operating currency.

- **Restriction on Day Trading**. Day (turnaround) trading is not permitted on the China A Share market. Therefore, the Funds buying SC Securities on T day may only sell the shares on and after T+1 day subject to any Stock Connect Scheme Rules. This will limit the Funds' investment options, in particular where a Fund wishes to sell any SC Securities on a particular trading day. Settlement and pre-trade checking requirements may be subject to change from time to time.

- **Order Priority**. Where a broker provides Stock Connect trading services to its clients, proprietary trades of the broker or its affiliates may be submitted to the trading system independently and without the traders having information on the status of orders received from clients. There is no guarantee that brokers will observe client order priority (as applicable under relevant laws and regulations).

- **Limited Off-Exchange Trading and Transfers Risk.** SC Securities generally may not be sold, purchased or otherwise transferred other than through Stock Connect in accordance with the applicable rules. “Non-trade” transfers (i.e. off-exchange trading and transfers) are permitted in limited circumstances such as post-trade allocation of China A Shares to different funds/sub-funds by fund managers or correction of trade errors.

- **Participation in Corporate Actions and Shareholders' Meetings Risk**. Notwithstanding the fact that HKSCC does not claim proprietary interests in the China Connect Securities held in its omnibus stock accounts in CSDCC, HKSCC is the shareholder on record of SSE or SZSE listed companies (in its capacity as nominee holder for Hong Kong and overseas investors) and can attend shareholders’ meeting as shareholder in respect of such China Connect Securities. Where the articles of association of a listed company do not prohibit the appointment of proxy/multiple proxies by its shareholder, HKSCC may make arrangements to appoint one or more investors as its proxies or representatives to attend shareholders’ meetings when instructed. Otherwise, following the existing market practice in the PRC, investors engaged in Northbound trading will generally not be able to attend shareholder meetings by proxy or in person and the Funds will not be able to exercise the voting rights of the invested company in the same manner as provided in some developed markets.

  Any corporate action in respect of China Connect Securities will be announced by the relevant issuer through the SSE or SZSE website and certain officially appointed newspapers. However, SSE and SZSE listed issuers publish corporate documents in Chinese only, and English translations will not be available.

  HKSCC will keep participants in CCASS informed of corporate actions of China Connect Securities. Hong Kong and overseas investors (including Funds) will need to comply with the arrangement and deadline specified by their respective brokers or custodians

(i.e. CCASS participants). The time for them to take actions for some types of corporate actions of China Connect Securities may be as short as one business day only. Therefore, Funds may not be able to participate in some corporate actions in a timely manner.

- **QFI Risk**. Repatriations of RMB by QFIs are currently not subject to any lock-up periods or prior regulatory approval. The application and interpretation of the relevant investment regulations are relatively untested and there is uncertainty as to how they will be applied as the PRC authorities and regulators have been given wide discretion in such investment regulations and there is limited precedent or certainty as to how such discretion may be exercised now or in the future. It is not possible to predict the future development of the QFI system. Any restrictions on repatriation imposed in respect of the relevant Fund's QFI investments may have an adverse effect on the Fund's ability to meet redemption requests. Investors should be aware that violations of the relevant PRC regulations by the QFI License Holder could potentially result in the revocation of its QFI status or other regulatory actions. Any change in the QFI system generally, including the possibility of the QFI losing its QFI status, may affect the relevant Fund's ability to invest in eligible securities in the PRC directly through the relevant QFI. In addition, should the QFI status be suspended or revoked, the relevant Fund's performance may be adversely affected as the relevant Fund may be required to dispose of its QFI eligible securities holdings.

  In extreme circumstances, a Fund may incur substantial losses due to limited investment capabilities, or may not be able to fully implement or pursue its investment objective or strategy due to any applicable investment limit (pursuant to regulatory requirement or otherwise) with respect to the Fund's investments through an entity's status as an QFI.

- **Remittance and Repatriation of RMB**. Applications for subscription, redemption and/or conversion of Shares may be subject to certain restrictions under the relevant Access Programme and other relevant PRC regulations. The repatriation of invested capital and of income and capital gains of a Fund from the PRC is subject to the relevant PRC regulations in effect from time to time.

  - Repatriations of RMB by QFIs are currently permitted on a daily basis based on the net subscriptions and redemptions of Shares of the relevant Fund and are not subject to repatriation restrictions, any lock-up period or prior regulatory approval (but still subject to authenticity and compliance reviews and other regulatory requirements, including without limitation the tax formalities required for the liquidation of QFIs' investment in the PRC). At present, there is no regulatory prior approval requirement for repatriation of funds from QFIs under the above circumstances, however, there is no assurance that PRC rules and regulations will not change or that repatriation restrictions will not be imposed in the future. Further, such changes to the PRC rules and regulations may be applied retroactively.

  - Remittance and repatriation for the account of a Fund under the CIBM Direct Access Programme regulations, may currently be effected subject to the following restrictions:

(i) a Fund may remit investment principal in RMB or foreign currency into the PRC for investing through the CIBM Direct Access Programme; and

(ii) where a Fund repatriates funds out of the PRC, the ratio of RMB to foreign currency should generally match the original ratio of RMB to foreign currency when the investment principal was remitted into PRC, with a maximum permissible deviation of 10%. Such ratio requirement can be waived for the first repatriation, provided that the foreign currency or RMB capital to be repatriated may not exceed 110% of the foreign currency or RMB amount remitted into the PRC in aggregate. To the extent repatriation is in the same currency as the inward remittance, the currency ratio restriction will not apply.

The regulations relating to the repatriation of capital and profits may potentially be applied in relation to QFIs as a whole. Hence the ability of a Fund to make investments and/or repatriate monies from QFIs may be affected adversely by the investments, performance and/or repatriation of monies invested by other investors through QFIs.

- Any repatriation restrictions as may be applicable under PRC regulations in the future, where applicable, could restrict the Fund's ability to satisfy all or any redemption requests in respect of any particular redemption day and accordingly, the Fund may have to manage the liquidity challenges through the maintenance of high cash balances and the imposition of the redemption restrictions referred to above.

- Furthermore, as the Sub-Custodian's review on authenticity and compliance is conducted on each repatriation, the repatriation may be delayed or even rejected by the Sub-Custodian in case of non-compliance with the QFI rules and regulations. In such case, it is expected that redemption proceeds will be paid to the redeeming Shareholder as soon as practicable and after the completion of the repatriation of funds concerned. The actual time required for the completion of the relevant repatriation will be beyond the QFI's control.

Bond Connect Risks as A New Programme. The Bond Connect is a novel trading programme in China. The application and interpretation of the relevant investment regulations are largely untested and there is a lack of certainty or guidance as to how any provision of the relevant investment regulations will be applied and interpreted in practice. The relevant investment regulations also give the relevant PRC regulators (including, without limitation, PBoC and SAFE) certain degree of discretion and there is limited precedent or certainty as to how such discretion might be exercised, either now or in the future. In addition, the relevant investment regulations under which the Fund may invest via Bond Connect are subject to evolvement and there is no assurance that the relevant investment regulations will not be changed in a way prejudicing the interests of the Fund.

Moreover, Bond Connect and its technology and risk management capability has only a short operating history. There is no assurance that the systems and controls of the Bond Connect programme will function as intended or whether they will be adequate.

Bond Connect Regulatory Risk. Any laws, rules, regulations, policies, notices, circulars or guidelines published or applied by any of the Bond Connect Authorities are subject to change from time to time in respect of Bond Connect or any activities arising from Bond Connect (the "Applicable Bond Connect Laws and Rules") and there can be no assurance that Bond Connect will not be abolished. The relevant Fund may be adversely affected as a result of any change in the Applicable Bond Connect Laws and Rules.

No Off-market Transfer. Pursuant to the Applicable Bond Connect Laws and Rules, the transfer of Bond Connect Securities between two members of CMU and between two CMU sub-accounts of the same CMU member is not allowed.

No Amendment of Orders, Limited Cancellation of Orders. Pursuant to the Applicable Bond Connect Laws and Rules, instructions relating to sell and buy orders for Bond Connect Securities may only be cancelled in limited circumstances pursuant to the Applicable Bond Connect Laws and Rules and that instructions may not be amended.

Hedging Activities. Hedging activities are subject to the Applicable Bond Connect Laws and Rules and any prevailing market practice and there is no guarantee that the Fund will be able to carry out hedging transactions at terms which are satisfactory to the Management Company, and the relevant Investment Adviser. The Fund may also be required to unwind its hedge in unfavourable market conditions.

Nominee Holding Structure. Bond Connect Securities will be held by CMU, opening two nominee accounts with CCDC and SHCH. While the distinct concepts of "nominee holder" and "beneficial owner" are generally recognized under the Applicable Bond Connect Laws and Rules, the application of such rules is untested, and there is no assurance that PRC courts will recognise such rules, e.g. in liquidation proceedings of PRC companies or other legal proceedings.

Risk of CMU / CCDC / SHCH Default. A failure or delay by CMU, CCDC or SHCH in the performance of their respective obligations may result in a failure of settlement, or the loss, of CIBM and/or monies in connection with them and the Fund may suffer losses as a result.

PRC Taxation Risk. Trading under the QFI regime and SHHK and SZHK Stock Connect currently enjoy a temporary exemption from PRC 'income' tax and PRC value-added tax in respect of gains derived from the transfer of China A Shares. It is uncertain when such exemptions will expire and whether other PRC taxes will be applicable to trading of China A Shares under the QFI regime and the SHHK and SZHK Stock Connect. Dividends derived from China A Shares are subject to PRC withholding tax. PRC stamp duty is also payable for transactions in China A Shares. However, there is no guarantee on how long the exemption will last and there can be no certainty that the trading of China A Shares will not attract a liability to such tax in the future. The mainland China tax authorities may in the future issue further guidance in this regard and with potential retrospective effect.

Similarly, overseas institutional investors are exempted from corporate income tax and value-added tax on their bond interest gains from investment in the PRC bond market. It is uncertain when such exemptions will expire and whether other PRC taxes will be applicable to investment in the PRC bond market. Moreover, currently there is no specific guidance imposed by the PRC tax authorities on the treatment of income tax on trading gains and other tax categories payable in respect of trading in the CIBM by foreign investors. Before further guidance is issued and is well established in the administrative practice of the PRC tax authorities, the practices of the PRC tax authorities that collect PRC taxes with respect to the CIBM transactions may differ from, or be applied in a manner inconsistent with, the

practices with respect to the analogous investments described herein or any further guidance that may be issued.

There is also uncertainty in respect of whether PRC value added tax could be levied in respect of CNY foreign exchange transactions entered into by the Funds. If any such value added tax were levied then this would be payable by the Fund.

The value of a Fund's investment in the PRC and the amount of its incomes and gains could be adversely affected by an increase in tax rates or change in the taxation basis.

In respect of Bond Connect, the treatment of tax on trading gains under the Applicable Bond Connect Laws and Rules (defined below) is not entirely clear. Accordingly, where the Applicable Bond Connect Laws and Rules require a custodian/ clearing house / any other agent stipulated by such rules to withhold any tax, or where such custodian / clearing house / any other agent has a reasonable basis for believing that such withholding may be required, the custodian / clearing house / any other agent may do so at the rate required by the regulation, or if in the custodian's opinion the Applicable Bond Connect Laws and Rules (defined below) are not very clear on the rate, at such rate as the custodian/ clearing house / any other agent may, reasonably determine to be appropriate. Tax may be withheld on a retroactive basis.

In light of the uncertainty as to how gains or income that may be derived from the Fund's investments in PRC will be taxed, the Company reserves the right to provide for withholding tax on such gains or income and withholding tax for the account of the Fund. Withholding tax may already be withheld at broker/custodian level. Any tax provision, if made, will be reflected in the relevant Fund's account(s) at the time of debit or release of such provision.

If the actual applicable tax levied by PRC tax authorities is greater than that (if any) provided for by the relevant Fund so that there is a shortfall in the tax provision amount, investors should note that the NAV of the Fund may suffer more than the tax provision amount as the relevant Fund will ultimately have to bear the additional tax liabilities. In this case, the then existing and new investors will be disadvantaged.

On the other hand, if the actual applicable tax levied by PRC tax authorities is less than that (if any) provided for by the relevant Fund so that there is an excess in the tax provision amount, investors who have redeemed Shares before PRC tax authorities' ruling, decision or guidance in this respect will be disadvantaged as they would have borne the loss from the Fund's overprovision. In this case, the then existing and new investors may benefit if the difference between the tax provision and the actual taxation liability can be returned to the account of the relevant Fund as assets thereof.

In addition, investors should be aware that any under-accrual or over-accrual for PRC tax liabilities may impact on the performance of a Fund during the period of such under-accrual or over-accrual and following any subsequent adjustments to the NAV.

In case of having excess in any tax provision amount (for example, the actual applicable tax levied by PRC tax authorities is less than the tax provision amount or due to a change in provisioning by a Fund), such excess shall be treated as property of the relevant Fund and investors who have already transferred or redeemed their Shares in the relevant Fund will not be entitled or have any right to claim any part of the amount representing the excess.

Europe: Certain Funds will concentrate investments in companies in the EU and, consequently, such Fund's performance is expected to be closely tied to the social, political, and economic conditions within that region, and its exposure to related risks could make its performance more volatile than the performance of more geographically diversified funds.

The Economic and Monetary Union of the EU requires compliance with restrictions on inflation rates, deficits, interest rates, debt levels and fiscal and monetary controls, each of which may significantly affect every country in Europe. Decreasing imports or exports, changes in governmental or EU regulations on trade, changes in the exchange rate of the euro

(the common currency of certain EU countries), the default or threat of default by an EU member country on its sovereign debt, and/or an economic recession in an EU member country may have a significant adverse effect on the economies of EU member countries and their trading partners. The European financial markets have recently experienced volatility and adverse trends due to concerns about economic downturns or rising government debt levels in several European countries, including Greece, Ireland, Italy, Portugal and Spain. These events have adversely affected the exchange rate of the euro and may continue to significantly affect every country in Europe, including countries that do not use the euro.

Responses to the financial problems by European governments, central banks and others, including austerity measures and reforms, may not produce the desired results, may result in social unrest and may limit future growth and economic recovery or have other unintended consequences. Further defaults or restructurings by governments and other entities of their debt could have additional adverse effects on economies, financial markets and asset valuations around the world. In addition, one or more countries may abandon the euro and/or withdraw from the EU. The impact of these actions, especially if they occur in a disorderly fashion, is not clear but could be significant and far-reaching.

The United Kingdom left the EU on 31 January 2020. There are a number of uncertainties in connection with the future of the United Kingdom and its relationship with the EU. The negotiation of the United Kingdom’s continuing relationship with the EU is likely to take a number of years. The uncertainty around the United Kingdom’s ongoing relationship with the EU may cause uncertainty in the global financial markets and the impact of this on the United Kingdom, the EU and the global financial markets is not clear but could be significant and far-reaching.

Japan: Certain Funds will concentrate investments in companies in Japan and, consequently, such Fund's performance is expected to be closely tied to the social, political and economic conditions within that country and its exposure to related risks could make its performance more volatile than the performance of more geographically diversified funds. The growth of Japan's economy has historically lagged that of its Asian neighbours and other major developed economies. The Japanese economy is heavily dependent on international trade and has been adversely affected by trade tariffs, other protectionist measures, competition from emerging economies and the economic conditions of its trading partners. China has become an important trading partner with Japan, yet the countries' political relationship has become strained. Should political tension increase, it could adversely affect the economy, especially the export sector, and destabilize the region as a whole. Japan also remains heavily dependent on oil imports and higher commodity prices could therefore have a negative impact on the economy. The Japanese economy faces several other concerns, including a financial system with large levels of nonperforming loans, over-leveraged corporate balance sheets, extensive cross-ownership by major corporations, a changing corporate governance structure and large government deficits. These issues may cause a slowdown of the Japanese economy. The Japanese yen has fluctuated widely at times and any increase in its value may cause a decline in exports that could weaken the Japanese economy. Japan has, in the past, intervened in the currency markets to attempt to maintain or reduce the value of the yen. Japanese intervention in the currency markets could cause the value of the yen to fluctuate sharply and unpredictably and could cause losses to investors. Japan has an aging workforce and has experienced a significant population decline in recent years. Japan's labour market appears to be undergoing fundamental structural changes, as a labour market traditionally accustomed to lifetime employment adjusts to meet the need for increased labour mobility, which may adversely affect Japan's economic competitiveness.

Natural disasters, such as earthquakes, volcanoes, typhoons or tsunamis, could occur in Japan or surrounding areas and could negatively affect the Japanese economy and, in turn, the Fund.

North America: Certain Funds will concentrate investments in companies in North America and, consequently, such Fund's performance is expected to be closely tied to the social, political, and economic conditions within that region and its exposure to related risks could make its performance more volatile than the performance of more geographically diversified funds. The United States is Canada's and Mexico's largest trading and investment partner. The Canadian and Mexican economies are significantly affected by developments in the U.S. economy. Since the implementation of the North American Free Trade Agreement ("NAFTA") in 1994 among Canada, the United States and Mexico, total merchandise trade between the three countries has increased. To further this relationship, the three NAFTA countries entered into the Security and Prosperity Partnership of North America in March 2005, which may further affect Canada's and Mexico's dependency on the U.S. economy. Economic events in any one North American country can have a significant economic effect on the entire North American region, and on some or all of the North American countries in which the Fund invests.

United Kingdom: Certain Funds will concentrate investments in companies in the United Kingdom and, consequently, such Fund's performance is expected to be closely tied to the social, political, and economic conditions within that country and its exposure to related risks could make its performance more volatile than the performance of more geographically diversified funds. The United Kingdom has one of the largest economies in Europe and the United States and other European countries are substantial trading partners of the United Kingdom. As a result, the UK economy may be impacted by changes to the economic condition of the United States and other European countries. The UK economy, along with certain other EU economies, experienced a significant economic slowdown during the recent financial crisis and certain British financial institutions suffered significant losses, were severely under-capitalized and required government intervention to survive. The UK economy relies heavily on the export of financial services to the United States and other European countries and, therefore, a prolonged slowdown in the financial services sector may have a negative impact on the UK economy. Continued governmental involvement or control in certain sectors may stifle competition in certain sectors or cause adverse effects on economic growth. In the past, the United Kingdom has been a target of terrorism. Acts of terrorism in the United Kingdom or against British interests abroad may cause uncertainty in the UK financial markets and adversely affect the performance of the issuers to which the Fund has exposure.

The United Kingdom left the EU on 31 January 2020. There are a number of uncertainties in connection with the future of the United Kingdom and its relationship with the EU. The negotiation of the United Kingdom's continuing relationship with the EU is likely to take a number of years. The uncertainty around the United Kingdom's ongoing relationship with the EU may cause uncertainty in the global financial markets and the impact of this on the United Kingdom, the EU and the global financial markets is not clear but could be significant and far-reaching.

Switzerland: The Fund's will concentrate investments in companies in Switzerland and, consequently, its performance is expected to be closely tied to the social, political, and economic conditions within that region, and its exposure to related risks could make its performance more volatile than the performance of more geographically diversified funds.

Investment Style Risk – Green and Climate Aligned Bonds: Certain Fund's assets will be allocated to companies in green investments which means such Fund will be more affected by the performance of green and climate aligned investments than a relevant reference index.

The market for climate aligned investments is new and still developing. There may be a concentration of issuers and investments and the market for green and climate aligned investments may be illiquid and the prices of such investments volatile. There is no guarantee that a robust secondary market for green and climate aligned investments will exist at any point in time. Green and climate aligned

investments are subject to the risks that, under certain market conditions, the Fund may underperform funds that have a relatively lower exposure to green and/or climate aligned bonds. Some green and climate aligned investments may be dependent on government tax incentives and subsidies, and on political support for certain environmental technologies and companies. There is no industry standard to determine whether a security is "green" or "climate aligned" and it is possible that the Fund will include securities that according to independent data provider are aligned with Climate Transition Corporate Bond Beta Strategy principles but that some other investors might not agree with this classification. Many green and climate aligned investments have in recent periods been favourably affected by increased investor awareness of their availability and investors' desire to own such investments. Green and climate aligned investments may at any time fall out of favour with investors and their values may as a result be adversely affected.

Investment Style Risk – Growth: The prices of growth stocks may be based largely on expectations of future earnings, and their prices can decline rapidly and significantly in reaction to negative news about such factors as earnings, revenues, the economy, political developments or other news. Growth stocks may underperform stocks in other broad style categories (and the stock market as a whole) over any period of time and may shift in and out of favour with investors generally, sometimes rapidly, depending on changes in market, economic and other factors. As a result, at times when a Fund holds substantial investments in growth stocks it may underperform other investment funds that invest more broadly or that favour different investment styles. Because growth companies typically reinvest their earnings, growth stocks typically do not pay dividends at levels associated with other types of stocks, if at all.

Investment Style Risk – Large Cap Companies: Securities issued by large-capitalization companies may present risks not present in smaller companies. For example, larger companies may be unable to respond as quickly as smaller and mid-sized companies to competitive challenges or to changes in business, product, financial, or other market conditions. Larger companies may not be able to maintain growth at the high rates that may be achieved by well-managed smaller and mid-sized companies, especially during strong economic periods. Returns on investments in securities of large companies could trail the returns on investments in securities of smaller and mid-sized companies.

Investment Style Risk – Quality*:* A "quality" style of investing emphasizes companies with high returns, stable earnings, and low financial leverage. This style of investing is subject to the risk that the past performance of these companies does not continue or that the returns on "quality" equity securities are less than returns on other styles of investing or the overall stock market.

Investment Style Risk – Small, Mid and Micro–Cap Companies: The securities of small-, mid- and micro-capitalization companies may be more volatile and may involve more risk than the securities of larger companies. These companies may have limited product lines, markets or financial resources, may lack the competitive strength of larger companies and may depend on a few key employees. These companies, particularly micro-capitalisation companies, may be in the early stages of development of product lines. In addition, these companies may have been recently organized and may have little or no track record of success. The securities of smaller companies may trade less frequently and in smaller volumes than more widely held securities. The prices of these securities may fluctuate more sharply than those of other securities and a Fund may experience some difficulty in establishing or closing out positions in these securities at prevailing market prices. There may be less publicly available information about the issuers of these securities or less market interest in these securities than in the case of larger companies, both of which can cause significant price volatility. Some securities of smaller issuers may be illiquid or may be restricted as to resale. A Fund investing in these companies may be unable to liquidate its positions in such securities at any time, or at a favourable price, in order to meet the Fund's

obligations. Returns on investments in securities of small- or micro-capitalization companies could trail the returns on investments in securities of larger companies.

Investment Style Risk – Value: Value stocks present the risk that they may decline in price or never reach their expected full market value, either because the market fails to recognize the stock's intrinsic worth or the Investment Manager overestimates the stock's expected value. Value stocks may underperform stocks in other broad style categories (and the stock market as a whole) over any period of time and may shift in and out of favour with investors generally, sometimes rapidly, depending on changes in market, economic and other factors. As a result, at times when a Fund holds substantial investments in value stocks it may underperform other investment portfolios that invest more broadly or that favour different investment styles.

IPO Risk Factor: A Fund may at times have the opportunity to invest in securities offered in initial public offerings ("IPOs"). IPOs involve companies that have no public operating history and therefore entail more risk than established public companies. The prices of securities offered in IPOs can have significant volatility and a Fund may lose money on an investment in such securities. IPOs may not be available to the Funds at all times and a Fund may not always invest in IPOs offered to it. Investments in IPOs may have a substantial beneficial effect on a Fund's investment performance. A Fund's investment return earned during a period of substantial investment in IPOs may not be sustained during other periods when the Fund makes more-limited, or no investments in IPOs. There can be no assurance that the Funds will have the opportunity to invest in IPOs that are made available to other clients of the Investment Manager.

Large Shareholder Risk: To the extent a large proportion of the shares of a Fund are held by a small number of Shareholders (or a single Shareholder), including funds or accounts over which the Investment Manager has investment discretion, a Fund is subject to the risk that these Shareholders will purchase or redeem their Shares in large amounts rapidly or unexpectedly, including as a result of an asset allocation decision made by the Investment Manager. These transactions could adversely affect the ability of a Fund to conduct its investment program.

Leveraging Risk: Certain transactions, including, for example, borrowing transactions, certain derivatives transactions, securities lending transactions and other investment transactions, such as when-issued, delayed-delivery or forward commitment transactions, may create investment leverage. When a Fund engages in transactions that have a leveraging effect on the Fund's investment portfolio, the value of the Fund will be potentially more volatile and all other risks will tend to be compounded. This is because leverage generally creates investment risk with respect to a larger base of assets than the Fund would otherwise have and so magnifies the effect of any increase or decrease in the value of the Fund's underlying assets. The use of leverage is considered to be a speculative investment practice and may result in losses to the Fund. In transactions involving leverage, a relatively small market movement or change in other underlying indicator can lead to significantly larger losses to the Fund. Certain derivatives have the potential for unlimited loss, regardless of the size of the initial investment. The use of leverage may cause the Fund to liquidate positions when it may not be advantageous to do so to satisfy repayment, interest payment or margin obligations or to meet asset segregation or coverage requirements.

Limited Investment Programme Risk: An investment in any Fund or even in a combination of Funds, is not intended to be a complete investment programme but rather is intended for investment as part of a diversified investment portfolio. Investors should consult their own advisors as to the role of an investment in any of the Funds in their overall investment programme.

Liquidity Risk*:* Liquidity risk is the risk that a Fund may not be able to acquire or dispose of securities or close out derivatives transactions readily at a favourable time or prices (or at all) or at prices approximating those at which the Fund currently values them. In large-scale

transactions or when markets are partially illiquid (e.g. where there are numerous individually agreed instruments) it may not be possible to execute a transaction or close out a position at an advantageous price.

Illiquid securities that may be held in accordance with applicable law ("Permitted Illiquid Securities") may be subject to restrictions on resale, may trade in the over-the-counter market or in limited volume, or may not have an active trading market. In addition, Permitted Illiquid Securities may trade at a discount from comparable, more liquid investments and may be subject to wide fluctuations in market value. It may be difficult for a Fund to value Permitted Illiquid Securities accurately. The market for certain investments held by a Fund may become illiquid under adverse market or economic conditions independent of any specific adverse changes in the conditions of a particular issuer. Disposal of Permitted Illiquid Securities may entail registration expenses and other transaction costs that are higher than those for liquid securities.

From time to time, the counterparties with which a Fund effects transactions might cease making markets or quoting prices in certain of the instruments in which a Fund has invested. In such instances, a Fund might be unable to enter into a desired transaction or to enter into any offsetting transaction with respect to an open position, which might adversely affect its performance.

The Management Company employs an appropriate liquidity risk management process, which takes into account efficient portfolio management transactions employed by the Funds, in order to ensure that each Fund is able to comply with its stated redemption obligations. However, it is possible that in the type of circumstances described above, a Fund may not be able to realise sufficient assets to meet all redemption requests that it receives or the Management Company may determine that the circumstances are such that meeting some or all of such requests is not in the best interests of the Shareholders in a Fund as a whole. In such circumstances, the Company may take the decision to apply the redemption gate provisions described in the "**Shares - Redemption**" section of this Prospectus or suspend dealings in the relevant Fund as described in the "**Valuation and Calculation of NAV – Temporary Suspension of NAV Calculation and Dealings**" section of this Prospectus.

Management Risk: Certain Funds are actively managed investment portfolios and are subject to a degree of management risk. The Investment Manager's judgments about the implementation of a strategy or the attractiveness, relative value or potential appreciation of a particular sector, security or investment strategy or hedging strategy may prove incorrect and may cause such Fund to incur losses. There can be no assurance that the Investment Manager's investment techniques and decisions will produce the desired results.

Market Disruption and Geopolitical Risk: Each Fund is subject to the risk that geopolitical events will disrupt securities markets and adversely affect global economies and markets. War, terrorism, the spread of infectious illness or other public health issues and related geopolitical events have led, and in the future may lead, to increased short-term market volatility and may have adverse long-term effects on global economies and markets generally. Likewise, natural and environmental disasters and systemic market dislocations may be highly disruptive to economies and markets. Those events as well as other changes in economic and political conditions also could adversely affect individual issuers or related groups of issuers, securities markets, interest rates, credit ratings, inflation, investor sentiment, and other factors affecting the value of a Fund's investments.

Given the increasing interdependence among global economies and markets, conditions in one country, market or region might adversely affect markets, issuers and/or foreign exchange rates in other countries, including the countries in which the Fund invests. Any partial or complete dissolution of the EU or the European Monetary Union due to the withdrawal of one or more member states or any increased uncertainty as to each of their status could have

significant adverse effects on currency and financial markets and on the values of the Funds' investments.

Securities and financial markets may be susceptible to market manipulation or other fraudulent trade practices, which could disrupt the orderly functioning of these markets or adversely affect the values of investments traded in these markets, including investments held by the Company.

To the extent a Fund has focused its investments in the market or index of a particular region, adverse geopolitical and other events could have a disproportionate impact on the Fund.

Market Risk: Market prices of investments held by a Fund may increase or decrease, at times rapidly or unpredictably. A Fund's investments are subject to changes in general economic conditions, general market fluctuations and the risks inherent in investment in international securities markets. Investment markets can be volatile and prices of investments can change substantially due to various factors including, but not limited to, economic growth or recession, changes in interest rates, changes in actual or perceived creditworthiness of issuers and general market liquidity. Even if general economic conditions do not change, the value of an investment in a Fund could decline and be worth less than Shareholder's original investment if the particular industries, sectors or companies in which the Fund invests do not perform well or are adversely affected by events. Further, legal, political, regulatory and tax changes may also cause fluctuations in markets and securities prices. Local, regional or global events such as war, acts of terrorism, the spread of infectious illness or other public health issues, or other events could have a significant impact on a Fund and its investments. The magnitude of these price fluctuations will be greater when the maturity of the outstanding securities is longer. Since a Fund may make investments in currencies other than its base currency, the value of a Fund's assets may also be affected by changes in currency rates and imposition of currency or capital controls.

Modelling Risk: The Investment Manager uses quantitative models in an effort to enhance returns and manage risk. These models may be proprietary to the Investment Manager or they may be licensed from third parties. Any imperfections, errors or limitations in these models could limit any benefit to the Fund from the use of the models or could result in incorrect outputs or in investment outcomes different from or opposite to those expected or desired by the Investment Manager. These models may make simplifying assumptions that limit their effectiveness and may draw from historical data that does not adequately identify or reflect factors necessary to an appropriate or useful output. There can be no assurance that the models will behave as expected in all market conditions. In addition, computer programming used to create quantitative models or the data on which such models operate, might contain one or more errors. Such errors might never be detected or might be detected only after a Fund has sustained a loss (or reduced performance) related to such errors.

It is possible that the license under which the Investment Manager or the applicable Fund is permitted to use the quantitative models will be terminated or may be disputed, impaired or cease to remain in effect. In such a case, the Investment Manager may be required to replace the quantitative model with another quantitative model which it considers to be appropriate in light of the investment strategy of the applicable Fund. The use of any such substitute quantitative model may have an adverse impact on such Fund's performance. In the event that the Investment Manager is unable to identify a suitable replacement for the relevant quantitative model, the Fund may be liquidated.

Mortgage-related and Asset-Backed Securities Risk*:* Investments in mortgage-related and other asset-backed securities are subject to the risk of significant credit downgrades, illiquidity and defaults to a greater extent than many other types of fixed income investments. Mortgage-related securities represent a participation in or are secured by mortgage loans. Other asset-backed securities are typically structured like mortgage-related securities but instead of mortgage loans or

interests in mortgage loans, the underlying assets may include, for example, items such as motor vehicle instalment sales or instalment loan contracts, leases on various types of real and personal property and receivables from credit card agreements. During periods of falling interest rates, mortgage-related and other asset-backed securities, which typically provide the issuer with the right to prepay the security prior to maturity, may be prepaid, which may result in a Fund having to reinvest the proceeds in other investments at lower interest rates. During periods of rising interest rates, the average life of mortgage-related and other asset-backed securities may extend because of slower-than expected principal payments. This may lock in a below market interest rate, increase the security's duration and interest rate sensitivity and reduce the value of the security. As a result, mortgage-related and other asset-backed securities may have less potential for capital appreciation during periods of declining interest rates than other debt securities of comparable maturities, although they may have a similar risk of decline in market values during periods of rising interest rates. Prepayment rates are difficult to predict and the potential impact of prepayments on the value of a mortgage-related or other asset-backed security depends on the terms of the instrument and can result in significant volatility. The price of a mortgage-related or other asset-backed security also depends on the credit quality and adequacy of the underlying assets or collateral. Defaults on the underlying assets, if any, may impair the value of a mortgage-related or other asset-backed security. For some asset-backed securities in which the Fund invests, such as those backed by credit card receivables, the underlying cash flows may not be supported by a security interest in a related asset. Moreover, the values of mortgage-related and other asset-backed securities may be substantially dependent on the servicing of the underlying asset pools and are therefore subject to risks associated with the negligence or malfeasance by their servicers and to the credit risk of their servicers. In certain situations, the mishandling of related documentation may also affect the rights of securities holders in and to the underlying collateral. There may be legal and practical limitations on the enforceability of any security interest granted with respect to underlying assets or the value of the underlying assets, if any, may be insufficient if the issuer defaults. Unanticipated legal and administrative costs incurred when enforcing a security interest may reduce the value of the Fund that holds such security.

In a "forward roll" transaction, the Fund will sell a mortgage-related security to a bank or other permitted entity and simultaneously agree to purchase a similar security from the institution at a later date at an agreed upon price. The mortgage securities that are purchased will bear the same interest rate as those sold but generally will be collateralized by different pools of mortgages with different prepayment histories than those sold. The values of such transactions will be affected by many of the same factors that affect the values of mortgage-related securities generally. In addition, forward roll transactions may have the effect of creating investment leverage in the Fund.

No Prior Operating History Risk: Upon launch, each Fund is a newly formed entity with limited operating history and there can be no assurance that it will be successful. Prior performance is no guarantee of future results.

OTC Clearing Risk: Certain derivatives transactions entered into by a Fund will be required to be centrally cleared. In a cleared derivatives transaction, a Fund's counterparty to the transaction is a central derivatives clearing organization or clearing house rather than a bank or dealer. A Fund will typically clear derivatives transactions through clearing members that are futures commission merchants and members of the clearing houses. A Fund will make and receive payments owed under cleared derivatives transactions (including margin payments) through its accounts at clearing members. A Fund's clearing members guarantee a Fund's performance of its obligations to the clearing house. In contrast to bilateral derivatives transactions, clearing members can generally require termination of existing cleared derivatives transactions at any time or increase the amount of margin required to be provided by a Fund to the clearing member for any new or existing cleared derivatives transaction

above the amount of margin required by the clearing house or clearing member. Any such termination or increase could result in losses to a Fund on its cleared derivatives position. Also, a Fund is subject to execution risk in respect of cleared derivatives transactions, because it is possible that no clearing member will be willing to clear a particular transaction on Fund's behalf. In that case, the transaction might have to be terminated and a Fund could lose some or all of the benefit of any increase in the value of the transaction after the time of the trade. In addition, the documentation governing the relationship between a Fund and a clearing member that is drafted by the clearing members is generally not negotiable and therefore less favourable to a Fund than typical bilateral derivatives documentation. These and other new rules and regulations could, among other things, restrict a Fund's ability to engage in or increase the cost to a Fund of derivatives transactions and could make the use of derivatives by the Fund impractical or generally undesirable. These regulations are new and evolving so their potential impact on a Fund and the financial system are not yet known. While the new regulations and central clearing of some derivatives transactions are designed to reduce systemic risk, there is no assurance that the new clearing mechanisms will achieve that result and in the meantime, as noted above, central clearing exposes Funds to new kinds of risks and costs.

Preferred Securities Risk: Generally, preferred security holders have no or limited voting rights with respect to the issuing company unless certain events occur. In addition, preferred securities are subordinated to bonds and other debt instruments in a company's capital structure and therefore will be subject to greater credit risk than those debt instruments. Unlike debt securities, dividend payments on a preferred security typically must be declared by the issuer's board of directors. An issuer's board of directors is generally not under any obligation to pay a dividend (even if such dividends have accrued) and may suspend payment of dividends on preferred securities at any time. In the event an issuer of preferred securities experiences economic difficulties, the issuer's preferred securities may lose substantial value due to the reduced likelihood that the issuer's board of directors will declare a dividend and the fact that the preferred security may be subordinated to other securities of the same issuer. Further, because many preferred securities pay dividends at a fixed rate, their market price can be sensitive to changes in interest rates in a manner similar to bonds that is, as interest rates rise, the value of the preferred securities held by a Fund are likely to decline. Therefore, to the extent that the Fund invests a substantial portion of its assets in fixed rate preferred securities, rising interest rates may cause the value of the Fund's investments to decline significantly. In addition, because many preferred securities allow holders to convert the preferred securities into common stock of the issuer, their market price can be sensitive to changes in the value of the issuer's common stock and, therefore, declining common stock values may also cause the value of the Fund's investments to decline. Preferred securities often have call features which allow the issuer to redeem the security at its discretion. The redemption of a preferred security, having a higher than average yield, may cause a decrease in the Fund's yield.

The value of a preferred security held by a Fund may decline due to a number of factors affecting or perceived to affect the issuer of the security, such as, for example, management performance, financial leverage and reduced demand for the issuer's goods or services as well as the historical and prospective earnings of the issuer and the value of its assets. In addition, there may be political changes that impact the ability of issuers to repay principal and to make interest payments on securities. Changes to the financial condition or credit rating of issuers may also adversely affect the value of the securities issued.

Provisional Allotment Risk: As the Company may provisionally allot Shares to proposed investors prior to receipt of the requisite subscription monies for those Shares, the Company may suffer losses as a result of the non-payment of such subscription monies.

The Company receives an indicative cash flow report from the UCI Administrator. The information contained in the indicative cash flow report is based on estimated valuations only

and may be inaccurate or incomplete to any effect and for any reason. The indicative cash flows may not be similar or the same as the final confirmed cash flows.

Proxy Voting Program Risk: Investors in certain Funds may, from time to time, enter into arrangements with the Management Company pursuant to which such investors have the ability to select a proxy voting policy that will apply in relation to a pro-rata portion of the shares (that are available for voting) held by applicable Fund(s) in which they invest. Such investors owe no fiduciary duty to the Funds. An investor's choice of voting policy and the voting of shares in accordance with such policy may not reflect, and may in fact conflict with, the concerns and values of one or more other investors in the Funds.

To the extent that shares held by a Fund are voted pursuant to such a proxy voting program there is the risk that such shares may be voted in a way that is different to how other equivalent shares held by the Fund are being voted.

The availability of the proxy voting program is subject to any applicable regulatory, operational (including in respect of fractional voting rights), local market (including any applicable local restrictions on split voting), tax, cost or other constraints of the third party proxy voting or State Street Global Advisors.

No warranty or acceptance of any liability is provided by the Management Company, the third party proxy voting administrator or any other party in relation to the implementation of the proxy voting program, and no guarantee is provided that voting will be in line with the proxy voting program.

There is also the risk that the third party proxy voting administrator's interpretation of how a voting policy should be applied in respect of a vote may be different to an Investor's interpretation as to how the policy should be interpreted in respect of that vote. Depending on the Investor's corporate structure, there is the risk that, pursuant to the proxy voting program, shares may be voted of a company which is in the Investor's group of companies.

The Management Company reserves the right to suspend or cancel, in full or in part, the proxy voting program (in any one instance or more broadly), including with immediate effect, if required by applicable law or regulation or if the Management Company otherwise considers that this is appropriate. This may result in shares being voted in accordance with the Fund's proxy voting policy rather than in accordance with the voting policy selected by the Investor pursuant to the proxy voting program.

Real Property Securities Risk: There are special risks associated with investment in securities of companies engaged in real property markets, including without limitation real estate operating companies. An investment in a real property company may be subject to risks similar to those associated with direct ownership of real estate, including, by way of example, the possibility of declines in the value of real estate, losses from casualty or condemnation and changes in local and general economic conditions, supply and demand, interest rates, environmental liability, zoning laws, regulatory limitations on rents, property taxes, and operating expenses. An investment in a real property company is subject to additional risks, such as poor performance by the manager of the real property company, adverse changes in tax laws, difficulties in valuing and disposing of real estate and the effect of general declines in stock prices. Some real property companies have limited diversification because they invest in a limited number of properties, a narrow geographic area or a single type of property. Also, the organizational documents of a real property company may contain provisions that make changes in control of the company difficult and time-consuming. As a shareholder in a real property company a Fund, and indirectly the Fund's Shareholders, would bear their rateable shares of the real property company's expenses and would at the same time continue to pay their own fees and expenses.

Real Estate Investment Trust (REIT) Risk. In addition to the risks associated with investing in

the securities of real property companies, REITs are subject to certain additional risks. REITs may be affected by changes in the values of the underlying properties that they own or operate. Further, REITs are dependent upon specialised management skills and their investments may be concentrated in relatively few properties or in a small geographic area or a single property type. REITs are also subject to heavy cash flow dependency and, as a result, are particularly reliant on the proper functioning of capital markets, as well as defaults by borrowers and self-liquidation. A variety of economic and other factors may adversely affect a lessee's ability to meet its obligations to a REIT. In the event of a default by a lessee, the REIT may experience delays in enforcing its rights as a lessor and may incur substantial costs associated in protecting its investments. Investments in REITs are also subject to the risks affecting equity markets generally.

Repurchase Agreements Risk: Repurchase agreements may be viewed as loans made by a Fund which are collateralized by the securities subject to repurchase. A Fund's investment return on such transactions will depend on the counterparty's willingness and ability to perform its obligations under a repurchase agreement. If a Fund's counterparty should default on its obligations and a Fund is delayed or prevented from recovering the collateral or if the value of the collateral is insufficient, a Fund may realize a loss.

Risk of Fluctuation of Net Asset Value and Trading Prices on the Secondary Market – ETF Shares: The Net Asset Value per ETF Share will fluctuate in accordance with changes in the market value of the investments held by the relevant Fund, and with changes in the exchange rate between the currency(ies) in which the investments which the relevant Fund holds are denominated and the Base Currency(ies). Investors are reminded that, even though the Net Asset Value per ETF Share may be converted and reported in a currency denomination other than the Base Currency, there is no assurance that such converted amount can actually be achieved. Depending on an investor's currency of reference, currency fluctuations may adversely affect the value of an investment in one or more of the Funds. The publication of the Net Asset Value per ETF Share for each Fund is for information purposes only, and is not an invitation to subscribe, redeem or convert ETF Shares at the published Net Asset Value per ETF Share. The Secondary Market price of the ETF Shares is likely to fluctuate with changes in the Net Asset Value per ETF Share, with changes in the exchange rate between the currency(ies) in which the investments held by the relevant Fund are denominated and the currency in which the ETF Shares are traded and with supply and demand factors on the stock exchange on which the ETF Shares are traded. The Company cannot predict the price at which the ETF Shares will trade and this may differ from the Net Asset Value per ETF Share (when converted to the currency in which the ETF Shares are traded). Price differences may be due, in large part, to the fact that supply and demand forces in the Secondary Market for the ETF Shares of any Fund will be closely related, but not identical, to the same forces influencing the prices of the relevant index securities. The Net Asset Value per ETF Share and the Secondary Market price of ETF Shares are expected to track each other through arbitrage. An Authorised Participant or other professional investor in calculating the price at which it would be willing on the Secondary Market to sell the ETF Shares of a Fund (known as the offer price), or to buy such ETF Shares (known as the bid price), will take account of the notional price at which it could purchase (when selling ETF Shares), or sell (when buying ETF Shares), the requisite amounts of the relevant index securities in respect of one or more creation and redemption Unit(s) including associated transaction costs and taxes (if applicable). Where the notional price of purchasing the index securities corresponding to a subscription for a creation and redemption unit is less, or the notional price of selling index securities corresponding to a redemption of a creation and redemption unit is more, than the Secondary Market price of ETF Shares in a creation and redemption unit, as the case may be, then an Authorised Participant may choose to arbitrage the Fund by subscribing for or redeeming creation and redemption units. The Directors believe such arbitrage will help to ensure that the deviation of the trading bid and

offer price per ETF Share from the Net Asset Value per ETF Share (after currency conversion) is generally minimised. However, if the calculation of the Net Asset Value of a Fund is suspended, the right to subscribe for or redeem ETF Shares in that Fund would also be suspended. In the event that the Company has to suspend the subscription and/or redemption of ETF Shares of a Fund, or if the Fund cannot trade its underlying investments, it is expected that larger ETF Share price discounts or premiums compared to the Net Asset Value per Share could arise. Investors should be aware that on days other than Business Days or Dealing Days of a Fund when one or more Recognised Markets are trading ETF Shares but the underlying Recognised Market(s) on which the index securities are traded are closed, the spread between the quoted bid and offer prices in the ETF Shares may widen and the difference between the market price of a ETF Share and the last calculated Net Asset Value per Share may, after currency conversion, increase. The settlement of trades in ETF Shares will be through the facilities of one or more Recognised Clearing and Settlement Systems following applicable procedures. Investors should also be aware that on such days the underlying Index value would not necessarily be calculated and available for investors in making their investment decisions because prices of index securities in the underlying Recognised Market(s) would not be available on such days.

Risk of Investment in Other UCIs: When a Fund invests in another UCI, it is exposed to the risk that such UCI will not perform as expected. Such a Fund is exposed indirectly to all of the risks applicable to an investment in such UCI. In addition, lack of liquidity in the underlying UCI could result in its value being more volatile than the underlying portfolio of securities and may limit the ability of the Fund to sell or redeem its interest in the UCI at a time or at a price it might consider desirable and the Fund may achieve a reduced investment return. The investment policies and limitations of the other UCI may not be the same as those of the Fund, as a result, the Fund may be subject to additional or different risks or may achieve a reduced investment return, as a result of its investment in such UCI.

If a UCI is an exchange-traded fund or other product traded on a securities exchange or otherwise actively traded, its shares may trade at a premium or discount to their NAV, an effect that might be more pronounced in less liquid markets. A Fund investing in a UCI bears its proportionate share of the fees and expenses of any UCI in which it invests. The Investment Manager or an affiliate may serve as investment manager and/or advisor to a UCI in which the Fund may invest, leading to potential conflicts of interest. For example, the Investment Manager or its affiliates may receive fees based on the amount of assets invested in the UCI. Investment by a Fund in the UCI may be beneficial to the Investment Manager or an affiliate in the management of the UCI, by helping to achieve economies of scale or enhancing cash flows. Due to this and other factors, the Investment Manager may have an incentive to invest a Fund's assets in a UCI sponsored or managed by the Investment Manager or its affiliates in lieu of investments by the Fund directly in portfolio securities, or may have an incentive to invest in such UCI over a different UCI sponsored or managed by others. Similarly, the Investment Manager may have an incentive to delay or decide against the sale of interests held by a Fund in a UCI sponsored or managed by the Investment Manager or its affiliates. It is possible that other clients of the Investment Manager or its affiliates will purchase or sell interests in a UCI sponsored or managed by the Investment Manager or its affiliates at prices and at times more favourable than those at which an invested Fund does so.

Risk of settlement time misalignment: In certain countries, the settlement time for securities in which the Fund invests may be shorter than the settlement time applicable for contributions and redemptions when an investor invests into or redeems from the Fund. The Investment Manager may agree with the trading counterparty to extend the settlement time for securities with a shorter settlement time than the Fund to align with the Fund contribution and redemption cycle. This may result in increased brokerage charges, which may be charged to the transacting investor via the Swing Pricing Adjustment. If the settlement time for securities being bought or

sold by the Fund in connection with a contribution is not extended, this may result in the Fund being overdrawn or being required to borrow from a lender, both of which may result in additional cost. In addition, the Fund may incur charges in connection with having a loan facility in place to enable the Fund to borrow in such situations. Any, costs associated with the loan facility will be charged to the Fund. The Investment Manager may also make use of alternative portfolio management tools, for example exchange traded futures (where permitted) or maintain an increased cash buffer to manage the misalignment being the settlement time of underling securities and the Fund contribution and redemption cycle.

Risks Related to Screening: Certain Funds use a screen (either within an index or which is applied outside of an index) based on criteria which may include certain sustainability-related or other characteristics of a company or other issuer of securities (for the purposes of this disclosure, each, an **"Issuer"**). The screen may be fully or partially designed and/or implemented by the benchmark index provider, the Investment Manager, an affiliate of the Investment Manager or by another party (each referred to as the **"Screen Provider"**). Any assessment of the screen criteria by a Screen Provider is based on data provided by third parties. Such data may be incomplete, inaccurate or unavailable, which could cause incorrect assessment of an Issuer's sustainability or other characteristics. For certain markets and types of Issuer or securities (including, but not limited to, certain government or corporate fixed income securities) there may be significant limitations in the amount of screening data that is available or no screening data may be available such that no screening is performed. In certain situations where screening data is not available for an Issuer, the Screen Provider may, as a proxy, use data relating to a different entity to the Issuer, which presents a risk this data may not accurately reflect the sustainability or other characteristics of the Issuer. In certain situations, even where screening data is available it may not be used as part of the Screen Provider's screening process. The screens used for a Fund may not be adequate for their intended purpose which could result in the improper inclusion or exclusion of Issuers in the investment decision-making process used for the Fund. There is a risk that errors may be made in the screening process. Errors may include, but are not limited to, inclusion of incorrect constituents/exclusion of correct constituents, incorrect interpretation of Issuer characteristics, transcription errors and incorrect assessment and application of the relevant screening criteria. There is an additional risk that a Screen Provider may amend or discontinue its screening services or screening process and that the data sources used by a Screen Provider may change or be discontinued. These circumstances could result in the improper inclusion or exclusion of Issuers in the investment decision-making process used for the Fund. In general, screening occurs at the level of the Issuer rather than at the level of the securities issued by the Issuer. Accordingly, there is a risk that the sustainability or other characteristics of the Issuer of a security held by the Fund are different to the characteristics of the security. The foregoing risks associated with screens, Screen Providers and data sources may result in a Fund holding securities that it seeks not to hold or excluding securities it seeks to include within its portfolio, and may limit the ability of the Fund to achieve its investment objective.

Russia Sanctions Risk: Sanctions threatened or imposed by a number of jurisdictions, including the United States, the European Union and the United Kingdom, and other intergovernmental actions that have been or may be undertaken in the future, against Russia, Russian entities or Russian individuals, may result in the devaluation of Russian currency, a downgrade in the country's credit rating, an immediate freeze of Russian assets, a decline in the value and liquidity of Russian securities, property or interest, and/or other adverse consequences to the Russian economy or a Fund. The scope and scale of sanctions in place at a particular time may be expanded or otherwise modified in a way that have negative effects on a Fund. Sanctions, or the threat of new or modified sanctions, could impair the ability of a Fund to buy, sell, hold, receive, deliver or otherwise transact in certain affected securities or other investment

instruments. Sanctions could also result in Russia taking counter measures or other actions in response, which may further impair the value and liquidity of Russian securities. These sanctions and the resulting disruption of the Russian economy, may cause volatility in other regional and global markets and may negatively impact the performance of various sectors and industries, as well as companies in other countries, which could have a negative effect on the performance of a Fund, even if a Fund does not have direct exposure to securities of Russian issuers. As a collective result of the imposition of sanctions, Russian government countermeasures and the impact that they have had on the trading markets for Russian securities, certain Funds have used, and may in the future use fair valuation procedures approved by the Fund's Board to value certain Russian securities, which could result in such securities being deemed to have a zero value.

Securities Lending Risk*:* A Fund may participate in a securities lending program sponsored by an affiliate of the Investment Manager for the purpose of lending the Fund's securities.

If a Fund engages in securities lending, there is a risk that the borrower may become insolvent or otherwise become unable to meet or refuse to honour its obligations to return equivalent securities to the loaned securities. In this event, the Fund could experience delays in recovering the securities and may incur a capital loss. There is the risk that, when lending portfolio securities, the securities may not be available to the Fund on a timely basis and the Fund may, therefore, lose the opportunity to sell the securities at a desirable price.

If a counterparty defaults and fails to return equivalent securities to those loaned, the Fund may suffer a loss equal to the shortfall between the value of the realised collateral and the market value of the replacement securities. To the extent that any securities lending is not fully collateralised (for example, due to timing lags associated with the posting of collateral), the Fund will have a credit risk exposure to the counterparty of a securities lending contract. Investors should also read the risk warning headed "**Counterparty Risk**" in the "**Risk Information**" section. The Fund could also lose money if the value of collateral falls. These events could trigger adverse tax consequences for the Fund.

SFDR - Fund Classification Risk: SFDR is an EU Regulation that aims to deliver greater transparency on the degree of sustainability of financial products and to harmonise sustainability-related disclosure requirements in the financial services sector. In the first phase of its implementation, information regarding an Investment Manager's approach to the integration of sustainability risks in investment must be included in the Prospectus. As part of this initial phase, all Funds must also be classified under criteria established by SFDR. That is, (i) whether or not Sustainability Risks are integrated into investment decisions made for a Fund (Article 6 of SFDR) and (ii)(a) if a Fund promotes environmental and/or social characteristics (Article 8 of SFDR) or (ii)(b) if a Fund has sustainable investment as its objective (Article 9 of SFDR).

As at the date of this Prospectus, the implementing Regulatory Technical Standards (Level 2) for SFDR have been adopted by the EU Commission. Certain concepts introduced by SFDR are not currently the subject of centralised implementing standards, local guidance or established market practice. The Funds have been assessed and classified in good faith based on the relevant information currently available. As these standards and guidance develop and evolve, the SFDR related disclosures and classification(s) indicated in this Prospectus and the Website are subject to change and may no longer apply.

Sovereign Risk/ Sovereign Debt Obligations Risk: A Fund may invest in debt securities issued by governments or by agencies, instrumentalities and sponsored enterprises of governments. These securities involve the risk that the governmental entities responsible for repayment may be unable or unwilling to pay interest and repay principal when due. A governmental entity's willingness or ability to pay interest and repay principal in a timely manner may be affected by a variety of factors, including its cash flow, the size of its reserves,

its access to foreign exchange, the relative size of its debt service burden to its economy as a whole and political constraints.

A governmental entity may default on its obligations or may require renegotiation or reschedule of debt payments. Any restructuring of a sovereign debt obligation held by a Fund will likely have a significant adverse effect on the value of the obligation. In the event of default of sovereign debt it holds, the Fund may be unable to pursue legal action against the sovereign issuer or to realize on collateral securing the debt.

The value of these securities may be affected by the creditworthiness of the relevant government, including any default or potential default by the relevant government. The sovereign debt of certain governments, including their sub-divisions and instrumentalities, is rated below investment grade ("junk" bonds). Sovereign debt risk may be greater for debt securities issued or guaranteed by emerging and/or frontier countries.

Sustainability Risk: A Fund will indicate that it integrates or does not integrate Sustainability Risk in its Relevant Supplement. Sustainability Risk is defined in SFDR as an environmental, social or governance event or conditions that, if it occurs, could cause an actual or a potential material negative impact on the value of the investment. Integrating Sustainability Risk into the Fund's investment process does not assure the mitigation of all Sustainability Risks relevant to the Fund and the degree to which management of Sustainability Risk can be integrated into the management of the assets of any Fund will depend on the characteristics of that Fund.

A Sustainability Risk event may materially affect the market price or liquidity of an underlying investment. This change to the profile of the underlying investment may only become apparent over time and at the time it is realised in the Fund's portfolio, the change in value or liquidity may be sudden and/or material. Investment decisions that integrate Sustainability Risks may include assumptions as to how such risks may materialise in the future. These assumptions may be incorrect or incomplete and the Sustainability Risk may not manifest at all or as anticipated. Any deterioration in the financial profile of the underlying investment may have a corresponding negative impact on the NAV and/or performance of the investing Fund.

The performance of Funds that do not integrate Sustainability Risk in their investment processes may be more negatively impacted by Sustainability Risk events materialising than those Funds that do.

Tax Risk: The tax information provided in the "**Tax Information**" section is based on the law and rules currently applied in the Grand Duchy of Luxembourg as at the date of this Prospectus and is subject to change (prospective or retroactive) from time to time. Any change in the taxation legislation in Luxembourg or in any jurisdiction where a Fund is registered, listed, marketed or invested could affect the tax status of the Company and any Fund, affect the value of the relevant Fund's investments in the affected jurisdiction, affect the relevant Fund's ability to achieve its investment objective and/or alter the after-tax returns to Shareholders.

The availability and value of any tax reliefs available to Shareholders depend on the individual circumstances of each Shareholder. The information in the "**Tax Information**" section is not exhaustive and does not constitute legal or tax advice. Prospective Shareholders should consult their tax advisors with respect to their particular tax situations and the tax effects of an investment in a Fund. Where a Fund invests in a jurisdiction where the tax regime is not fully developed or is not sufficiently certain, the Company, the relevant Fund, the Investment Manager, the Depositary and the UCI Administrator shall not be liable to account to any Shareholder for any payment made or suffered by the Company or the relevant Fund in good faith to a fiscal authority for taxes or other charges of the Company or the relevant Fund notwithstanding that it is later found that such payments need not or ought not have been made or suffered.

The Company may be liable to taxes (including withholding taxes) in countries other than

Luxembourg on income earned and capital gains arising on its investments. The Company may not be able to benefit from a reduction in the rate of such foreign tax by virtue of the double taxation treaties between Luxembourg and other countries. The Company may not, therefore, be able to reclaim any foreign withholding tax borne by it in particular countries. If this position changes and the Company obtains a repayment of foreign tax, the NAV of a Fund will not be restated and the benefit will be allocated to the then-existing Shareholders rateably at the time of repayment.

Shareholders should be aware that the performance of index tracking Funds, as compared to an index, may be adversely affected in circumstances where the assumptions about tax made by the relevant index provider in their index calculation methodology differ to the actual tax treatment of the underlying securities in the index held within Funds.

Base Erosion and Profit Shifting and Anti-Tax Avoidance Directives. The Organization for Economic Co-operation and Development (the "**OECD**") together with the G20 countries have committed to addressing abusive global tax avoidance, referred to as base erosion and profit shifting ("**BEPS**"), through 15 actions detailed in reports released on 5 October 2015 and through the Inclusive Framework on a global consensus solution to reform the international corporate tax system via a two-pillar plan agreed in 2021 ("**BEPS 2.0**").

As part of the BEPS project, new rules dealing with, inter alia, the abuse of double tax treaties, the definition of permanent establishment, controlled foreign companies, restriction of the deductibility of excessive interest payments, and hybrid mismatch arrangements have been or will be introduced into the respective domestic laws of members of the BEPS project (i.a., by means of European directives and multilateral instruments).

The Council of the European Union ("EU") adopted two Anti-Tax Avoidance Directives (Council Directive (EU) 2016/1164 of 12 July 2016 laying down rules against tax avoidance practices that directly affect the functioning of the internal market ("**ATAD I**") and Council Directive (EU) 2017/952 of 29 May 2017 amending ATAD I as regards hybrid mismatches with third countries ("**ATAD II**")) that address many of the above-mentioned issues. The measures included in ATAD I and ATAD II have been implemented into Luxembourg domestic law by the law of 21 December 2018 (the "**ATAD I Law**") and the law of 20 December 2019 (the "**ATAD II Law**"). Most of the measures have been applicable since 1 January 2019 and 1 January 2020, respectively, while the reverse hybrid rules have been applicable as from tax year 2022. These measures may significantly affect returns to the Company and the Shareholders.

On 22 December 2021, the European Commission issued a proposal for a Council Directive laying down rules to prevent the misuse of shell entities for tax purposes within the EU ("**ATAD III**"). The draft ATAD III rules aim to introduce an EU-wide substance test to facilitate the identification of undertakings that perform no or minimal economic activity, do not have a minimum level of substance and are misused to obtain tax advantages (so-called "shell companies"). The draft rules also provide for specific tax consequences for undertakings that have insufficient substance under ATAD III. There is significant uncertainty as to the development of the draft ATAD III and its implementation into domestic law. This could result in additional reporting and disclosure obligations within the Company structure and/or affect returns to the Company and the Shareholders.

The Multilateral Convention to Implement Tax Treaty Related Measures to Prevent Base Erosion and Profit Shifting (the "**MLI**") was published by the OECD on 24 November 2016. The aim of the MLI is to update international tax rules and lessen the opportunity for tax avoidance by implementing results from the BEPS project in more than 2,000 double tax treaties worldwide. A number of jurisdictions (including Luxembourg) have signed the MLI. Luxembourg ratified the MLI through the Luxembourg law of 7 March 2019 and deposited its instrument of ratification with the OECD on 9 April 2019. As a result, the MLI entered into force for Luxembourg on 1 August

2019. Its application to each individual double tax treaty concluded by Luxembourg depends on ratification by the other contracting state and on the type of tax concerned. The resulting changes and any other subsequent changes to tax treaties negotiated by Luxembourg may significantly affect returns to the Company and the Shareholders.

BEPS 2.0 has two parts, known as Pillar I and Pillar II, which seek to address the tax challenges arising from the digitalisation of the economy, and target large multi-national enterprises ("**MNE**").

Pillar I aims to first introduce a mechanism for the reallocation of taxing rights (called Amount A) over a portion of the residual profits of the largest and most profitable MNEs to market jurisdictions, i.e., jurisdictions in which goods or services are supplied or consumers are located. In October 2023, the Multilateral Convention to Implement Amount A of Pillar I (MLC) was released with the aim of coordinating this reallocation of taxing rights. The text of the MLC is not yet open for signature. In addition, Amount B of Pillar I aims to standardise the remuneration of related party distributors that perform baseline marketing and distribution activities in a manner that is aligned with the arm's length principle. The OECD/G20 Inclusive Framework will approve and publish a final Amount B report, which will be is incorporated into the OECD Transfer Pricing guidelines. For in-scope structures, these measures may affect returns to the Company and the Shareholders.

In December 2021, following a Pillar II agreement signed by more than 135 jurisdictions in October 2021, the OECD published final model rules for a global minimum tax (the "**GloBE rules**"). The GloBE rules aim to ensure that large MNE groups pay a minimum level of tax on the income arising in each of the jurisdictions where they operate, by imposing a top-up tax whenever the effective tax rate, determined on a jurisdictional basis, is below the minimum rate of 15%. Council Directive (EU) 2022/2523 of 14 December 2022 on ensuring a global minimum level of taxation for multinational enterprise groups and large-scale domestic groups in the Union ("**Pillar II Directive**") builds on the GloBE rules and targets any MNE group which has an annual revenue of EUR 750,000,000 or more, including the revenue of excluded entities, in its ultimate parent entity's consolidated financial statements in at least two of the four fiscal years immediately preceding the tested fiscal year and with either a parent entity or a subsidiary located in an EU Member State. Certain entities are excluded from its scope, including i.a. investment entities that are ultimate parent entities and certain entities owned by these excluded entities. The Luxembourg law of 22 December 2023 implements Pillar II Directive ("**Pillar II Law**") by providing for an income inclusion rule ("**IIR**"), an undertaxed profit rule ("**UTPR**"), and a qualified domestic minimum top-up tax rule ("**QDMTT**"). Most provisions will apply to tax years starting on or after 31 December 2023. The provisions on UTPR will in principle apply to tax years starting on or after 31 December 2024. Effective tax rates could increase within the Company's structure (if in scope) due to higher amounts of tax being due or possible denial of deductions. Costs of tax compliance may also increase. This could adversely affect any returns to the Shareholders.

Exchange of information on reportable cross-border arrangements. Following the adoption of the Luxembourg law of 25 March 2020, as amended from time to time (the "**DAC 6 Law**") implementing Council Directive (EU) 2018/822 of 25 May 2018 amending Directive 2011/16/EU as regards mandatory automatic exchange of information in the field of taxation in relation to reportable cross-border arrangements ("**DAC 6**"), certain intermediaries and, in certain cases, taxpayers have to report to the Luxembourg tax authorities within a specific timeframe certain information on reportable cross-border arrangements.

A reportable cross-border arrangement covers any cross-border arrangement that is linked to one or more of certain types of taxes, and contains at least one hallmark (i.e., a characteristic or feature that presents an indication of a potential risk of tax avoidance) as set out in the DAC 6 Law. A cross-border arrangement will only fall within the scope of the DAC 6 Law if one of the following triggering

events occurs: the arrangement is made available, or is ready for implementation, or the first step of the implementation of the arrangement is taken; or aid, assistance or advice is provided with respect to designing, marketing, organising, making available for implementation or managing the implementation of a reportable cross-border arrangement.

The reported information will be automatically exchanged by the Luxembourg tax authorities with the competent authorities of all other EU Member States. As the case may be, the Company may take any action that it deems required, necessary, advisable, desirable or convenient to comply with the reporting obligations imposed on intermediaries and/or taxpayers pursuant to the DAC 6 Law. Failure to provide the necessary information under DAC 6 may result in the application of fines or penalties in the relevant EU jurisdiction(s) involved in the cross-border arrangement at stake. Under the DAC 6 Law, late reporting, incomplete or inaccurate reporting, or non-reporting may be subject to a fine of up to EUR 250,000.

FATCA and CRS. Under the terms of the FATCA Law and the CRS Law, the Company is likely to be treated as a Luxembourg Reporting Financial Institution. As such, the Company may require all Shareholders to provide documentary evidence of their tax residence and all other information deemed necessary to comply with the above-mentioned regulations.

Should the Company become subject to withholding tax and/or penalties as a result of non-compliance under the FATCA Law, and/or penalties as a result of non-compliance under the CRS Law, the value of the Shares held by all Shareholders may be materially affected.

Furthermore, the Company may also be required to withhold tax on certain payments to its Shareholders which would not be compliant with FATCA (i.e., the so-called foreign passthru payments withholding tax obligation).

Temporary Defensive Positions Risk (non-principal risk): In response to actual or perceived adverse market, economic, political, or other conditions, an actively managed Fund may (but will not necessarily), without notice, depart from its investment strategy by temporarily investing for defensive purposes. Temporary defensive positions may include, but are not limited to, cash, cash equivalents, certain government securities, repurchase agreements collateralized by such securities, money market instruments, and high-quality debt investments (provided such investments are consistent with the Fund's investment objective and are in the best interest of the Fund). There is no guarantee that a defensive strategy will work as intended.

In general, index tracking funds seek to track the performance of an index regardless of market conditions and do not take defensive positions. However, in certain situations or market conditions, a Fund may temporarily depart from its normal investment strategy, provided that the alternative is consistent with the Fund's investment objective and is in the best interest of the Fund. For example, the Fund may make larger than normal investments in derivatives to maintain exposure to its specified index if it is unable to invest directly in a component security.

Trading Issues Risk. Although the ETF Shares of a Fund will be listed for trading on the relevant Listing Stock Exchange(s), there can be no assurance that an active trading market for such ETF Shares will develop or be maintained. Trading in ETF Shares on a Listing Stock Exchange may be halted due to market conditions or for reasons that, in the view of the relevant Listing Stock Exchange, make trading in ETF Shares inadvisable. In addition, trading in ETF Shares on a Listing Stock Exchange is subject to trading halts caused by extraordinary market volatility pursuant to stock exchange "circuit breaker" rules. There can be no assurance that the requirements of a Listing Stock Exchange necessary to maintain the listing of a Fund will continue to be met or will remain unchanged or that the ETF Shares will trade with any volume, or at all, on any stock exchange. Furthermore, any securities that are listed and traded on stock exchanges can also be bought or sold by members of those exchanges to and from each other and other third parties on terms and prices that are agreed on an "over-the-counter" basis and may also be

bought or sold on other multi-lateral trading facilities or platforms. The Company has no control over the terms on which any such trades may take place.

Shares purchased on the Secondary Market cannot usually be sold directly back to the Company. Investors must buy and sell ETF Shares on a Secondary Market with the assistance of an intermediary (e.g. a stockbroker) and may incur fees for doing so. In addition, investors may pay more than the current Net Asset Value per Share when buying ETF Shares and may receive less than the current Net Asset Value per Share when selling them. ETF Shares purchased on the Secondary Market cannot usually be sold directly back to the Company. In exceptional circumstances, whether as a result of disruptions in the Secondary Market or otherwise, investors who have acquired ETF Shares on the Secondary Market are entitled to apply to the Company in writing to have the ETF Shares in question registered in their own name, to enable them to access the redemption facilities described in the "Primary Market" section. Investors should refer to the "Purchase and Sale Information" section for further details.

Valuation Risk: A Fund's investments will typically be valued at the relevant market value, in accordance with the Company's Articles and applicable law. In certain circumstances, a portion of a Fund's assets may be valued by the Company at fair value using prices provided by a pricing service or, alternatively, broker-dealers or other market intermediaries (and at times may be a single broker-dealer or other market intermediary) when other reliable pricing sources may not be available. If relevant information is not available from any of those sources or the Company considers it unreliable, the Company may value a Fund's assets based on such other information as the Company may in its discretion consider appropriate. The value established for any portfolio holding at a point in time might differ from what would be produced using a different methodology or if it had been priced using market quotations. Portfolio holdings that are valued using techniques other than market quotations, including fair valued securities, may be subject to greater fluctuation in their valuations from one day to the next than if market quotations were used. There can be no assurance that such prices will accurately reflect the price a Fund would receive upon sale of a security and to the extent a Fund sells a security at a price lower than the price it has been using to value the security, its NAV will be adversely affected. When a Fund invests in other funds or investment pools, it will generally value its investments in those funds or pools based on the valuations determined by the funds or pools, which may not be the same as if the net assets of the funds or pools had been valued using the procedures employed by the Fund to value its own assets.

5. Shares

5.1. Types of Shares

The Company may issue ETF Shares as well as Non-ETF Shares as specified in the following sections of this Prospectus as well as in the Relevant Supplement. Further information in relation to the subscription, conversion, transfer and redemption of ETF Shares as well as Non-ETF Shares is set out below under sections 5.5. and 5.6 of this Prospectus.

5.1.1 Non-ETF Shares

Non-ETF Shares are available in registered form only and ownership will be demonstrated by an entry in the Shareholders' register. Written confirmation of ownership shall be issued to Shareholders; however no physical share certificates will be issued.
Registered Non-ETF Shares may also be issued in fractions of Shares, which are rounded up or down to four decimal places. Fractions less than 0.0001 of a Non-ETF Share will not be issued nor will subscription or redemption monies representing less than 0.0001 of a Non-ETF Share be returned to the Shareholder. Fractional Shares will be entitled to participate on a pro rata basis in the net assets attributable to the Fund or Class to which they belong but do not confer any voting rights on their holder.
Non-ETF Shares do not include rights of priority, subscription rights, options or other special rights. Non-ETF Shares are transferable to eligible investors only.

5.1.2 ETF Shares

The ETF Share Classes are exchange-traded fund classes meaning that each Class will be listed and traded on one or more Listing Stock Exchanges. There are two markets for the ETF Share Classes. The Primary Market is the market on which the ETF Shares are subscribed for or redeemed (off exchange) directly with the Company. Whereas the Secondary Market is the market on which the ETF Shares are traded between investors rather than the Company itself, which may either take place on a Listing Stock Exchange or over-the-counter.

Only Authorised Participants are able to instruct the subscription or redemption of ETF Shares directly with the Company on the Primary Market as described under "Primary Market – Subscription for ETF Shares" and "Redemption of ETF Shares" below. When doing so, Authorised Participants act at their own risks.

Other investors can buy and sell ETF Shares on the Secondary Market through a stockbroker/intermediary on a Recognised Stock Exchange as further outlined under the Section 5.6.2. "Secondary Market" below.

All ETF Shares issued will be in registered form. A written trade confirmation will be sent to investors that have subscribed for ETF Shares. ETF Shares may only be issued as fully paid in whole units.

ETF Shares will be issued in dematerialised non-certificated form in the ICSD subject to the issue of a global share certificate (where required by the ICSD in which the Shares are held). The ICSD for the Funds are currently Euroclear Bank S.A./N.V. and Clearstream Banking, Société Anonyme, Luxembourg, and any successor entity thereto. No individual certificates for ETF Shares will be issued by the Company. The global share certificate will be deposited with the relevant common depositary (being the entity nominated by the relevant ICSD to hold the global share certificate) and registered in the name of the relevant common depositary (or its nominee). The common depositary (or its nominee) will appear as a Shareholder on the register of Shareholders in respect of such ETF Shares. As a result, purchasers of ETF Shares in the Funds will not be recorded as Shareholders on the register of Shareholders of the Company but will hold a beneficial interest in such ETF Shares and the rights of such investors will be governed by their

agreement with their nominee, broker or CSD as appropriate.
The Company or its duly authorised agent may from time to time require investors to provide them with information relating to: (a) the capacity in which they hold an interest in ETF Shares; (b) the identity of any other person or persons then or previously interested in such ETF Shares; (c) the nature of any such interests; and (d) any other matter where disclosure of such matter is required to enable compliance by the Company with applicable laws or the constitutional documents of the Company.

The Company or its duly authorised agent may from time to time request the applicable ICSD to provide the Company with following details: ISIN, ICSD Participant name, ICSD Participant type - Fund/Bank/Individual, residence of ICSD Participant, number of ETF of the Participant within Euroclear or Clearstream, as appropriate, that holds an interest in ETF Shares and the number of such interests in the ETF Shares held by each such Participant.

Participants which are holders of interests in ETF Shares or intermediaries acting on behalf of such account holders will provide such information upon request of the ICSD or its duly authorised agent and have been authorised pursuant to the respective rules and procedures of [Euroclear and Clearstream] to disclose such information to the Company of the interest in ETF Shares or to its duly authorised agent.

Investors may be required to provide promptly any information as required and requested by the Company or its duly authorised agent, and agree to the applicable ICSD providing the identity of such Participant or investor to the Company upon their request.

5.2. Classes

The Company may from time to time offer Shares of each Fund in various Non-ETF Share Classes and ETF Share Classes. Each Class will accommodate different characteristics, such as currency, dividend policies, etc. the details of which are set out in the Relevant Supplement. The Board is authorized to issue Shares in any Class at the respective NAV per Share, determined in accordance with Articles.

In addition, the Board is also authorized to discontinue offering one or more Classes subject to applicable notice and the Articles. Information regarding the availability of Non-ETF Share Classes for each Fund can be found in the Dealing Forms available on the Website. Information regarding the availability of ETF Share Classes for each Fund and further differences between ETF Share Classes and Non-ETF Share Classes can be found on the Website.
A KIID may be obtained for each available Class at the Website.
At the date of this Prospectus, the Company offers the following Classes:

Class	Eligible Investors
A	Financial intermediaries that are prohibited by the local laws or regulations applicable to them to receive and/or keep any commissions or other non-monetary benefits. Distributors rendering portfolio management and investment advice on an independent basis (for Distributors which are incorporated in the European Union those services as defined by MiFID II); or Distributors providing non independent advice who have agreed with their clients not to receive and retain any commissions.
A2	All investors, who meet the minimum initial investment and ongoing holding requirements for this Class to be issued at the discretion of the Board.
B	Institutional Investors who have entered into a Qualifying Agreement.
I	Institutional Investors.
P	All investors.

S	Institutional Investors who meet the minimum initial investment requirement for this Class to be issued at the discretion of the Board.
UCITS ETF Share Class	Available to Authorised Participants on the Primary Market. Available to [eligible] investors on the Secondary Market.

Based on the administrative practice of the CSSF, as of the date of this Prospectus, the Board adopted the following definition of Institutional Investors:

1. Credit institutions or other professionals of the financial sector ("PFS") whether established in Luxembourg or abroad, investing either:
(i) in their own name and on their behalf; OR
(ii) in their own name and on behalf of an "institutional investor"; OR
(iii) in their own name but on behalf of another party who is not an "institutional investor", (the "**Third Party**") provided that:

(a) the Third Party has entered into a *discretionary* management relationship with the credit institution or the other PFS, AND

(b) the Third Party is not entitled to any direct claim against the UCI, but only against the credit institution or the other PFS.

2. Insurance and reinsurance companies: even if policy holders do not qualify as 'institutional', the insurance company may qualify if:
(i) the insurance company is the sole subscriber vis-à-vis the fund, AND
(ii) the policyholder has no direct access to the assets of the fund, *i.e.* he is not entitled to receive, upon termination of the insurance policy, units/shares of the Company.
3. Pension funds/plans, if the beneficiaries of the pension fund/plan are not entitled to any direct claim against the Company.
4. Undertakings for Collective Investment (i.e. other funds), whether domiciled in Luxembourg or abroad, even if their investors are not institutional investors.
5. Local authorities, such as regions, provinces, cantons and municipalities, insofar as they invest their own funds.
6. Holding companies or similar companies which are EITHER:
(i) holding companies or similar companies all the shareholders of which are institutional investors, OR
(ii) holding companies or similar companies all the shareholders of which are not institutional investors provided that EITHER:

(a) they have material substance, a separate structure and activities from those of the shareholders, and hold significant financial interests; OR

(b) they may be regarded as "family" holding companies or similar structures through which a family or a branch of a family holds significant financial interests.

7. Financial or industrial groups.

8. Foundations holding significant other financial investments and having an existence independent from the beneficiaries or recipients of their income or assets. This implies that such foundations must not be "transparent", which would be the case if all their income is redistributed directly to beneficiaries and control were exercised by their beneficiaries.
Certain Classes may not be available for each Fund and certain Funds and/or Classes may not be available in an investor's country of residence or domicile. Further information with respect to the offering of Shares is outlined in the **"Distribution and Selling Restrictions"** section below.

The Board may at a future date create and offer additional Classes in any of the following currencies: AUD, CAD, CHF, DKK, EUR, GBP, HKD, JPY, NOK, NZD, SEK, SGD, USD without the approval of Shareholders. Such new Classes may be issued on terms and conditions that differ from the existing Classes. In such an event, the new Classes will be added to the Relevant Supplement.

5.3. Class Currencies and Class Currency Hedging

Each Fund is denominated in a Base Currency and Classes may be issued, at the discretion of the Board, in that Base Currency or in any of the following Class Currencies: AUD, CAD, CHF, DKK, EUR, GBP, HKD, JPY, NOK, NZD, SEK, SGD, USD. Each Class, may or may not be hedged. Details of the Base Currency and hedging policies of the available Classes are set out in the Relevant Supplement.

Portfolio Hedged Classes aim to reduce the impact of exchange rate fluctuations between the Class Currency and the currency in which the underlying assets are denominated.

NAV Hedged Classes are made available to reduce the impact of exchange rate fluctuations between the currency in which each NAV Hedged Class is denominated and the Base Currency of the Fund. This involves hedging the Fund's Base Currency to the currency of the relevant Class without reference to the currencies represented in the Fund's underlying investment portfolio.

Financial derivative instruments, including forward foreign exchange contracts, will be used to hedge against the effect of changes in the values of foreign currencies on investments a Fund holds or may purchase or on the share class currencies for the NAV Hedged share classes. Currency hedging transactions in respect of a Hedged Class will be clearly attributable to that Class and any costs shall be for the account of that Class only. Accordingly, all such costs, related liabilities and/or benefits will be reflected in the NAV per Share of the Class. The performance of a Fund may be impacted if a Fund is required to hold or to borrow cash in order to satisfy collateral or margin requirements arising under derivatives transactions.

The Company draws Shareholders' attention to the fact that hedging transactions carry specific risks and may not produce expected results. The risk warnings headed "**Currency Risk**" and "**Currency Hedging Risk"** in the "**Risk Information**" section provide further details on these potential risks.

5.4. Minimum investments and holdings for Non-ETF Shares

The minimum initial and subsequent subscription amounts as well as the ongoing minimum holding per Non-ETF Share Class are set out below. These minimums may be waived by the Board or its duly authorised delegate. The Company may redeem holdings of any Shareholder that fall below these minimums at any time.

Class	A	A2	B	I	P*	S
Minimum Initial Investment and Minimum Holding	€250,000 $250,000 £250,000 AUD$250,000 CAD$250,000 CHF250,000 ¥25,000,000 SEK 2,000,000 S$250,000	€300,000,000**	€10,000,000 $10,000,000 £10,000,000 AUD$10,000,000 CAD$10,000,000 CHF10,000,000 ¥1,000,000,000 S$10,000,000	€3,000,000 $3,000,000 £3,000,000 AUD$3,000,000 CAD$3,000,000 CHF3,000,000 ¥300,000,000 SEK 30,000,000 NOK 30,000,000 NZD 5,000,000 S$3,000,000	€50 $50 £50 AUD$50 CAD$50 CHF50 ¥5,000 SEK 500 S$50	$125,000,000

* minimum as indicated in this table or as otherwise set out in the Relevant Supplement;
** or equivalent in the relevant Class currency.

The Minimum Initial Investment and Minimum Redemption amount for Authorised Participants in any ETF Share Class will be specified in the Authorised Participant Operating Guidelines.

Secondary Market investors should consult their intermediary or stockbroker for minimum investment and holding amounts.

5.5. The Non-ETF Shares

This section 5.5 relates only to subscription, redemption and switching of Non-ETF Shares. Investors in ETF Shares should refer to section 5.6 for information on the subscription and redemption of ETF Shares.

5.5.1. Subscription

Application procedure: Initial applications for Non-ETF Shares must be made using the Application Form for each Class that is available from the UCI Administrator or on the Website. Amendments to or updates of the details provided in the Application Form will only be effected by an original written signed instruction.

Completed Application Forms should be sent by facsimile to the UCI Administrator by the Dealing Deadline as specified for each Fund in the Relevant Supplement using the details included in the Application Form. Investors must also send the hard-copy original of the executed Application Form and supporting AML/CFT documentation to the UCI Administrator within 5 Business Days of the Application Form being sent to the UCI Administrator. Failure to provide the above documentation by such time may result in the rejection of the application or in the compulsory redemption of the Non-ETF Shares. The UCI Administrator will seek to return any monies received prior to the Application Form being accepted (minus any handling charge incurred in any such return) as soon as possible by wire transfer (but without interest, costs or compensation). The Company, the UCI Administrator as well as agents of the UCI Administrator have the right to request additional information deemed necessary to process the application, e.g. as to identity and corporate authorisation, and failure to provide such information may prevent the processing of an investor's application. The Company, the UCI Administrator as well as agents of the UCI Administrator, will not accept liability for any loss suffered by applicants as a result of unclear or incomplete applications. No interest will be paid to investors on subscription proceeds received by the Company prior to receiving clear and complete applications.

Subscription procedure: Once the application has been accepted and an appropriate account has been opened by the UCI Administrator, investors may subscribe for Non-ETF Shares on any Dealing Day. Subscription requests can be made by faxing a completed Dealing Form to the UCI Administrator by the Dealing Deadline indicated in the Relevant Supplement. Dealing Forms received after the Dealing Deadline will be treated as a request for subscription on the following Dealing Day, unless otherwise the Board or its duly authorised delegate, in exceptional circumstances, decides to accept subscription requests sent prior to but received after the relevant Dealing Deadline provided that, in all cases, such request is received before the relevant Valuation Point.

Investors may subscribe for Non-ETF Shares directly from the Company.

Investors may also subscribe via dealing platforms or other electronic means which have been approved by the Board or their delegates. Investors wishing to transact through a dealing platform or via electronic means should contact the Company for a list of approved dealing platforms and investors are reminded that they must refer to the provider of the dealing platform or electronic means for the procedures that apply to such trading arrangements. Alternatively, investors may purchase Non-ETF Shares in a Fund using the nominee services offered by a Distributor or sub-distributor or its correspondent bank. Distributors or sub-distributors that offer nominee services are either domiciled in countries that have ratified the resolutions adopted by the FATF or their correspondent bank is domiciled in a FATF country. The Distributor(s), sub-distributor(s) or their correspondent bank(s) may subscribe for and hold the Non-ETF Shares as a nominee in its own name but for the account of the investor and will thereafter send a letter of confirmation to the investor confirming the subscription of the Non-ETF Shares. Investors who use a nominee service may issue instructions to the nominee regarding the exercise of votes conferred by their Non-ETF Shares as well as request direct ownership by submitting an appropriate request in writing to the relevant Distributor or Depositary.

Earlier dealing deadlines may apply for subscriptions via dealing platforms or other electronic means or when using nominee services offered by a Distributor or sub-distributor or its correspondent bank. Investors must refer to the provider of the dealing platform or electronic means or nominee service provider for the dealing deadlines that apply.

The Board or its duly authorised delegate may accept or reject, in whole or in part, any application for Non-ETF Shares at its discretion. If a subscription request is rejected, the UCI Administrator will seek to return any monies received (minus any handling charge incurred in any such return) as soon as possible by wire transfer (but without interest, costs or compensation).

The Board is also empowered to impose such restrictions, including the compulsorily redemption of Non-ETF Shares, it believes are necessary to ensure that no Non-ETF Shares are acquired or held by any person who might expose the Company or any Fund to adverse tax or regulatory consequences or by any person in breach of the law or requirement of any country or governmental authority. In addition, the Board may decide to restrict or suspend the issuance of Non-ETF Shares and/or the switch into Non-ETF Shares for a limited or unlimited duration if this is in the interest of the Company and/or Shareholders, including situations where the Company or a Fund have reached a size that could impact the ability to find suitable investments for the Company and/or Fund.

Settlement of subscription: Subscription payments, in the relevant Class Currency, should be sent by wire transfer to the account specified in the Dealing Form by the Settlement Deadline. Other official currencies of payment are subject to applicable currency exchange rates applied by the UCI Administrator. If cleared funds representing the subscription monies are not received by the Settlement Deadline, any allotment of Non-ETF Shares made in respect of such subscription may be cancelled. The UCI Administrator will inform the investor that the application has been rejected or the subscription cancelled, as applicable, and the money received after the Settlement Deadline, if any, will be returned to the investor at its risks and costs, without interest. Notwithstanding cancellation of the allotment of Non-ETF Shares, the Company may charge the investor for any expense incurred by the Company or the Fund or for any loss to the Fund arising out of such non-receipt or non-clearance. In addition, the Board will have the right to sell all or part of the Shareholder's holding of Non-ETF Shares in the relevant Class in order to meet those charges.

More specifically, the Company may restrict or prevent the ownership of Non-ETF Shares in the Company by any person, firm or corporate body, and without limitation, by any "U.S. person", as defined hereafter. For such purposes, the Company may:

- decline to issue any Non-ETF Share and decline to register any transfer of a Non-ETF Share, where it appears to it that such registry or transfer would or might result in beneficial ownership of such share being vested in a person who is precluded from holding Non-ETF Shares in the Company;
- at any time require any person whose name is entered in, or any person seeking to register the transfer of Non-ETF Shares on, the register of Shareholders to furnish it with any information, supported by affidavit, which it may consider necessary for the purpose of determining whether or not, to what extent and under which circumstances, beneficial ownership of such Shareholder's Non-ETF Shares rests or will rest in a person who is precluded from holding Non-ETF Shares in the Company; and
- where it appears to the Company that any person who is precluded from holding Non-ETF Shares in the Company either alone or in conjunction with any other person is a beneficial owner of Non-ETF Shares, compulsorily redeem from any such Shareholder all Non-ETF Shares held by such Shareholder in the following manner:
    1. the Company shall serve a notice (hereinafter called the "redemption notice") upon the Shareholder, bearing such Non-ETF Shares or appearing in the register of Shareholders as the owner of the Non-ETF Shares to be redeemed, specifying the Non-ETF Shares to be redeemed as aforesaid,

the price to be paid for such Non-ETF Shares, and the place at which the redemption price in respect of such Non-ETF Shares is payable. Any such notice may be served upon such Shareholder by posting the same in a prepaid registered envelope addressed to such Shareholder at his last address known to or appearing in the books of the Company. The said Shareholder shall thereupon forthwith be obliged to deliver to the Company the Non-ETF Share certificate or certificates representing the Non-ETF Shares in the redemption notice. Immediately after the close of business on the date specified in the redemption notice, such Shareholder shall cease to be a Shareholder and the Non-ETF Shares previously held by him shall be cancelled.

2. The price at which the Non-ETF Shares specified in any redemption notice shall be redeemed (hereinafter called "the redemption price") shall be an amount equal to the per Non-ETF Share NAV of shares in the Company of the relevant Fund, determined in accordance with the Articles, and may be reduced in accordance with the previsions of the Articles.
3. Payment of the redemption price will be made to the owner of such Non-ETF Shares in Euro, except during periods of exchange restrictions, and will be deposited by the Company with a bank in Luxembourg or elsewhere (as specified in the redemption notice) for payment to such owner upon surrender of the Non-ETF Share certificate or certificates representing the Non-ETF Shares specified in such notice. Upon deposit of such price as aforesaid no person interested in the Non-ETF Shares specified in such purchase notice shall have any further interest in such Non-ETF Shares or any of them, or any claim against the Company or its assets in respect thereof, except the right of the Shareholder appearing as the owner thereof to receive the price so deposited (without interest) from such bank upon effective surrender of the Non-ETF Share certificate or certificates as aforesaid.
4. The exercise by the Company of the powers conferred by the Articles in this respect shall not be questioned or invalidated in any case on the ground that there was insufficient evidence of ownership of Non-ETF Shares by any person or that the true ownership of any Non-ETF Shares was otherwise than appeared to the Company at the date of any redemption notice, provided that in such case the said powers were exercised by the Company in good faith; and

- decline to accept the vote of any person who is precluded from holding Non-ETF Shares in the Company at any meeting of Shareholders of the Company.

The term "U.S. Person" shall have the meaning set forth in Regulation S of the US Securities Act.

Subscription pricing: Except during an initial offer period, the Board operates "forward pricing" for all Funds and Classes, i.e. by reference to the Subscription Price calculated as at the Valuation Point for the relevant Dealing Day. A Dilution Adjustment may be included in the Subscription Price. See "**Dilution Adjustment**" below.

Subscription in-kind: With prior approval of the Board, investors may be permitted to subscribe for Non-ETF Shares in-kind, provided the composition of such contribution in-kind is consistent with the investment limits contained in this Prospectus as well as with the investment objective and policy of the Fund as described in the Relevant Supplement. In accepting or rejecting such a contribution at any given time, the Company shall take into account the interest of other Shareholders and the principle of fair treatment. With regard to the subscription in-kind, the Auditor will execute a special audit report and any costs associated with the subscription in-kind, including the cost of the special audit report, will be borne by the subscribing Shareholder.

Local rules: As a result of the registration of one or several Funds for public distribution in a non-EU Member State, additional, local requirements may apply to subscriptions for Shares.

5.5.2. Redemption

Redemption procedure: Redemption requests can be made on any Dealing Day and must be made using the Dealing Form which is available from and should be sent to the UCI Administrator in accordance with the instructions on that form by the Dealing Deadline indicated in the Relevant Supplement. Dealing Forms received after the Dealing Deadline will be treated as a request for redemption on the following Dealing Day unless the Board or its duly authorised delegate, in exceptional circumstances, decides to accept redemption requests sent prior to but received after the relevant Dealing Deadline provided that, in all cases, such request is received before the relevant Valuation Point. Redemption requests shall be irrevocable. Shareholders who subscribed for Non-ETF Shares via a dealing platform or other electronic means may only request redemption of their Non-ETF Shares via this same dealing platform or electronic means. The Company or the UCI Administrator will only process redemption applications that it considers clear and complete. Applications will be considered complete only if the Company or the UCI Administrator has received all information and supporting documentation it deems necessary to process the application. Unclear or incomplete applications may lead to delays in their execution. The Company, the UCI Administrator as well as agents of the UCI Administrator will not accept liability for any loss suffered by applicants as a result of unclear or incomplete applications.

The redemption of Non-ETF Shares of a Fund or Class shall be suspended whenever the determination of the NAV per Non-ETF Share of such Fund or Class is suspended by the Company, as described in the section "**Temporary Suspension of NAV calculation and Dealings**" below. The redemption of shares of a Fund or Class may also be suspended in other exceptional cases where the circumstances and the best interest of the Shareholders so require.

Redemption limits: If redemption requests received in respect of Non-ETF Shares of a particular Fund on any Dealing Day total, in aggregate, more than 10% of the outstanding Non-ETF Shares of that Fund, the Company is not obliged to redeem on any Dealing Day or within a period of seven (7) consecutive Dealing Days more than 10% of the outstanding Non-ETF Shares of any one Fund. Alternatively, the Board may, at its discretion, defer redemption requests for an amount of Non-ETF Shares exceeding 10% up to the seventh consecutive Dealing Day. If the Fund refuses to redeem Non-ETF Shares for the above reasons, such applications for redemption of Non-ETF Shares will take precedence over applications subsequently received.

Where the Funds invest in other UCIs and/or UCITS they may be subject to redemption gates that limit the amount of shares or units to be redeemed on any one working day, redemption fees or suspension of redemptions.

Settlement of redemption: Redemption proceeds will normally be paid two (2) bank business days in Luxembourg after the date on which the NAV was calculated, or after such other period as the Board may determine in their discretion, provided the UCI Administrator has received the original Application Form and all required supporting AML/CFT documentation. As may be required by settlement and/or other constraints prevailing in the market on which a substantial portion of the relevant Fund's investments is traded, the Board may extend the payment period up to and including forty-five (45) bank business days in Luxembourg for Funds whose investment objective and policy provides for investments in securities of issuers in emerging countries and (ii) Funds invested in UCIs and/or UCITS, which are effectively subject to redemption gates or suspension of redemptions. Payment of redemption proceeds will be made only to the account of record, at the risks and costs of the redeeming Shareholder, and are generally made in the relevant Class currency. Other official currencies of payment are subject to

applicable currency exchange rates applied by the UCI Administrator.
The Company, the UCI Administrator as well as agents of the UCI Administrator will not accept responsibility for any delays or charges incurred at any receiving bank or clearing system.

Redemption Pricing: All redemption requests are dealt with on a "forward" pricing basis, i.e. by reference to the Redemption Price calculated as at the Valuation Point for the relevant Dealing Day. This fee will be for the benefit of the Fund and Shareholders will be notified in their contract notes if such a fee has been charged. This fee will be further to any Dilution Adjustment that may be added to the Redemption Price. See "**Dilution Adjustment**" below.

Redemption in-kind: In the Board's discretion, the Company may choose to redeem Non-ETF Shares in kind where the redeeming Shareholder requests such a redemption. All Shareholders shall be treated fairly. Any redemption in kind will be valued independently in a special report issued by the Auditor or any other independent auditor (*réviseur d'entreprises agréé*) agreed by the Company. The costs associated with the redemption in-kind shall be borne by the redeeming Shareholder.

Compulsory redemption: The Shares of the Company, the Non-ETF Shares of any Fund, or the Non-ETF Shares of a particular Shareholder, as applicable, may be compulsorily redeemed by the Board in the following circumstances:

- the NAV of all outstanding Non-ETF Shares of the Company is less than €100,000,000;
- the NAV of a Fund falls below €100,000,000;
- the Board deems it necessary because of changes in the economic or political circumstances that affect the Fund;
- the Shares are acquired by investors who do not satisfy applicable eligibility requirements; or
- a redemption request causes a Shareholder's holding in a Fund to fall below the minimum holding.

The Shares will be redeemed at the Redemption Price on the relevant Dealing Day. All redeemed Shares will be cancelled.
Local rules: As a result of the registration of one or several Funds for public distribution in a non-EU Member State, additional, local requirements may apply to redemption requests, redemption limits and deferral of redemptions as well as redemption payments.

5.5.3. Switching

Switching procedure: Applications for a Switch of all or part of a Shareholder's Shares in a Fund (the "**Original Shares**") into shares of another Class of the same Fund can be made on any Dealing Day. Switching applications must be made by using a Switching Form which is available from and should be sent to the UCI Administrator by the Dealing Deadline indicated in the Relevant Supplement.
It should be noted that the right to switch Shares is subject to compliance with any investor eligibility requirements which may result from the conversion of the Original Shares into Shares of another Class of the same Fund (the "**New Shares**").
In addition, switching applications are subject to the provisions on the minimum initial or additional subscription amounts applicable to the New Shares and the minimum holding amount applicable to the Original Shares.
The number of Shares issued upon switching will be based on the respective NAVs per Share of the Original Shares and the New Shares on the day of the switching. The Original Shares will be redeemed and the New Shares will be issued on such day.
The Company or the UCI Administrator will only process switching applications that they consider clear and complete. Applications will be considered complete only if the Company or the UCI Administrator has received all information and supporting documentation it deems necessary to process the application. The Company or the UCI Administrator may delay the acceptance of unclear or incomplete applications until reception of all necessary information and supporting documentation in a form satisfactory to the Company or the UCI Administrator. Unclear or incomplete applications may lead to delays in their execution. The Fund, the UCI Administrator as

well as agents of the UCI Administrator will not accept liability for any loss suffered by applicants as a result of unclear or incomplete applications.

The Company reserves the right to reject any application for switching of Original Shares to New Shares, in whole or in part, including, without limitation, where the Company decides to close a Class to new subscriptions or new investors.

The switching of Shares shall be suspended whenever the determination of the NAV per Share of the Original Shares or the New Shares is suspended by the Company in accordance with section "**Temporary Suspension of NAV calculation and Dealings**" below, or when the redemption of Original Shares or the subscription for New Shares is suspended in accordance with the Articles and this Prospectus.

Any request to convert Shares from one Fund to another Fund will be treated as a redemption from one Fund followed by a subscription into another Fund. Such operation may have tax implications for a Shareholder.

5.6. The ETF Shares

This section 5.6 relates only to the subscription and redemption of ETF Shares. Investors in Non-ETF Shares should refer to section 5.5 for information on the subscription, redemption and switching of Non-ETF Shares.

5.6.1. Primary Market

Subscription For ETF Shares. The provisions below apply to subscriptions for ETF Shares made directly to the Company only and not to purchase of ETF Shares on Secondary Markets. Applications for subscriptions directly to the Company in respect of ETF Shares may only be made by Authorised Participants. All other investors may purchase ETF Shares through Authorised Participants on the Secondary Market, as described below in the section entitled "Secondary Market – Secondary Market Purchases and Sales". This restriction does not apply in the case of Non-ETF Shares which may be issued directly by the Company to all prospective investors. Subscriptions for ETF Shares in a Fund may be made, at the discretion of the Directors, in cash. In view of a potential failure of an Authorised Participant to settle and/or complete a dealing request, Investors should also read the risk warning headed "Failure to Settle – ETF Shares" in the "Risk Information" section.

Initial Subscriptions. ETF Shares in any Fund will be issued initially at the price specified in the Relevant Supplement and, thereafter, at the Net Asset Value per Share as specified in the Relevant Supplement. Subscriptions for ETF Shares will be considered upon receipt by the UCI Administrator of completed Application Form which satisfy the application requirements including, but not limited to, AML/CFT documentation and must be settled with, cleared funds and/or any other appropriate consideration as specified below. Such ETF Shares will be issued in accordance with the provisions of the Relevant Supplement.

Subsequent Subscriptions. Shareholders may submit subsequent applications, without a requirement to submit original documentation, for ETF Shares in a Fund to the UCI Administrator either by fax or electronically in such format or method as shall be agreed in advance in writing with the UCI Administrator in accordance with the requirements of the CSSF.

Minimum Subscription Amounts. Shareholders who subscribe for ETF Shares, in any of the ways described below, must subscribe an amount that is at least equal to the Minimum Subscription Amount. The Minimum Subscription Amount may differ for initial subscriptions and subsequent subscriptions and may be waived by the Directors in their absolute discretion or by duly authorised delegates. The Minimum Subscription Amount for any Fund will be specified in the Authorised Participant Operating Guidelines.

Application Forms. Signed original subscription application forms and supporting AML/CFT documentation should be sent by post to the UCI Administrator in accordance with the details set out in the subscription application form. Amendments to a Shareholder's registration details and payment instructions will only be effected upon receipt of original documentation.

Cash Subscriptions. Investors may subscribe for ETF Shares for cash on each Dealing Day by making an application before the dealing deadline specified for each Fund in the Relevant Supplement. Any properly made application received by the UCI Administrator after the time specified in the Relevant Supplement will not be deemed to have been accepted until the following Dealing Day provided always that the Management Company may decide, in exceptional circumstances, to accept subscriptions after the relevant dealing deadline provided that they are received before the relevant Valuation Point. Subscription monies in the currency in which the relevant ETF Shares are denominated should be sent by wire transfer to the relevant account specified in the subscription application form no later than the time specified in the Relevant Supplement. If cleared funds representing the subscription monies (including all Duties and Charges) are not received by the Company by the time and date specified in the Relevant Supplement, the Management Company reserves the right to cancel any provisional allotment of ETF Shares and may seek to recover any relevant credit charges incurred by the Company in respect of the allotment.

Redemption of ETF Shares. The provisions set out below apply only to redemptions of ETF Shares by the Company to Primary Market investors, such as Authorised Participants in relation to ETF Shares and not to disposals of ETF Shares on the Secondary Markets. ETF Shares purchased on the Secondary Market cannot usually be sold directly back to the Company. Investors must buy and sell shares on a Secondary Market with the assistance of an intermediary (eg a stockbroker) and may incur fees for doing so. In addition, investors may pay more than the current NAV when buying shares and may receive less than the current NAV when selling them. However, in exceptional circumstances, investors who have acquired ETF Shares on the Secondary Market may be entitled redeem their ETF Shares directly with the Company as described below in the section entitled **"Secondary Market – Secondary Market Purchases and Sales"**.

Redemption Applications. Shareholders may request the Company to redeem their ETF Shares on any Dealing Day in accordance with the following redemption procedures and as specified in the Relevant Supplement. The Management Company may decide to accept, in exceptional circumstances, redemption requests sent prior to but received after the relevant dealing deadline provided that, in all cases, they are received before the relevant Valuation Point. A properly completed redemption instruction must be received by the UCI Administrator by fax or, if agreed with the UCI Administrator, by electronic means before the dealing deadline on the relevant Dealing Day specified in the Relevant Supplement provided that, in the case of faxed redemption requests, payment of redemption proceeds will be made only to the account of record. The Directors may, in their absolute discretion, reject
a request to redeem ETF Shares, in whole or in part, where the Directors or their duly authorised delegates have reason to believe that the request is being made fraudulently.

Minimum Redemption Amount. Shareholders who wish to redeem Shares may only redeem Shares with a value that is at least equal to the Minimum Redemption Amount. The Minimum Redemption Amount may be waived by the Directors in their absolute discretion or by duly authorised delegates. The Minimum Redemption Amount for any Fund will be specified in the Authorised Participant Operating Guidelines.

Redemptions for Cash. Shareholders may request the redemption, in cash, of ETF Shares on any Dealing Day at the NAV per Share as of the relevant Dealing Day. The UCI Administrator or the Management Company (or their duly authorised delegates) may refuse to process a redemption request until proper information has been provided. Any amendments to a Shareholder's registration detail or payment instructions will only be effected upon receipt of original documentation by the UCI Administrator. All redemptions for cash will be subject to an appropriate provision for Duties and Charges. Payment for ETF Shares redeemed will be effected no later than

ten (10) Business Days after the relevant dealing deadline. Redemption proceeds in the Base Currency of the Class will be paid by wire transfer to the appropriate bank account as notified by the redeeming Shareholder. The cost of any transfer of proceeds by wire transfer will be deducted from such proceeds. Payment will be made only to an account in the name of the registered Shareholder. The ETF Shares shall be redeemed at the NAV per Share on the Dealing Day on which redemption is effected.

Redemption Proceeds. Redemptions proceeds in cash will only be released where the UCI Administrator has received the original application form and all requested supporting AML/CFT documentation. Where ETF Shares are issued in dematerialised form in one or more recognised clearing and settlement systems, redemption of these ETF Shares can only be completed by the delivery of those ETF Shares back through that recognised clearing and settlement system. Redemption instructions received after the relevant deadlines will be held over and dealt with on the following Dealing Day, unless the Directors (or their duly authorised delegates) otherwise determine. Redemption instructions should be sent by facsimile (or by electronic means if agreed with the UCI Administrator) to the UCI Administrator. Shareholders will not be entitled to withdraw redemption requests unless otherwise agreed by the Directors in consultation with the UCI Administrator.

Redemption Limits. If redemption requests received in respect of Shares of a particular Fund on any Dealing Day total, in aggregate, more than 10% of all of the issued ETF Shares of that Fund on that Dealing Day, the Management Company shall be entitled, at its absolute discretion, to refuse to redeem such number of ETF Shares of that Fund on that Dealing Day, in excess of 10% of the issued ETF Shares of the Fund, in respect of which redemption requests have been received, as the Management Company shall determine. If the Management Company refuses to redeem ETF Shares for this reason, the requests for redemption on such date shall be reduced rateably and the ETF Shares to which each request relates which are not redeemed shall be redeemed on each subsequent Dealing Day (but shall not receive priority on such subsequent Dealing Day), provided that the Company shall not be obliged to redeem more than 10% of the number of ETF Shares of a particular Fund outstanding on any Dealing Day, until all the ETF Shares of the Fund to which the original request related have been redeemed.

Compulsory Redemptions of ETF Shares. A Fund is established for an unlimited period and may have unlimited assets. However, a Fund may (but is not obliged to) redeem all of the ETF Shares of any Class in issue if:

a) the Board deems it appropriate because of adverse political, economic, fiscal or regulatory changes affecting the relevant Fund in any way;

b) The NAV of all outstanding ETF Shares of the Company is less than €100,000,000;

c) the NAV of the relevant Fund falls below €100,000,000 or the prevailing currency equivalent in the currency in which Shares of the relevant Fund are denominated;

d) The ETF Shares are acquired by investors who do not satisfy applicable eligibility requirements; or

e) the ETF Shares in the relevant Fund cease to be listed on a Listing Stock Exchange.

If the Depositary has given notice of its intention to retire and no new depositary acceptable to the Company and the CSSF has been appointed within ninety (90) days of such notice, the Company shall apply to the CSSF for revocation of its authorisation and shall redeem all of the Shares of any Class in issue.

In each such case, the ETF Shares of a Class shall be redeemed after giving not less than one (1) month's but not more than three (3) months' prior notice to all holders of such ETF Shares. The ETF Shares will be redeemed at the NAV per Share on the relevant Dealing Day less any Duties and Charges.

Directed Trading. Authorised Participants in the Primary Markets may request the execution of a transaction, including, without limitation, the sale or purchase of securities on their

behalf, either as part of a subscription or a redemption, in accordance with specific terms. These terms may include, without limitation, the use of a particular broker or market or other terms which are not in accordance with the standard terms on which the Investment Manager executes transactions for the Company generally, having regard to its obligation to provide best execution to the Company. Any investor wishing to instruct a transaction on such specific terms should contact the Investment Manager in good time in advance of any proposed trade date to propose the terms of such transaction, provided that neither the Company nor the Investment Manager shall be under any obligation to consent to any such proposal. Investors should note that none of the Company, the Investment Manager or their agents accept any liability for any loss, damage or delay caused by compliance with any such terms agreed with an investor. Investors should also read the risk warning headed **"Directed Trading Risk"** in the **"Risk Information"** section.

5.6.2. Secondary Market

Secondary Market Purchases and Sales of ETF Shares. The ETF Shares are listed for secondary trading on each Listing Stock Exchange and individual ETF Shares may be purchased and sold on Listing Stock Exchanges through a broker-dealer. The opening and closing days for the Listing Stock Exchanges will be specified on the Website. If an investor buys or sells ETF Shares in the Secondary Market, such investor will pay the Secondary Market price for ETF Shares. In addition, an investor may incur customary brokerage commissions and charges and may pay some or all of the spread between the bid and the offered price in the Secondary Market on each leg of a round trip (purchase and sale) transaction. Investors should also read the risk warnings headed **"Costs Of Buying And Selling Shares Risk"** and **"Trading Issues Risk"** in the **"Risk Information"** section.

ETF Shares purchased on the Secondary Market cannot usually be sold directly back to the Company. In exceptional circumstances as determined by the Directors, whether as a result of disruptions in the Secondary Market or otherwise, investors who have acquired ETF Shares on the Secondary Market are entitled to apply to the Company in writing to have the ETF Shares in question registered in their own name, to enable them to access the redemption facilities described above in the **"Primary Market"** section. In such event, the relevant Listing Stock Exchange would be duly informed that the relevant Fund is open for direct redemptions at the level of the Fund. Investors wishing to do so should contact the UCI Administrator to provide such proper information, including original documentation, as the UCI Administrator shall require in order to register the investor as a Shareholder. A charge, which shall be at normal market rates, may apply for this process as further described in the definition of "Duties and Charges".

Secondary Market Prices. The trading prices of a Fund's ETF Share will fluctuate continuously throughout trading hours based on market supply and demand rather than the NAV per Share, which is only calculated at the end of each business day. The ETF Shares will trade on the Listing Stock Exchange at prices that may be above (i.e., at a premium) or below (i.e., at a discount), to varying degrees, the NAV per Share.

In this regard, certain Authorized Participants and non-Authorized Participants exercising the function as a Market Maker, may play a two-folded role in maintaining liquidity as regards the ETF Shares in the Secondary Market: While simultaneously providing offers to buy (bid) and sell (ask) the ETF Shares at specified prices, Market Makers support the provision of liquidity of the ETF Shares to other participants in the Secondary Market and facilitate efficient and orderly trading of the ETF Shares on the Secondary Market. At the same time Market Makers may benefit from the differences between the quotes of their buy (bid) - and sell (ask) offers as regards the ETF Shares as well as certain arbitrage opportunities between the NAV of the ETF Shares and its market price. This process facilitated by the Market Makers simultaneously supports the transparency and stability of the prices of the ETF Shares on the Secondary Market in line with the NAV of the ETF Shares.

Nevertheless, the trading prices of a Fund's ETF Share may deviate significantly from the

NAV per Share during periods of market volatility and may be subject to brokerage commissions and/or transfer taxes associated with the trading and settlement through the Listing Stock Exchange. There can be no guarantee that once the ETF Shares are listed on a stock exchange they will remain listed. Information showing the number of days the market price of a Fund's ETF Shares was greater than the NAV per Share and the number of days it was less than the NAV per Share (i.e., premium or discount) for various time periods is available on the Website. Investors should also read the risk warning headed **"Fluctuation of Net Asset Value"** in the **"Risk Information"** section.

An i**NAV** which is an estimate of the NAV per Share calculated using market data will be disseminated at regular intervals throughout the day. The iNAV is based on quotes and last sale prices from the securities' local market and may not reflect events that occur subsequent to the local market's close. Premiums and discounts between the iNAV and the market price may occur and the iNAV should not be viewed as a "real-time" update of the NAV per Share, which is calculated only once a day. The inability of the Management Company's designated iNAV service provider to provide an iNAV, on a real-time basis, or for any period of time, will not in itself result in a halt in the trading of the ETF Shares on a Listing Stock Exchange, which will be determined by the rules of such Listing Stock Exchange in such circumstances. An inaccuracy in the iNAV could result from various factors, including the difficulty of pricing the Fund's assets on an intra-day basis. Investors interested in buying for or selling ETF Shares on a Listing Stock Exchange should not rely solely on any iNAV which is made available in making investment decisions, but should also consider other market information and relevant economic and other factors (including, where relevant, information regarding the portfolio of the relevant Fund). Neither the Funds, nor the Investment Manager or any of their affiliates, nor any third party calculation agents involved in, or responsible for, the calculation or publication of such iNAVs makes any warranty as to their accuracy. Details of the iNAV for each Fund are available on the Website.

5.7. Dilution Adjustment

A Fund may suffer dilution of the NAV per Share due to investors buying or selling Shares in a Fund at a price that does not reflect the dealing and other costs that arise when security trades are undertaken by the Investment Manager to accommodate cash inflows or outflows. In order to mitigate the effects of dilution on remaining Shareholders and to allocate such costs to the redeeming, subscribing or converting Shareholder, the technique described below may be applied to protect the interests of Shareholders. The Relevant Supplement will indicate technique used in relation to the relevant Share Class and the maximum adjustment applied. In the case of Non-ETF Share Classes dealing and other costs that arise when security trades are undertaken are provided for through an adjustment in the NAV per Share, known as a "Swing Pricing Adjustment". Please refer to "Duties and Charges definition included in the "Glossary" section of this Prospectus for information in relation to the treatment of dealing and other costs that arise when ETF Shares trade.

Swing Pricing Adjustment: an adjustment of the NAV of the Non-ETF Share Class of the relevant Fund by an amount not exceeding either 2% or 3% of the NAV per Share under normal market conditions (the "**Swing Factor**") depending on each Fund's investment policy as detailed in the Relevant Supplement. However, whilst the adjustment is normally not expected to exceed the threshold set out in the Relevant Supplement, the Board or the Board of Directors, may decide to increase the Swing Pricing Adjustment limit in exceptional circumstances to protect Shareholders' interests. As any Swing Pricing Adjustment will be dependent on aggregate net transactions in Shares, it is not possible to accurately predict whether an adjustment will occur at any future point in time and if so, how frequently it will need to be made. Shareholders will be informed about any such increase of the Swing Pricing Adjustment limit and the Swing Factor actually applied in accordance with applicable laws and regulations.

The Swing Pricing Adjustment is used to reflect the dealing costs that may be incurred by the Fund and the estimated bid/offer spread of the assets in which the Fund invests and generally will be applied on any Dealing Day when the aggregate total of subscriptions, switches or redemption of Shares of all Classes of a Fund result in a net capital inflow or outflow which exceeds a pre-determined threshold, as determined and reviewed by the Company from time to time for that Fund. In addition, the Board may agree to include anticipated fiscal charges, trading costs and related expenses in the amount of the adjustment. The Swing Pricing Adjustment will be an addition when the net movement results in a net capital inflow from all Classes the Fund and a deduction when it results in a net capital outflow. As certain stock markets and jurisdictions may have different charging structures on the buy and sell sides, the resulting adjustment may be different for net inflows than for net outflows. A periodical review will be undertaken in order to verify the appropriateness of the Swing Factor in view of market conditions. In certain circumstances, the Board may decide that it is not appropriate to make such an adjustment. The volatility of the NAV of the Fund might not reflect the true portfolio performance (and therefore might deviate from the Fund's benchmark, where applicable) as a consequence of the application of swing pricing.

5.8. Distribution

Shareholders of each Fund are entitled to their share of a Fund's income and net realised gains on its investments. Each Fund typically earns income in the form of dividends from stocks, interest from debt securities and, if relevant, securities lending income. Each Fund realises capital gains or losses whenever it sells securities.

All Classes available in each Fund may include both accumulating Shares, which capitalise their entire earnings, and distributing Shares, which may distribute capital gains and income to Shareholders in or around April. At the date of this Prospectus, all available Share Classes may not be seeded. UCITS ETF Share Classes are available Accumulating only. All Non-ETF Share Classes are available as Accumulating or Distributing income. The distribution policy of any Fund or of any Class may be changed by the Board upon reasonable notice to Shareholders of that Fund or Class as the case may be and, in such circumstances, the distribution policies will be disclosed in an updated Prospectus and/or Relevant Supplement.

Dividends in respect of each Class of distributing Shares will be declared annually by the annual general meeting of Shareholders, upon proposal by the Board. Dividends can also be declared as interim dividends by the Board in accordance with the Articles and the applicable law. Special dividend arrangements relating to a particular Fund or Class will be decided by the Board. Any dividend paid on a Share that has not been claimed will not earn interest and, if not claimed within five years of its declaration, will be forfeited and will accrue for the benefit of that Fund or Class.

5.9. Excessive Trading Policy

Subscriptions and redemptions shall be made for investment purposes only and the Company does not permit market timing (as set out in CSSF circular 04/146) or related excessive trading practices. Excessive trading includes investors, individually or as a group, whose securities transactions are excessively frequent and large in size and seem to follow a timing pattern. Such practices may adversely impact the performance of the Funds and the interest of all Shareholders.

While the Company and its Funds do not knowingly allow investments that are associated with excessive trading practices, Shareholders and potential Shareholders should, nevertheless, be aware that investments in the Funds may be made for various investment purposes by different types of investors, including but not limed to asset allocation or structured product providers. Such investors require periodic re-balance and re-allocation of their assets, and also between Funds. This activity, under normal circumstances, is not classified as excessive trading. Where, in the opinion of the Board, an investor's trading appears to constitute excessive trading, the Company may compulsorily redeem the Shares of a

Shareholder engaging in or having engaged in such practices. Further, the Company may reject any subscription or switching order it suspects is related to such practices. The Company shall not be liable for any gain or loss resulting from such rejected applications for subscription or switching or compulsory redemptions.

5.10. Prevention of Money Laundering

In order to prevent the use of funds for money laundering and financing of terrorism ("**ML/FT**") purposes, the Company will ensure compliance with the applicable Luxembourg laws and regulations in relation to AML/CFT, including but not limited to the "**AML/CFT Rules**").

Amongst others, the AML/CFT Rules require to establish and verify the identity of a potential shareholder, and, as the case may be, of any person acting on behalf of such shareholder as well as of the beneficial owner. The identity of a potential shareholder should be verified on the basis of documents, data or information obtained from a reliable and independent source and depending on the legal form of the investor (individual, corporate or other category of investor).

Depending on the circumstances of each application and in accordance with the AML/CFT Rules, a simplified customer due diligence might be applicable, in situations where the Company has assessed that the risk of ML/FT is low. In such case the customer due diligence measures may be adjusted in timing, amount or type of information to be received.

In case of higher risk situations, the Company will apply enhanced customer due diligence measures in accordance with the AML/CFT Rules to manage and mitigate those risks appropriately.

6. Valuation and Calculation of NAV

6.1. Calculation of NAV

The UCI Administrator will carry out the calculation of the NAV of each Fund and the NAV per Share on each Dealing Day and at least twice monthly. The NAV of a Fund is made up of the value of the assets of the Company less its liabilities.

The NAV of the Fund or Class per Share will be calculated by dividing the NAV of the relevant Fund or Class by the number of Shares of the relevant Fund or Class outstanding as of the relevant Dealing Day and will be rounded up or down to the nearest fourth decimal.

Unless otherwise determined by the Board in accordance with the Articles, the NAV per Share of each Fund will be expressed in its Base Currency and the NAV per Share of each Class will be expressed in its Class Currency, if different from the Base Currency.

The NAV of the Fund or Class will be calculated to two (2) decimal places and the NAV per Share of the Fund or Class will be calculated to four (4) decimal places, as the Board may determine from time to time.

6.2. Valuation Procedure

6.2.1. Assets of the Company

Subject to the rules on allocation of assets and liabilities of the Company to the Funds and Classes in the "**Allocation of assets and liabilities**" section, the assets of the Company shall include the following:

- all cash on hand or on deposit, including any interest accrued thereon;
- all bills and demand notes and accounts receivable (including proceeds of securities sold but not delivered) except those receivable from a subsidiary of the Company;
- all bonds, time notes, shares, stock, debenture stocks, subscription rights, warrants, options and other investments and securities owned or contracted for by the Company;
- all stock, stock dividends, cash dividends and cash distributions receivable by the Company to the extent information thereon is reasonably available to the Company (provided that the Company may make adjustments with regard to fluctuations in the market value of securities caused by trading ex-dividends, ex-rights or by similar practices);
- all interest accrued on any interest-bearing securities owned by the Company except to the extent that the same is included or reflected in the principal amount of such security; and
- all other assets of every kind and nature, including prepaid expenses.

6.2.2. Liabilities of the Company

Subject to the rules on allocation of assets and liabilities of the Company to the Funds and Classes in the "**Allocation of assets and liabilities**" section, the liabilities of the Company shall include the following:

- all loans, bills and accounts payable, except those payable to any subsidiary;
- all accrued or payable administrative expenses (including investment management fee, depositary fee and corporate agents' fees);
- all known liabilities, present and future, including all matured contractual obligations for payments of money or property, including the amount of any unpaid dividends declared by the Company where the Dealing Day falls on the record date for determination of the person entitled thereto or is subsequent thereto;
- an appropriate provision for future taxes based on capital and income to the Dealing Day, as determined from time to time by the Company, and other reserves if any authorised and approved by the Board;
- the preliminary expenses of the Company insofar as the same have not been written off, provided that such preliminary expenses may be written off directly from the capital of the Company; and
- all other liabilities of the Company of whatsoever kind and nature.

6.2.3. Valuation Principles

The value of the assets of each Class is determined as follows:

- the value of any cash on hand or on deposit, bills and demand notes, accounts receivable, prepaid expenses, cash dividends and interest declared or accrued but not yet received shall be deemed to be the full amount thereof, unless in any case the same is unlikely to be paid or received in full, in which case the value thereof shall be determined after making such discount as the Company may consider appropriate to reflect the true value thereof;
- the value of securities quoted or dealt in on any stock exchange is based on the latest available price on the principal market on which the securities are traded applicable to the relevant Dealing Day;
- the value of securities dealt in on a regulated market is based on the latest available price applicable to the relevant Dealing Day;
- the value of the derivatives and structured products used by the Company will be performed on a regular basis by using the mark-to-market principle, being the latest available price; and
- securities held in the Company's portfolio on the relevant Dealing Day that are not quoted or dealt in on any stock exchange or other regulated market or if, with respect to securities quoted or dealt in on any stock exchange or dealt in on another regulated market, the price as determined pursuant to indents 2) or 3) is not representative of the fair market value of the relevant securities, the value of such securities will be determined based on the probable realisation price determined prudently and in good faith.

All assets and liabilities in a currency other than the Base Currency of the Fund in question are converted using the exchange rate determined at the time of valuation.

6.2.4. Allocation of Assets and Liabilities

The Articles require the assets and liabilities of the Company to be allocated to each Fund and Class in the following manner:

- the records and accounts of each Fund shall be maintained separately in its Base Currency;
- the liabilities of each Fund shall be attributable exclusively to that Fund;
- the assets of each Fund shall belong exclusively to that Fund, shall be segregated in the records of the Depositary from the assets of other Funds and shall not be used to discharge directly or indirectly the liabilities of or claims against any other Fund of the Company;
- the proceeds from the issue of each Class shall be applied to the relevant Fund established for that Class, and the assets and liabilities and income and expenditure attributable thereto shall be applied to such Fund subject to the provisions of the Articles;
- where any asset is derived from another asset, the derived asset shall be applied to the same Fund as the assets from which it was derived and on each revaluation of an asset the increase or diminution in value shall be applied to the relevant Fund;
- all liabilities incurred in connection with the creation, operation or liquidation of a Fund or Class will be charged to that Fund or Class and, together with any increase or decrease in the value thereof, will be allocated to that Fund or Class and recorded in its books. In particular and without limitation, the costs and any benefit of any Class specific feature will be allocated solely to the Class to which the specific feature relates.; and
- in the case where an asset or a liability of the Company which cannot be considered as being attributable to a particular Fund or Class, the Board shall have discretion, subject to Luxembourg law and the approval of the Auditor, to determine the basis upon which any such asset or liability shall be allocated between the Funds and Class. The Board shall also have power at any time subject as aforesaid to vary such basis provided that the approval of the Auditors shall not be required in any case where the asset or liability is allocated between all Funds and Classes pro rata to their NAVs.

6.2.5. Alternative Method of Valuation

The Board may apply, in good faith and in accordance with generally accepted valuation principles and procedures, other valuation principles or alternative methods of valuation that it considers appropriate in order to determine the probable realisation value of any asset if applying the rules described above appears inappropriate or impracticable.

With respect to the determination of the probable realisable value of assets in the absence of a representative price, the Board is assisted by the SSGA European Valuation Committee. The SSGA European Valuation Committee is made up of representatives from a cross section of functional areas including portfolio managers who are non-voting participants. As a general rule, the Board must be informed by the SSGA European Valuation Committee and will make a case-by-case decision on the basis of the SSGA European Valuation Committee's recommendations.

In order to address valuation issues that have an insignificant impact on the NAV in a more efficient and faster manner, the Board has decided that the SSGA European Valuation Committee's recommendations may be implemented immediately. This is a permanent and ongoing permission which may be revoked, at any time, by the Board.

6.2.6. Adjustment

The Board may decide to adjust the NAV of any Fund if it determines that the level of subscriptions, redemptions or switching in a particular Fund will require significant purchases or sales of assets in order to provide the required liquidity. Taking into account the best interests of the Shareholders, the NAV of such Fund may be adjusted to account for the estimated dealing spreads, costs and charges incurred in purchasing or liquidating investments in order to more closely reflect the actual prices of the underlying transactions. The adjustment shall not exceed such percentage of the NAV of the relevant Fund as is set out in the Prospectus and the Relevant Supplement on the relevant Dealing Day. Details of swing pricing may be found in the "**Dilution Adjustment**" section of the "**Shares**" section.

The Board may also adjust the value of any asset if it determines that such adjustment is required to reflect its fair value taking into account its denomination, maturity, liquidity, applicable or anticipated interest rates or dividend distributions or any other relevant considerations.

6.3. Publication of NAV and iNAV

Save where the determination of the NAV per Share in respect of any Fund has been temporarily suspended in the circumstances described under "**Temporary Suspension of Dealings**" below, the NAV per Share shall be made public daily on the Website on the next day after the relevant Valuation Point. The NAV per Share shall be available from the office of the UCI Administrator and it shall also be published by the UCI Administrator in various publications as required and will be notified to any Listing Stock Exchange in accordance with the rules of the relevant Listing Stock Exchange.

6.3.1. iNAV publication for ETF Shares only

An iNAV which is an estimate of the NAV per Share calculated using market data will be disseminated at regular intervals throughout the day. The iNAV is based on quotes and last sale prices from the securities' local market and may not reflect events that occur subsequent to the local market's close. Premiums and discounts between the iNAV and the market price may occur and the iNAV should not be viewed as a "real-time" update of the NAV per Share, which is calculated only once a day. Neither the Funds, nor the Investment Manager or any of their affiliates, nor any third-party calculation agents involved in, or responsible for, the calculation or publication of such iNAVs makes any warranty as to their accuracy. Details of the iNAV for each Fund are available on the Website.

6.4. Temporary Suspension of NAV Calculation and Dealings

The Board may at any time, in consultation with the Depositary, temporarily suspend the calculation of the NAV in the following circumstances:

- where one or more stock exchanges or other markets which are the basis for valuing a significant part of the NAV are closed or during which trading is suspended;
- where in the opinion of the Company it is impossible to sell or to value assets as a result of particular circumstances;
- where the communication technology normally used in determining the price of a security of the Fund fails or provides only partial functionality;
- where the transfer of moneys for the purchase or sale of investments of the Company is impractical;
- following a decision to merge a Fund or the Company, if justified in order to protect the interest of Shareholders;
- where a Fund is a feeder fund and the NAV calculation of the master UCITS (or sub-fund thereof) is suspended;
- in the case of a resolution to liquidate the Company on or after the date of publication of the first calling of a general meeting of Shareholders for the purpose of such resolution.

The Company will suspend immediately the issue, redemption, and switching of Shares in the event that any issue, redemption or switching would result in the liquidation of the Company or by order of the CSSF.

The suspension of calculation of the NAV per Share of one Fund will not necessarily imply a suspension in respect of other Funds unaffected by the relevant events. Investors who have requested the subscription, redemption or switching of their Shares will be notified of any suspension in writing within seven (7) days and of the termination of such suspension period immediately. Shareholders who have requested the issue, redemption or switching of Shares of any Class will have their subscription, redemption or switching request dealt with on the first Dealing Day after the suspension has been lifted unless applications or redemption requests have been withdrawn prior to the lifting of the suspension. Where possible, all reasonable steps will be taken to bring any period of suspension to an end as soon as possible.

6.5. Investors' rights

Upon the issue of the Shares, the person whose name appears on the register of Shares will become a shareholder of the Company in relation to the relevant Fund and Share Class. The Company draws the investors' attention to the fact that, where an investor invests in the Company through an intermediary acting in his own name but on behalf of the investor, it may not always be possible for the investor (i) to exercise certain shareholder rights, such as the right to participate in general meetings of shareholders, directly against the Company or (ii) to be indemnified in case of NAV calculation errors and/or non-compliance with investment rules and/or other errors at the level of the Fund. Investors are advised to seek advice in relation to their rights which may be negatively impacted.

7. Fees and Expenses

The Company bears all costs with respect to all fixed and variable charges, fees and other expenses incurred in the operation of the Company. The total costs and expenses for each Class (the "**Total Expense Ratio**" or "**TER**") are capped at a maximum rate as set out in the Relevant Supplement as a portion of the NAV of the Class.

The Management Company has voluntarily agreed to reimburse such amounts as is necessary to ensure that the TER attributable to each Class does not exceed the maximum TER as specified in the Relevant Supplement. The Management Company reserves the right, at a future date, to cease any such reimbursements in which case the Shareholders will be notified thereof prior to the Management Company ceasing these reimbursements.

The TER shall include (i) operating and administrative expenses, (ii) directors' and officers' fees, (iii) Depositary and UCI Administrator's fees, (iv) the Sub-Investment Manager's fee, (v) fees and expenses of the Management Company (including Investment Management fees) and (vi) the *taxe d'abonnement* (applicable for Non-ETF Share Classes only). The TER excludes (i) any performance fee, (ii) Embedded Costs and (iii) extraordinary costs and certain ongoing costs and expenses (including but not limited to transaction charges, stamp duty or other taxes on the investments of the Company, including duty charges for portfolio re-balancing, withholding taxes, commissions and brokerage fees incurred with respect to the Company's investments, interest on borrowings and bank charges incurred in negotiating, effecting or varying the terms of such borrowings, any commissions charged by intermediaries in relation to an investment in the Fund and such extraordinary or exceptional costs and expenses (if any) as may arise from time to time, such as material litigation in relation to the Company), all of which, if applicable, will be paid separately and in addition to the TER by the Company.

7.1. Operating and Administrative Expenses

All ordinary operating and administrative costs and expenses incurred in the operation and administration of the Company will be borne by the Company. These ordinary operating and administrative expenses include, but are not limited to, costs and expenses incurred in connection with:

- preparing, producing, translating, printing, publishing and distributing, inter alia, the Articles, Prospectus, KIID(s), accounts, and notices to shareholders;
- the authorization of the Company, the Funds and Classes, regulatory compliance obligations and reporting requirements of the Company (e.g. filing fees, and any regulatory or other fees assessed by the CSSF or other applicable regulatory authority);
- initial and ongoing obligations relating to the registration and/or listing of the Company, a Fund or a Class and the distribution of Shares in Luxembourg and abroad (including translation fees and any local jurisdiction supplements and offering documents required by local laws and regulations);
- licensing or other fees payable to any index provider or other licensor of intellectual property, trademarks or service marks used by the Company;
- professional advisory services (e.g. audit, tax, legal, other consulting services);
- entity-level taxes, charges, duties, and contingent liabilities as determined from time to time by the Board;
- any costs incurred as a result of periodic or sporadic updates to the Company documents (including Articles);
- fees and expenses relating to the operation of the Company or attributable to the investments of the Company, including expenses associated with acquiring and disposing of investments;

- fees in respect of publishing details of the NAV of each Fund (including publishing prices) and NAV per Share of each Class;
- in respect of each financial year of the Company in which expenses are being determined, such proportion, if any, of the establishment expenses as are being amortised in that year;
- convening and holding the general meetings of Shareholders and the Board meetings; and
- such other costs and expenses (including non-recurring and extraordinary costs and expenses) as may arise from time to time and which have been approved by the Directors as necessary or appropriate for the continued operation of the Company or of any Fund.

7.2. Directors' and Officers' Fees

The directors shall be entitled to receive remuneration for their services at a rate to be determined from time to time by the Board and proposed to the annual general meeting of Shareholders. Officers of the Company shall be entitled to receive remuneration for their services at a rate to be determined from time to time by the Board. The directors and officers may also be reimbursed for all expenses incurred by them in attending, *inter alia*, Board meetings and general meetings of Shareholders.

Directors' and officers' fees are reviewed annually by the Board, disclosed in the annual financial statements, and directors' fees are approved by the annual general meeting of Shareholders. The directors that are employees of the State Street group are not entitled to fees for their services as directors.

7.3. Depositary and UCI Administrator's Fees

The Depositary and UCI Administrator are entitled to receive a maximum fee of 0.004% and 0.025% respectively per annum of the NAV of the relevant Fund, as may be agreed from time to time with the Company. In addition, the Depositary and UCI Administrator are entitled to charge, per transaction, a flat fee for certain services or products, out-of-pocket expenses and for charges of any custodians, sub-custodians and correspondent banks, if applicable. The fees of the UCI Administrator and Depositary shall be accrued daily based on the NAV of each Fund and will be paid monthly in arrears.

7.4. Investment Management Fee

The Management Company is entitled to charge a fee of up to 3% per annum of the NAV of each Fund. Different rates may be charged in respect of different Classes of the same Fund. The Management Company will discharge, from this fee, the fees payable to any Sub-Investment Manager and any other delegate appointed by the Management Company in respect of a Fund. The investment management fee will be accrued daily based on the NAV of each Fund and will be paid monthly in arrears. Subject to the "**Embedded Costs**" section below, no double-charging of fees will occur. The current maximum investment management fee for all Classes is set out in the Relevant Supplements.

7.5. Fees of the Global Distributor, Distributors and Sub-distributors

The Management Company also acts as the Global Distributor for the Company, responsible for the marketing and distribution of Funds or Classes of the Company. The Management Company is remunerated for these global distribution services as part of the Investment Management fee it receives. The Management Company is entitled to appoint Distributors relating to the distribution of Shares. Any Distributor is also entitled to receive compensation for its marketing and distribution of particular Funds or Classes. This fee may be discharged from the fees received by the Management Company or the Distributors.

7.6. Formation Expenses

The fees and expenses incurred in connection with the formation of the Company were borne by the Company and amortised over the first 5 years from the date the Company was launched. In the Board's discretion, the formation expenses of each new Fund will be borne by such Fund and may be amortised over the first 5 years from the date this Fund is launched.

7.7. Embedded Costs

The Funds may invest in other UCIs and/or UCITS. Where this occurs charges may exist at the level of both the UCI/UCITS and the Company. If a Fund invests in the shares of other UCITS or UCIs that are managed, directly or by delegation, by the Management Company or by any other company with which the Management Company is linked by common management or control, or by a substantial direct or indirect holding, the Management Company or other company shall not charge subscription or redemption fees on account of the Fund's investment in the shares of such other UCITS or UCI.

The Funds may invest in other UCIs and/or UCITS that qualify as money market funds under the Regulation (EU) 2017/1131 of the European Parliament and of the Council of 14 June 2017 on money market funds. Where this occurs such UCIs and/or UCITS may be subject to liquidity fees on redemptions. Embedded Costs apply in respect of exchange traded fund investments held by each Fund which includes costs paid to the Management Company or its affiliates (as relevant), in respect of investment management, custody and administration services. These Embedded Costs will be borne by the Fund and not the individual Shareholders. Further detail is available from the Management Company or its affiliates (as relevant) upon request.

In addition, subscriptions, redemptions and switching made through a third party agent may result in additional fees and expenses being incurred by Shareholders.

7.8. Allocation of Expenses

Expenses readily attributable to a particular Class or Classes will be paid by such Class or Classes. Where an expense is not considered by the Board to be attributable to any one Class, this expense will normally be allocated, insofar as practicable, to all Classes pro-rata to their NAV. In certain circumstances however, the Board may exercise their discretion to vary this allocation subject to Luxembourg law and, if applicable, auditor approval.

8. Investment Techniques

When pursuing the investment objective and policy set out in the Relevant Supplement, each Fund must comply with the following investment techniques. These investment techniques are subject, at all times, to any regulations and guidance issued by the CSSF or any other appropriate regulatory body.

8.1. Investment Strategies

Funds will pursue their investment objectives and policies as set out in the Relevant Supplement by applying one of the following strategies:

- **Index Strategies:**

Replication Strategy – this index strategy (also known as passive management) seeks to physically hold all or close to all of the securities of the particular Index, with the approximate weightings as in that Index. Essentially, the portfolio of the Fund would be a near mirror-image of the particular Index. The Investment Manager may also, in exceptional circumstances, invest in securities not included in the Index but that it believes closely reflect the risk and distribution characteristics of securities of the Index. The Fund may also hold (i) securities which, in the opinion of the relevant Investment Manager, are likely to become part of the particular Index and (ii) securities acquired through corporate activity which may not form part of the Index.

Stratified Sampling Strategy – this index strategy (also known as passive management) seeks to build a representative portfolio that matches the risk and return characteristics of the applicable Index in the most efficient way, including, but not limited to, risks related to currencies, countries, sectors, quality, maturity duration and issuers. Stratified sampling is typically used because the Index contains too many securities to efficiently purchase and, at times, certain securities included in that index may be difficult, or too costly, to purchase in the open markets. Consequently, a Fund using this strategy will typically hold only a subset of the securities included in the Index. Where an ESG screen is applied to the Fund, as indicated in the Relevant Supplement, the Investment Manager may consider certain ESG criteria when building a representative portfolio, as described in the section "ESG Investing", including by way of applying the Exclusion List Methodology for screened Funds in SSGA Luxembourg SICAV.

Optimisation Strategy – this index strategy (also known as passive management) uses a risk model to build a representative portfolio that seeks to match the risk and return characteristics of the applicable Index, including risks related to currencies, countries, sectors, industries and size. Optimisation is typically used because the applicable Index contains too many securities to efficiently purchase and, at times, certain securities included in the Index may be difficult to purchase in the open markets. Consequently, a Fund using this strategy will typically hold only a subset of the securities included in the Index.

Index Strategies and Sustainability Integration

With these index strategies, the decision of the Investment Manager as to whether or not to take exposure to a particular security will primarily be driven by the constituents of the relevant index which the Fund is tracking. For this reason, Sustainability Risks are not generally taken into account in the investment decisions. However, certain Funds applying an index strategy will track an Index constructed to promote a combination of environmental and social characteristics. In this instance, Sustainability Risks are integrated into the Index construction. Where Funds track such an Index, this will be set out in the Relevant Supplement.

Where an ESG screen is applied to the Fund, as indicated in the Relevant Supplement, the Investment Manager may consider ESG criteria

when building a representative portfolio, as described in the section “ESG Investing”.

- **Active Strategies:**

Flexible Asset Allocation Strategy – this active tactical asset allocation strategy uses a top-down proprietary quantitative model to determine an appropriate asset allocation based on an assessment of the current market regime. This research process integrates a review of companies’ ESG ratings and other ESG data metrics. In following this strategy, a long only diversified portfolio is built through direct investment in each asset class as well as indirect investment via derivatives and UCIs. The performance comparator of the strategy does not influence the strategy’s tactical asset allocation and thus the performance may significantly deviate from that of the respective performance comparator. The Investment Manager has full discretion over the composition of the portfolio of the Funds using this strategy. The Investment Manager may consider further ESG criteria in its investment process, as described in the section “ESG Investing”, including by way of applying the Exclusion List Methodology for screened Funds in SSGA Luxembourg SICAV.

Fundamental Opportunities Equity Strategy – this actively managed strategy uses a proprietary fundamentally driven and bottom-up research process to identify high quality companies that offer durable growth at reasonable valuations. This research process integrates a review of companies’ ESG ratings and other ESG data metrics. For emerging market equities, a top-down component is also utilised where views on countries and their growth drivers are incorporated into the stock-selection process. The securities in the portfolio are selected primarily from the securities in the index. Non-index securities may be held in the portfolios. The Investment Manager has broad discretion regarding deviation from the respective index and thus any deviation from the performance of the respective index may be significant. The portfolios incorporate defined risk parameters that include limits on the region and sector relative to the respective index and limits on security weights on an absolute basis. The Investment Manager may consider further ESG criteria in its investment process.

Fundamental Value Equity Strategy – this actively managed strategy uses a proprietary fundamentally driven and bottom-up research process to identify companies with a dislocation between the intrinsic value of the company and the price of its equity security. This research process integrates a review of companies’ ESG ratings and other ESG data metrics. The securities in the portfolios are selected primarily from the securities in the respective Index. Non-index securities may be held in the portfolios. The Investment Manager has full discretion over the composition of the portfolio of the Funds using this strategy and thus any deviation from the performance of the respective Index may be significant. The Investment Manager may consider further ESG criteria in its investment process.

Global Climate Transition Equity Strategy - this actively managed strategy uses a proprietary fundamentally driven and bottom-up research process to identify companies that the Investment Manager considers to offer the best combination of quality, durable growth and reasonable valuations and that are well positioned for the risks posed by climate change and the transition to a low-carbon economy. As part of the fundamental research process, proprietary scores, based on several qualitative factors, are attributed to companies in the investment universe to form the basis for the Investment Manager’s assessment of each company’s quality. For ESG specifically, each company in the investment universe is given a proprietary ESG score resulting from Investment Manager’s fundamental due diligence process, with additional input from various external ESG data metrics, used to assess companies’ ESG attributes, including ESG risks. Further, in relation to climate, based on the Investment Manager’s proprietary research, the companies in the investment universe are assigned the following climate scores: (i) Climate Transition Score, (ii) Climate Risks Score and (iii) Climate Opportunities Score. The climate scores take into account disclosure, credibility and accountability of a company’s transition planning and process

(Climate Transition Score), an evaluation of the physical and financial risks associated with climate change (Climate Risks Score), and the resource intensity of a company's operations and green products, services and solutions (Climate Opportunities Score). The resulting climate scores allow the Investment Manager to assess companies' adherence to their stated climate goals as well as transition planning and progress. The securities in the portfolio are selected primarily from the securities in the index. Non-index securities may be held in the portfolios. The Investment Manager has broad discretion regarding deviation from the respective index and thus any deviation from the performance of the respective index may be significant. The portfolios incorporate defined risk parameters that include limits on the region and sector relative to the respective index and limits on security weights on an absolute basis.

Multi-Factor Equity Strategy – this actively managed strategy uses quantitative stock selection and multi-factor models to evaluate stocks based on their exposure to certain factors that the Investment Manager has evaluated to be the most persistent in driving excess returns, in particular quality, value and momentum. In addition to these factor exposures, this model also considers the ESG characteristics of individual securities using ESG ratings and other ESG data metrics. In following this strategy, the Investment Manager will tilt the composition of the relevant portfolio towards securities with favourable exposures to quality value and momentum, as well as ESG criteria. The Multi-Factor Strategy involves a limited use of derivatives and direct investment in a portfolio of equity securities that may differ from that of the relevant Index. The securities in the portfolios are selected primarily from the securities in the Index. Non-Index securities may be held in the portfolios. The Investment Manager has limited discretion regarding deviation from the respective Index and thus any deviation from the performance of the respective Index is expected to be limited under normal market conditions as the portfolios incorporate defined risk parameters that include limits on country, sector and security weights on an absolute basis and relative to the respective Index. The Investment Manager may consider further ESG criteria in its investment process.

Quantitative Equity Strategy – this active strategy uses quantitative country allocation, stock selection and multi-factor models to evaluate the attractiveness of stocks. The quantitative models integrate a review of ESG criteria through the measurement of ESG risks by integrating ESG metrics into the assessment of stock returns. In following this strategy, the Investment Manager may invest in or gain exposure to securities registered in or trading in markets other than those included in the relevant Index. The Investment Manager has limited discretion regarding deviation from the respective Index and thus any deviation from the performance of the respective Index is expected to be limited under normal market conditions as the investment strategy uses defined risk parameters that mean the Fund's weighting to countries, sectors and/or securities relative to the respective Index will be limited. The Investment Manager may consider further ESG criteria in its investment process.

Managed Volatility Equity Strategy – this active strategy uses a multi-factor risk model to select securities that are assessed as having low exposure to market risk factors and are expected to exhibit lower volatility than the relevant Index with the potential to provide returns comparable with the relative Index. In following this strategy, the Investment Manager will invest directly in equity securities and will build a portfolio of securities that may differ from that of the relevant Index. The securities in the portfolios are selected primarily from the securities in the Index. Non-Index securities may be held in the portfolio. The Investment Manager has limited discretion regarding deviation from the respective Index and thus any deviation from the performance of the respective Index is expected to be limited under normal market conditions as the portfolios incorporate defined risk parameters that include limits on country, sector and security weights on an absolute basis and relative to the respective Index. The Investment Manager may consider certain ESG criteria in its investment process.

Defensive Equity Strategy – this actively managed strategy uses quantitative stock selection and multi-factor models to evaluate stocks. The quantitative models integrate a review of ESG criteria through the measurement of ESG risks by integrating ESG metrics into the assessment of stock returns. Investments are chosen based on their potential to produce returns in excess of the relevant Index with reduced volatility relative to the Index. The securities in the portfolios are selected primarily from the securities in the Index. The Fund may invest in or gain exposure to securities registered in or trading in markets other than those included in the Index. The Investment Manager has broad discretion regarding deviation from the respective Index and thus any deviation from the performance of the respective Index may be significant. Defined risk parameters include limits on country, sector and security weights on an absolute basis and relative to the Index. The Investment Manager may consider further ESG criteria in its investment process.

Climate Transition Equity Beta Strategy – this actively managed strategy uses a systematic methodology to provide higher exposure (relative to the respective Index) to companies that are mitigating and adapting to climate risk, by constructing a portfolio of stocks based on the following climate characteristics: carbon intensity (emissions scaled by revenue), fossil fuel reserves, green revenues, brown revenues, sensitivity to climate risks, implied temperature rise, climate value at risk and carbon risk rating. In following this strategy, the Investment Manager employs a quantitative process to construct the portfolio and invest directly in equity securities and as such, the return of the portfolio will be predominantly driven by the beta of the underlying market while seeking the climate characteristics described above. The securities in the portfolios are selected primarily from the securities in the Index. Non-Index securities may be held in the portfolios. The Investment Manager has limited discretion regarding deviation from the respective Index and thus any deviation from the performance of the respective Index is expected to be limited under normal market conditions as the investment strategy uses defined risk parameters that mean each Fund's weighting to countries, sectors and securities relative to the respective Index will be limited. This is likely to limit the extent to which the strategy can outperform the Index.

Climate Transition Corporate Bond Beta Strategy – this actively managed strategy uses a systematic methodology to provide higher exposure (relative to the respective Index) to bonds issued by companies that are mitigating and adapting to climate risk, by constructing a portfolio of bonds based on the following climate related characteristics: carbon intensity (emissions scaled by revenue), fossil fuel reserves, allocation to green bonds, brown revenues, implied temperature rise and carbon risk rating. In following this strategy, the Investment Manager employs a quantitative process to construct the portfolio and invest directly in corporate bonds and as such, the return of the portfolio will be predominantly driven by the beta of the underlying market while seeking the climate characteristics described above. The securities in the portfolios are selected primarily from the securities in the Index. Non-Index securities may be held in the portfolios. The Investment Manager has limited discretion regarding deviation from the respective Index and thus any deviation from the performance of the respective Index is expected to be limited under normal market conditions as the investment strategy uses defined risk parameters that mean each Fund's weighting to credit rating exposure, sectors and issuer weights relative to the respective Index will be limited. This is likely to limit the extent to which the strategy can outperform the Index.

Climate Transition Quantitative Equity Enhanced Strategy – this active strategy uses quantitative country allocation, stock selection and multi-factor models to evaluate the attractiveness of stocks including the use of a systematic methodology to provide higher exposure (relative to the respective Index) to companies that are mitigating and adapting to climate risk, by constructing a portfolio of stocks that takes into account climate characteristics such as carbon intensity (emissions scaled by

revenue), fossil fuel reserves, green revenues, brown revenues, sensitivity to climate risks, implied temperature rise, climate value at risk and carbon risk rating. In following this strategy, the Investment Manager may invest in or gain exposure to securities registered in or trading in markets other than those included in the relevant Index and seeks to generate alpha over the relevant Index while considering the climate characteristics as described above. The Investment Manager has limited discretion regarding deviation from the respective Index and thus any deviation from the performance of the respective Index is expected to be limited under normal market conditions as the investment strategy uses defined risk parameters that mean the Fund's weighting to countries, sectors and/or securities relative to the respective Index will be limited.

Systematic Corporate Bond Strategy – this actively managed systematic strategy uses quantitative bond selection, factor scoring and data-driven models to evaluate securities with the aim to outperform relative to the respective Index over the long term. Using as an input a third-party´s quantitative factor-driven scores assigned to each security in the relevant investment universe, the Investment Manager applies its optimization process to inform portfolio construction and implementation decisions. The Investment Manager's optimization process seeks to maximise exposure to the highest scoring securities, while considering a defined set of risk parameters in keeping with the relevant Index. In addition, this strategy also considers the ESG and climate characteristics of individual securities using ESG ratings and other ESG data metrics. In following this strategy, the Investment Manager will also tilt the composition of the portfolio towards securities providing higher exposure (relative to the respective Index) to bonds issued by companies that are mitigating and adapting to climate risk by considering the following climate-related characteristics: carbon intensity (emissions scaled by revenue), fossil fuel reserves, allocation to green bonds, brown revenues and carbon risk rating. In following this strategy, the Investment Manager employs a quantitative process to construct the portfolio and invest directly in corporate bonds. The securities in the portfolios are primarily selected from the securities in the Index. Non-Index securities may be held in the portfolios. The Investment Manager has limited discretion regarding deviation from the respective Index and thus any deviation from the performance of the respective Index is expected to be limited under normal market conditions as the investment strategy uses defined risk parameters that mean each Fund's weighting to credit rating exposure, sectors and issuer weights relative to the respective Index will be limited. This is likely to limit the extent to which the strategy can outperform the Index.

8.2. Investment Restrictions and Limits

8.2.1. Permitted Investments

The investments of each Fund shall comprise only one or more of the following:

i. transferable securities and money market instruments which are either admitted to official listing on or are dealt in on another Regulated Market; and/or

ii. recently issued transferable securities and money market instruments provided that the terms of issue include an undertaking that application will be made for admission to official listing on a Regulated Market and such admission is secured within a year of the issue; and/or

iii. Shares or units in UCITS authorised in accordance with the UCITS Directive and/or other UCIs within the meaning of Article 1 (2), (a) and (b) of the UCITS Directive whether or not established in an EU Member State (individually and collectively referred also to as "other funds"), provided that:

- such other UCIs are authorised under laws which provide that they are subject to supervision considered by the CSSF to be equivalent to that under EU law and that cooperation between authorities is sufficiently ensured;

- the level of protection for unitholders in such other UCIs is equivalent to that provided for unitholders in a UCITS and in particular that the rules on asset segregation, borrowing, lending and uncovered sales of transferable securities and money market instruments are equivalent to the requirements of the UCITS Directive;
- the business of the other UCIs is subject to semi-annual and annual reports which enable an assessment of the assets and liabilities, income and transactions over the reporting period; and
- the UCITS or other UCI, whose units or shares are to be acquired, may, according to their constitutional documents, invest, in total, no more than 10% of their net assets in units or shares of other UCITS or UCIs; and/or

iv. Deposits with a credit institution which are repayable on demand or have the right to be withdrawn, and maturing in no more than 12 months, provided that the credit institutions has its registered office in an EU Member State or, if the registered office of the credit institution is situated in a third country, provided that it is subject to prudential rules considered by the CSSF as equivalent to those laid down in EU law; and/or

v. Financial derivative instruments, including equivalent cash-settled instruments, which are dealt in on a Regulated Market referred to in subparagraph (i) above, and/or over the counter derivatives ("OTC derivatives"), provided that:
- the underlying securities are instruments as defined by this section 8.2.1., financial indices, interest rates, exchange rates or currencies in which the Funds may invest according to their investment objective;
- the counterparties to OTC derivative transactions are institutions subject to prudential supervision and belonging to the categories approved by the CSSF; and
- the OTC derivatives are subject to reliable and verifiable valuation on a daily basis and can be sold, liquidated or settled through an offsetting transaction at any time at the initiative of the Company at their fair value; and/or

vi. Money market instruments other than those dealt in on a Regulated Market provided the issue or issuer of these instruments is itself subject to regulations concerning the protection of savings and investors, and provided the instruments are:
- issued or guaranteed by a central, regional or local authority or the central bank of an EU Member State, the European Central Bank, the EU or the European Investment Bank, a third country or, in the case of a federal state, one of the members making up the federation, or by a public international institution to which at least one EU Member State belongs;
- issued by an undertaking whose securities are traded on Regulated Markets;
- issued or guaranteed by an establishment subject to prudential supervision in accordance with the criteria defined by EU law, or by an institution which is subject to and complies with prudential rules considered by the CSSF to be at least as stringent as those under EU law; or
- issued by other issuers belonging to a category approved by the CSSF provided such instruments are subject to investor protection regulations which are equivalent to those of the first, second or third indent of this paragraph and provided the issuer is either a company whose capital and reserves amount to at least ten (10) million euro which presents and

publishes its annual accounts in accordance with Directive 78/660/EEC, or an entity within a group comprising one or more companies listed on an official stock exchange which is dedicated to the financing of that group, or is an entity which is dedicated to the financing of the securitization vehicles which benefit from a banking liquidity line.

vii. The Company may hold up to 20% of ancillary liquid assets, notably cash, in accordance with the 2010 Law for cash management purposes. The 20% limit for ancillary liquid assets shall only be temporary breached when, due to exceptionally unfavourable market conditions, circumstances so require and where such breach is justified by the investors' best interest, for instance in highly serious circumstances such as the September 11 attacks or the bankruptcy of Lehman Brothers in 2008.

The Relevant Supplement will indicate which of these permitted investments are available for each Fund.

8.2.2. Investment Restrictions

(A) (i) Each Fund may not invest more than 10% of its net assets in transferable securities or money market instruments of the same issuer. Each Fund may invest no more than 20% of the net assets in deposits made with the same institution. The risk exposure to a counterparty in OTC derivative transactions by the Company may not exceed 10% of the net assets of each Fund when the counterparty is a credit institution referred to in 8.2.1 (iv) above or 5% of each Fund's assets in other cases.

(ii) The total value of the transferable securities and money market instruments held by a Fund in the issuing bodies in each of which it invests more than 5% of the net assets of such Fund must not exceed 40% of the net assets of such Fund. This limitation does not apply to deposits or OTC derivative transactions made with financial institutions subject to prudential supervision.

Irrespective of the individual limits under (A) (i) above a Fund may not combine:

- investments in transferable securities or money market instruments issued by a single body; and/or
- deposits made with a single body; and/or
- exposure arising from OTC derivative transactions undertaken with a single body

in excess of 20% of its assets.

(iii) The 10% limit laid down in (A) (i) above may be increased to:

- 35% if the transferable securities or money market instruments are issued or guaranteed by a EU Member State or by its local authorities, by a non-EU Member State or by public international institutions of which at least one EU Member State is a member;
- 25% for certain debt securities when they are issued by a credit institution with its registered office in an EU Member State which is subject, by law, to special prudential supervision designed to protect investors in debt securities. In particular sums deriving from the issue of these debt securities must be invested in conformity with the law in assets which, during the whole period of validity of the debt securities, are capable of covering claims attaching to the debt securities and which, in case of bankruptcy of the issuer, would be used on a priority basis for the repayment of principal and of the accrued interest. If a Fund invests more than 5% of its NAV in the debt securities referred to above and which are issued by one issuer, the total value of such investments may not exceed 80% of the NAV of the Fund concerned.

(iv) The transferable securities and money market instruments referred to in (A) (iii) above are not taken into account in the calculation of the limit of 40% referred to in (A) (ii) above.

The limits laid down in (A) (i), (ii), and (iii) may not be combined, and thus, investments in transferable securities or money market instruments issued by the same body or in deposits or derivatives made with this body carried out in accordance with (A) (i), (ii) and (iii) shall not exceed in total 35% of the assets of any Fund.
Companies which are included in the same group for the purpose of consolidated accounts as defined in the Directive 83/349/EEC or in accordance with recognized international accounting rules are regarded as a single issuer for the purpose of calculating the aforementioned limits.

A Fund may cumulatively invest up to 20% of its assets in transferable securities and money market instruments within the same group.

(v) Without prejudice to the limits set out in (B) and (C) below, the limits set out in (A) (i) for investors in Shares and/or debt securities issued by the same issuer may be raised to a maximum of 20% when the investment strategy of the Fund is to replicate the composition of a certain stock or bond index which is recognized by CSSF, on the following basis:
- that the composition of the index is sufficiently diversified;
- that the index represents an adequate benchmark for the market to which it refers; and
- that the index is published in an appropriate manner.

This limit is raised to 35% where this proves to be justified by exceptional market conditions, in particular on Regulated Markets where certain transferable securities or money market instruments are highly dominant. The investment up to this limit is only permitted for a single issuer.

(vi) Notwithstanding points (A) (i), (ii), (iii) and (iv), each Fund is authorised to invest up to 100% of its net assets in different transferable securities and money market instruments issued or guaranteed by an EU Member State, its local authorities, by a member state of the OECD or public international bodies of which one or more EU Member States are members, provided that (i) such securities are part of at least six different issues and (ii) securities from any one issue do not account for more than 30% of the net assets of such Fund.

(vii) Each Fund may acquire units of UCITS and/or other UCIs as defined within 8.2.1 (iii) above, provided that no more than 10% of a Fund's assets may in aggregate be invested in units of UCITS or other UCIs, unless the Relevant Supplement relating to a particular Fund provides for the possibility for such Fund to invest in aggregate more than 10% of its assets in units of UCITS or other UCIs.

If the Relevant Supplement of a particular Fund allows the Fund to invest in aggregate more than 10% of its assets into UCITS or other UCIs the following restrictions will apply:
- no more than 20% of its assets may be invested in the units of a single UCITS or other UCI. For the purpose of the application of this investment limit, each sub-fund of a UCI is to be considered as a separate issuer provided that the principle of segregation of the obligations of the various Funds vis-à-vis third parties is ensured;
- investments made in units of UCIs other than UCITS may not, in aggregate, exceed 30% of the NAV of a Fund.

(viii) The underlying investments held by the UCITS or other UCIs in which the Fund invests do not have to be considered for the purpose of the investment

restrictions set forth above in paragraph (A) (i), (ii), (iii), and (iv).

(ix) When a Fund invests in the units of UCITS and/or other UCIs which are managed directly or indirectly by the Management Company or by another company to which the Management Company is linked by common management or control or by a substantial direct or indirect shareholding, no subscription or redemption fees may be charged to the Fund on account of its investment in the units of such other UCITS and/or UCIs.

(B) The Company may not acquire:

i. shares carrying voting rights which would enable it to exercise significant influence over the management of the issuer.

(C) Each Fund may not acquire more than:

i. 10% of the non-voting shares from the same issuer; and/or
ii. 10% of debt securities from the same issuer; and/or
iii. 25% of the units of the same target fund; and/or
iv. 10% of the money market instruments of any single issuer.

The limits set out in (C) (ii), (iii), and (iv) may be disregarded at the time of acquisition if at that time the gross amount of debt securities or money market instruments, or the net amount of the Shares in issue cannot be calculated.

The foregoing sub-paragraphs (i) and (ii) shall not apply to:

- transferable securities and money market instruments issued or guaranteed by a EU Member State or its local authorities;
- transferable securities and money market instruments issued or guaranteed by a non-EU Member State;
- transferable securities and money market instruments issued by public international institutions of which one or more EU Member States are members;
- shares held by the Company in the capital of a company incorporated in a non-EU Member State which invests its assets mainly in the securities of issuers having their registered office in that state, where under the legislation of that state, such a holding represents the only way in which the Company can invest in the securities of issuers of that state. This derogation, however, shall only apply if in its investment policy the company from the non-EU Member State complies with the limits laid down in (A) (i), (ii), (iii), (iv), (vii), (viii) and (ix), and (B) (i) and (ii). Where the limits set in (A) (i), (ii), (iii), (iv), (vii), (viii) and (ix), are exceeded, section 8.3 (viii) and (ix) shall mutatis mutandis apply;
- shares held by the Company alone or together with other UCIs in the capital of subsidiary companies which, exclusively on its or their behalf carry on only the business of management, advice or marketing in the country where the subsidiary is located, in regard to the redemption of Shares at the request of Shareholders.

8.2.3. Other Investment Restrictions

In addition, the Company may not:

i. invest more than 10% of the assets of any Fund in transferable securities and money market instruments other than those referred to in section 8.2.1 above.
ii. acquire precious metals or certificates representing them;
iii. carry out uncovered sales of transferable securities or money market instruments or other financial instruments referred to in 8.2.1 (iii), (v) and (vi);
iv. grant loans to or act as guarantor on behalf of third parties for the account of the Fund, provided that this restriction shall not prevent the Company from:

- Lending its portfolio securities and
- Acquiring transferable securities or money market instruments or other financial instruments referred to in 8.2.1 (iii), (v) and (vi) which are not fully paid.

v. borrow for the account of any Fund amounts in excess of 10% of the total assets of that Fund, any such borrowings to be effected only on a temporary basis. The Company may however acquire foreign currencies by means of back to back loans;

vi. mortgage, pledge or otherwise encumber as security for indebtedness any securities held for the account of any Fund, except as may be necessary in connection with the borrowings mentioned in (iv) above, and then such mortgaging, pledging, or hypothecating may not exceed 10% of the asset value of each Fund. In connection with OTC transactions including but not limited to option and forward exchange or futures transactions, or swap transaction the deposit of securities or other assets in a separate account shall not be considered a mortgage, pledge or hypothecation for this purpose;

vii. underwrite or sub-underwrite securities of other issuers;

viii. acquire securities which entail unlimited liability;

ix. The Company need not comply with the limits set out in this section when exercising subscription rights attaching to transferable securities and money market instruments which form part of its assets.

x. During the first six months following its launch, a Fund may derogate from the rules set out in (A) (i), (ii), (iii), (iv), (v), (vi), (vii), (viii), and (ix) while ensuring observance of the principle of risk-spreading.

The Company may implement further investment restrictions.

8.2.4. Cross-Fund Investments

A Fund may subscribe, acquire and/or hold Shares of one or more Funds (the "**Target Fund(s)**"), without it being subject to the requirements of the 1915 Law, with respect to the subscription, acquisition and/or the holding by a company of its own shares provided that:

- the Target Fund does not, in turn, invest in the Fund invested in such Target Fund;
- no more than 10% of the net assets of the Target Fund, the acquisition of which is contemplated, may be invested in aggregate in units/shares of other UCIs;
- voting rights, if any, attaching to the Shares of the Target Fund(s) are suspended for as long as they are held by the Fund concerned and without prejudice to the appropriate processing in the accounts and the periodic reports; and
- in any event, for as long as these Shares of the Target Fund(s) are held by the Fund, their value will not be taken into consideration for the calculation of the net assets of the Fund for the purposes of verifying the minimum threshold of the net assets of the Fund as imposed by the 2010 Law.

8.2.5. Master Feeder Structures

Under the conditions and within the limits set out in the 2010 Law, the Company may create any Fund qualifying as a feeder UCITS or convert any existing Fund into a feeder UCITS. A feeder UCITS shall invest at least 85% of its assets in the units or shares of another master UCITS. A feeder UCITS may hold up to 15% of its assets in one or more of the following:

- ancillary liquid assets in accordance with 8.2.1 (vii):
- financial derivative instruments, which may only be used for hedging purposes: and
- movable and immovable property which is essential for the direct pursuit of its business.

8.2.6. PRC Investments

One or more Funds may seek exposure to PRC Investments through cross border Access Programmes approved by competent regulators.

As provided in the Relevant Supplement, these PRC Investments may be effected through Access Programmes as follows:

(i) directly into the PRC domestic securities markets (China A

Shares, and other domestic securities as permitted) using the licenced QFI status of the Investment Manager from the moment when the Investment Manager has obtained the relevant licence.

(ii) through the Stock Connect (as set out in the Relevant Supplement, the Investment Manager may pursue a relevant Fund's investment objective by investing directly in China A Shares through Stock Connect);

(iii) through the CIBM Direct Access Programme; and/or

(iv) through the Bond Connect.

Set out below are the further details about each of the Access Programmes.

The QFI regime is a policy initiative of China which allows holders of a QFI licence to channel funds raised outside the PRC to invest into the Chinese securities markets subject to applicable PRC regulatory requirements. As the Funds will not satisfy the qualification criteria for QFI status in their own right, direct investments will be made through the holders of QFI licence, such as the Investment Manager and/or Sub-Investment Manager from the moment when they have obtained such licence. The QFI regime is jointly regulated by CSRC, SAFE and PBoC from different angles. Their respective duties and authorities are summarised below:

CSRC	*a)* approves licence applications made by prospective international investors
	b) supervises and regulates domestic securities and future investment activities by QFIs jointly with PBoC
PBoC and SAFE	*a)* monitors and regulates QFI's bank accounts in China;
	b) monitors and regulates cross-border transfer of funds; and
	c) monitors and regulates currency conversion matters.

The SHHK Stock Connect is a securities trading and clearing linked programme operational since 17 November 2014 and developed by SEHK, SSE, HKSCC and CSDCC, with an aim to achieve mutual stock market access between mainland China (Shanghai) and Hong Kong. The SZHK Stock Connect is a similar securities trading and clearing linked programme developed by SEHK, SZSE, HKSCC and CSDCC for the establishment of mutual stock market access between mainland China (Shenzhen) and Hong Kong. The SZHK Stock Connect became operational since 5 December 2016. The SSE, SZSE and SEHK will enable Funds to trade eligible shares listed on the other's market, as applicable, through local securities firms or brokers, subject to rules and regulations issued from time to time.

The CIBM is an OTC wholesale market outside the 2 main stock exchanges (SSE and SZSE) which was established in 1997. The CIBM together with its market operators are regulated by PBoC. The CIBM is the dominant trading venue for bonds in the PRC. CFETS is the sole bond trading platform of the CIBM. CFETS operates its trading platform with comprehensive functions of trade matching, post-trading services, risk management and information services. CCDC and SHCH are designated as the central securities depositaries of the bonds traded on the CIBM, which register, hold and safekeep the bonds in the form of book-entry, as well as dealing with

interest payment and principal payment for the investors. The trading platform of CFETS is directly linked with the Centralized Bond Book-Entry System of CCDC and SHCH to achieve a straight-through processing of trading and settlement of the bonds on the CIBM. Under PRC regulations, certain qualified overseas investors are eligible to participate in the CIBM Direct Access Programme to make investments in the CIBM. The Investment Manager, on behalf of each relevant Fund, has registered as a qualified institution under the CIBM Direct Access Programme via an onshore interbank bond trade and settlement agent, which has the responsibility for making the relevant filings and account opening with the relevant PRC authorities.

Bond Connect is an initiative launched on 3 July 2017 for mutual bond market access between mainland China and Hong Kong established by CFETS, CCDC, SHCH, HKEx and CMU, enabling the investment in the CIBM via the arrangement between mainland China and Hong Kong that enables the China and overseas investors to trade various types of debt securities in each other's bond markets through connection between the relevant respective financial infrastructure institutions.

Investors should be aware that use of each of these Access Programmes exposes the Fund to increased risks. Investors should also read the risk warnings headed "**PRC and Greater China Region Risk**", "**Risks Associated with Investment through Access Programmes**" and **"PRC Taxation Risk**" in the section "**Risk Information**".

Sub-custodian and PRC interbank bond trade and settlement agent

The HSBC Bank (China) Company Limited has been appointed as sub-custodian and the interbank bond trade and settlement agent for the relevant Funds for the purposes of the investments made through the CIBM Direct Access Programme and/or the QFI regime.

8.3. Financial Derivative Instruments

8.3.1. General

Each Fund may use those financial derivative instruments for the purpose of efficient portfolio management, including hedging, and investment purposes as indicated in the Relevant Supplements. The use of financial derivative instruments may not cause a Fund to deviate from its stated investment objective and policy. Further, each Fund shall, at all times, hold sufficient liquid assets (including if relevant sufficient liquid long positions) to cover its financial obligations arising from its financial derivative positions (including short positions).

Efficient portfolio management means the reduction of risks, including the risk of tracking error between the performance of a Fund and the performance of the Index tracked by the relevant Fund, the reduction of costs to a Fund, the generation of additional capital or income for a Fund and hedging against market movements, currency exchange or interest rate risks, subject to the general restrictions outlined in the "**Investment Restrictions and Limits**" section of this Prospectus. Hedging is a technique used to minimise an exposure created from an underlying position by counteracting the exposure by acquiring an offsetting position. The positions taken for hedging purposes will not be allowed to materially exceed the value of the assets they seek to offset. If a Fund uses financial derivative instruments for investment purposes they form part of such Fund's general investment policy.

To the extent that a Fund uses financial derivative instruments, there may be a risk that the volatility of the Fund's NAV may increase.

The Company will use financial institutions it reasonably believes are highly rated as counterparties for investments in derivative instruments. When assessing a financial institution's creditworthiness, the Company will consider long term and short term credit ratings and bank financial strength ratings. Notwithstanding any assessment made in respect of a financial institution's creditworthiness, there can be no assurance that the credit quality of any counterparty will not deteriorate during the course of a derivative

transaction and that a Fund will not sustain a loss on a transaction as a result.

The following is a non-exhaustive summary description of certain types of financial derivative instruments, which may be used by a Fund. The types of financial derivative instruments used by each individual Fund are set out in the Relevant Supplement.

• **Contract for difference (CFD)** – CFDs are contracts where the buyer is the holder of the long position and will receive or pay the difference between the current value of an asset and the price when the contract is closed.

• **Forward foreign exchange contracts** – Forward foreign exchange contracts are agreements between parties to exchange fixed amounts of different currencies at an agreed exchange rate at an agreed time in the future. Forward foreign exchange contracts are similar to currency futures, except that they are not exchange-traded, but are instead over the counter instruments. Forward foreign exchange contracts may be used to manage currency exposures represented in the Index. Non-deliverable forward foreign exchange contracts may be used for the same reasons. They differ from standard forward foreign exchange contracts in that at least one of the currencies in the transaction is not permitted to be delivered in settlement of any profit or loss resulting from the transaction. Typically, profit or loss in this case will be delivered in US Dollars or Euros.

• **Futures** - futures contracts are agreements to buy or sell a fixed amount of an index, equity, bond or currency at a fixed date in the future. Futures contracts are exchange-traded instruments and their dealing is subject to the rules of the exchanges on which they are dealt.

• **Options** – Options are contracts, usually exchange-traded, in which the writer (seller) promises that the contract buyer has the right, but not the obligation, to buy or sell a certain index, equity, bond or currency at a certain price (the strike price) on or before a certain expiration date, or exercise date. An option giving the buyer the right to buy at a certain price is called a call, while one that gives him/her the right to sell is called a put. The Fund may purchase and write call and put options on securities (including straddles), securities indices and currencies and use options on futures contracts (including straddles) and swap agreements, and / or hedge against changes in interest rates, currency exchange rates or securities prices. OTC options may only be concluded if the counterparties are highly rated financial institutions which specialize in transactions of this kind.

• **Swaps** – swaps are a bilateral contract to exchange two securities, performance, income, interest rates or currencies.

• Total return swaps (TRS)

In particular, a total return swap is an agreement in which one party (total return payer) transfers the total economic performance of a reference obligation, which may for example be a share, bond or index, to the other party (total return receiver). The total return receiver must in turn pay the total return payer any reduction in the value of the reference obligation and possibly certain other cash flows. Total economic performance includes income from interest and fees, gains or losses from market movement, and credit losses. A Fund may use a total return swap to gain exposure to an asset (or other reference obligation), which it does not wish to buy and hold itself, or otherwise to make a profit or avoid a loss.

Total return swaps entered into by a Fund may be in the form of funded and/or unfunded swaps. An unfunded swap means a swap where no upfront payment is made by the total return receiver at inception. A funded swap means a swap where the total return receiver pays an upfront amount in return for the total return of the reference obligation.

Unless otherwise indicated in the Relevant Supplement, no Fund shall employ total return swaps (within the meaning of, and under the conditions set out in, applicable laws, regulations and CSSF circulars issued from time to time, in particular, but not limited to, Regulation (EU) 2015/2365).

The counterparties to such total return swaps will be entities (which may or may not be related to the Management Company, the Investment Manager, the Depositary or their delegates) with any type of legal personality typically located in OECD jurisdictions. They will be subject to ongoing supervision by a public authority, be financially sound and have the necessary organisational structure and

resources for the relevant type of transaction. In addition, a credit assessment (which may, but is not obliged to, include a minimum credit rating requirement) will be undertaken with respect to each counterparty. The credit assessment considers in particular asset quality, capital adequacy, funding profile, earnings stability and liquidity.

Where a Fund uses total return swaps, the maximum and the expected proportion of assets that could be subject to these instruments will be expressed as a percentage of the sum of the gross notional exposures of the total return swaps entered into by the Fund divided by its NAV and set out in the Relevant Supplement.

Each Fund may incur costs and fees in connection with total return swaps. In particular, a Fund may pay fees to agents and other intermediaries, which may be affiliated with the Depositary or the Investment Manager to the extent permitted under applicable laws and regulations, in consideration for the functions and risks they assume. The amount of these fees may be fixed or variable. Information on direct and indirect operational costs and fees incurred by each Fund in this respect, as well as the identity of the entities to which such costs and fees are paid and any affiliation they may have with the Depositary or the Investment Manager, if applicable, will be available in the annual report. The entire return generated by total return swaps, net of applicable counterparty, brokerage and/or other intermediary fees and expenses, will be returned to the Fund. The Investment Manager does not charge any specific fee, in addition to the investment management fee, upon entering into transactions under total return swap agreements.

• **TBA securities** – To Be Announced ("TBA") mortgage-backed securities are, typically, debt securities structured by agencies such as the Federal National Mortgage Association (Fannie Mae), Federal Home Loan Mortgage Corporation (Freddie Mac) etc. In the case of a typical TBA transaction, the terms of the security, including coupon, face value, price and settlement date are determined at the time of the trade but there is, effectively, a delayed delivery obligation and there is settlement of TBA mortgage-backed securities, usually on one specific date in each calendar month. For example, although a Fund may enter into a transaction to acquire a TBA mortgage-backed security, the issuer is not actually obliged to deliver that security to the Fund for a period of, for example, three months. Typically, the Investment Manager will dispose of any TBA mortgage-backed securities immediately prior to the projected date of settlement and realise any gain on the acquisition and disposal of the TBA mortgage-backed security in that manner. Accordingly, a Fund may use TBA mortgage-backed securities to gain exposure to the mortgage sector without being subject to a requirement to take delivery of the relevant securities. A Fund may use TBA mortgage-backed securities to gain a liquid exposure to the component of the Index that is comprised of U.S. mortgage-backed securities with the intention of minimising tracking error between the Fund and the Index.

8.3.2. Global Exposure

The global exposure (*i.e.* aggregate exposure) to financial derivative instruments is measured daily using the commitment approach. It is calculated taking into account the current value of the underlying assets, counterparty risk, foreseeable market movements and the time available to liquidate the positions.

The Company shall ensure that the global exposure of each Fund to financial derivative instruments using the commitment approach does not exceed the total net assets of that Fund. In addition, this overall risk exposure may not be increased by more than 10% by means of temporary borrowings.

Commitment approach

Unless otherwise indicated in the Relevant Supplement, each Fund uses the commitment approach to calculate its global exposure. Each Fund using this approach will make use of financial derivative instruments in a manner which will not materially alter the Fund's risk profile with respect to what it would be if financial derivate instruments were not used.

Under the commitment approach, positions on financial derivative instruments held by a Fund are converted into the equivalent positions in the underlying assets. The Fund's total commitment to financial derivative instruments is then quantified as the sum of the individual

commitments. Netting and hedging arrangements are permitted in certain cases only.

8.3.3. Financial Techniques and Instruments

The Company may enter into repurchase agreements and securities lending agreements for efficient portfolio management purposes (as described in section 8.3.1 above), subject to article 42(2) of the 2010 Law and the conditions and limits set out in CSSF circular 08/356, CSSF circular 14/592, ESMA guidelines ESMA/2014/937, Regulation (EU) 2015/2365 and other applicable laws, regulations, and administrative practice of the CSSF. Unless otherwise indicated in the Relevant Supplement, no Fund shall use such techniques.

In order to limit the exposure of a Fund to the risk of default of the counterparty under a securities lending or repurchase transaction, the Fund will receive collateral, as further specified in 8.7.4 below.

Details of the exposures obtained through efficient portfolio management techniques, the identity of the counterparties used, the type and amount of collateral received to reduce such exposures and any income and expenses, whether direct or indirect, generated by efficient portfolio management techniques will be disclosed in the periodic reports of the Company.

8.3.3.1 Repurchase Agreements

A repurchase agreement is an agreement between a seller and a buyer of specified securities under which the seller agrees to repurchase securities at an agreed upon price and, usually, at a stated time. If the Company is the seller, the agreement is categorised by the Company as a repurchase agreement; if the Company is the buyer, the agreement is categorised by the Company as a reverse repurchase agreement. The difference between the purchase price and the repurchase price represents the yield to the buyer from the repurchase transaction. Each Fund may enter into repurchase agreements with an affiliate of the Investment Manager, provided that such transactions will be effected on an arm's length basis.

The entire return generated by repurchase agreements, net of applicable counterparty, brokerage and/or other intermediary fees and expenses, will be returned to the Fund. The Investment Manager does not charge any specific fee, in addition to the investment management fee, upon entering into transactions under repurchase agreements. Information on direct and indirect operational costs and fees incurred by each Fund in this respect, as well as the identity of the entities to which such costs and fees are paid and any affiliation they may have with the Depositary or the Management Company, if applicable, will be available in the annual report.

Investors should also read the risk warning headed "**Repurchase agreements**" in the section "**Risk Information**".

8.3.3.2 Securities Lending

In a securities lending transaction, the lender makes a loan of securities to the borrower upon terms that require the borrower to return equivalent securities to the lender within a specified period and the borrower pays the lender a fee for the use of the securities during the period that they are on loan. The Fund should ensure that it can, at any time, recall any security lent out within five (5) Business Days or such other period as is considered normal practice or terminate any securities lending agreement into which it has entered.

The Board may determine to lend the portfolio securities of any Fund via a securities lending programme through an appointed securities lending agent, including State Street Bank and Trust Company, a Massachusetts trust company having a principal place of business at One Lincoln Street, Boston, Massachusetts, USA ("SSBT"), acting through its London branch (Branch Registration No. in England BR002088) at 20 Churchill Place, London E14 5HJ, England; and any of its affiliates, to brokers, dealers and other financial institutions desiring to borrow securities to complete transactions and for other purposes. The Company has enrolled certain Funds in the Securities Lending Programme sponsored by State Street Bank and Trust Company. Eligibility of a Fund to participate in the Securities Lending Programme is flagged in the Relevant Supplement. Investors should read the risk warning headed "**Conflicts of Interest Risk**" in the "**Risk Information**" section for further information regarding the risks

associated with the use of affiliates to provide securities lending agency services to the Company.

Participating in a securities lending programme allows a Fund to receive the net income generated by lending its securities. All revenues from efficient portfolio management techniques, net of direct and indirect operational costs, will be returned to the relevant Fund. Pursuant to the terms of the relevant Securities Lending Programme, the lending agent (State Street Bank and Trust Company, acting through its London branch, or any of its affiliates) will be entitled to retain a portion of up to 25% of the securities lending revenue to cover all fees and costs associated with the securities lending activity, including the delivery of loans, the management of collateral. The Fund will be entitled to at least 75% of the securities lending gross revenues. Information on direct and indirect operational costs and fees incurred by each Fund in this respect, as well as the identity of the entities to which such costs and fees are paid and any affiliation they may have with the Depositary or the Management Company, if applicable, will be available in the annual report. Investors should also read the risk warning headed "**Securities Lending Risk**" in the section "**Risk Information**".

On 1 February 2022 Regulation (EU) No. 909/2014 **("CSDR")** introduced new rules intended to reduce the number of settlement fails and to address settlement fails where they occur within EU central securities depositories. These measures include the introduction of a new cash penalties regime under which the participant within the relevant clearing system responsible for a settlement fail will be required to pay a cash penalty which is in turn distributed to the other participant. Such penalties that relate to securities lending transactions will be borne entirely by the lending agent and will not be paid out of the assets of the Fund on whose behalf the in-scope transaction was entered into. A securities lending transaction may also result in there being penalty credits as a consequence of the CSDR settlement discipline regime which will be retained by the lending agent and not passed onto the relevant Fund.

Unless otherwise indicated in the Relevant Supplement, no Fund shall participate in a securities lending programme.

8.3.3.3 Selection of counterparties

A Fund may only enter into securities lending agreements and repurchase agreements with counterparties which (i) are financial institution with any type of legal personality and typically located in an OECD member state (and which may or may not be related to the Investment Manager, Depositary or their delegates), (ii) subject to prudential supervision rules considered by the CSSF as equivalent to those provided by European Union law, (iii) be of good reputation, and (iii) where a credit assessment has been undertaken. Where the counterparty is subject to a credit rating by any agency registered and supervised by the European Securities and Markets Authority, that rating shall be taken into account in the credit assessment. Where a counterparty is downgraded to A2 or below (or comparable rating) by such a credit rating agency, a new credit assessment in respect of the counterparty will be undertaken without delay. Use of the efficient portfolio management techniques described above could adversely affect the liquidity of a Fund's portfolio and will be taken into account by the Investment Manager in managing the Fund's liquidity risk and in this respect, investors should also read the risk warning headed "**Liquidity Risk**" in the "**Risk Information**" section.

8.3.4. Collateral

A Fund may enter securities lending agreements and repurchase agreements only where it acts in accordance with normal market practice, in the best interests of Company and provided that all collateral received under the securities lending contract or repurchase agreement and any financial derivative instrument meet, at all times, the following criteria:

- **Liquidity:** Collateral (other than cash) should be highly liquid and traded on a regulated market or multi-lateral trading facility with transparent pricing in order that it can be sold quickly at a price that is close to its pre-sale valuation.
- **Valuation:** Collateral should be valued on a daily basis and assets that exhibit high price volatility should not be accepted as collateral unless suitably conservative haircuts are in place.

- **Issuer Credit Quality:** Collateral received should be of high quality.
- **Correlation:** Collateral should be issued by an entity that is independent from the counterparty and is expected not to display a high correlation with the performance of the counterparty.
- **Diversification:** Collateral should be sufficiently diversified in terms of country, markets and issuers. Non-cash collateral will be considered to be sufficiently diversified if the relevant Fund receives from a counterparty a basket of collateral with a maximum exposure to any one issuer of 20% of the Fund's NAV. When the Fund is exposed to a variety of different counterparties, the various baskets of collateral are aggregated to ensure exposure to a single issuer does not exceed 20% of the Fund's NAV.
- **Immediately available:** Assets received as collateral should be capable of being fully enforced by the Company at any time without reference to or approval from the counterparty.

Eligible collateral

It is proposed that each Fund will accept the following types of collateral:

- Cash (except in the framework of securities lending transaction);
- Bonds issued or guaranteed by an EU Member State or a member country of the OECD or by their local public authorities or by supranational institutions and undertakings with EU, regional or worldwide scope;
- Shares or units issued by money market UCIs calculating a daily NAV and being assigned a rating of AAA or its equivalent;
- Shares or units issued by UCITS investing mainly in bonds/shares mentioned in the following two bullet points;
- Bonds issued or guaranteed by first class issuers offering adequate liquidity; or
- Shares admitted to or dealt in on a regulated market of an EU Member State or on a stock exchange of a member state of the OECD, on the condition that these Shares are included in a main index.

Level of collateral

The Fund will determine the required level of collateral for OTC financial derivatives transactions by reference to the applicable counterparty risk limits set out in this section of the Prospectus and taking into account the nature and characteristics of transactions, the creditworthiness and identity of counterparties and prevailing market conditions.

Haircut Policy

The Company has implemented a haircut policy in respect of each class of assets received as collateral. This policy takes account of the characteristics of the relevant asset class, including the credit standing of the issuer of the collateral, the price volatility of the collateral and the results of any stress tests which may be performed in accordance with the stress testing policy.

Depending on the foregoing factors, the haircut applied to the collateral received in relation to the securities lending transactions will be at least included in the following ranges:

- Government bonds: from 2% to 5%;
- Equities: from 5% to 8%.

Depending on the foregoing factors, the haircut applied to the collateral received in relation to the OTC financial derivatives transactions will be at least included in the following ranges:

- Cash in eligible currencies (EUR, GBP, USD): 0%;
- Government bonds: from 1% to 13%.

Depending on the foregoing factors, it is expected that the haircut applied to the collateral received in relation to the repurchase transactions will be at least included in the following ranges:

- Government bonds: from 0% to 5%.

Valuation of collateral

Collateral will be valued on a daily basis using available market prices and taking into account appropriate discounts which will be determined for each asset class based on the haircut policy described above, and will be subject to daily variation margin requirements.

Stress Testing

Any Fund receiving collateral for at least 30% of its assets will undergo regular stress testing in accordance with the Company's liquidity stress-

testing policy to assess the liquidity risk attached to the collateral it has received.

Reinvestment of collateral

Non-cash collateral received by a Fund may not be sold, re-invested or pledged.

Cash collateral received for the benefit of a Fund can only be:

- placed on deposit with a credit institution which has its registered office in a EU Member State or a credit institution located in a third-country which is subject to prudential rules considered by the CSSF as equivalent to those laid down in EU law;
- invested in high-quality government bonds;
- used for the purpose of reverse repurchase transactions provided the transactions are with credit institutions subject to prudential supervision and the Fund is able to recall at any time the full amount of cash on accrued basis; and/or
- invested in short-term money market funds as defined in the Guidelines on a Common Definition of European Money Market Funds issued by ESMA (CESR/10-049) as may be amended from time to time.

Re-invested cash collateral should be diversified in accordance with the diversification requirements applicable to non-cash collateral as set out above.

8.3.5. Safekeeping

Any securities received by a Fund under a securities lending transaction, a repurchase or reverse repurchase agreement transaction or a total return swap, including securities received as collateral under these transactions, will be safe-kept with the Depositary, including via its sub-custodians, where there is title transfer. Where there is no title transfer, it can be held by a third party custodian.

However, in relation to securities lending transactions, the first requirement is not applicable in the event that the Company uses tri-party collateral management services of international central securities depositaries or relevant institutions which are generally recognised as specialists in this type of transaction, which are subject to prudential supervision and which are unrelated to the provider of the assets. Furthermore, notwithstanding the first requirement above, the Company may enter into securities lending programmes organised by generally recognised international central securities depositaries systems provided that the programme is subject to a guarantee from the system operator. The Depositary must be a named participant to the collateral arrangements. Cash received by a Fund under such transactions, including cash received as collateral under such transactions, may be held in a cash account with the Depositary or another bank or credit institution, subject to the conditions of the 2010 Law.

8.4. Proxy Voting and Asset Stewardship

Proxy voting and engagement activities in respect of securities held by the Funds are conducted pursuant to the terms of the Sustainability Stewardship Service Proxy Voting and Engagement Policy available at Sustainability Stewardship Service Proxy Voting and Engagement Policy (the **"Sustainability Policy"**).

The Sustainability Policy focuses on risks and opportunities that may impact long-term value creation, with a focus on sustainability priorities such as climate change, nature, human rights and diversity.

The Management Company has delegated to the Sub-Investment Manager the responsibility for exercising voting rights and engagement activities pursuant to the Sustainability Stewardship Policy. Subject to its full discretion, the Company may from time to time appoint and delegate voting authority attached to certain securities held by the Funds to an independent third party as necessitated by regulatory or other requirements.

Reporting

Periodic reports on the proxy voting and engagement activities undertaken under the Sustainability Policy will be available at Sustainability Stewardship Service Proxy Voting and Engagement Policy.

Proxy Voting Choice
Under Proxy Voting Choice, participating investors are able to select a proxy voting policy that will apply in relation to a pro-rata proportion of the shares (that are available for voting) held by the applicable Funds in which they invest, See further "Proxy Voting Program Risk" disclosure. Any such policy selection under Proxy Voting Choice will apply in place of the Sustainability Policy in respect of the proxy voting activities. All engagements with portfolio companies will continue to be conducted pursuant to the terms of the Sustainability Policy.

8.5. ESG Investing

ESG investing is the assessment of material environmental, social and governance ("**ESG**") issues and Sustainability Risks during the investment process. It complements traditional research such as analysing financial statements, industry trends and company growth strategies.
ESG investing can be used by investors in a variety of ways to achieve a wide range of investment goals including risk management, alignment with values and to enhance sustainable long-term performance and may be incorporated into the Investment Policy of a Fund, as described in the Relevant Supplement, in one or more ways further described below.
To facilitate the various investment goals of such investors, the Investment Manager may apply ESG criteria as a core part of or ancillary to the investment policy of the Fund described in the Relevant Supplement. That is to say that certain Funds target ESG specific outcomes while other Funds, while they do not primarily target ESG outcomes, incorporate ESG tools, ancillary to their primary objective, to enhance risk management and to facilitate responsible investing. Each Fund has been classified under SFDR. See further each Relevant Supplement. Additional information regarding State Street Global Advisors ESG investment approach can be found on the Website.

The Funds do not pursue a reduction of negative externalities caused by the underlying investments and therefore do not consider principal adverse impacts of their investment decisions unless otherwise stated in the Relevant Supplement.
For the purposes of Article 4 of SFDR, the Management Company does not consider the adverse impacts of investment decisions on sustainability factors at its entity level. Details of this consideration and SSGA's approach in this regard can be found on the "Fund Finder" section of the Website.

8.5.1. ESG Integration

ESG Integration refers to the integration of qualitative and quantitative ESG information, including Sustainability Risks, in the investment processes with the objective of broadening investment decision-making framework. ESG Integration aims to improve long-term financial performance and/or mitigate financial risks. It involves considering ESG factors in investment analysis and decisions to lower risk and generate returns. ESG integration is a broad tool, considering material ESG components as a driver of risk and/or return rather than achieving particular environmental, social, or governance goals. The Investment Manager believes that the consideration of ESG factors can aid investment decision making, help to manage investment risk, and facilitate the generation of long term value. As such, where appropriate, the Investment Manager may integrate ESG factors into its investment decision-making alongside traditional investment analysis. Application of ESG Integration to a specific Fund should be tailored depending on the asset class, investment strategy and targeted outcome. In considering the appropriate design, the Investment Manager will assess if and how financially material ESG issues are integrated into their decision-making processes, consider appropriate ESG signals and factors to mitigate risk and identify opportunities for long-term performance potential. See further each Relevant Supplement for details on where ESG Integration is embedded and refer to section 8.1 "Investment Strategies" above for details on how Sustainability Risks are integrated for a particular investment strategy.

8.5.2. ESG Screening

Where indicated in a Relevant Supplement, the Investment Manager will exclude securities

related to certain sectors, companies or practices based on specific ESG criteria. This exclusion is achieved by applying a rules-based exclusion, also known as a screen. The relevant ESG exclusion criteria applied to the Funds are negative and/or norms-based exclusions. A summary of the ESG exclusion criteria relevant for each ESG screened portfolio are included in the Relevant Supplement and the SFDR Annex.

An example of norms-based screening is the exclusion of securities issued by companies that are found, following research, to contravene international norms in relation to environmental protection, human rights, labour standards and anti-corruption.

An example of a negative screen is the exclusion of securities issued by companies that are found, following research, to be involved in the area of controversial weapons, as set out in the Convention of Cluster Munitions and / or the exclusions of companies based on other ESG criteria such as ESG rating thresholds.

For Funds which incorporate an ESG screening approach (other than Index equity funds incorporating an ESG screening approach), the Investment Manager will apply a negative and/or norms-based ESG Screen to the Fund. That is, prior to the construction of the portfolio of the Fund and on an ongoing basis, the Investment Manager will exclude certain securities from the investment universe based on an assessment of their adherence to certain ESG criteria as laid out in the Relevant Supplement and the SFDR Annex. The criteria for the assessment are outlined in the documents produced to comply with Article 10 of SFDR for the relevant Funds. Such documents are available on the Website.

For Index equity funds incorporating an ESG screening approach, a negative and/or norms-based ESG Screen is applied to the Index (as set out in the Relevant Supplement) itself. That is, prior to the construction of the Index and on an ongoing basis, the Index provider will exclude certain securities from the investment universe based on an assessment of their adherence to certain ESG criteria as laid out in the Relevant Supplement and the SFDR Annex using the ESG exclusionary screening methodology of that Index provider. The ESG exclusionary screening methodology of the Index provider is available on the website shown in the Relevant Supplement.

8.5.3. ESG Best in Class Investing

ESG Best in Class investing refers to the composition of portfolios that favour companies with a better ESG performance relative to investment universes and/or industry peers when assessed against objective criteria. See further each Relevant Supplement for details on where ESG Best in Class Investing is embedded.

8.5.4. Thematic ESG Investing

Thematic investing refers to the investment in themes or assets specifically related to sustainability.

For Funds which incorporate a Thematic ESG Investing approach, the Investment Manager will construct the portfolio to include investments on the basis of their fulfilling certain sustainability criteria and/or deliver on specific focus areas within the spectrum of ESG investing. See further each Relevant Supplement for details on where thematic ESG Investing is embedded.

8.6. Taxonomy Regulation

The Taxonomy Regulation establishes criteria for determining whether an economic activity qualifies as environmentally sustainable in the context of particular environmental objectives. The Taxonomy Regulation also obliges the Manager to disclose how and to what extent the investments of the relevant Funds are in economic activities that qualify as environmentally sustainable pursuant to those criteria.

The Taxonomy Regulation requires the Management Company to disclose (i) how and to what extent it has used the Taxonomy Regulation to determine the sustainability of the Funds' underlying investments; and (ii) to what environmental objective(s), as set out within the Taxonomy Regulation, the underlying

investments contribute. The analysis and disclosure requirements introduced by the Taxonomy Regulation are very detailed and compliance with them requires the availability of multiple, specific data points in respect of each investment, which a Fund may invest. As at the date hereof, due to the delay to the publication of the final regulatory technical standards supplementing the Taxonomy Regulation and the related absence of sufficient reliable, timely and verifiable data in respect of the underlying investments, it is not currently possible to state accurately that the underlying investments of a relevant Fund contribute to such environmental objectives. Once the regulatory technical standards have been finalised and more reliable data on the underlying investments becomes available, it is possible that this position may change. The Management Company is keeping this situation under active review and where adequate, reliable data on the relevant Fund's investments become available, the Management Company may be in a position to provide further details on the extent of which the Fund's investments are taxonomy aligned, in which case the Prospectus or the Relevant Supplement will be updated.

Unless otherwise stated in the Relevant Supplement, the investments in the Funds do not take into account the EU criteria for environmentally sustainable economic activities.

9. Luxembourg taxation

The following information is of a general nature only and is based on the Company's understanding of certain aspects of the laws and practices in force in Luxembourg as of the date of this Prospectus. It does not purport to be a comprehensive description of all tax considerations that may be relevant to an investment decision. It is included herein solely for preliminary information purposes. It is not intended to be, nor should it be construed to be, legal or tax advice. It is a description of the essential material Luxembourg tax consequences with respect to the subscribing for, purchasing, owning and disposing of Shares and may not include tax considerations that arise from rules of general application or that are generally assumed to be known to investors. This summary is based on the laws in force in Luxembourg on the date of this Prospectus and is subject to any changes in law that may take effect after such date, even with retroactive or retrospective effect. Prospective investors should consult their own professional advisors as to the particular consequences of subscribing for, purchasing, owning and disposing of Shares, including the application and effect of any federal, state or local taxes under the tax laws of Luxembourg and their countries of citizenship, residence, domicile or incorporation.

Investors should be aware that the residence concept used under the respective headings below applies for Luxembourg income tax assessment purposes only. Any reference in the present section to a tax, duty, levy, impost or other charge or withholding of a similar nature refers to Luxembourg tax law and/or concepts only. Also, please note that a reference to Luxembourg income tax generally encompasses corporate income tax (*impôt sur le revenu des collectivités*), municipal business tax (*impôt commercial communal*), the solidarity surcharge (*contribution au fonds pour l'emploi*), as well as personal income tax (*impôt sur le revenu des personnes physiques*). Corporate taxpayers may further be subject to net wealth tax (*impôt sur la fortune*) as well as other duties, levies or taxes. Corporate income tax, municipal business tax, net wealth tax and the solidarity surcharge apply to most corporate taxpayers that are resident in Luxembourg for tax purposes. Corporate taxpayers may further be subject to a top-up tax arising under any legislation implementing the GloBE Rules, Pillar II Directive, the Pillar II Law or similar rules (the "**Pillar II Laws**"). Individual taxpayers are generally subject to personal income tax and the solidarity surcharge. Under certain circumstances, where an individual taxpayer acts in the course of the management of a professional or business undertaking, municipal business tax may apply as well.

9.1. Taxation of the Company

9.1.1. Subscription tax

Under current Luxembourg tax law, the Company is neither subject to corporate income tax and municipal business tax (including the solidarity surcharge) nor net wealth tax (including the minimum net wealth tax) in Luxembourg. The Company is, however, subject to an annual subscription tax of 0.05% based on its NAV at the end of each quarter, calculated and paid quarterly. A reduced rate of 0.01% per annum applies to:

- UCIs and individual compartments of umbrella UCIs that are authorised as money market funds in accordance with Regulation (EU) 2017/1131 of the European Parliament and of the Council of 14 June 2017 on money market funds; and/or
- individual compartments of UCIs with multiple compartments subject to the 2010 Law and individual classes of securities issued within a UCI or within a compartment of a UCI with multiple compartments, provided that the securities of these compartments or classes are reserved for one or more institutional investors.

Under certain conditions, reduced rates ranging from 0.04% to 0.01% may also be available for the portion of the net assets of a UCI or of an individual compartment of a UCI with multiple compartments that are invested in sustainable economic activities (as defined in Article 3 of the Taxonomy Regulation).

In order to benefit from the above exemptions, UCIs must separately disclose the value of the eligible net assets in their periodic subscription tax returns.

A subscription tax exemption is available for:

- the value of the assets represented by units held in other UCIs, provided that such units have already been subject to the subscription tax provided for by Article 174 of the 2010 Law, Article 68 of the amended law of 13 February 2007 on specialised investment funds, or Article 46 of the amended law of 23 July 2016 on reserved alternative investment funds;
  In order to benefit from this exemption, UCIs which hold such units must indicate their value separately in their periodic subscription tax returns.
- UCIs as well as individual compartments of UCIs with multiple compartments (i) whose securities are reserved for institutional investors, and (ii) that are authorised as short-term money market funds in accordance with Regulation (EU) 2017/1131 of the European Parliament and of the Council of 14 June 2017 on money market funds, and (iii) that have obtained the highest possible rating from a recognised rating agency.
  If several classes of securities exist within the UCI or the compartment, the exemption only applies to classes whose securities are reserved for institutional investors;
- UCIs as well as individual compartments of UCIs with multiple compartments whose securities are reserved for (i) institutions for occupational retirement pension or similar investment vehicles set up at the initiative of one or more employers for the benefit of their employees, (ii) companies of one or more employers investing the funds they hold, to provide retirement benefits to their employees, and (iii) investors in the context of a pan-European Personal Pension Product established under Regulation (EU) 2019/1238 of the European Parliament and of the Council of 20 June 2019 on a pan-European Personal Pension Product (PEPP);
  If there are several classes of securities within the UCI or compartment, the exemption applies only to those classes whose securities are reserved for these investors;
- UCIs as well as individual compartments of UCIs with multiple compartments whose main object is the investment in microfinance institutions;
- UCIs as well as individual compartments of UCIs with multiple compartments (i) whose securities are listed or traded on at least one stock exchange or another regulated market operating regularly, recognised and open to the public, and (ii) whose sole object is to replicate the performance of one or more indices.
  If several classes of securities exist within the UCI or the compartment, the exemption only applies to classes fulfilling the condition sub-point (i).
- UCIs and individual compartments of UCIs with multiple compartments which are approved as European long-term investment funds in accordance with Regulation (EU) 2015/760 of the European Parliament and of the Council of 29 April 2015 on European long-term investment funds.
- **UCITS and individual sub-funds of UCITS with multiple sub-funds of which the units or shares are traded throughout the day on at least one regulated market or a multilateral trading facility and for which at least one market maker intervenes to ensure that the price of their units or shares does not deviate significantly from their NAV and, where applicable, their iNAV.**
  If there are several classes of units or shares within the UCITS or sub-fund, the exemption applies only to the classes of units or shares referred to in this point.

In order to qualify for these exemptions, UCIs/UCITS must separately disclose the value of the eligible net assets in their periodic subscription tax returns.

9.1.2. Withholding tax

The Company may be subject to non-recoverable withholding tax on dividends and interest and to tax on capital gains in the country of origin of its investments. Under current Luxembourg tax law there is no withholding tax on any distribution or redemption payments made by the Company to its Shareholders or on the distribution of liquidation proceeds to Shareholders.

Whether the Company may benefit from a double tax treaty concluded by Luxembourg must be analysed on a case-by-case basis. Indeed, as the Company is structured as an investment company (as opposed to a mere co-ownership of assets), certain double tax treaties signed by Luxembourg may directly be applicable to the Company.

9.1.3. Value added tax

In Luxembourg, regulated investment funds such as the Company are considered as taxable persons for value added tax ("**VAT**") purposes without any input VAT deduction right. A VAT exemption applies in Luxembourg for services qualifying as fund management services. Other services supplied to the Company could potentially trigger VAT and require the VAT registration of the Company in Luxembourg. As a result of such VAT registration, the Company will be in a position to fulfil its duty to self-assess the VAT regarded as due in Luxembourg on taxable services (or goods to some extent) purchased from abroad. No VAT liability arises in principle in Luxembourg in respect of payments made by the Company to its Shareholders to the extent that such payments are linked to their subscription to the Shares and therefore do not constitute the consideration received for taxable services supplied.

9.1.4. Stamp duty

No stamp duty or other tax will be payable in Luxembourg in connection with the issue of Shares of the Company. A fixed registration duty of Euro 75 will be levied upon amendments of the Articles of the Company.

9.1.5. Top-up tax

The Company may be subject to a top-up tax in Luxembourg if it falls within the scope of the Luxembourg law of 22 December 2023 implementing Council Directive (EU° 2022/2523. Such top-up tax is currently determined under either an income inclusion rule ("**IIR**") or a qualified domestic minimum top-up tax rule ("**QDMTT**").

9.1.6. Net wealth tax

The Company is exempt from net wealth tax.

9.2. Taxation of Luxembourg non-resident Shareholders

It is expected that the Shareholders will be resident for tax purposes in different countries. Accordingly, no attempt is made in this Prospectus to summarise the tax consequences for each Shareholder of subscribing for, purchasing, owning or disposing of Shares. These consequences will vary depending on the law and practice currently in force in the Shareholders' country of citizenship, residence, domicile or incorporation, as well as their personal circumstances. Shareholders that are residents or citizens of certain countries which have a tax legislation affecting foreign funds may have a current liability to tax on undistributed income and gains of the Company. Shareholders should consult their own professional advisors as to the particular consequences of subscribing for, purchasing, owning and disposing of Shares, including the application and effect of any federal, state or local taxes under the tax laws of Luxembourg and their countries of citizenship, residence, domicile or incorporation.

9.2.1. Tax residency

A Shareholder will not become resident (or be deemed resident) in Luxembourg by reason only of holding and/or disposing of the Shares or executing, performing, delivering and/or enforcing its rights thereto.

9.2.2. Non-resident Shareholders

Shareholders, who are non-residents of Luxembourg and who have neither a permanent establishment nor a permanent representative in Luxembourg to which or whom the Shares are attributable, are not liable to any Luxembourg income tax on income received and capital gains realized upon the sale, disposal or redemption of the Shares.

Non-resident corporate Shareholders having a permanent establishment or a permanent representative in Luxembourg, to which or whom the Shares are attributable, must include any income received, as well as any gain realized on the sale, disposal or redemption of Shares, in their taxable income for Luxembourg tax assessment purposes. The same inclusion applies to individuals, acting in the course of the management of a professional or business undertaking, who have a permanent establishment or a permanent representative in Luxembourg to which or whom the Shares are attributable.

Taxable gains are determined as being the difference between the sale, repurchase or redemption price and the lower of the cost or book value of the Shares sold or redeemed.

9.2.3. Other taxes

On the contrary, no inheritance tax is levied on the transfer of the Shares upon the death of an individual Shareholder if the deceased was not resident in Luxembourg for inheritance tax purposes at the time of his/her death.

9.3. Taxation of Luxembourg Shareholders

9.3.1. Luxembourg resident individuals

Dividends and other payments derived from the Shares by resident individual Shareholders, who act in the course of the management of either their private wealth or their professional/business activity, are subject to income tax at the ordinary progressive rates.

Capital gains realised upon the disposal of the Shares by a resident individual Shareholder, who acts in the course of the management of their private wealth, are not subject to income tax, unless said capital gains qualify either as speculative gains or as gains on a substantial participation. Capital gains are deemed to be speculative and are thus subject to income tax at ordinary rates if the Shares are disposed of within 6 months after their acquisition or if their disposal precedes their acquisition. A participation is deemed to be substantial where a resident individual Shareholder holds or has held, either alone or together with his/her spouse or partner and/or minor children, directly or indirectly at any time within the 5 years preceding the disposal, more than 10% of the share capital of the company whose shares are being disposed of. A Shareholder is also deemed to alienate a substantial participation if he acquired free of charge, within the 5 years preceding the transfer, a participation that constituted a substantial participation in the hands of the alienator (or the alienators in case of successive transfers free of charge within the same 5-year period). Capital gains realised on a substantial participation more than 6 months after the acquisition thereof are taxed according to the half-global rate method (i.e. the average rate applicable to the total income is calculated according to progressive income tax rates and half of the average rate is applied to the capital gains realised on the substantial participation). A disposal may include a sale, an exchange, a contribution or any other kind of alienation of the participation.

Capital gains realised on the disposal of the Shares by resident individual Shareholders, who act in the course of their

professional/business activity, are subject to income tax at ordinary rates. Taxable gains are defined as being the difference between the price for which the Shares have been disposed of and the lower of their cost or book value.

9.3.2. Luxembourg resident companies

Luxembourg resident corporate (*sociétés de capitaux*) Shareholders must include any income received, as well as any gain realised on the sale, disposal or redemption of Shares, in their taxable income for Luxembourg income tax assessment purposes.

9.3.3. Luxembourg residents benefiting from a special tax regime

Luxembourg resident corporate Shareholders which are companies benefiting from a special tax regime (such as (i) undertakings for collective investment subject to the 2010 Law, (ii) specialised investment funds subject to the amended law of 13 February 2007, (iii) family wealth management companies governed by the amended law of 11 May 2007 (iv) and reserved alternative investment funds governed by the law of 23 July 2016 and treated as specialised investment funds for Luxembourg tax purposes) are tax exempt entities in Luxembourg, and are thus not subject to any Luxembourg income tax.

9.3.4. Net wealth tax

Luxembourg resident Shareholders as well as non-resident Shareholders that have a permanent establishment or a permanent representative in Luxembourg to which or to whom the Shares are attributable, are subject to Luxembourg net wealth tax on such Shares, except if such Shareholders are (i) an individual, (ii) a securitisation vehicle subject to the amended law of 22 March 2004, (iii) a venture capital company subject to the amended law of 15 June 2004, (iv) a professional pension institution subject to the amended law of 13 July 2005, (v) a specialised investment fund subject to the amended law of 13 February 2007, (vi) a family wealth management company subject to the amended law of 11 May 2007, (vii) a UCI subject to 2010 Law, or (viii) a reserved alternative investment fund subject to the amended law of 23 July 2016.

However, (i) a securitisation company subject to the amended law of 22 March 2004, (ii) a tax opaque venture capital company subject to the amended law of 15 June 2004, (iii) a professional pension institution subject to the amended law of 13 July 2005, and (iv) a tax opaque reserved alternative investment fund treated as a venture capital vehicle for Luxembourg tax purposes and subject to the amended law of 23 July 2016 remain subject to the minimum net wealth tax in Luxembourg

9.3.5. Other taxes

Under current Luxembourg tax law, where an individual Shareholder is resident in Luxembourg for inheritance tax purposes at the time of his/her death, the Shares are included in his/her taxable base for inheritance tax purposes.

Gift tax may be due on a gift or donation of the Shares, if the gift is recorded in a Luxembourg notarial deed or otherwise registered in Luxembourg.

9.4. Exchange of Information

Capitalized terms used in this section should have the meaning as set forth in the CRS Law (as defined below), unless provided otherwise herein.

The Company may be subject to the Standard for Automatic Exchange of Financial Account Information in Tax Matters (the "**Standard**") and its Common Reporting Standard (the "**CRS**") as set out in the Luxembourg law dated 18 December 2015 on the Common Reporting Standard (the "**CRS Law**").

Under the terms of the CRS Law, the Company is likely to be treated as a Luxembourg Reporting Financial Institution. As such, as of 30 June 2017 and without prejudice to other applicable data protection provisions as set out

in the fund documentation, the Company will be required to annually report to the Luxembourg tax authorities personal and financial information related, inter alia, to the identification of, holdings by and payments made to (i) investors that are reportable persons under the CRS Law, and (ii) Controlling Persons (as defined below) of certain non-financial entities which are themselves reportable persons. This information, as exhaustively set out in Annex I of the CRS Law, will include personal data related to the reportable persons (the "**CRS Information**").

The Company is responsible for the processing of personal data and each shareholder has a right to access the data communicated to the Luxembourg tax authorities and to correct such data (if necessary). Any data obtained by the Company are to be processed in accordance with the Data Protection Legislation.

The Company's ability to satisfy its reporting obligations under the CRS Law will depend on each investor providing the Company with the required CRS Information, as described above, along with the required supporting documentary evidence. Upon request of the Company, each investor shall agree to provide the Company such information. In this context, the investors are hereby informed that, as data controller, the Company will process the CRS Information for the purposes as set out in the CRS Law. The investors undertake to inform their Controlling Persons, if applicable, of the processing of their CRS Information by the Company.

For the purposes of this section, "Controlling Person" means the natural persons who exercise control over an entity. In the case of a trust, the settlor(s), the trustee(s), the protector(s) (if any), the beneficiary(ies) or class(es) of beneficiaries, and any other natural person(s) exercising ultimate effective control over the trust, and in the case of a legal arrangement other than a trust, such term means persons in equivalent or similar positions. The term "Controlling Persons" must be interpreted in a manner consistent with the Financial Action Task Force Recommendations. Investors are further informed that the CRS Information related to reportable persons within the meaning of the CRS Law will be disclosed to the Luxembourg tax authorities annually for the purposes set out in the CRS Law. In particular, reportable persons are informed that certain operations performed by them will be reported to them through the issuance of statements, and that part of this information will serve as a basis for the annual disclosure to the Luxembourg tax authorities.

Similarly, investors undertake to inform the Company within thirty (30) days of receipt of these statements should any personal data not be accurate. The investors further undertake to inform the Company of, and provide the Company with all supporting documentary evidence of any changes related to the CRS Information after occurrence of such changes within thirty (30) days.

Any investor that fails to comply with the Company's CRS Information or documentation requests may be held liable for penalties imposed on the Company and attributable to such investor's failure to provide the CRS Information or subject to disclosure of the CRS Information by the Company to the Luxembourg tax authorities. The Company may, in its sole discretion, redeem the Shares of such investor. It is the responsibility of investors to seek advice on taxes and other consequences which may result from the subscription, ownership, redemption, switching and transfer of Shares, including any regulations regarding the control on the movement of capital.

9.5. FATCA

The Company may be subject to regulations imposed by foreign regulators, in particular, the United States Hiring Incentives to Restore Employment Act (Hire Act) which was enacted into U.S. law on 18 March 2010. It includes provisions generally known as FATCA. FATCA provisions generally impose a reporting to the U.S. Internal Revenue Services of non-U.S. financial institutions that do not comply with FATCA and U.S. persons' (within the meaning of FATCA) direct and indirect ownership of non-U.S. accounts and non-U.S. entities. Failure to provide the requested information will lead to a 30% withholding tax applying to certain U.S.

source income (including dividends and interest) and gross proceeds from the sale or other disposal of property that can produce U.S. source interest or dividends.

Luxembourg has entered into a 'model 1' intergovernmental agreement with the United States of America (the "**IGA**") in relation to FATCA and has adopted a law to introduce the provisions of the IGA into Luxembourg law. This law requires financial institutions located in Luxembourg to report, when required, information on financial accounts held by U.S. Specified Persons (within the meaning of the IGA) and non-U.S. financial institutions that do not comply with FATCA and, if any, to the competent authorities.

The Company may be treated as a Foreign Financial Institution (within the meaning of the IGA). This status obliges the Company to regularly obtain and verify information on all of its Shareholders concerning their tax residence and all other information deemed necessary to comply with the above mentioned regulations. Upon request of the Company, each Shareholder shall agree to provide certain information, including, in case of a Non-Financial Foreign Entity ("**NFFE**") (within the meaning of the IGA), the direct or indirect owners above a certain threshold of ownership of such NFFE, along with the required supporting documentation. Similarly, each Shareholder shall agree to actively provide to the Company within thirty days any information that would affect its status, as for instance a new mailing address or a new residency address.

FATCA and the IGA may result in the obligation for the Company to disclose the name, address and taxpayer identification number (if available) of the Shareholder as well as information such as account balances, income and gross proceeds (non-exhaustive list) to the Luxembourg tax authorities (*administration des contributions directes*) under the terms of the IGA. Such information will be onward reported by the Luxembourg tax authorities to the U.S. Internal Revenue Service.

Additionally, the Company is responsible for the processing of personal data and each investor has a right to access the data communicated to the Luxembourg tax authorities and to correct such data (if necessary). Any data obtained by the Company are to be processed in accordance with the Data Protection Legislation. Although the Company will attempt to satisfy any obligation imposed on it to avoid imposition of FATCA withholding tax, no assurance can be given that the Company will be able to satisfy these obligations. If the Company becomes subject to a withholding tax as result of the FATCA regime, the value of the shares held by the Shareholders may suffer material losses. A failure for the Company to obtain such information from each Shareholder and to transmit it to the Luxembourg tax authorities may trigger the 30% withholding tax to be imposed on payments of U.S. source income and on proceeds from the sale of property or other assets that could give rise to U.S. source interest and dividends.

Any Shareholder that fails to comply with the Company's documentation requests may be charged with any taxes imposed on the Company attributable to such Shareholder's failure to provide the information and the Company may, in its sole discretion, redeem the shares of such Shareholder.
Shareholders who invest through intermediaries are reminded to check if and how their intermediaries will comply with this U.S. withholding tax and reporting regime.
The Company and/or the investors may also be indirectly affected by the fact that a non U.S. financial entity does not comply with FATCA regulations even if the Company satisfies with its own FATCA obligations.

Despite anything else herein contained and as far as permitted by Luxembourg law, the Company shall have the right to:

- withhold any taxes or similar charges that it is legally required to withhold, whether by law or otherwise, in respect of any Shares issued by the Company;

- require any investor or beneficial owner of the Shares to promptly furnish such personal data as may be required by the Company in its discretion in order to comply

with any law and/or to promptly determine the amount of withholding to be retained;

- divulge any such personal information to any tax authority, as may be required by applicable laws or regulations or requested by such authority; and
- delay payments to a Shareholder until the Company holds sufficient information to comply with applicable laws and regulations or determine the correct amount to be withheld.

10. French taxation

10.1. *Plan d'Epargne en Actions* ("PEA") eligibility – France

Funds eligible for inclusion in the French PEA tax wrapper must invest a minimum of 75% of their assets in PEA eligible equities as defined under applicable French laws and regulations. The Relevant Supplement will indicate if a Fund is PEA eligible at the Relevant Supplement's date of issue. Should the Board believe that a fund is no longer PEA eligible (e.g., for Index funds because the Index constituents are no longer aligned with PEA criteria), it will provide notice to the Shareholders.

11. Other Information

11.1. Where to learn more about the Funds

Copies of the following documents may be inspected at the registered office of the Company during normal Luxembourg business hours:

- the Management Company agreement;
- the Depositary agreement;
- the administration agreement; and
- the Articles.

In addition, the PRIIPS KIDs/KIID(s), the Prospectus, and the annual or semi-annual reports may be obtained from the UCI Administrator free of charge or may be inspected at the registered office of the UCI Administrator during normal Luxembourg business hours or online on the Website.

The most recent audited financial statements for the Company will be available at the registered office of the UCI Administrator during normal Luxembourg business hours within four months in the case of the annual report and two months in the case of the half-yearly report.

SHAREHOLDER INFORMATION: Telephone: +352 464 010 700 or on the Website.

Shareholder inquiries may be directed to the Funds by calling the Shareholder Information number listed above. Email: ssgaquerydesk@statestreet.com

No person has been authorised to give any information or to make any representations other than those contained in this Prospectus in connection with the offer of each Fund's Shares, and, if given or made, the information or representations must not be relied upon as having been authorised by the Company. Neither the delivery of this Prospectus or any Relevant Supplement nor any sale of Shares shall under any circumstance imply that the information contained herein is correct as of any date after the date of this Prospectus.

11.2. Complaints

Any investor wishing to make a complaint about the Company may file a complaint by writing to the Management Company. Details on the complaints handling procedure may be obtained from the registered office of the Management Company upon request.

11.3. Class action policy

The Fund (or its agent) works with the Depositary to file claims related to class action lawsuits in the United States and Canada for which the Fund may be eligible to participate (e.g. claims alleging violations of antitrust laws or those involving securities held by the Fund). The Fund will use reasonable efforts to file applicable proofs of claim; however, the Fund generally does not act as a lead plaintiff. Settlement proceeds received as a result of such filings will be added to the Fund's assets (when received) and thus contribute to the Fund's then current NAV and unit price, benefiting investors in the Fund when proceeds are received. Consequently, investors in the Fund, when the loss was sustained, may not benefit from a later receipt of class action proceeds if they are no longer invested in that Fund, or may benefit disproportionately if their level of investment has changed.

The Fund (or its agent) will use reasonable efforts to review "opt-in" group securities litigation actions outside the U.S. and Canada to evaluate whether it is in the Fund's best interests to participate in such action. Any class action or "opt-in" group litigation settlement proceeds recovered, less a pro rata portion of any litigation-related expense, will be added to the Fund's assets (when received) and contribute to the Fund's then-current NAV and unit price, benefitting investors in the Fund at the time proceeds are received.

In the event that the Fund has closed prior to the receipt of settlement proceeds by the Fund, such settlement proceeds will be allocated and distributed to the Fund's investors of record as of the time the Fund closed or such earlier time that allows for a more equitable distribution.

Consistent with State Street Global Advisors current procedure, proceeds received by a closed Fund will be distributed to former investors of the Fund to the extent that each

former investor's pro rata share at the time of the closing of the Fund equals or exceeds $100 (or equivalent). In the following circumstances, the Fund will not allocate and distribute proceeds to a closed Fund's former investors, but rather will make a donation to an external charitable organization of State Street Global Advisors choosing: (i) settlement proceeds result in a pro rata share of less than $100 (or equivalent) for each former investor; (ii) the Fund (or its agent) is unable to locate the former investor after reasonable efforts; or (iii) located investors decline the proceeds for any reason.

11.4. Distribution and Selling Restrictions

The distribution of this Prospectus and the offering or purchase of Shares may be restricted or prohibited by law in certain jurisdictions. This Prospectus does not constitute and may not be treated as an offer or solicitation by or to anyone in any jurisdiction in which such offer or solicitation is not lawful or in which the person making such offer or solicitation is not qualified to do so or to anyone to whom it is unlawful to make such offer or solicitation. It is the responsibility of any persons in possession of this Prospectus and any persons wishing to apply for Shares pursuant to this Prospectus to inform themselves of and to observe all applicable laws and regulations of any relevant jurisdiction. Shares are offered only on the basis of the information contained in this Prospectus. Any further information or representations given or made by any dealer, broker or other person should be disregarded and, accordingly, should not be relied upon. No person has been authorised to give any information or to make any representation in connection with the offering of Shares other than those contained in this Prospectus for the Company and, if given or made, such information or representations must not be relied on as having been authorised by the Company, the Directors or the Management Company. Statements in this Prospectus are in accordance with the law and practice in force in Luxembourg at the date hereof and are subject to change. Neither the delivery of this Prospectus nor the issue of Shares shall, under any circumstances, create any implication or constitute any representation that the affairs of the Company have not changed since the date hereof.

This Prospectus may also be translated into other languages. Any such translation shall only contain the same information and have the same meaning as the English language Prospectus. To the extent that there is any inconsistency between the English language Prospectus and the Prospectus in another language, this English language Prospectus will prevail, except, to the extent (but only to the extent) required by law of any jurisdiction where the Shares are sold, that in an action based upon disclosure in a Prospectus in a language other than English, the language of the Prospectus on which such action is based shall prevail. All disputes as to the contents of this Prospectus shall be governed in accordance with the laws of Luxembourg.

11.5. Benchmark Contingency Plan

Investors should note that, in accordance with the requirements of the Benchmark Regulation, the Company has adopted a benchmark contingency plan to set out the actions which the Company would take in the event that a benchmark used by a Fund materially changes or ceases to be provided (the "Benchmark Contingency Plan"). The benchmarks used (within the meaning of the Benchmarks Regulation) are set out in Appendix 1 to this Prospectus. Actions taken by the Company on the foot of the Benchmark Contingency Plan may result in changes to the investment objectives or investment policies of a Fund and any such changes will be notified to investors and implemented in accordance with the requirements of the CSSF, any local requirements for the Funds registered for public distribution in non-EU countries and the terms of this Prospectus. According to the Supplement, the investment policy of a Fund may grant discretion to the Directors to substitute an index with another index to substantially track the same market. In certain circumstances, this discretion may be exercised by the Directors on the foot of the Benchmark Contingency Plan before notifying investors about the substitution of the index, if

this is deemed to be in the best interest of investors. In any event, any such changes resulting in an amendment of the Prospectus will be carried out in accordance with section 11.7 – "Changes to the Prospectus" below. In addition, the PRIIPs KID/KIID of the affected Fund will be updated to reflect the substitution of the index. Investors may obtain further information on the Contingency Plan upon request at the registered office of the Company.

11.6. Data Protection

Prospective investors and Shareholders should note that by completing the application form they are providing the Company with personal information, which may constitute personal data within the meaning of the Data Protection Legislation. The personal data of prospective investors and registered Shareholders shall be processed in accordance with the Privacy Statement (which is appended to the Application Form and available via the website under https://www.ssga.com/global/en/legal/terms-and-conditions-global.html that prospective investors and Shareholders must read and understand. The Privacy Statement describes among others how personal data is collected, used and shared, and the investors' rights in this context.

11.7. Changes to the Prospectus

The Board may from time to time amend this Prospectus to reflect various changes it deems necessary and in the best interest of the Company, such as implementing changes to laws and regulations, changes to a Fund's objective and policy or changes to fees and costs charged to a Fund or Class. Any amendment of this Prospectus will require approval by the CSSF prior to taking effect and may also require a prior approval by the relevant local regulator for the Funds registered for public distribution in non-EU countries. In accordance with applicable laws and regulations, investors in the Funds or Classes will be informed about the changes and will be given prior notice of any proposed material changes and where appropriate given a right to request the redemption of their Shares should they disagree, free of charge.

11.8. Listing of Shares

The Company may, from time to time, determine to list or remove existing listing of the Shares of any Fund or Class on the Luxembourg Stock Exchange, Euro MTF or any other stock exchange. The Board will approve any new listing on any stock exchange as well as removal of such listing. Full details on the listing of each Class of each Fund may be obtained at any time at the registered office of the Company upon request or on the Website. Unless otherwise specified in the Relevant Supplement, the Shares of each Fund of the Company are not listed on any stock exchange. The approval of any listing particularities pursuant to the listing requirements of the Listing Stock Exchange does not constitute a warranty or representation by such Listing Stock Exchange as to the competence of the service providers or as to the adequacy of information contained in the listing particularities or the suitability of the ETF Shares for investment or for any other purpose.

Appendix 1 – Index Disclaimers

Bloomberg

BLOOMBERG® is a service mark of Bloomberg Finance L.P. and its affiliates, including Bloomberg Index Services Limited ("BISL"), the UCI Administrator of the index (collectively, "Bloomberg") and have been licensed for use for certain purposes by State Street Global Advisors.

The funds are not sponsored, endorsed, sold or promoted by Bloomberg. Bloomberg does not make any representation or warranty, express or implied, to the owners of or counterparties of the funds or any member of the public regarding the advisability of investing in the funds or the advisability of investing in securities generally or in the funds particularly.

The only relationship of Bloomberg with the Issuer in respect of the Bloomberg Indices is the licensing of the Bloomberg Indices, which is determined, composed and calculated by BISL without regard to State Street Global Advisors , or without regard to the Issuer or the funds or the owners of the funds.

Bloomberg has no obligation to take the needs of the Issuer or the owners of the funds or any other third party into consideration in determining, composing or calculating the Bloomberg Indices. FTSE

The funds are not in any way sponsored, endorsed, sold or promoted by FTSE International Limited ("FTSE IL") or the London Stock Exchange Group companies ("LSEG Companies") (together the "Licensor Parties") and none of the Licensor Parties make any claim, prediction, warranty or representation whatsoever, expressly or impliedly, either as to (i) the results to be obtained from the use of the FTSE INDEX (the "Index") (upon which the funds are based), (ii) the figure at which the Index is said to stand at any particular time on any particular day or otherwise, or (iii) the suitability of the Index for the purpose to which it is being put in connection with the funds.

None of the Licensor Parties have provided or will provide any financial or investment advice or recommendation in relation to the Index to the funds or to its clients. The Index is calculated by FTSE IL or its agent. None of the Licensor Parties shall be (a) liable (whether in negligence or otherwise) to any person for any error in the Index or (b) under any obligation to advise any person of any error therein.

All rights in the Index vest in FTSE IL and/or its licensors. "FTSE®" is a trade mark of LSEG Companies and is used by FTSE IL under license.

As of the date of this visa-stamped Prospectus, the Company uses (within the meaning of the Benchmark Regulation) the following FTSE benchmarks:

- FTSE EMU Government Bond Index

As of the date of this visa-stamped Prospectus, FTSE International Limited is not listed on the ESMA register referred to in article 36 of the Benchmark Regulation.

Markit iBoxx

The Markit iBoxx Euro SRI Corporate Bond Custom Index is a product of S&P Dow Jones Indices LLC ("SPDJI") and has been licensed for use by SSGA. S&P® and S&P 500®, iBoxx®, iTraxx® and CDX® are registered trademarks of S&P Global, Inc. or its affiliates ("S&P"); Dow Jones® is a registered trademark of Dow Jones Trademark Holdings LLC ("Dow Jones"); and these trademarks have been licensed for use by SPDJI and sublicensed for certain purposes by SSGA. It is not possible to invest directly in an index. The Company is not sponsored, endorsed, sold or promoted by SPDJI, Dow Jones, S&P, any of their respective affiliates (collectively, "S&P Dow Jones Indices"). S&P Dow Jones Indices makes no representation or warranty, express or implied, to the owners of the Company or any member of the public regarding the advisability of investing in securities generally or in the Company particularly or the ability of the Markit iBoxx Euro SRI Corporate Bond Custom Index to track general market performance. Past performance of an index is not an indication of future results. S&P Dow Jones Indices' only relationship to SSGA with respect to the Markit iBoxx Euro SRI Corporate Bond Custom Index is the licensing of the Index and certain trademarks, service marks and/or trade names of S&P Dow Jones Indices or its licensors. The Markit iBoxx Euro SRICorporate Bond Custom Index is determined, composed and calculated by S&P Dow Jones Indices without regard to SSGA or the Company. S&P Dow Jones Indices have no obligation to take the needs of SSGA or the owners of the Company into consideration in determining, composing or calculating the Markit iBoxx Euro SRI Corporate Bond Custom Index. S&P Dow Jones Indices is not responsible for and has not participated in the determination of the prices, and amount of the Company or the timing of the issuance or sale of the Company or in the determination or calculation of the equation by which the Company is to be converted into cash, surrendered or redeemed, as the case may be. S&P Dow Jones Indices has no obligation or liability in connection with the administration, marketing or trading of the Company. There is no assurance that investment products based on the Markit iBoxx Euro S Corporate Bond Custom Index will accurately track index performance or provide positive investment returns. S&P Dow Jones Indices LLC is not an investment advisor, commodity pool operator, broker dealer, fiduciary promoter (as defined in the Investment Company Act 1940, as amended), "expert" as enumerated within the 15 U.S.C. §77k(a) or tax advisor. Inclusion of a security, commodity, crypto currency or other asset within an index is not a recommendation by S&P Dow Jones Indices to buy, sell, or hold such security, commodity, crypto currency or other asset nor is it considered to be investment advice or commodity trading advice.

S&P DOWN JONES INDICES DOES NOT GUARANTEE THE ADEQUACY, ACCURACY, TIMELINESS AND/OR COMPLETENESS OF THE Markit iBoxx Euro SRI Corporate Bond Custom Index OR ANY DATA RELATED THERETO OR ANY COMMUNICATION,

INCLUDING BUT NOT LIMITED TO, ORAL, OR WRITTEN COMMUNICATION(INCLUDING ELECTRONIC COMMUNICATIONS) WITH RESPECT THERETO. S&P DOWN JONES INDICES SHALL NOT BE SUBJECT TO ANY DAMAGES OR LIABILITY FOR ANY ERRORS, OMISSIONS, OR DELAYS THEREIN, S&P DOW JONES INDICES MAKES NO EXPRESS OR IMPLIED WARRANTIES, AND EXPRESSLY DISCLAIMS ALL WARRANTIES, OR MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR USE OR AS TO RESULTS TO BE OBTAINES BY SSGA, OWNERS OF THE COMPANY, OR ANY OTHER PERSON, ENTITY FORM THE USE OF THE Markit iBoxx Euro SRI Corporate Bond Custom Index OR WITH RESPECT TO ANY DATA RELATED THERETO. WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT WHATSOEVER SHALL S&P DOW JONES INDICES BY LIABLE FOR ANY INDIRECT, SPECIAL. INCIDENTAL, PUNITIVE, OR CONSEQUENTIAL DAMAGES INCLUDING BUT NOT LIMITED TO, LOSS OF PROFITS TRADING LOSSES, LOST TIME OR GOODWILL, EVEN IF THEY HAVE BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES, WHETHER IN CONTRACT, TORT, STRICT LIABILITY OR OTHERWISE. S&P DOW JONES INDICES HAS NOT REVIEWED, PREPARED AND/OR CERTIFIED ANY PORTION OF, NOR DOED S&P DOW JONES INDICES HAVE ANY CONTROL OVER, THE SSGA REGISTRATION STATEMENT, PROSPECTUS OR OTHER OFFERING MATERIALS. THERE ARE NO THIRD PARTY BENEFICIARIES OF ANY AGREEMENTS OR ARRANGEMENTS BETWEEN S&P DOW JONES INDICES AND SSGA, OTHER THAN THE LICENSORS OF S&P DOW JONES INDICES.

SPDJI is listed on the ESMA register for third country benchmarks, referred to in Article 36 of the Benchmark Regulation as a third country administrator recognised pursuant to Article 32 of the Benchmark Regulation.

MSCI

This fund is not sponsored, endorsed, sold or promoted by MSCI INC. (“MSCI”), any of its affiliates, any of its information providers or any other third party involved in, or related to, compiling, computing or creating any MSCI index (collectively, the “MSCI Parties”). The MSCI indices are the exclusive property of MSCI (“MSCI Indices”). MSCI and the MSCI Indices names are service mark(s) of MSCI or its affiliates and have been licensed for use for certain purposes by licensee. None of the MSCI Parties makes any representation or warranty, express or implied, to the issuer or owners of the fund or any other person or entity regarding the advisability of investing in funds generally or in this fund particularly or the ability of any MSCI Indices to track corresponding stock market performance. MSCI or its affiliates are the licensors of certain trademarks, service marks and trade names and of the MSCI Indices which are determined, composed and calculated by MSCI without regard to this fund or the issuer or owners of this fund or any other person or entity. None of the MSCI Parties has any obligation to take the needs of the issuer or owners of this fund or any other person or entity into consideration in determining, composing or calculating the MSCI Indices. None of the MSCI Parties is responsible for or has participated in the determination of the timing of, prices at, or quantities of this fund to be issued or in the determination or calculation of the equation by or the consideration into which this fund is redeemable. Further, none of the MSCI Parties has any obligation or liability to the issuer or owners of this fund or any other person or entity in connection with the administration, marketing or offering of this fund.

Although MSCI shall obtain information for inclusion in or for use in the calculation of the MSCI Indices from sources that MSCI considers reliable, none of the MSCI parties warrants or guarantees the originality, accuracy and/or the completeness of any MSCI Indices or any data included therein. None of the MSCI Parties makes any warranty, express or implied, as to results to be obtained by the issuer of the fund, owners of the fund, or any other person or entity, from the use of any MSCI Indices or any data included therein. None of the MSCI Parties shall have any liability for any errors, omissions or interruptions of or in connection with any MSCI Indices or any data included therein. Further, none of the MSCI Parties makes any express or implied warranties of any kind, and the MSCI Parties hereby expressly disclaim all warranties of merchantability and fitness for a particular purpose, with respect to each MSCI Indices and any data included therein. Without

limiting any of the foregoing, in no event shall any of the MSCI Parties have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.

As of the date of this visa-stamped Prospectus, the Company uses (within the meaning of the Benchmark Regulation) the following benchmarks, which are provided by MSCI Limited in its capacity as administrator (within the meaning of the Benchmark Regulation):

- MSCI All Country World Index
- MSCI Emerging Markets Screened Choice Index

- MSCI Switzerland Screened Choice Index
- MSCI United Kingdom Screened Choice Index
- MSCI USA Index
- MSCI USA Screened Choice Index
- MSCI World Universal Index
- MSCI World Screened Choice Index
- MSCI World Index

As of the date of this visa-stamped Prospectus, MSCI Limited is not listed on the ESMA register referred to in article 36 of the Benchmark Regulation.

S&P 500

The S&P 500 Index is a product of S&P Dow Jones Indices LLC ("SPDJI") and has been licensed for use by SSGA. Standard & Poor's®, S&P® and S&P 500® are registered trademarks of Standard & Poor's Financial Services LLC ("S&P"); Dow Jones® is a registered trademark of Dow Jones Trademark Holdings LLC ("Dow Jones"); and these trademarks have been licensed for use by SPDJI and sublicensed for certain purposes by SSGA. The Company is not sponsored, endorsed, sold or promoted by SPDJI, Dow Jones, S&P, any of their respective affiliates (collectively, "S&P Dow Jones Indices"). S&P Dow Jones Indices makes no representation or warranty, express or implied, to the owners of the Company or any member of the public regarding the advisability of investing in securities generally or in the Company particularly or the ability of the S&P 500 Index to track general market performance. S&P Dow Jones Indices' only relationship to SSGA with respect to the S&P 500 Index is the licensing of the Index and certain trademarks, service marks and/or trade names of S&P Dow Jones Indices or its licensors. The S&P 500 Index is determined, composed and calculated by S&P Dow Jones Indices without regard to SSGA or the Company. S&P Dow Jones Indices have no obligation to take the needs of SSGA or the owners of the Company into consideration in determining, composing or calculating the S&P 500 Index. S&P Dow Jones Indices is not responsible for and has not participated in the determination of the prices, and amount of the Company or the timing of the issuance or sale of the Company or in the determination or calculation of the equation by which the Company is to be converted into cash, surrendered or redeemed, as the case may be. S&P Dow Jones Indices has no obligation or liability in connection with the administration, marketing or trading of the Company. There is no assurance that investment products based on the S&P 500 Index will accurately track index performance or provide positive investment returns. S&P Dow Jones Indices LLC is not an investment advisor. Inclusion of a security within an index is not a recommendation by S&P Dow Jones Indices to buy, sell, or hold such security, nor is it considered to be investment advice. Notwithstanding the foregoing, CME Group Inc. and its affiliates may independently issue and/or sponsor financial products unrelated to the Company currently being issued by SSGA, but which may be similar to and competitive with the Company. In addition, CME Group Inc. and its affiliates may trade financial products which are linked to the performance of the S&P 500 Index.

S&P Dow Jones Indices does not guarantee the adequacy, accuracy, timeliness and/or the completeness of the S&P 500 index or any data related thereto or any communication, including

but not limited to, oral or written communication (including electronic communications) with respect thereto. S&P Dow Jones Indices shall not be subject to any damages or liability for any errors, omissions, or delays therein. S&P Dow Jones Indices makes no express or implied warranties, and expressly disclaims all warranties, of merchantability or fitness for a particular purpose or use or as to results to be obtained by SSGA, owners of the Company, or any other person or entity from the use of the S&P 500 index or with respect to any data related thereto. Without limiting any of the foregoing, in no event whatsoever shall S&P Dow Jones Indices be liable for any indirect, special, incidental, punitive, or consequential damages including but not limited to, loss of profits, trading losses, lost time or goodwill, even if they have been advised of the possibility of such damages, whether in contract, tort, strict liability, or otherwise. There are no third party beneficiaries of any agreements or arrangements between S&P Dow Jones Indices and SSGA, other than the licensors of S&P Dow Jones Indices.
As of the date of this visa-stamped Prospectus, the Company uses (within the meaning of the Benchmark Regulation) the S&P 500 Index, which is provided by SPDJ.

SPDJI is listed on the ESMA register for third country benchmarks, referred to in Article 36 of the Benchmark Regulation as a third country administrator recognised pursuant to Article 32 of the Benchmark Regulation.

** Fees, expressed as a percentage of NAV, are accrued daily and paid monthly in arrears. Shareholders should refer to the "**Fees and Expenses**" section of the Prospectus for further information.

Investment Objective and Policy

Investment Objective: The objective of the Fund is to track the performance of the Euro core government bond market.

Investment Policy: The investment policy of the Fund is to track the performance of the Index (or any other index determined by the Directors from time to time to track substantially the same market as the Index) as closely as possible while seeking to minimise as far as possible the tracking difference between the Fund's performance and that of the Index.

The Index measures the performance of the German, French and Dutch government bond markets. Securities must be fixed rate and rated investment grade as defined by the Index methodology.

The Investment Manager, on behalf of the Fund, will invest using the Stratified Sampling Strategy as further described in the **"Investment Techniques"** section of the Prospectus, primarily in the securities of the Index, at all times in accordance with the investment restrictions set forth in the Prospectus. The Investment Manager also may, in exceptional circumstances, invest in securities not included in the Index but that it believes closely reflect the risk and distribution characteristics of securities of the Index. From time to time securities are added to or removed from the Index. The Investment Manager may sell securities that are represented in the Index, or purchase securities that are not yet represented in the Index, in anticipation of their removal from or addition to the Index. Where such securities remain non-Index constituents, they will be sold or transferred as soon as reasonably practicable.

The investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities as per the Taxonomy Regulation.

Permitted Investments

In order to achieve its investment objective, this Fund will only invest in:

- Fixed rate, investment grade, Euro-denominated government and government-related bonds;
- Other UCITS authorised in accordance with the UCITS Directive and/or other UCIs within the meaning of Article 1(2), (a) and (b) of the UCITS Directive whether or not established in an EU Member State;
- Ancillary liquid assets, notably cash, for cash management purposes; and
- Derivatives for efficient portfolio management limited to futures, forward foreign exchange contracts options and swaps.

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the 2010 Law and further described in the "**Investment Restrictions and Limits**" section of the Prospectus.

Securities Financing Transactions

	Expected	Maximum
Securities Lending	0%-40%*	70%

*Securities lending transactions will be entered into depending on the market opportunities and in particular depending on the market demand to borrow the securities held in the Fund's portfolio at any time and the expected revenues of the transaction. Market demand depends on the specific securities and the reason borrowers enter into the transaction, such as hedging against market risk, use as collateral or to meet required liquidity standards. Market demand is also subject to volatility, seasonality, and liquidity of the underlying securities in the Fund's portfolio. Revenues vary according to the specific security and the demand to borrow them. The maximum exposure could be reached when there is high demand for many securities held in the Fund's portfolio. Each of these factors may vary and cannot be predicted with certainty. Securities lending transactions to be entered into exclusively aim to generate additional capital or income. As such, there is no restriction on the frequency under which the Fund may engage into such type of transactions.

Listing

All Share Classes are listed on the Euro MTF Market.

Investor Profile

The typical investors of the Fund are expected to be institutional and intermediary investors with a medium or long term horizon who want to gain exposure to the performance of the Euro core government bond market and are prepared to accept the risks associated with an investment of this type.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the **"Risk Information**" section of the Prospectus. The following are the principal risks of investing in the Fund:

Concentration Risk: When the Fund focuses its investments in a particular region, the financial, economic, business, and other developments affecting issuers in that region will have a greater effect on the Fund than if it was more diversified. This concentration may also limit the liquidity of the Fund. Investors may buy or sell substantial amounts of the Fund's shares in response to factors affecting or expected to affect a region in which the Fund focuses its investments.

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund's hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund's assets are denominated appreciates.

Debt Securities Risk: The value of debt securities may change significantly depending on economic and interest rate conditions as well as the credit worthiness of the issuer. Issuers of debt securities may fail to meet payment obligations or the credit rating of debt securities may be downgraded. Returns on investments in debt securities could trail the returns on other investment options, including investments in equity securities.

Index Tracking Risk: The Fund's return may not match the return of the Index. The Fund's ability to track the Index will be affected by Fund expenses, the amount of cash and cash equivalents held in its portfolio, and the frequency and the timing of purchases and sales of interests in the Fund. The Investment Manager may attempt to replicate the Index return by investing in a sub-set of the securities in the Index, or in some securities not included in the Index, potentially

increasing the risk of divergence between the Fund's return and that of the Index.

Integrating Sustainability Risk: Sustainability Risk has not been integrated into the Fund's investment process. Any deterioration in the financial profile of an underlying investment affected by a Sustainability Risk may have a corresponding negative impact on the Net Asset Value and/or performance of the investing Fund. Where a Sustainability Risk event occurs, this Fund may be more impacted than an equivalent Fund that integrates Sustainability Risk.

Liquidity Risk: Lack of a ready market or restrictions on resale may limit the ability of the Fund to sell a security at an advantageous time or price or at all. Illiquid securities may trade at a discount from comparable, more liquid investments and may be subject to wide fluctuations in market value. Illiquidity of the Fund's holdings may limit the ability of the Fund to obtain cash to meet redemptions on a timely basis.

Securities Lending Risk: If the Fund engages in securities lending, there is a risk that the borrower may default its obligations to return equivalent securities to the loaned securities. In this way the Fund is exposed to counterparty risk. In this event, the Fund could also experience delays in recovering the securities and may incur a capital loss. The Fund could also lose money if the value of collateral held against the loaned securities falls.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Subscriptions, Redemptions and Switches

Investors may subscribe for, redeem or switch launched Share Classes on each Dealing Day at the Subscription Price or Redemption Price as applicable. For all subscription, redemption, and switch requests, the relevant form must be received by the UCI Administrator by the Dealing Deadline. Shareholders should refer to section "**Shares**" of the Prospectus for further information.

Index Disclaimer

Please see Appendix 1 of the Prospectus for the Bloomberg index disclaimer.

Investment Objective and Policy

Investment Objective: The objective of the Fund is to track the performance of the Euro government bond market.

Investment Policy: The investment policy of the Fund is to track the performance of the Index (or any other index determined by the Directors from time to time to track substantially the same market as the Index) as closely as possible while seeking to minimise as far as possible the tracking difference between the Fund's performance and that of the Index.

The Index measures the performance of the Euro government bond market. Securities must be fixed rate and rated investment grade as defined by the Index methodology.

The Investment Manager, on behalf of the Fund, will invest using the Stratified Sampling Strategy as further described in the **"Investment Techniques"** section of the Prospectus, primarily in the securities of the Index, at all times in accordance with the investment restrictions set forth in the Prospectus. The Investment Manager also may, in exceptional circumstances, invest in securities not included in the Index but that it believes closely reflect the risk and distribution characteristics of securities of the Index. . From time to time securities are added to or removed from the Index. The Investment Manager may sell securities that are represented in the Index, or purchase securities that are not yet represented in the Index, in anticipation of their removal from or addition to the Index. Where such securities remain non-Index constituents, they will be sold or transferred as soon as reasonably practicable.

The investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities as per the Taxonomy Regulation.

Permitted Investments

In order to achieve its investment objective, this Fund will only invest in:

- Fixed rate, investment grade, Euro-denominated government and government-related bonds;
- Other UCITS authorised in accordance with the UCITS Directive and/or other UCIs within the meaning of Article 1(2), (a) and (b) of the UCITS Directive whether or not established in an EU Member State;
- Ancillary liquid assets, notably cash, for cash management purposes; and
- Derivatives for efficient portfolio management limited to, futures, forward foreign exchange contracts, options and swaps.

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the 2010 Law and further described in the "**Investment Restrictions and Limits**" section of the Prospectus.

Securities Financing Transactions

	Expected	Maximum
Securities Lending	0%-10%*	70%

*Securities lending transactions will be entered into depending on the market opportunities and in particular depending on the market demand to borrow the securities held in the Fund's portfolio at any time and the expected revenues of the transaction. Market demand depends on the specific securities and the reason borrowers enter into the transaction, such as hedging against market risk, use as collateral or to meet required liquidity standards. Market demand is also subject to volatility, seasonality, and liquidity of the underlying securities in the Fund's portfolio. Revenues vary according to the specific security and the demand to borrow them. The maximum exposure could be reached when there is high demand for many securities held in the Fund's portfolio. Each of these factors may vary and cannot be predicted with certainty. Securities lending transactions to be entered into exclusively aim to generate additional capital or income. As such, there is no restriction on the frequency under which the Fund may engage into such type of transactions.

Listing

All Share Classes are listed on the Euro MTF Market.

Investor Profile

The typical investors of the Fund are expected to be institutional and intermediary investors with a medium or long term horizon who want to gain exposure to the performance of the Euro government bond market and are prepared to accept the risks associated with an investment of this type.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the **"Risk Information**" section of the Prospectus. The following are the principal risks of investing in the Fund:

Concentration Risk: When the Fund focuses its investments in a particular region, the financial, economic, business, and other developments affecting issuers in that region will have a greater effect on the Fund than if it was more diversified. This concentration may also limit the liquidity of the Fund. Investors may buy or sell substantial amounts of the Fund's shares in response to factors affecting or expected to affect a region in which the Fund focuses its investments.

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund's hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund's assets are denominated appreciates.

Debt Securities Risk: The value of debt securities may change significantly depending on economic and interest rate conditions as well as the credit worthiness of the issuer. Issuers of debt securities may fail to meet payment obligations or the credit rating of debt securities may be downgraded. Returns on investments in debt securities could trail the returns on other investment options, including investments in equity securities.

Index Tracking Risk: The Fund's return may not match the return of the Index. The Fund's ability to track the Index will be affected by Fund expenses, the amount of cash and cash equivalents held in its portfolio, and the frequency and the timing of purchases and sales of interests in the Fund. The Investment Manager may attempt to replicate the Index return by investing in a sub-set of the securities in the Index, or in some securities not included in the Index, potentially

increasing the risk of divergence between the Fund's return and that of the Index.

Integrating Sustainability Risk: Sustainability Risk has not been integrated into the Fund's investment process. Any deterioration in the financial profile of an underlying investment affected by a Sustainability Risk may have a corresponding negative impact on the Net Asset Value and/or performance of the investing Fund. Where a Sustainability Risk event occurs, this Fund may be more impacted than an equivalent Fund that integrates Sustainability Risk.

Liquidity Risk: Lack of a ready market or restrictions on resale may limit the ability of the Fund to sell a security at an advantageous time or price or at all. Illiquid securities may trade at a discount from comparable, more liquid investments and may be subject to wide fluctuations in market value. Illiquidity of the Fund's holdings may limit the ability of the Fund to obtain cash to meet redemptions on a timely basis.

Securities Lending Risk: If the Fund engages in securities lending, there is a risk that the borrower may default its obligations to return equivalent securities to the loaned securities. In this way the Fund is exposed to counterparty risk. In this event, the Fund could also experience delays in recovering the securities and may incur a capital loss. The Fund could also lose money if the value of collateral held against the loaned securities falls.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which itis intended, the transactions could result in liabilities for other Classes.

Subscriptions, Redemptions and Switches

Investors may subscribe for, redeem or switch launched Share Classes on each Dealing Day at the Subscription Price or Redemption Price as applicable. For all subscription, redemption, and switch requests, the relevant form must be received by the UCI Administrator by the Dealing Deadline. Shareholders should refer to section "**Shares**" of the Prospectus for further information.

Index Disclaimer

Please see Appendix 1 of the Prospectus for the FTSE index disclaimer.

Investment Objective and Policy

Investment Objective: The objective of the Fund is to track the performance of the inflation-linked Euro government bond market.

Investment Policy: The investment policy of the Fund is to track the performance of the Index (or any other index determined by the Directors from time to time to track substantially the same market as the Index) as closely as possible while seeking to minimise as far as possible the tracking difference between the Fund's performance and that of the Index.

The Index measures the performance of the Euro government bond market. Securities must be rated investment grade as defined by the Index methodology. The principal and the interest of all constituent bonds must be inflation-linked and denominated in Euro. Nominal Euro government bonds and floating rate bonds are excluded.

The Investment Manager, on behalf of the Fund, will invest using the Replication Strategy as further described in the **"Investment Techniques"** section of the Prospectus, primarily in the securities of the Index, at all times in accordance with the investment restrictions set forth in the Prospectus. The Investment Manager also may, in exceptional circumstances, invest in securities not included in the Index but that it believes closely reflect the risk and distribution characteristics of securities of the Index. . From time to time securities are added to or removed from the Index. The Investment Manager may sell securities that are represented in the Index, or purchase securities that are not yet represented in the Index, in anticipation of their removal from or addition to the Index. Where such securities remain non-Index constituents, they will be sold or transferred as soon as reasonably practicable.

The investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities as per the Taxonomy Regulation.

Permitted Investments

In order to achieve its investment objective, this Fund will only invest in:

- Investment grade, inflation linked, Euro-denominated government and government-related bonds;
- Other UCITS authorised in accordance with the UCITS Directive and/or other UCIs within the meaning of Article 1(2), (a) and (b) of the UCITS Directive whether or not established in an EU Member State;
- Ancillary liquid assets, notably cash, for cash management purposes; and
- Derivatives for efficient portfolio management limited to futures, forward foreign exchange contracts, options and swaps.

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the 2010 Law and further described in the "**Investment Restrictions and Limits**" section of the Prospectus.

Securities Financing Transactions

	Expected	Maximum
Securities Lending	0%-40%*	70%

*Securities lending transactions will be entered into depending on the market opportunities and in particular depending on the market demand to borrow the securities held in the Fund's portfolio at any time and the expected revenues of the transaction. Market demand depends on the specific securities and the reason borrowers enter into the transaction, such as hedging against market risk, use as collateral or to meet required liquidity standards. Market demand is also subject to volatility, seasonality, and liquidity of the underlying securities in the Fund's portfolio. Revenues vary according to the specific security and the demand to borrow them. The maximum exposure could be reached when there is high demand for many securities held in the Fund's portfolio. Each of these factors may vary and cannot be predicted with certainty. Securities lending transactions to be entered into exclusively aim to generate additional capital or income. As such, there is no restriction on the frequency under which the Fund may engage into such type of transactions.

Listing

All Share Classes are listed on the Euro MTF Market.

Investor Profile

The typical investors of the Fund are expected to be institutional and intermediary investors with a medium or long term horizon who want to gain exposure to the performance of the inflation-linked Euro government bond market and are prepared to accept the risks associated with an investment of this type.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the **"Risk Information**" section of the Prospectus. The following are the principal risks of investing in the Fund:

Debt Securities Risk: The value of debt securities may change significantly depending on economic and interest rate conditions as well as the credit worthiness of the issuer. Issuers of debt securities may fail to meet payment obligations or the credit rating of debt securities may be downgraded. Returns on investments in debt securities could trail the returns on other investment options, including investments in equity securities.

Concentration Risk: When the Fund focuses its investments in a particular region, the financial, economic, business, and other developments affecting issuers in that region will have a greater effect on the Fund than if it was more diversified. This concentration may also limit the liquidity of the Fund. Investors may buy or sell substantial amounts of the Fund's shares in response to factors affecting or expected to affect a region in which the Fund focuses its investments.

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund's hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund's assets are denominated appreciates.

Index Tracking Risk: The Fund's return may not match the return of the Index. The Fund's ability to track the Index will be affected by Fund expenses, the amount of cash and cash equivalents held in its portfolio, and the frequency and the timing of purchases and sales of interests in the Fund. The Investment Manager may attempt to replicate the Index return by investing in a sub-set of the securities in the Index,

or in some securities not included in the Index, potentially increasing the risk of divergence between the Fund's return and that of the Index.

Integrating Sustainability Risk: Sustainability Risk has not been integrated into the Fund's investment process. Any deterioration in the financial profile of an underlying investment affected by a Sustainability Risk may have a corresponding negative impact on the Net Asset Value and/or performance of the investing Fund. Where a Sustainability Risk event occurs, this Fund may be more impacted than an equivalent Fund that integrates Sustainability Risk.

Liquidity Risk: Lack of a ready market or restrictions on resale may limit the ability of the Fund to sell a security at an advantageous time or price or at all. Illiquid securities may trade at a discount from comparable, more liquid investments and may be subject to wide fluctuations in market value. Illiquidity of the Fund's holdings may limit the ability of the Fund to obtain cash to meet redemptions on a timely basis.

Securities Lending Risk: If the Fund engages in securities lending, there is a risk that the borrower may default its obligations to return equivalent securities to the loaned securities. In this way the Fund is exposed to counterparty risk. In this event, the Fund could also experience delays in recovering the securities and may incur a capital loss. The Fund could also lose money if the value of collateral held against the loaned securities falls.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Valuation of Inflation Linked Local Bonds Risk: The value of the inflation linked securities in which the Fund may invest will be linked to the rate of inflation in the relevant market. If inflation rises at a faster rate than nominal interest rates, real interest rates (i.e., the rate of interest an investor expects to receive after allowing for inflation) might decline, leading to an increase in value of inflation linked securities which the Fund holds. In addition, there is no guarantee that the strategy and statistics used by the relevant market country in calculating its rate of inflation is or will remain accurate. As a result there is risk that the change in value of the inflation linked security purchased by the Fund may not accurately correspond to the actual rate of inflation in the relevant market.

Subscriptions, Redemptions and Switches

Investors may subscribe for, redeem or switch launched Share Classes on each Dealing Day at the Subscription Price or Redemption Price as applicable. For all subscription, redemption, and switch requests, the relevant form must be received by the UCI Administrator by the Dealing Deadline. Shareholders should refer to section "**Shares**" of the Prospectus for further information.

Index Disclaimer

Please see Appendix 1 of the Prospectus for the Bloomberg index disclaimer.

Investment Objective and Policy

Investment Objective: The objective of the Fund is to track the performance of the fixed-rate, investment grade, Euro-denominated corporate bond market.

Investment Policy: The investment policy of the Fund is to track the performance of the Index (or any other index determined by the Directors from time to time to track substantially the same market as the Index) as closely as possible seeking to minimise as far as possible the tracking difference between the Fund's performance and that of the Index while screening out securities based on an assessment of their adherence to certain ESG criteria defined by the Investment Manager and further detailed in Annex 1.

The Index measures the performance of the Euro corporate bond market. Securities must be fixed rate, Euro-denominated and rated investment grade as defined by the Index methodology. Inclusion is based on the currency of the issue, not the domicile of the issuer.

The Investment Manager, on behalf of the Fund, will invest using the Stratified Sampling Strategy as further described in the **"Investment Techniques"** section of the Prospectus, primarily in the securities of the Index, at all times in accordance with the investment restrictions set forth in the Prospectus. The Investment Manager integrates Sustainability Risk into its investment decisions and employs a negative and norms-based ESG screen prior to the construction of the portfolio of the Fund and on an ongoing basis, as further described in the "**ESG Integration**" and the "**ESG Screening**" subsections, respectively, of the "**ESG Investing**" section of the Prospectus. The Investment Manager also may, in exceptional circumstances, invest in securities not included in the Index but that it believes closely reflect the risk and distribution characteristics of securities of the Index. . From time to time securities are added to or removed from the Index. The Investment Manager may sell securities that are represented in the Index, or purchase securities that are not yet represented in the Index, in anticipation of their removal from or addition to the Index. Where such securities remain non-Index constituents, they will be sold or transferred as soon as reasonably practicable.

As at the date of this Supplement the Investment Manager and/or Sub-Investment Manager consider the principal adverse impacts of its investment decisions at the Fund level in order to seek to reduce negative externalities that may be caused by its underlying investments.

This Fund promotes environmental or social characteristics in accordance with SFDR Article 8. More information about the environmental and social characteristics can be found in Annex 1.

Permitted Investments

In order to achieve its investment objective, this Fund will only invest in:

- Fixed rate, Euro-denominated, investment grade, corporate bonds;
- Other UCITS authorised in accordance with the UCITS Directive and/or other UCIs within the meaning of Article 1(2), (a) and (b) of the UCITS Directive whether or not established in an EU Member State;
- Ancillary liquid assets, notably cash, for cash management purposes; and
- Derivatives for efficient portfolio management limited to futures, forward foreign exchange contracts, options and swaps.

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the 2010 Law and further described in the "**Investment Restrictions and Limits**" section of the Prospectus.

Securities Financing Transactions

	Expected	Maximum
Securities Lending	0%-40%*	70%

*Securities lending transactions will be entered into depending on the market opportunities and in particular depending on the market demand to borrow the securities held in the Fund's portfolio at any time and the expected revenues of the transaction. Market demand depends on the specific securities and the reason borrowers enter into the transaction, such as hedging against market risk, use as collateral or to meet required liquidity standards. Market demand is also subject to volatility, seasonality, and liquidity of the underlying securities in the Fund's portfolio. Revenues vary according to the specific security and the demand to borrow them. The maximum exposure could be reached when there is high demand for many securities held in the Fund's portfolio. Each of these factors may vary and cannot be predicted with certainty. Securities lending transactions to be entered into exclusively aim to generate additional capital or income. As such, there is no restriction on the frequency under which the Fund may engage into such type of transactions.

Listing

All Share Classes are listed on the Euro MTF Market.

Investor Profile

The typical investors of the Fund are expected to be institutional and intermediary investors with a medium or long term horizon who want to gain exposure to the performance of fixed-rate, investment-grade, Euro denominated corporate bond markets and are prepared to accept the risks associated with an investment of this type.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the **"Risk Information**" section of the Prospectus. The following are the principal risks of investing in the Fund:

Concentration Risk: When the Fund focuses its investments in a particular region, the financial, economic, business, and other developments affecting issuers in that region will have a greater effect on the Fund than if it was more diversified. This concentration may also limit the liquidity of the Fund. Investors may buy or sell substantial amounts of the Fund's shares in response to factors affecting or expected to affect a region in which the Fund focuses its investments.

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund's hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also

reduce or eliminate gains where the currency in which the Fund's assets are denominated appreciates.

Debt Securities Risk: The value of debt securities may change significantly depending on economic and interest rate conditions as well as the credit worthiness of the issuer. Issuers of debt securities may fail to meet payment obligations or the credit rating of debt securities may be downgraded. Returns on investments in debt securities could trail the returns on other investment options, including investments in equity securities.

Index Tracking Risk: The Fund's return may not match the return of the Index. The Fund's ability to track the Index will be affected by Fund expenses, the amount of cash and cash equivalents held in its portfolio, and the frequency and the timing of purchases and sales of interests in the Fund. The Investment Manager may attempt to replicate the Index return by investing in a sub-set of the securities in the Index, or in some securities not included in the Index, potentially increasing the risk of divergence between the Fund's return and that of the Index.

Integrating Sustainability Risk: Integrating Sustainability Risk into the Fund's investment process does not assure the mitigation of any or all Sustainability Risk. Any deterioration in the financial profile of an underlying investment affected by a Sustainability Risk may have a corresponding negative impact on the Net Asset Value and/or performance of the investing Fund.

Liquidity Risk: Lack of a ready market or restrictions on resale may limit the ability of the Fund to sell a security at an advantageous time or price or at all. Illiquid securities may trade at a discount from comparable, more liquid investments and may be subject to wide fluctuations in market value. Illiquidity of the Fund's holdings may limit the ability of the Fund to obtain cash to meet redemptions on a timely basis.

Screening Risk: There is a risk that the screen provider may make errors, such as incorrect assessment of the screen criteria and/or include incorrect/exclude correct constituents in the screening process or discontinue its screening services. In such circumstances, the Company may change the screen provider although there is no guarantee that a replacement screen provided would result in a similar screening process to that intended or would be available at all.

Securities Lending Risk: If the Fund engages in securities lending, there is a risk that the borrower may default its obligations to return equivalent securities to the loaned securities. In this way the Fund is exposed to counterparty risk. In this event, the Fund could also experience delays in recovering the securities and may incur a capital loss. The Fund could also lose money if the value of collateral held against the loaned securities falls.

SFDR - Fund Classification Risk: The SFDR has phased implementation from 10 March 2021 and imposes new disclosure obligations on financial market participants. As at the date of this Prospectus, the implementing Regulatory Technical Standards (Level 2) for SFDR have been adopted by the European Commission but certain concepts introduced by SFDR are not currently the subject of centralised implementing standards, local guidance or established market practice. The Fund has been assessed and classified in good faith based on the relevant information currently available. As these standards and guidance develop, the SFDR related disclosures and the Article 8 classification indicated in this Supplement and on the Website are subject to change and may no longer apply.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Subscriptions, Redemptions and Switches

Investors may subscribe for, redeem or switch launched Share Classes on each Dealing Day at the Subscription Price or Redemption Price as applicable. For all subscription, redemption, and switch requests, the relevant form must be received by the UCI Administrator by the Dealing Deadline. Shareholders should refer to section "**Shares**" of the Prospectus for further information.

** Fees, expressed as a percentage of NAV, are accrued daily and paid monthly in arrears. Shareholders should refer to the "**Fees and Expenses**" section of the Prospectus for further information.

Investment Objective and Policy

Investment Objective: The objective of the Fund is to track the performance of the fixed-rate, investment grade, Euro-denominated sustainable corporate bond market.

Investment Policy: The investment policy of the Fund is to track the performance of the Index (or any other index determined by the Directors from time to time to track substantially the same market as the Index) as closely as possible while seeking to minimise as far as possible the tracking difference between the Fund's performance and that of the Index.

The Index measures the performance of the Euro corporate bond market, screened based on sustainability criteria. Securities must be fixed rate, Euro-denominated and rated investment grade as defined by the Index methodology. Inclusion is based on the currency of the issue, not the domicile of the issuer. Please refer to the "**ESG Screening**" and "**ESG Best in Class Investing**" sub-sections of the "**ESG Investing**" section of the Prospectus for further details.

The Investment Manager, on behalf of the Fund, will invest using the Stratified Sampling Strategy as further described in the **"Investment Techniques"** section of the Prospectus, primarily in the securities of the Index, at all times in accordance with the investment restrictions set forth in the Prospectus. The Investment Manager also may, in exceptional circumstances, invest in securities not included in the Index but that it believes closely reflect the risk and distribution characteristics of securities of the Index. From time to time securities are added to or removed from the Index. The Investment Manager may sell securities that are represented in the Index, or purchase securities that are not yet represented in the Index, in anticipation of their removal from or addition to the Index. Where such securities remain non-Index constituents, they will be sold or transferred as soon as reasonably practicable. The Investment Manager integrates Sustainability Risk into its investment decisions as further described in the "**ESG Integration**" subsection of the "**ESG Investing**" section of the Prospectus.

As at the date of this Supplement the Investment Manager and/or Sub-Investment Manager consider the principal adverse impacts of its investment decisions at the Fund level in order to seek to reduce negative externalities that may be caused by its underlying investments.

This Fund promotes environmental or social characteristics in accordance with SFDR Article 8. More information about the environmental and social characteristics can be found in Annex 2.

Permitted Investments

In order to achieve its investment objective, this Fund will only invest in:

- Fixed rate, Euro-denominated, investment grade rated corporate bonds;
- Other UCITS authorised in accordance with the UCITS Directive and/or other UCIs within the meaning of Article 1(2), (a) and (b) of the UCITS Directive whether or not established in an EU Member State;
- Ancillary liquid assets, notably cash, for cash management purposes; and
- Derivatives for efficient portfolio management limited to futures, forward foreign exchange contracts, options and swaps.

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the 2010 Law and further described in the "**Investment Restrictions and Limits**" section of the Prospectus.

Securities Financing Transactions

	Expected	Maximum
Securities Lending	0%-40%*	70%

*Securities lending transactions will be entered into depending on the market opportunities and in particular depending on the market demand to borrow the securities held in the Fund's portfolio at any time and the expected revenues of the transaction. Market demand depends on the specific securities and the reason borrowers enter into the transaction, such as hedging against market risk, use as collateral or to meet required liquidity standards. Market demand is also subject to volatility, seasonality, and liquidity of the underlying securities in the Fund's portfolio. Revenues vary according to the specific security and the demand to borrow them. The maximum exposure could be reached when there is high demand for many securities held in the Fund's portfolio. Each of these factors may vary and cannot be predicted with certainty. Securities lending transactions to be entered into exclusively aim to generate additional capital or income. As such, there is no restriction on the frequency under which the Fund may engage into such type of transactions.

Listing

All Share Classes are listed on the Euro MTF Market.

Investor Profile

The typical investors of the Fund are expected to be institutional and intermediary investors with a medium or long term horizon who want to gain exposure to the performance of fixed-rate, investment grade, Euro-denominated sustainable corporate bond market and are prepared to accept the risks associated with an investment of this type.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the **"Risk Information**" section of the Prospectus. The following are the principal risks of investing in the Fund:

Index Tracking Risk: The Fund's return may not match the return of the Index. The Fund's ability to track the Index will be affected by Fund expenses, the amount of cash and cash equivalents held in its portfolio, and the frequency and the timing of purchases and sales of interests in the Fund. The Investment Manager may attempt to replicate the Index return by investing in a sub-set of the securities in the Index, or in some securities not included in the Index, potentially increasing the risk of divergence between the Fund's return and that of the Index.

Concentration Risk: When the Fund focuses its investments in a particular region, the financial, economic, business, and other developments affecting issuers in that region will have a greater effect on the Fund than if it was more diversified. This concentration may also limit the liquidity of the Fund. Investors may buy or sell substantial amounts of the Fund's shares in response to factors

affecting or expected to affect a region in which the Fund focuses its investments.

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund's hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund's assets are denominated appreciates.

Debt Securities Risk: The value of debt securities may change significantly depending on economic and interest rate conditions as well as the credit worthiness of the issuer. Issuers of debt securities may fail to meet payment obligations or the credit rating of debt securities may be downgraded. Returns on investments in debt securities could trail the returns on other investment options, including investments in equity securities.

Integrating Sustainability Risk: Integrating Sustainability Risk into the Fund's investment process does not assure the mitigation of any or all Sustainability Risk. Any deterioration in the financial profile of an underlying investment affected by a Sustainability Risk may have a corresponding negative impact on the Net Asset Value and/or performance of the investing Fund.

Liquidity Risk: Lack of a ready market or restrictions on resale may limit the ability of the Fund to sell a security at an advantageous time or price or at all. Illiquid securities may trade at a discount from comparable, more liquid investments and may be subject to wide fluctuations in market value. Illiquidity of the Fund's holdings may limit the ability of the Fund to obtain cash to meet redemptions on a timely basis.

Screening Risk: There is a risk that the screen provider may make errors, such as incorrect assessment of the screen criteria and/or include incorrect/exclude correct constituents in the screening process or discontinue its screening services. In such circumstances, the Company may change the screen provider although there is no guarantee that a replacement screen provided would result in a similar screening process to that intended or would be available at all.

Securities Lending Risk: If the Fund engages in securities lending, there is a risk that the borrower may default its obligations to return equivalent securities to the loaned securities. In this way the Fund is exposed to counterparty risk. In this event, the Fund could also experience delays in recovering the securities and may incur a capital loss. The Fund could also lose money if the value of collateral held against the loaned securities falls.

SFDR - Fund Classification Risk: The SFDR has phased implementation from 10 March 2021 and imposes new disclosure obligations on financial market participants. As at the date of this Prospectus, the implementing Regulatory Technical Standards (Level 2) for SFDR have been adopted by the European Commission but certain concepts introduced by SFDR are not currently the subject of centralised implementing standards, local guidance or established market practice. The Fund has been assessed and classified in good faith based on the relevant information currently available. As these standards and guidance develop, the SFDR related disclosures and the Article 8 classification indicated in this Supplement and on the Website are subject to change and may no longer apply.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Subscriptions, Redemptions and Switches

Investors may subscribe for, redeem or switch launched Share Classes on each Dealing Day at the Subscription Price or Redemption Price as applicable. For all subscription, redemption, and switch requests, the relevant form must be received by the UCI Administrator by the Dealing Deadline. Shareholders should refer to section "**Shares**" of the Prospectus for further information.

Investment Objective and Policy

Investment Objective: The objective of the Fund is to track the performance of the global government bond market.

Investment Policy: The investment policy of the Fund is to track the performance of the Index (or any other index determined by the Directors from time to time to track substantially the same market as the Index) as closely as possible while seeking to minimise as far as possible the tracking difference between the Fund's performance and that of the Index.

The Index measures the performance of the global government bond market. Securities must be fixed rate and rated investment grade as defined by the Index methodology.

The Investment Manager, on behalf of the Fund, will invest using the Stratified Sampling Strategy as further described in the **"Investment Techniques"** section of the Prospectus, primarily in the securities of the Index, at all times in accordance with the investment restrictions set forth in the Prospectus. The Investment Manager also may, in exceptional circumstances, invest in securities not included in the Index but that it believes closely reflect the risk and distribution characteristics of securities of the Index. From time to time securities are added to or removed from the Index. The Investment Manager may sell securities that are represented in the Index, or purchase securities that are not yet represented in the Index, in anticipation of their removal from or addition to the Index. Where such securities remain non-Index constituents, they will be sold or transferred as soon as reasonably practicable.

The investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities as per the Taxonomy Regulation.

Permitted Investments

In order to achieve its investment objective, this Fund will only invest in:

- Fixed rate, investment rated, global government and government-related bonds. The Fund may invest in China bonds acquired on the CIBM through the CIBM Direct Access Programme/Bond Connect;
- Other UCITS authorised in accordance with the UCITS Directive and/or other UCIs within the meaning of Article 1(2), (a) and (b) of the UCITS Directive whether or not established in an EU Member State;
- Ancillary liquid assets, notably cash, for cash management purposes; and
- Derivatives for efficient portfolio management limited to forward foreign exchange contracts, futures, options and swaps.

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the 2010 Law and further described in the "**Investment Restrictions and Limits**" section of the Prospectus.

Securities Financing Transactions

	Expected	Maximum
Securities Lending	0%-40%*	70%

*Securities lending transactions will be entered into depending on the market opportunities and in particular depending on the market demand to borrow the securities held in the Fund's portfolio at any time and the expected revenues of the transaction. Market demand depends on the specific securities and the reason borrowers enter into the transaction, such as hedging against market risk, use as collateral or to meet required liquidity standards. Market demand is also subject to volatility, seasonality, and liquidity of the underlying securities in the Fund's portfolio. Revenues vary according to the specific security and the demand to borrow them. The maximum exposure could be reached when there is high demand for many securities held in the Fund's portfolio. Each of these factors may vary and cannot be predicted with certainty. Securities lending transactions to be entered into exclusively aim to generate additional capital or income. As such, there is no restriction on the frequency under which the Fund may engage into such type of transactions.

Listing

All Share Classes are listed on the Euro MTF Market.

Investor Profile

The typical investors of the Fund are expected to be institutional and intermediary investors with a medium or long term horizon who want to gain exposure to the performance of the global government bond markets and are prepared to accept the risks associated with an investment of this type.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the **"Risk Information**" section of the Prospectus. The following are the principal risks of investing in the Fund:

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund's hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund's assets or share classes are denominated appreciates.

Debt Securities Risk: The value of debt securities may change significantly depending on economic and interest rate conditions as well as the credit worthiness of the issuer. Issuers of debt securities may fail to meet payment obligations or the credit rating of debt securities may be downgraded. Returns on investments in debt securities could trail the returns on other investment options, including investments in equity securities.

Index Tracking Risk: The Fund's return may not match the return of the Index. The Fund's ability to track the Index will be affected by Fund expenses, the amount of cash and cash equivalents held in its portfolio, and the frequency and the timing of purchases and sales of interests in the Fund. The Investment Manager may attempt to replicate the Index return by investing in a sub-set of the securities in the Index, or in some securities not included in the Index, potentially

increasing the risk of divergence between the Fund's return and that of the Index.

Integrating Sustainability Risk: Sustainability Risk has not been integrated into the Fund's investment process. Any deterioration in the financial profile of an underlying investment affected by a Sustainability Risk may have a corresponding negative impact on the Net Asset Value and/or performance of the investing Fund. Where a Sustainability Risk event occurs, this Fund may be more impacted than an equivalent Fund that integrates Sustainability Risk.

Liquidity Risk: Lack of a ready market or restrictions on resale may limit the ability of the Fund to sell a security at an advantageous time or price or at all. Illiquid securities may trade at a discount from comparable, more liquid investments and may be subject to wide fluctuations in market value. Illiquidity of the Fund's holdings may limit the ability of the Fund to obtain cash to meet redemptions on a timely basis.

PRC Investments Risk: In addition to the risks of investing in emerging markets, risks of investing in PRC Investments include, among others, trading suspensions, currency transfer/exposure restrictions, limits on holdings of PRC Investments and use of brokers, untested concepts regarding treatment of beneficial ownership, reliance on Access Programmes which may be discontinued or substantially changed, technology system risks and controls associated with such Access Programmes, custody risks including lack of sufficient segregation of assets from those of the applicant, other intermediaries under the relevant Access Programmes, and the relevant Sub-Custodians and tax uncertainty.

Securities Lending Risk: If the Fund engages in securities lending, there is a risk that the borrower may default its obligations to return equivalent securities to the loaned securities. In this way the Fund is exposed to counterparty risk. In this event, the Fund could also experience delays in recovering the securities and may incur a capital loss. The Fund could also lose money if the value of collateral held against the loaned securities falls.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Subscriptions, Redemptions and Switches

Investment Objective and Policy

Investment Objective: The objective of the Fund is to track the performance of the global bond market.

Investment Policy: The investment policy of the Fund is to track the performance of the Index (or any other index determined by the Directors from time to time to track substantially the same market as the Index) as closely as possible while seeking to minimise as far as possible the tracking difference between the Fund's performance and that of the Index.

The Index measures the performance of the global bond market. The Index includes government, government-related and corporate bonds, as well as asset-backed, mortgage-backed and commercial mortgage-backed securities from both developed and emerging markets issuers. Securities must be fixed rate and rated investment grade as defined by the Index methodology.

The Investment Manager and/or Sub-Investment Manager, on behalf of the Fund, will invest using the Stratified Sampling Strategy as further described in the **"Investment Techniques"** section of the Prospectus, primarily in the securities of the Index, at all times in accordance with the investment restrictions set forth in the Prospectus. Where the Fund is directly invested in corporate bonds, the Investment Manager employs a negative and norms-based ESG screen prior to the construction of the portfolio of the Fund and on an ongoing basis, as further described in the "**ESG Screening**" subsection of the "**ESG Investing**" section of the Prospectus and in the "Exclusion List Methodology for screened Funds in SSGA Luxembourg SICAV" document. The Investment Manager and/or Sub-Investment Manager also may, in exceptional circumstances, invest in securities not included in the Index but that it believes closely reflect the risk and distribution characteristics of securities of the Index. From time to time securities are added to or removed from the Index. The Investment Manager may sell securities that are represented in the Index, or purchase securities that are not yet represented in the Index, in anticipation of their removal from or addition to the Index. Where such securities remain non-Index constituents, they will be sold or transferred as soon as reasonably practicable.

The investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities as per the Taxonomy Regulation.

Permitted Investments

In order to achieve its investment objective, this Fund will only invest in:

- Fixed rate, investment grade, global government and government-related bonds, corporate bonds, asset-backed securities, mortgage-backed securities, commercial mortgage-backed securities, covered bonds, collateralised bonds. The Fund may invest in China bonds acquired on the CIBM through the CIBM Direct Access Programme/Bond Connect;

- Other UCITS authorised in accordance with the UCITS Directive and/or other UCIs within the meaning of Article 1(2), (a) and (b) of the UCITS Directive whether or not established in an EU Member State;

- Ancillary liquid assets, notably cash, for cash management purposes;

- Derivatives for efficient portfolio management limited to futures, forward foreign exchange contracts, options and swaps; and

- The Fund may take exposure to mortgage-backed securities through To Be Announced ("**TBA**") securities.

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the 2010 Law and further described in the "**Investment Restrictions and Limits**" section of the Prospectus.

Securities Financing Transactions

	Expected	Maximum
Securities Lending	0%-40%*	70%

*Securities lending transactions will be entered into depending on the market opportunities and in particular depending on the market demand to borrow the securities held in the Fund's portfolio at any time and the expected revenues of the transaction. Market demand depends on the specific securities and the reason borrowers enter into the transaction, such as hedging against market risk, use as collateral or to meet required liquidity standards. Market demand is also subject to volatility, seasonality, and liquidity of the underlying securities in the Fund's portfolio. Revenues vary according to the specific security and the demand to borrow them. The maximum exposure could be reached when there is high demand for many securities held in the Fund's portfolio. As such, there is no restriction on the frequency under which the Fund may engage into such type of transactions.

Listing

All Share Classes are listed on the Euro MTF Market.

Investor Profile

The typical investors of the Fund are expected to be institutional and intermediary investors with a medium or long term horizon who want to gain exposure to the performance of the global bond markets and are prepared to accept the risks associated with an investment of this type.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the **"Risk Information**" section of the Prospectus. The following are the principal risks of investing in the Fund:

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund's hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund's assets or share classes are denominated appreciates.

Debt Securities Risk: The value of debt securities may change significantly depending on economic and interest rate conditions as well as the credit worthiness of the issuer. Issuers of debt securities may fail to meet payment obligations or the credit rating of debt securities may be downgraded. Returns on investments in debt securities

could trail the returns on other investment options, including investments in equity securities.

Index Tracking Risk: The Fund's return may not match the return of the Index. The Fund's ability to track the Index will be affected by Fund expenses, the amount of cash and cash equivalents held in its portfolio, and the frequency and the timing of purchases and sales of interests in the Fund. The Investment Manager and/or Sub-Investment Manager may attempt to replicate the Index return by investing in a sub-set of the securities in the Index, or in some securities not included in the Index, potentially increasing the risk of divergence between the Fund's return and that of the Index.

Integrating Sustainability Risk: Sustainability Risk has not been integrated into the Fund's investment process. Any deterioration in the financial profile of an underlying investment affected by a Sustainability Risk may have a corresponding negative impact on the Net Asset Value and/or performance of the investing Fund. Where a Sustainability Risk event occurs, this Fund may be more impacted than an equivalent Fund that integrates Sustainability Risk.

Liquidity Risk: Lack of a ready market or restrictions on resale may limit the ability of the Fund to sell a security at an advantageous time or price or at all. Illiquid securities may trade at a discount from comparable, more liquid investments and may be subject to wide fluctuations in market value. Illiquidity of the Fund's holdings may limit the ability of the Fund to obtain cash to meet redemptions on a timely basis.

Mortgage-related and Other Asset Backed Securities Risk: Investments in mortgage-related and other asset-backed securities are subject to the risk of significant credit downgrades, illiquidity, and defaults to a greater extent than many other types of fixed-income investments. During periods of falling interest rates, mortgage- and asset-backed securities may be called or prepaid, which may result in the Fund having to reinvest proceeds in other investments at a lower interest rate. During periods of rising interest rates, the average life of mortgage- and asset-backed securities may extend which may lock in a below-market interest rate, increase the security's duration and interest rate sensitivity, and reduce the value of the security. Enforcing rights against the underlying assets or collateral may be difficult, and the underlying assets or collateral may be insufficient if the issuer defaults.

PRC Investments Risk: In addition to the risks of investing in emerging markets, risks of investing in PRC Investments include, among others, trading suspensions, currency transfer/exposure restrictions, limits on holdings of PRC Investments and use of brokers, untested concepts regarding treatment of beneficial ownership, reliance on Access Programmes which may be discontinued or substantially changed, technology system risks and controls associated with such Access Programmes, custody risks including lack of sufficient segregation of assets from those of the applicant, other intermediaries under the relevant Access Programmes, and the relevant Sub-Custodians and tax uncertainty.

Securities Lending Risk: If the Fund engages in securities lending, there is a risk that the borrower may default its obligations to return equivalent securities to the loaned securities. In this way the Fund is exposed to counterparty risk. In this event, the Fund could also experience delays in recovering the securities and may incur a capital loss. The Fund could also lose money if the value of collateral held against the loaned securities falls.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager and/or Sub-Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Subscriptions, Redemptions and Switches

Investment Objective and Policy

Investment Objective: The objective of the Fund is to track the performance of the global government bond market with a maturity between 1 and 10 years.

Investment Policy: The investment policy of the Fund is to track the performance of the Index (or any other index determined by the Directors from time to time to track substantially the same market as the Index) as closely as possible while seeking to minimise as far as possible the tracking difference between the Fund's performance and that of the Index.

The Index measures the performance of the global government bond market whose maturities range between 1-10 years. Securities must be fixed rate and rated investment grade as defined by the Index methodology.

The Investment Manager, on behalf of the Fund, will invest using the Stratified Sampling Strategy as further described in the **"Investment Techniques"** section of the Prospectus, primarily in the securities of the Index, at all times in accordance with the investment restrictions set forth in the Prospectus. The Investment Manager also may, in exceptional circumstances, invest in securities not included in the Index but that it believes closely reflect the risk and distribution characteristics of securities of the Index. From time to time securities are added to or removed from the Index. The Investment Manager may sell securities that are represented in the Index, or purchase securities that are not yet represented in the Index, in anticipation of their removal from or addition to the Index. Where such securities remain non-Index constituents, they will be sold or transferred as soon as reasonably practicable.

The investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities as per the Taxonomy Regulation.

Permitted Investments

In order to achieve its investment objective, this Fund will only invest in:

- Fixed rate, investment grade, global government and government-related bonds with maturity between 1-10 years. The Fund may invest in China bonds acquired on the CIBM through the CIBM Direct Access Programme/Bond Connect;
- Other UCITS authorised in accordance with the UCITS Directive and/or other UCIs within the meaning of Article 1(2), (a) and (b) of the UCITS Directive whether or not established in an EU Member State;
- Ancillary liquid assets, notably cash, for cash management purposes; and
- Derivatives for efficient portfolio management limited to forward foreign exchange contracts, futures, options and swaps.

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the 2010 Law and further described in the "**Investment Restrictions and Limits**" section of the Prospectus.

Securities Financing Transactions

	Expected	Maximum
Securities Lending	0%-40%*	70%

*Securities lending transactions will be entered into depending on the market opportunities and in particular depending on the market demand to borrow the securities held in the Fund's portfolio at any time and the expected revenues of the transaction. Market demand depends on the specific securities and the reason borrowers enter into the transaction, such as hedging against market risk, use as collateral or to meet required liquidity standards. Market demand is also subject to volatility, seasonality, and liquidity of the underlying securities in the Fund's portfolio. Revenues vary according to the specific security and the demand to borrow them. The maximum exposure could be reached when there is high demand for many securities held in the Fund's portfolio. Each of these factors may vary and cannot be predicted with certainty. Securities lending transactions to be entered into exclusively aim to generate additional capital or income. As such, there is no restriction on the frequency under which the Fund may engage into such type of transactions.

Listing

All Share Classes are listed on the Euro MTF Market.

Investor Profile

The typical investors of the Fund are expected to be institutional and intermediary investors with a medium or long term horizon who want to gain exposure to the performance of the global government bond markets and are prepared to accept the risks associated with an investment of this type.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the **"Risk Information**" section of the Prospectus. The following are the principal risks of investing in the Fund:

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund's hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund's assets or share classes are denominated appreciates.

Debt Securities Risk: The value of debt securities may change significantly depending on economic and interest rate conditions as well as the credit worthiness of the issuer. Issuers of debt securities may fail to meet payment obligations or the credit rating of debt securities may be downgraded. Returns on investments in debt securities could trail the returns on other investment options, including investments in equity securities.

Index Tracking Risk: The Fund's return may not match the return of the Index. The Fund's ability to track the Index will be affected by Fund expenses, the amount of cash and cash equivalents held in its portfolio, and the frequency and the timing of purchases and sales of interests in the Fund. The Investment Manager may attempt to replicate the Index return by investing in a sub-set of the securities in the Index, or in some securities not included in the Index, potentially

increasing the risk of divergence between the Fund's return and that of the Index.

Integrating Sustainability Risk: Sustainability Risk has not been integrated into the Fund's investment process. Any deterioration in the financial profile of an underlying investment affected by a Sustainability Risk may have a corresponding negative impact on the Net Asset Value and/or performance of the investing Fund. Where a Sustainability Risk event occurs, this Fund may be more impacted than an equivalent Fund that integrates Sustainability Risk.

Liquidity Risk: Lack of a ready market or restrictions on resale may limit the ability of the Fund to sell a security at an advantageous time or price or at all. Illiquid securities may trade at a discount from comparable, more liquid investments and may be subject to wide fluctuations in market value. Illiquidity of the Fund's holdings may limit the ability of the Fund to obtain cash to meet redemptions on a timely basis.

PRC Investments Risk: In addition to the risks of investing in emerging markets, risks of investing in PRC Investments include, among others, trading suspensions, currency transfer/exposure restrictions, limits on holdings of PRC Investments and use of brokers, untested concepts regarding treatment of beneficial ownership, reliance on Access Programmes which may be discontinued or substantially changed, technology system risks and controls associated with such Access Programmes, custody risks including lack of sufficient segregation of assets from those of the applicant, other intermediaries under the relevant Access Programmes, and the relevant Sub-Custodians and tax uncertainty.

Securities Lending Risk: If the Fund engages in securities lending, there is a risk that the borrower may default its obligations to return equivalent securities to the loaned securities. In this way, the Fund is exposed to counterparty risk. In this event, the Fund could also experience delays in recovering the securities and may incur a capital loss. The Fund could also lose money if the value of collateral held against the loaned securities falls.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Subscriptions, Redemptions and Switches

Investors may subscribe for, redeem or switch launched Share Classes on each Dealing Day at the Subscription Price or Redemption Price as applicable. For all subscription, redemption, and switch requests, the relevant form must be received by the UCI Administrator by the Dealing Deadline. Shareholders should refer to section "**Shares**" of the Prospectus for further information.

Index Disclaimer

Please see Appendix 1 of the Prospectus for the Bloomberg index disclaimer.

Investment Objective and Policy

Investment Objective: The objective of the Fund is to track the performance of investible local currency denominated, emerging markets sovereign bonds.

Investment Policy: The investment policy of the Fund is to track the performance of the Index (or any other index determined by the Directors from time to time to track substantially the same market as the Index) as closely as possible while seeking to minimise as far as possible the tracking difference between the Fund's performance and that of the Index.

The Index measures the performance of investible local currency emerging markets bonds. The Index limits country exposure to a maximum of 10% and redistributes the excess market value Index-wide on a pro-rata basis. To be included in the Index, securities must meet the country inclusion criteria, be fixed rate coupon instruments, have more than 13 months to maturity remaining and meet any other criteria as defined in the index methodology.

The Investment Manager, on behalf of the Fund, will invest using the Stratified Sampling Strategy as further described in the **"Investment Techniques"** section of the Prospectus, primarily in the securities of the Index, at all times in accordance with the investment restrictions set forth in the Prospectus. The Investment Manager also may, in exceptional circumstances, invest in securities not included in the Index that it believes closely reflect the risk and distribution characteristics of securities of the Index. From time to time securities are added to or removed from the Index. The Investment Manager may sell securities that are represented in the Index, or purchase securities that are not yet represented in the Index, in anticipation of their removal from or addition to the Index. Where such securities remain non-Index constituents, they will be sold or transferred as soon as reasonably practicable.

The investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities as per the Taxonomy Regulation.

Permitted Investments

In order to achieve its investment objective, this Fund will only invest in:

- Government and government-related bonds from issuers in emerging markets. Such instruments may be fixed and/or floating rate. The securities may be investment grade and below investment grade. The Fund may invest in China bonds acquired on the CIBM through the CIBM Direct Access Programme/Bond Connect;

- Other UCITS authorised in accordance with the UCITS Directive and/or other UCIs within the meaning of Article 1(2), (a) and (b) of the UCITS Directive whether or not established in an EU Member State;

- Ancillary liquid assets, notably cash, for cash management purposes; and

- Derivatives for efficient portfolio management limited to forward foreign exchange contracts, futures, options and swaps.

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the 2010 Law and further described in the "**Investment Restrictions and Limits**" section of the Prospectus.

Securities Financing Transactions

	Expected	Maximum
Securities Lending	0%-40%*	70%

*Securities lending transactions will be entered into depending on the market opportunities and in particular depending on the market demand to borrow the securities held in the Fund's portfolio at any time and the expected revenues of the transaction. Market demand depends on the specific securities and the reason borrowers enter into the transaction, such as hedging against market risk, use as collateral or to meet required liquidity standards. Market demand is also subject to volatility, seasonality, and liquidity of the underlying securities in the Fund's portfolio. Revenues vary according to the specific security and the demand to borrow them. The maximum exposure could be reached when there is high demand for many securities held in the Fund's portfolio. Each of these factors may vary and cannot be predicted with certainty. Securities lending transactions to be entered into exclusively aim to generate additional capital or income. As such, there is no restriction on the frequency under which the Fund may engage into such type of transactions.

Listing

All Share Classes are listed on the Euro MTF Market.

Investor Profile

The typical investors of the Fund are expected to be institutional and intermediary investors with a medium or long term horizon who want to gain exposure to the performance of liquid local currency emerging markets debt markets and are prepared to accept the risks associated with an investment of this type and the expected medium to high volatility of the Fund.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the **"Risk Information**" section of the Prospectus. The following are the principal risks of investing in the Fund:

Currency Risk: The value of the Fund's assets may be affected favourably or unfavourably by currency exchange rates, currency exchange control regulations, and restrictions or prohibitions on the repatriation of foreign currencies. Foreign currency exchange rates may have significant volatility, and changes in the values of foreign currencies may result in substantial declines in the values of the Fund's assets or share classes denominated in foreign currencies.

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund's hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund's assets are denominated appreciates.

Debt Securities Risk: The value of debt securities may change significantly depending on economic and interest rate conditions as well as the credit worthiness of the issuer. Issuers of debt securities may fail to meet payment

obligations or the credit rating of debt securities may be downgraded. Returns on investments in debt securities could trail the returns on other investment options, including investments in equity securities.

Duration / Interest Rate Risk: The values of bonds and other debt instruments usually rise and fall in response to changes in interest rates. Rising interest rates generally result in declines in the values of existing debt, while falling interest rates generally result in bond values increasing. Investments with longer maturities and higher durations are more sensitive to interest rate changes, therefore a change in interest rates could have a substantial and immediate negative effect on the values of the Fund's investments.

Emerging Markets Risk: Risks of investing in emerging markets include, among others, greater political and economic instability, possible trade barriers, less governmental supervision and regulation, greater volatility in currency exchange rates, currency transfer restrictions or difficulties in gaining currency exposure, less developed securities markets, legal systems and financial services industries, differences in auditing and financial reporting standards, and greater dependence on revenue from particular commodities or international aid.

Index Tracking Risk: The Fund's return may not match the return of the Index. The Fund's ability to track the Index will be affected by Fund expenses, the amount of cash and cash equivalents held in its portfolio, and the frequency and the timing of purchases and sales of interests in the Fund. The Investment Manager may attempt to replicate the Index return by investing in a sub-set of the securities in the Index, or in some securities not included in the Index, potentially increasing the risk of divergence between the Fund's return and that of the Index.

Integrating Sustainability Risk: Sustainability Risk has not been integrated into the Fund's investment process. Any deterioration in the financial profile of an underlying investment affected by a Sustainability Risk may have a corresponding negative impact on the Net Asset Value and/or performance of the investing Fund. Where a Sustainability Risk event occurs, this Fund may be more impacted than an equivalent Fund that integrates Sustainability Risk.

Liquidity Risk: Lack of a ready market or restrictions on resale may limit the ability of the Fund to sell a security at an advantageous time or price or at all. Illiquid securities may trade at a discount from comparable, more liquid investments and may be subject to wide fluctuations in market value. Illiquidity of the Fund's holdings may limit the ability of the Fund to obtain cash to meet redemptions on a timely basis.

Lower Rated Securities Risk: Lower-quality debt securities ("high yield" or "junk" bonds) can involve a substantially greater risk of default than higher quality debt securities. They can be illiquid, and their values can have significant volatility and may decline significantly over short periods of time. Lower-quality debt securities tend to be more sensitive to adverse news about the issuer, or the market or economy in general.

PRC Investments Risk: In addition to the risks of investing in emerging markets, risks of investing in PRC Investments include, among others, trading suspensions, currency transfer/exposure restrictions, limits on holdings of PRC Investments and use of brokers, untested concepts regarding treatment of beneficial ownership, reliance on Access Programmes which may be discontinued or substantially changed, technology system risks and controls associated with such Access Programmes, custody risks including lack of sufficient segregation of assets from those of the applicant, other intermediaries under the relevant Access Programmes, and the relevant Sub-Custodians and tax uncertainty.

Securities Lending Risk: If the Fund engages in securities lending, there is a risk that the borrower may default its obligations to return equivalent securities to the loaned securities. In this way the Fund is exposed to counterparty risk. In this event, the Fund could also experience delays in recovering the securities and may incur a capital loss. The Fund could also lose money if the value of collateral held against the loaned securities falls.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Sovereign Risk: The Fund may invest in securities issued by governments or by agencies, instrumentalities and sponsored enterprises of governments. The value of these securities may be affected by the creditworthiness of the relevant government, including any default or potential default by the relevant government. In addition, issuer payment obligations relating to securities issued by government agencies, instrumentalities and sponsored enterprises of governments may have limited or no support of the relevant government.

Subscriptions, Redemptions and Switches

Investors may subscribe for, redeem or switch launched Share Classes on each Dealing Day at the Subscription Price or Redemption Price as applicable. For all subscription, redemption, and switch requests, the relevant form must be received by the UCI Administrator by the Dealing Deadline. Shareholders should refer to section "**Shares**" of the Prospectus for further information.

Investment Objective and Policy

Investment Objective: The objective of the Fund is to track the performance of investible local currency denominated, emerging markets sovereign bonds.

Investment Policy: The investment policy of the Fund is to track the performance of the Index (or any other index determined by the Directors from time to time to track substantially the same market as the Index) as closely as possible while seeking to minimise as far as possible the tracking difference between the Fund's performance and that of the Index.

The Index is tilted from the parent index based on an ESG methodology as defined by the Index provider and measures the performance of investible local currency emerging markets bonds, screened based on certain Environmental, Social and Governance (ESG) criteria. The Index will also overweight Green Bond issuances. The Index limits country exposure to a maximum of 10% and redistributes the excess market value Index-wide on a pro-rata basis. To be included in the Index, securities must meet the country inclusion criteria, be fixed rate coupon instruments, have more than 13 months to maturity remaining and meet any other criteria as defined in the index methodology. Please refer to the "**ESG Best in Class Investing**" sub-section of the "**ESG Investing**" section of the Prospectus for further details.

The Investment Manager, on behalf of the Fund, will invest using the Stratified Sampling Strategy as further described in the **"Investment Techniques"** section of the Prospectus, primarily in the securities of the Index, at all times in accordance with the investment restrictions set forth in the Prospectus. The Investment Manager also may, in exceptional circumstances, invest in securities not included in the Index that it believes closely reflect the risk and distribution characteristics of securities of the Index. From time to time securities are added to or removed from the Index. The Investment Manager may sell securities that are represented in the Index, or purchase securities that are not yet represented in the Index, in anticipation of their removal from or addition to the Index. Where such securities remain non-Index constituents, they will be sold or transferred as soon as reasonably practicable. The Investment Manager integrates Sustainability Risk into its investment decisions as further described in the "**ESG Integration**" sub-section of the "**ESG Investing**" section of the Prospectus.

As at the date of this Supplement the Investment Manager and/or Sub-Investment Manager consider the principal adverse impacts of its investment decisions at the Fund level in order to seek to reduce negative externalities that may be caused by its underlying investments.

This Fund promotes environmental or social characteristics in accordance with SFDR Article 8. More information about the environmental and social characteristics can be found in Annex 3.

Permitted Investments

In order to achieve its investment objective, this Fund will only invest in:

- Government and government-related bonds from issuers in emerging markets. Such instruments may be fixed and/or floating rate. The securities may be investment grade and below investment grade. The Fund may invest in China bonds acquired on the CIBM through the CIBM Direct Access Programme/Bond Connect;
- Other UCITS authorised in accordance with the UCITS Directive and/or other UCIs within the meaning of Article 1(2), (a) and (b) of the UCITS Directive whether or not established in an EU Member State;
- Ancillary liquid assets, notably cash, for cash management purposes; and
- Derivatives for efficient portfolio management limited to forward foreign exchange contracts, futures, options and swaps.

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the 2010 Law and further described in the "**Investment Restrictions and Limits**" section of the Prospectus.

Securities Financing Transactions

	Expected	Maximum
Securities Lending	0%-40%*	70%

*Securities lending transactions will be entered into depending on the market opportunities and in particular depending on the market demand to borrow the securities held in the Fund's portfolio at any time and the expected revenues of the transaction. Market demand depends on the specific securities and the reason borrowers enter into the transaction, such as hedging against market risk, use as collateral or to meet required liquidity standards. Market demand is also subject to volatility, seasonality, and liquidity of the underlying securities in the Fund's portfolio. Revenues vary according to the specific security and the demand to borrow them. The maximum exposure could be reached when there is high demand for many securities held in the Fund's portfolio. Each of these factors may vary and cannot be predicted with certainty. Securities lending transactions to be entered into exclusively aim to generate additional capital or income. As such, there is no restriction on the frequency under which the Fund may engage into such type of transactions.

Listing

All Share Classes are listed on the Euro MTF Market.

Investor Profile

The typical investors of the Fund are expected to be institutional and intermediary investors with a medium or long term horizon who want to gain exposure to the performance of liquid local currency emerging markets debt markets and are prepared to accept the risks associated with an investment of this type and the expected medium to high volatility of the Fund.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the **"Risk Information**" section of the Prospectus. The following are the principal risks of investing in the Fund:

Currency Risk: The value of the Fund's assets may be affected favourably or unfavourably by currency exchange rates, currency exchange control regulations, and restrictions or prohibitions on the repatriation of foreign currencies. Foreign currency exchange rates may have significant volatility, and changes in the values of foreign currencies may result in substantial declines in the values of the Fund's assets denominated in foreign currencies.

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund's hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund's assets or share classes are denominated appreciates.

Debt Securities Risk: The value of debt securities may change significantly depending on economic and interest rate conditions as well as the credit worthiness of the issuer. Issuers of debt securities may fail to meet payment obligations or the credit rating of debt securities may be downgraded. Returns on investments in debt securities could trail the returns on other investment options, including investments in equity securities.

Duration / Interest Rate Risk: The values of bonds and other debt instruments usually rise and fall in response to changes in interest rates. Rising interest rates generally result in declines in the values of existing debt, while falling interest rates generally result in bond values increasing. Investments with longer maturities and higher durations are more sensitive to interest rate changes; therefore a change in interest rates could have a substantial and immediate negative effect on the values of the Fund's investments.

Emerging Markets Risk: Risks of investing in emerging markets include, among others, greater political and economic instability, possible trade barriers, less governmental supervision and regulation, greater volatility in currency exchange rates, currency transfer restrictions or difficulties in gaining currency exposure, less developed securities markets, legal systems and financial services industries, differences in auditing and financial reporting standards, and greater dependence on revenue from particular commodities or international aid.

Index Tracking Risk: The Fund's return may not match the return of the Index. The Fund's ability to track the Index will be affected by Fund expenses, the amount of cash and cash equivalents held in its portfolio, and the frequency and the timing of purchases and sales of interests in the Fund. The Investment Manager may attempt to replicate the Index return by investing in a sub-set of the securities in the Index, or in some securities not included in the Index, potentially increasing the risk of divergence between the Fund's return and that of the Index.

Integrating Sustainability Risk: Integrating Sustainability Risk into the Fund's investment process does not assure the mitigation of any or all Sustainability Risk. Any deterioration in the financial profile of an underlying investment affected by a Sustainability Risk may have a corresponding negative impact on the Net Asset Value and/or performance of the investing Fund.

Liquidity Risk: Lack of a ready market or restrictions on resale may limit the ability of the Fund to sell a security at an advantageous time or price or at all. Illiquid securities may trade at a discount from comparable, more liquid investments and may be subject to wide fluctuations in market value. Illiquidity of the Fund's holdings may limit the ability of the Fund to obtain cash to meet redemptions on a timely basis.

Lower Rated Securities Risk: Lower-quality debt securities ("high yield" or "junk" bonds) can involve a substantially greater risk of default than higher quality debt securities. They can be illiquid, and their values can have significant volatility and may decline significantly over short periods of time. Lower-quality debt securities tend to be more sensitive to adverse news about the issuer, or the market or economy in general.

PRC Investments Risk: In addition to the risks of investing in emerging markets, risks of investing in PRC Investments include, among others, trading suspensions, currency transfer/exposure restrictions, limits on holdings of PRC Investments and use of brokers, untested concepts regarding treatment of beneficial ownership, reliance on Access Programmes which may be discontinued or substantially changed, technology system risks and controls associated with such Access Programmes, custody risks including lack of sufficient segregation of assets from those of the applicant, other intermediaries under the relevant Access Programmes, and the relevant Sub-Custodians and tax uncertainty.

Screening Risk: There is a risk that the screen provider may make errors, such as incorrect assessment of the screen criteria and/or include incorrect/exclude correct constituents in the screening process or discontinue its screening services. In such circumstances, the Company may change the screen provider although there is no guarantee that a replacement screen provided would result in a similar screening process to that intended or would be available at all.

Securities Lending Risk: If the Fund engages in securities lending, there is a risk that the borrower may default its obligations to return equivalent securities to the loaned securities. In this way the Fund is exposed to counterparty risk. In this event, the Fund could also experience delays in recovering the securities and may incur a capital loss. The Fund could also lose money if the value of collateral held against the loaned securities falls.

SFDR - Fund Classification Risk: The SFDR has phased implementation from 10 March 2021 and imposes new disclosure obligations on financial market participants. As at the date of this Prospectus, the implementing Regulatory Technical Standards (Level 2) for SFDR have been adopted by the European Commission but certain concepts introduced by SFDR are not currently the subject of centralised implementing standards, local guidance or established market practice. The Fund has been assessed and classified in good faith based on the relevant information currently available. As these standards and guidance develop, the SFDR related disclosures and the Article 8 classification indicated in this Supplement and on the Website are subject to change and may no longer apply.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Sovereign Risk: The Fund may invest in securities issued by governments or by agencies, instrumentalities and sponsored enterprises of governments. The value of these securities may be affected by the creditworthiness of the relevant government, including any default or potential default by the relevant government. In addition, issuer payment obligations relating to securities issued by government agencies, instrumentalities and sponsored enterprises of governments may have limited or no support of the relevant government.

Subscriptions, Redemptions and Switches

Investors may subscribe for, redeem or switch launched Share Classes on each Dealing Day at the Subscription Price or Redemption Price as applicable. For all subscription, redemption, and switch requests, the relevant form must be received by the UCI Administrator by the Dealing Deadline. Shareholders should refer to section "**Shares**" of the Prospectus for further information.

Investment Objective and Policy

Investment Objective: The objective of the Fund is to track the performance of the fixed rate global high yield corporate bond market.

Investment Policy: The investment policy of the Fund is to track the performance of the Index (or any other index determined by the Directors from time to time to track substantially the same market as the Index) as closely as possible, seeking to minimise as far as possible the tracking difference between the Fund's performance and that of the Index while screening out securities based on an assessment of their adherence to certain ESG criteria defined by the Investment Manager and further in Annex 4.

The Index measures the performance of the below investment grade corporate debt publicly issued in the major domestic or eurobond markets. The Index limits issuer exposure to a maximum of 2% and redistributes the excess market value Index-wide on a pro-rata basis. To be included in the Index, securities must have a below investment grade rating, at least 18 months to final maturity at the time of issuance, at least one year remaining term to final maturity as of the rebalancing date, a fixed coupon schedule and meet any other criteria as defined in the index methodology.

The Investment Manager, on behalf of the Fund, will invest using the Stratified Sampling Strategy as further described in the **"Investment Techniques"** section of the Prospectus, primarily in the securities of the Index, at all times in accordance with the investment restrictions set forth in the Prospectus. The Investment Manager integrates Sustainability Risk into its investment decisions and employs a negative and norms-based ESG screen prior to the construction of the portfolio of the Fund and on an ongoing basis, as further described in the "**ESG Integration**" and "**ESG Screening**" subsections, respectively, of the "**ESG Investing**" section of the Prospectus. The Investment Manager also may, in exceptional circumstances, invest in securities not included in the Index that it believes closely reflect the risk and distribution characteristics of securities of the Index. From time to time securities are added to or removed from the Index. The Investment Manager may sell securities that are represented in the Index, or purchase securities that are not yet represented in the Index, in anticipation of their removal from or addition to the Index. Where such securities remain non-Index constituents, they will be sold or transferred as soon as reasonably practicable.

As at the date of this Supplement the Investment Manager and/or Sub-Investment Manager consider the principal adverse impacts of its investment decisions at the Fund level in order to seek to reduce negative externalities that may be caused by its underlying investments.

This Fund promotes environmental or social characteristics in accordance with SFDR Article 8. More information about the environmental and social characteristics can be found in Annex 4.

Permitted Investments

In order to achieve its investment objective, this Fund will only invest in:

- Fixed rate, investment grade government and government-related bonds;
- Below investment grade corporate bonds. The Fund may invest in China bonds acquired on the CIBM through the CIBM Direct Access Programme;
- Other UCITS authorised in accordance with the UCITS Directive and/or other UCIs within the meaning of Article 1(2), (a) and (b) of the UCITS Directive whether or not established in an EU Member State;
- Ancillary liquid assets, notably cash, for cash management purposes; and
- Derivatives for efficient portfolio management limited to forward foreign exchange contracts, futures, options and swaps.

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the 2010 Law Law and further described in the "**Investment Restrictions and Limits**" section of the Prospectus.

Securities Financing Transactions

	Expected	Maximum
Securities Lending	0%-40%*	70%

*Securities lending transactions will be entered into depending on the market opportunities and in particular depending on the market demand to borrow the securities held in the Fund's portfolio at any time and the expected revenues of the transaction. Market demand depends on the specific securities and the reason borrowers enter into the transaction, such as hedging against market risk, use as collateral or to meet required liquidity standards. Market demand is also subject to volatility, seasonality, and liquidity of the underlying securities in the Fund's portfolio. Revenues vary according to the specific security and the demand to borrow them. The maximum exposure could be reached when there is high demand for many securities held in the Fund's portfolio. Each of these factors may vary and cannot be predicted with certainty. Securities lending transactions to be entered into exclusively aim to generate additional capital or income. As such, there is no restriction on the frequency under which the Fund may engage into such type of transactions.

Listing

All Share Classes are listed on the Euro MTF Market.

Investor Profile

The typical investors of the Fund are expected to be institutional and intermediary investors with a medium, or long term horizon who want to gain exposure to the performance of global high yield corporate bond markets and are prepared to accept the risks associated with an investment of this type and the expected medium to high volatility of the Fund.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the **"Risk Information**" section of the Prospectus. The following are the principal risks of investing in the Fund:

Currency Risk: The value of the Fund's assets may be affected favourably or unfavourably by currency exchange rates, currency exchange control regulations, and restrictions or prohibitions on the repatriation of foreign currencies. Foreign currency exchange rates may have significant volatility, and changes in the values of foreign currencies may result in substantial declines in the values of the Fund's assets denominated in foreign currencies.

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund's hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund's assets or share classes are denominated appreciates.

Debt Securities Risk: The value of debt securities may change significantly depending on economic and interest rate conditions as well as the credit worthiness of the issuer. Issuers of debt securities may fail to meet payment obligations or the credit rating of debt securities may be downgraded. Returns on investments in debt securities could trail the returns on other investment options, including investments in equity securities.

Duration / Interest Rate Risk: The values of bonds and other debt instruments usually rise and fall in response to changes in interest rates. Rising interest rates generally result in declines in the values of existing debt, while falling interest rates generally result in bond values increasing. Investments with longer maturities and higher durations are more sensitive to interest rate changes, therefore a change in interest rates could have a substantial and immediate negative effect on the values of the Fund's investments.

Emerging Markets Risk: Risks of investing in emerging markets include, among others, greater political and economic instability, possible trade barriers, less governmental supervision and regulation, greater volatility in currency exchange rates, currency transfer restrictions or difficulties in gaining currency exposure, less developed securities markets, legal systems and financial services industries, differences in auditing and financial reporting standards, and greater dependence on revenue from particular commodities or international aid.

Index Tracking Risk: The Fund's return may not match the return of the Index. The Fund's ability to track the Index will be affected by Fund expenses, the amount of cash and cash equivalents held in its portfolio, and the frequency and the timing of purchases and sales of interests in the Fund. The Investment Manager may attempt to replicate the Index return by investing in a sub-set of the securities in the Index, or in some securities not included in the Index, potentially increasing the risk of divergence between the Fund's return and that of the Index.

Integrating Sustainability Risk: Integrating Sustainability Risk into the Fund's investment process does not assure the mitigation of any or all Sustainability Risk. Any deterioration in the financial profile of an underlying investment affected by a Sustainability Risk may have a corresponding negative impact on the Net Asset Value and/or performance of the investing Fund.

Liquidity Risk: Lack of a ready market or restrictions on resale may limit the ability of the Fund to sell a security at an advantageous time or price or at all. Illiquid securities may trade at a discount from comparable, more liquid investments and may be subject to wide fluctuations in market value. Illiquidity of the Fund's holdings may limit the ability of the Fund to obtain cash to meet redemptions on a timely basis.

Lower Rated Securities Risk: Lower-quality debt securities ("high yield" or "junk" bonds) can involve a substantially greater risk of default than higher quality debt securities. They can be illiquid, and their values can have significant volatility and may decline significantly over short periods of time. Lower-quality debt securities tend to be more sensitive to adverse news about the issuer, or the market or economy in general. **As the Fund has material exposure to sub-investment grade bonds an investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.**

PRC Investments Risk: In addition to the risks of investing in emerging markets, risks of investing in PRC Investments markets include, among others, trading suspensions, currency transfer/exposure restrictions, limits on holdings of PRC Investments and use of brokers, untested concepts regarding new treatment of beneficial ownership, reliance on Access Programmes which may be discontinued or substantially changed, custody risks including a lack of sufficient segregation of assets from those of the applicant for the CIBM Direct Access Programme and Sub-Custodian and tax uncertainty.

Screening Risk: There is a risk that the screen provider may make errors, such as incorrect assessment of the screen criteria and/or include incorrect/exclude correct constituents in the screening process or discontinue its screening services. In such circumstances, the Company may change the screen provider although there is no guarantee that a replacement screen provided would result in a similar screening process to that intended or would be available at all.

Securities Lending Risk: If the Fund engages in securities lending, there is a risk that the borrower may default its obligations to return equivalent securities to the loaned securities. In this way the Fund is exposed to counterparty risk. In this event, the Fund could also experience delays in recovering the securities and may incur a capital loss. The Fund could also lose money if the value of collateral held against the loaned securities falls.

SFDR – Fund Classification Risk: The SFDR has phased implementation from 10 March 2021 and imposes new disclosure obligations on financial market participants. As at the date of this Prospectus, the implementing Regulatory Technical Standards (Level 2) for SFDR have been adopted by the European Commission but certain concepts introduced by SFDR are not currently the subject of centralised implementing standards, local guidance or established market practice. The Fund has been assessed and classified in good faith based on the relevant information currently available. As these standards and guidance develop, the SFDR related disclosures and the Article 8 classification indicated in this Supplement and on the Website are subject to change and may no longer apply.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Subscriptions, Redemptions and Switches

Investors may subscribe for, redeem or switch launched Share Classes on each Dealing Day at the Subscription Price or Redemption Price as applicable. For all subscription, redemption, and switch requests, the relevant form must be received by the UCI Administrator by the Dealing Deadline. Shareholders should refer to section "**Shares**" of the Prospectus for further information.

Investment Objective and Policy

Investment Objective: The objective of the Fund is to track the performance of the U.S. dollar denominated emerging markets government bond market.

Investment Policy: The investment policy of the Fund is to track the performance of the Index (or any other index determined by the Directors from time to time to track substantially the same market as the Index) as closely as possible while seeking to minimise as far as possible the tracking difference between the Fund's performance and that of the Index.

The Index measures the performance of publicly issued U.S. dollar-denominated emerging markets government bonds. The Index limits country exposure to a maximum of 10% and redistributes the excess market value Index-wide on a pro-rata basis.

The Investment Manager, on behalf of the Fund, will invest using the Stratified Sampling Strategy as further described in the **"Investment Techniques"** section of the Prospectus, primarily in the securities of the Index, at all times in accordance with the investment restrictions set forth in the Prospectus. The Investment Manager also may, in exceptional circumstances, invest in securities not included in the Index but that it believes closely reflect the risk and distribution characteristics of securities of the Index. From time to time securities are added to or removed from the Index. The Investment Manager may sell securities that are represented in the Index, or purchase securities that are not yet represented in the Index, in anticipation of their removal from or addition to the Index. Where such securities remain non-Index constituents, they will be sold or transferred as soon as reasonably practicable.

The Investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities as per the Taxonomy Regulation.

Permitted Investments

In order to achieve its investment objective, this Fund will only invest in:

- Government and government-related bonds and corporate bonds from issuers in emerging markets. Such instruments may be fixed and/or floating rate. The securities may be investment grade and below investment grade;
- Other UCITS authorized in accordance with the UCITS Directive and/or other UCIs within the meaning of Article 1(2), (a) and (b) of the UCITS Directive whether or not established in an EU Member State;
- Ancillary liquid assets, notably cash, for cash management purposes; and
- Derivatives for efficient portfolio management limited to futures, forward foreign exchange contracts options and swaps.

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the 2010 Law and further described in the "**Investment Restrictions and Limits**" section of the Prospectus.

Securities Financing Transactions

	Expected	Maximum
Securities Lending	0%-40%*	70%

*Securities lending transactions will be entered into depending on the market opportunities and in particular depending on the market demand to borrow the securities held in the Fund's portfolio at any time and the expected revenues of the transaction. Market demand depends on the specific securities and the reason borrowers enter into the transaction, such as hedging against market risk, use as collateral or to meet required liquidity standards. Market demand is also subject to volatility, seasonality, and liquidity of the underlying securities in the Fund's portfolio. Revenues vary according to the specific security and the demand to borrow them. The maximum exposure could be reached when there is high demand for many securities held in the Fund's portfolio. Each of these factors may vary and cannot be predicted with certainty. Securities lending transactions to be entered into exclusively aim to generate additional capital or income. As such, there is no restriction on the frequency under which the Fund may engage into such type of transactions.

Listing

All Share Classes are listed on the Euro MTF Market.

Investor Profile

The typical investors of the Fund are expected to be institutional and intermediary investors who want to take medium or long term exposure to the performance of the U.S. dollar-denominated, emerging market government bond market and are prepared to accept the risks associated with an investment of this type and the expected medium to high volatility of the Fund.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the **"Risk Information**" section of the Prospectus. The following are the principal risks of investing in the Fund:

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund's hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund's assets are denominated appreciates.

Debt Securities Risk: The value of debt securities may change significantly depending on economic and interest rate conditions as well as the credit worthiness of the issuer. Issuers of debt securities may fail to meet payment obligations or the credit rating of debt securities may be downgraded. Returns on investments in debt securities could trail the returns on other investment options, including investments in equity securities.

Emerging Markets Risk: Risks of investing in emerging markets include, among others, greater political and economic instability, possible trade barriers, less governmental supervision and regulation, greater volatility in currency exchange rates, currency transfer restrictions or difficulties in gaining currency exposure, less developed securities markets, legal systems and financial services industries, differences in auditing and financial reporting

standards, and greater dependence on revenue from particular commodities or international aid.

Index Tracking Risk: The Fund's return may not match the return of the Index. The Fund's ability to track the Index will be affected by Fund expenses, the amount of cash and cash equivalents held in its portfolio, and the frequency and the timing of purchases and sales of interests in the Fund. The Investment Manager may attempt to replicate the Index return by investing in a sub-set of the securities in the Index, or in some securities not included in the Index, potentially increasing the risk of divergence between the Fund's return and that of the Index.

Integrating Sustainability Risk: Sustainability Risk has not been integrated into the Fund's investment process. Any deterioration in the financial profile of an underlying investment affected by a Sustainability Risk may have a corresponding negative impact on the Net Asset Value and/or performance of the investing Fund. Where a Sustainability Risk event occurs, this Fund may be more impacted than an equivalent Fund that integrates Sustainability Risk.

Liquidity Risk: Lack of a ready market or restrictions on resale may limit the ability of the Fund to sell a security at an advantageous time or price or at all. Illiquid securities may trade at a discount from comparable, more liquid investments and may be subject to wide fluctuations in market value. Illiquidity of the Fund's holdings may limit the ability of the Fund to obtain cash to meet redemptions on a timely basis.

Lower Rated Securities Risk: Lower-quality debt securities ("high yield" or "junk" bonds) can involve a substantially greater risk of default than higher quality debt securities. They can be illiquid, and their values can have significant volatility and may decline significantly over short periods of time. Lower-quality debt securities tend to be more sensitive to adverse news about the issuer, or the market or economy in general. **As the Fund has material exposure to sub-investment grade bonds an investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.**

Securities Lending Risk: If the Fund engages in securities lending, there is a risk that the borrower may default its obligations to return equivalent securities to the loaned securities. In this way the Fund is exposed to counterparty risk. In this event, the Fund could also experience delays in recovering the securities and may incur a capital loss. The Fund could also lose money if the value of collateral held against the loaned securities falls.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Sovereign Risk: The Fund may invest in securities issued by governments or by agencies, instrumentalities and sponsored enterprises of governments. The value of these securities may be affected by the creditworthiness of the relevant government, including any default or potential default by the relevant government. In addition, issuer payment obligations relating to securities issued by government agencies, instrumentalities and sponsored enterprises of governments may have limited or no support of the relevant government.

Subscriptions, Redemptions and Switches

Investors may subscribe for, redeem or switch launched Share Classes on each Dealing Day at the Subscription Price or Redemption Price as applicable. For all subscription, redemption, and switch requests, the relevant form must be received by the UCI Administrator by the Dealing Deadline. Shareholders should refer to section "**Shares**" of the Prospectus for further information.

Investment Objective and Policy

Investment Objective: The objective of the Fund is to track the performance of the U.S. dollar denominated emerging markets government bond market.

Investment Policy: The investment policy of the Fund is to track the performance of the Index (or any other index determined by the Directors from time to time to track substantially the same market as the Index) as closely as possible while seeking to minimise as far as possible the tracking difference between the Fund's performance and that of the Index.

The Index is tilted from the parent index based on an ESG methodology as defined by the Index provider and measures the performance of publicly issued U.S. dollar-denominated emerging markets government bonds. The Index applies an ESG scoring and screening methodology to tilt toward issuers ranked higher on ESG criteria and green bond issues, and to underweight and remove issuers that rank lower. The Index limits country exposure to a maximum of 10% and redistributes the excess market value Index-wide on a pro-rata basis. Please refer to the "**ESG Best in Class Investing**" sub-section of the "**ESG Investing**" section of the Prospectus for further details.

The Investment Manager, on behalf of the Fund, will invest using the Stratified Sampling Strategy as further described in the **"Investment Techniques"** section of the Prospectus, primarily in the securities of the Index, at all times in accordance with the investment restrictions set forth in the Prospectus. The Investment Manager also may, in exceptional circumstances, invest in securities not included in the Index but that it believes closely reflect the risk and distribution characteristics of securities of the Index. From time to time securities are added to or removed from the Index. The Investment Manager may sell securities that are represented in the Index, or purchase securities that are not yet represented in the Index, in anticipation of their removal from or addition to the Index. Where such securities remain non-Index constituents, they will be sold or transferred as soon as reasonably practicable. The Investment Manager integrates Sustainability Risk into its investment decisions as further described in the "**ESG Integration**" sub-section of the "**ESG Investing**" section of the Prospectus.

As at the date of this Supplement the Investment Manager and/or Sub-Investment Manager consider the principal adverse impacts of its investment decisions at the Fund level in order to seek to reduce negative externalities that may be caused by its underlying investments.

This Fund promotes environmental or social characteristics in accordance with SFDR Article 8. More information about the environmental and social characteristics can be found in Annex 5.

Permitted Investments

In order to achieve its investment objective, this Fund will only invest in:

- Government and government-related bonds and corporate bonds from issuers in emerging markets. Such instruments may be fixed and/or floating rate. The securities may be investment grade and below investment grade;
- Other UCITS authorised in accordance with the UCITS Directive and/or other UCIs within the meaning of Article 1(2), (a) and (b) of the UCITS Directive whether or not established in an EU Member State;
- Ancillary liquid assets, notably cash, for cash management purposes; and
- Derivatives for efficient portfolio management limited to futures, forward foreign exchange contracts options and swaps.

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the 2010 Law and further described in the "**Investment Restrictions and Limits**" section of the Prospectus.

	Expected	Maximum
Securities Lending	0%-40%*	70%

*Securities lending transactions will be entered into depending on the market opportunities and in particular depending on the market demand to borrow the securities held in the Fund's portfolio at any time and the expected revenues of the transaction. Market demand depends on the specific securities and the reason borrowers enter into the transaction, such as hedging against market risk, use as collateral or to meet required liquidity standards. Market demand is also subject to volatility, seasonality, and liquidity of the underlying securities in the Fund's portfolio. Revenues vary according to the specific security and the demand to borrow them. The maximum exposure could be reached when there is high demand for many securities held in the Fund's portfolio. Each of these factors may vary and cannot be predicted with certainty. Securities lending transactions to be entered into exclusively aim to generate additional capital or income. As such, there is no restriction on the frequency under which the Fund may engage into such type of transactions.

Listing

All Share Classes are listed on the Euro MTF Market.

Investor Profile

The typical investors of the Fund are expected to be institutional and intermediary investors who want to take medium or long term exposure to the performance of the U.S. dollar-denominated, emerging market government bond market and are prepared to accept the risks associated with an investment of this type and the expected medium to high volatility of the Fund.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the **"Risk Information**" section of the Prospectus. The following are the principal risks of investing in the Fund:

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund's hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund's assets are denominated appreciates.

Debt Securities Risk: The value of debt securities may change significantly depending on economic and interest rate conditions as well as the credit worthiness of the issuer. Issuers of debt securities may fail to meet payment obligations or the credit rating of debt securities may be

downgraded. Returns on investments in debt securities could trail the returns on other investment options, including investments in equity securities.

Emerging Markets Risk: Risks of investing in emerging markets include, among others, greater political and economic instability, possible trade barriers, less governmental supervision and regulation, greater volatility in currency exchange rates, currency transfer restrictions or difficulties in gaining currency exposure, less developed securities markets, legal systems and financial services industries, differences in auditing and financial reporting standards, and greater dependence on revenue from particular commodities or international aid.

Index Tracking Risk: The Fund's return may not match the return of the Index. The Fund's ability to track the Index will be affected by Fund expenses, the amount of cash and cash equivalents held in its portfolio, and the frequency and the timing of purchases and sales of interests in the Fund. The Investment Manager may attempt to replicate the Index return by investing in a sub-set of the securities in the Index, or in some securities not included in the Index, potentially increasing the risk of divergence between the Fund's return and that of the Index.

Integrating Sustainability Risk: Integrating Sustainability Risk into the Fund's investment process does not assure the mitigation of any or all Sustainability Risk. Any deterioration in the financial profile of an underlying investment affected by a Sustainability Risk may have a corresponding negative impact on the Net Asset Value and/or performance of the investing Fund.

Liquidity Risk: Lack of a ready market or restrictions on resale may limit the ability of the Fund to sell a security at an advantageous time or price or at all. Illiquid securities may trade at a discount from comparable, more liquid investments and may be subject to wide fluctuations in market value. Illiquidity of the Fund's holdings may limit the ability of the Fund to obtain cash to meet redemptions on a timely basis.

Lower Rated Securities Risk: Lower-quality debt securities ("high yield" or "junk" bonds) can involve a substantially greater risk of default than higher quality debt securities. They can be illiquid, and their values can have significant volatility and may decline significantly over short periods of time. Lower-quality debt securities tend to be more sensitive to adverse news about the issuer, or the market or economy in general. **As the Fund has material exposure to sub-investment grade bonds an investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.**

Screening Risk: There is a risk that the screen provider may make errors, such as incorrect assessment of the screen criteria and/or include incorrect/exclude correct constituents in the screening process or discontinue its screening services. In such circumstances, the Company may change the screen provider although there is no guarantee that a replacement screen provided would result in a similar screening process to that intended or would be available at all.

Securities Lending Risk: If the Fund engages in securities lending, there is a risk that the borrower may default its obligations to return equivalent securities to the loaned securities. In this way the Fund is exposed to counterparty risk. In this event, the Fund could also experience delays in recovering the securities and may incur a capital loss. The Fund could also lose money if the value of collateral held against the loaned securities falls.

SFDR - Fund Classification Risk: The SFDR has phased implementation from 10 March 2021 and imposes new disclosure obligations on financial market participants. As at the date of this Prospectus, the implementing Regulatory Technical Standards (Level 2) for SFDR have been adopted by the European Commission but certain concepts introduced by SFDR are not currently the subject of centralised implementing standards, local guidance or established market practice. The Fund has been assessed and classified in good faith based on the relevant information currently available. As these standards and guidance develop, the SFDR related disclosures and the Article 8 classification indicated in this Supplement and on the Website are subject to change and may no longer apply.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Sovereign Risk: The Fund may invest in securities issued by governments or by agencies, instrumentalities and sponsored enterprises of governments. The value of these securities may be affected by the creditworthiness of the relevant government, including any default or potential default by the relevant government. In addition, issuer payment obligations relating to securities issued by government agencies, instrumentalities and sponsored enterprises of governments may have limited or no support of the relevant government.

Subscriptions, Redemptions and Switches

Investors may subscribe for, redeem or switch launched Share Classes on each Dealing Day at the Subscription Price or Redemption Price as applicable. For all subscription, redemption, and switch requests, the relevant form must be received by the UCI Administrator by the Dealing Deadline. Shareholders should refer to section "**Shares**" of the Prospectus for further information.

Investment Objective and Policy

Investment Objective: The objective of the Fund is to track the performance of the Japanese equity market.

Investment Policy: The investment policy of the Fund is to track the performance of the Index (or any other index determined by the Directors from time to time to track substantially the same market as the Index) as closely as possible while seeking to minimise as far as possible the tracking difference between the Fund's performance and that of the Index.

The Index measures the performance of Japanese equities. Securities are weighted by free float-adjusted market capitalisation after screening out securities based on an assessment of their adherence to ESG criteria as further detailed in the Index methodology and Annex 6. Please refer to the "**ESG Screening**" sub-section of the "**ESG Investing**" section of the Prospectus for further details.

The Investment Manager, on behalf of the Fund, will invest using the Replication Strategy as further described in the **"Investment Strategies"** section of the Prospectus, primarily in the securities of the Index, at all times in accordance with the Investment Restrictions set forth in the Prospectus. The Investment Manager also may, in exceptional circumstances, invest in securities not included in the Index but that it believes closely reflect the risk and distribution characteristics of securities of the Index. From time to time securities are added to or removed from the Index. The Investment Manager may sell securities that are represented in the Index, or purchase securities that are not yet represented in the Index, in anticipation of their removal from or addition to the Index. Where such securities remain non-Index constituents, they will be sold or transferred as soon as reasonably practicable.

The Investment Manager integrates Sustainability Risk into its investment decisions as further described in the "**ESG Integration**" sub-section of the "**ESG Investing**" section of the Prospectus.

As at the date of this Supplement the Investment Manager and/or Sub-Investment Manager consider the principal adverse impacts of its investment decisions at the Fund level in order to seek to reduce negative externalities that may be caused by its underlying investments.

This Fund promotes environmental or social characteristics in accordance with SFDR Article 8. More information about the environmental and social characteristics can be found in Annex 6.

Permitted Investments

In order to achieve its investment objective, this Fund will only invest in:

- Equities and equity-related securities such ADRs or GDRs. ADRs and GDRs are typically used instead of local shares, where owning the local shares represented in the Index is not possible or prohibitively expensive;
- Other UCITS authorised in accordance with the UCITS Directive and/or other UCIs within the meaning of Article 1(2), (a) and (b) of the UCITS Directive whether or not established in an EU Member State;
- Ancillary liquid assets, notably cash, for cash management purposes; and
- Derivatives for efficient portfolio management limited to swaps, options, futures and forward foreign exchange contracts.

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the 2010 Law and further described in the "**Investment Restrictions and Limits**" section of the Prospectus.

Securities Financing Transactions

	Expected	Maximum
Securities lending	0%-30%*	40%

*Securities lending transactions will be entered into depending on the market opportunities and in particular depending on the market demand to borrow the securities held in the Fund's portfolio at any time and the expected revenues of the transaction. Market demand depends on the specific securities and the reason borrowers enter into the transaction, such as hedging against market risk, use as collateral or to meet required liquidity standards. Market demand is also subject to volatility, seasonality, and liquidity of the underlying securities in the Fund's portfolio. Revenues vary according to the specific security and the demand to borrow them. The maximum exposure could be reached when there is high demand for many securities held in the Fund's portfolio. Each of these factors may vary and cannot be predicted with certainty. Securities lending transactions to be entered into exclusively aim to generate additional capital or income. As such, there is no restriction on the frequency under which the Fund may engage into such type of transactions.

Listing

All Share Classes are listed on the Euro MTF Market.

Investor Profile

The typical investors of the Fund are expected to be institutional and intermediary investors with a medium or long term horizon who want to gain exposure to the performance of the Japanese equity market and are prepared to accept the risks associated with an investment of this type.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the **"Risk Information**" section of the Prospectus. The following are the principal risks of investing in the Fund:

Concentration Risk: When the Fund focuses its investments in a particular region, the financial, economic, business, and other developments affecting issuers in that region will have a greater effect on the Fund than if it was more diversified. This concentration may also limit the liquidity of the Fund. Investors may buy or sell substantial amounts of the Fund's shares in response to factors affecting or expected to affect a region in which the Fund focuses its investments.

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund's hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate

losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund's assets are denominated appreciates.

Equity and Equity related securities Risk: The market prices of equity and equity related securities may go up or down, sometimes rapidly or unpredictably. The value of these securities may decline for reasons that directly relate to the issuer and/or due to general industry or market, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates, or adverse investor sentiment generally. Equity markets tend to move in cycles, which may cause stock prices to fall over short or extended periods of time.

Index Tracking Risk: The Fund's return may not match the return of the Index. The Fund's ability to track the Index will be affected by Fund expenses, the amount of cash and cash equivalents held in its portfolio, and the frequency and the timing of purchases and sales of interests in the Fund. The Investment Manager may attempt to replicate the Index return by investing in a sub-set of the securities in the Index, or in some securities not included in the Index, potentially increasing the risk of divergence between the Fund's return and that of the Index.

Integrating Sustainability Risk: Integrating Sustainability Risk into the Fund's investment process does not assure the mitigation of any or all Sustainability Risk. Any deterioration in the financial profile of an underlying investment affected by a Sustainability Risk may have a corresponding negative impact on the Net Asset Value and/or performance of the investing Fund.

Screened Indices Risk: There is a risk that the index provider may make errors, such as incorrect assessment of the screen criteria and/or include incorrect/exclude correct constituents, in the screening process or amend or discontinue its screening services. In such circumstances, the Company may change the Index although there is no guarantee that a replacement Index would result in a similar screening process to that intended or would be available at all.

Securities Lending Risk: If the Fund engages in securities lending, there is a risk that the borrower may default its obligations to return equivalent securities to the loaned securities. In this way the Fund is exposed to counterparty risk. In this event, the Fund could also experience delays in recovering the securities and may incur a capital loss. The Fund could also lose money if the value of collateral held against the loaned securities falls.

SFDR - Fund Classification Risk: The SFDR has phased implementation from 10 March 2021 and imposes new disclosure obligations on financial market participants. As at the date of this Prospectus, the implementing Regulatory Technical Standards (Level 2) for SFDR have been adopted by the European Commission but certain concepts introduced by SFDR are not currently the subject of centralised implementing standards, local guidance or established market practice. The Fund has been assessed and classified in good faith based on the relevant information currently available. As these standards and guidance develop, the SFDR related disclosures and the Article 8 classification indicated in this Supplement and on the Website are subject to change and may no longer apply.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Subscriptions, Redemptions and Switches

Investors may subscribe for, redeem or switch launched Share Classes on each Dealing Day at the Subscription Price or Redemption Price as applicable. For all subscription, redemption, and switch requests, the relevant form must be received by the UCI Administrator by the Dealing Deadline. Shareholders should refer to section "**Shares**" of the Prospectus for further information.

In order to achieve its investment objective, this Fund will only invest in:

- Equities and equity-related securities such as ADRs or GDRs. ADRs and GDRs are typically used instead of local shares, where owning the local shares represented in the Index is not possible or prohibitively expensive;
- Other UCITS authorised in accordance with the UCITS Directive and/or other UCIs within the meaning of Article 1(2), (a) and (b) of the UCITS Directive whether or not established in an EU Member State;
- Ancillary liquid assets, notably cash, for cash management purposes; and
- Derivatives for efficient portfolio management limited to swaps, options, futures and forward foreign exchange contracts.

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the 2010 Law and further described in the "**Investment Restrictions and Limits**" section of the Prospectus.

Securities Financing Transactions

	Expected	Maximum
Securities lending	0%-30%*	40%

*Securities lending transactions will be entered into depending on the market opportunities and in particular depending on the market demand to borrow the securities held in the Fund's portfolio at any time and the expected revenues of the transaction. Market demand depends on the specific securities and the reason borrowers enter into the transaction, such as hedging against market risk, use as collateral or to meet required liquidity standards. Market demand is also subject to volatility, seasonality, and liquidity of the underlying securities in the Fund's portfolio. Revenues vary according to the specific security and the demand to borrow them. The maximum exposure could be reached when there is high demand for many securities held in the Fund's portfolio. Each of these factors may vary and cannot be predicted with certainty. Securities lending transactions to be entered into exclusively aim to generate additional capital or income. As such, there is no restriction on the frequency under which the Fund may engage into such type of transactions.

Listing

All Share Classes are listed on the Euro MTF Market.

Investor Profile

The typical investors of the Fund are expected to be institutional and intermediary investors with a medium or long term horizon who want to gain exposure to the performance of the UK equity market and are prepared to accept the risks associated with an investment of this type.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the **"Risk Information**" section of the Prospectus. The following are the principal risks of investing in the Fund:

Concentration Risk: When the Fund focuses its investments in a particular region, the financial, economic, business, and other developments affecting issuers in that region will have a greater effect on the Fund than if it was more diversified. This concentration may also limit the liquidity of the Fund. Investors may buy or sell substantial amounts of the Fund's shares in response to factors affecting or expected to affect a region in which the Fund focuses its investments.

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund's hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund's assets are denominated appreciates.

Equity and Equity related securities Risk: The market prices of equity and equity related securities may go up or down, sometimes rapidly or unpredictably. The value of these securities may decline for reasons that directly relate to the issuer and/or due to general industry or market, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates, or adverse investor sentiment generally. Equity markets tend to move in cycles, which may cause stock prices to fall over short or extended periods of time.

Index Tracking Risk: The Fund's return may not match the return of the Index. The Fund's ability to track the Index will be affected by Fund expenses, the amount of cash and cash equivalents held in its portfolio, and the frequency and the timing of purchases and sales of interests in the Fund. The Investment Manager may attempt to replicate the Index return by investing in a sub-set of the securities in the Index, or in some securities not included in the Index, potentially increasing the risk of divergence between the Fund's return and that of the Index.

Integrating Sustainability Risk: Integrating Sustainability Risk into the Fund's investment process does not assure the mitigation of any or all Sustainability Risk. Any deterioration in the financial profile of an underlying investment affected by a Sustainability Risk may have a corresponding negative impact on the Net Asset Value and/or performance of the investing Fund.

Screened Indices Risk: There is a risk that the index provider may make errors, such as incorrect assessment of the screen criteria and/or include incorrect/exclude correct constituents, in the screening process or amend or discontinue its screening services. In such circumstances, the Company may change the Index although there is no guarantee that a replacement Index would result in a similar screening process to that intended or would be available at all.

Securities Lending Risk: If the Fund engages in securities lending, there is a risk that the borrower may default its obligations to return equivalent securities to the loaned securities. In this way the Fund is exposed to counterparty risk. In this event, the Fund could also experience delays in recovering the securities and may incur a capital loss. The Fund could also lose money if the value of collateral held against the loaned securities falls.

SFDR - Fund Classification Risk: The SFDR has phased implementation from 10 March 2021 and imposes new disclosure obligations on financial market participants. As at the date of this Prospectus, the implementing Regulatory Technical Standards (Level 2) for SFDR have been adopted by the European Commission but certain concepts introduced by SFDR are not currently the subject of centralised implementing standards, local guidance or established market practice. The Fund has been assessed and classified in good faith based on the relevant information currently available. As these standards and guidance develop, the SFDR related disclosures and the Article 8 classification indicated in this Supplement and on the Website are subject to change and may no longer apply.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Subscriptions, Redemptions and Switches

Investors may subscribe for, redeem or switch launched Share Classes on each Dealing Day at the Subscription Price or Redemption Price as applicable. For all subscription, redemption, and switch requests, the relevant form must be received by the UCI Administrator by the Dealing Deadline. Shareholders should refer to section "**Shares**" of the Prospectus for further information.

Index Disclaimer

Please see Appendix 1 of the Prospectus for the MSCI index disclaimer.

Investment Objective and Policy

Investment Objective: The objective of the Fund is to track the performance of the US equity market.

Investment Policy: The investment policy of the Fund is to track the performance of the Index (or any other index determined by the Directors from time to time to track substantially the same market as the Index) as closely as possible while seeking to minimise as far as possible the tracking difference between the Fund's performance and that of the Index.

The Index measures the performance of US equities. Securities are weighted by free float-adjusted market capitalisation after screening out securities based on an assessment of their adherence to ESG criteria as further detailed in the Index methodology and Annex 9. Please refer to the "**ESG Screening**" sub-section of the "**ESG Investing**" section of the Prospectus for further details.

The Investment Manager, on behalf of the Fund, will invest using Replication Strategy as further described in the **"Investment Strategies"** section of the Prospectus, primarily in the securities of the Index, at all times in accordance with the Investment Restrictions set forth in the Prospectus. The Investment Manager also may, in exceptional circumstances, invest in securities not included in the Index but that it believes closely reflect the risk and distribution characteristics of securities of the Index. From time to time securities are added to or removed from the Index. The Investment Manager may sell securities that are represented in the Index, or purchase securities that are not yet represented in the Index, in anticipation of their removal from or addition to the Index. Where such securities remain non-Index constituents, they will be sold or transferred as soon as reasonably practicable.

The Investment Manager integrates Sustainability Risk into its investment decisions as further described in the "**ESG Integration**" sub-section of the "**ESG Investing**" section of the Prospectus.

As at the date of this Supplement the Investment Manager and/or Sub-Investment Manager consider the principal adverse impacts of its investment decisions at the Fund level in order to seek to reduce negative externalities that may be caused by its underlying investments.

This Fund promotes environmental or social characteristics in accordance with SFDR Article 8. More information about the environmental and social characteristics can be found in Annex 9.

Permitted Investments

In order to achieve its investment objective, this Fund will only invest in:

- Equities and equity related securities such as ADRs or GDRs. ADRs and GDRs are typically used instead of local shares, where owning the local shares represented in the Index is not possible or prohibitively expensive;
- Other UCITS authorised in accordance with the UCITS Directive and/or other UCIs within the meaning of Article 1(2), (a) and (b) of the UCITS Directive whether or not established in an EU Member State;
- Ancillary liquid assets, notably cash, for cash management purposes; and
- Derivatives for efficient portfolio management limited to swaps, options, futures and forward foreign exchange contracts.

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the 2010 Law and further described in the "**Investment Restrictions and Limits**" section of the Prospectus.

Securities Financing Transactions

	Expected	Maximum
Securities lending	0%-30%*	40%

*Securities lending transactions will be entered into depending on the market opportunities and in particular depending on the market demand to borrow the securities held in the Fund's portfolio at any time and the expected revenues of the transaction. Market demand depends on the specific securities and the reason borrowers enter into the transaction, such as hedging against market risk, use as collateral or to meet required liquidity standards. Market demand is also subject to volatility, seasonality, and liquidity of the underlying securities in the Fund's portfolio. Revenues vary according to the specific security and the demand to borrow them. The maximum exposure could be reached when there is high demand for many securities held in the Fund's portfolio. Investment Objective and Policy

Investment Objective: The objective of the Fund is to track the performance of the European equity markets.

Investment Policy: The investment policy of the Fund is to track the performance of the Index (or any other index determined by the Directors from time to time to track substantially the same market as the Index) as closely as possible while seeking to minimise as far as possible the tracking difference between the Fund's performance and that of the Index.

The Index measures the performance of European equities. Securities are weighted by market capitalisation after screening out securities based on an assessment of their adherence to ESG criteria as further detailed in the Index methodology and Annex 11. Please refer to the "**ESG Screening**" sub-section of the "**ESG Investing**" section of the Prospectus for further details.

The Investment Manager, on behalf of the Fund, will invest using the Replication Strategy as further described in the **"Investment Strategies"** section of the Prospectus, primarily in the securities of the Index, at all times in accordance with the Investment Restrictions set forth in the Prospectus. The Investment Manager also may, in exceptional circumstances, invest in securities not included in the Index but that it believes closely reflect the risk and distribution characteristics of securities of the Index. From time to time securities are added to or removed from the Index. The Investment Manager may sell securities that are represented in the Index, or purchase securities that are not yet represented in the Index, in anticipation of their removal from or addition to the Index. Where such securities remain non-Index constituents, they will be sold or transferred as soon as reasonably practicable.

The Investment Manager integrates Sustainability Risk into its investment decisions as further described in the "**ESG Integration**" sub-section of the "**ESG Investing**" section of the Prospectus.

As at the date of this Supplement the Investment Manager and/or Sub-Investment Manager consider the principal adverse impacts of its investment decisions at the Fund level in order to seek to reduce negative externalities that may be caused by its underlying investments.

This Fund promotes environmental or social characteristics in accordance with SFDR Article 8. More information about the environmental and social characteristics can be found in Annex 11.

Permitted Investments

In order to achieve its investment objective, this Fund will only invest in:

- Equities and equity related securities such as ADRs or GDRs. ADRs and GDRs are typically used instead of local shares, where owning the local shares represented in the Index is not possible or prohibitively expensive;
- Other UCITS authorised in accordance with the UCITS Directive and/or other UCIs within the meaning of Article 1(2), (a) and (b) of the UCITS Directive whether or not established in an EU Member State;
- Ancillary liquid assets, notably cash, for cash management purposes; and
- Derivatives for efficient portfolio management limited to swaps, options, futures and forward foreign exchange contracts.

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the 2010 Law and further described in the "**Investment Restrictions and Limits**" section of the Prospectus.

Securities Financing Transactions

	Expected	Maximum
Securities lending	0%-30%*	40%

*Securities lending transactions will be entered into depending on the market opportunities and in particular depending on the market demand to borrow the securities held in the Fund's portfolio at any time and the expected revenues of the transaction. Market demand depends on the specific securities and the reason borrowers enter into the transaction, such as hedging against market risk, use as collateral or to meet required liquidity standards. Market demand is also subject to volatility, seasonality, and liquidity of the underlying securities in the Fund's portfolio. Revenues vary according to the specific security and the demand to borrow them. The maximum exposure could be reached when there is high demand for many securities held in the Fund's portfolio. Each of these factors may vary and cannot be predicted with certainty. Securities lending transactions to be entered into exclusively aim to generate additional capital or income. As such, there is no restriction on the frequency under which the Fund may engage into such type of transactions.

Listing

All Share Classes are listed on the Euro MTF Market.

Investor Profile

The typical investors of the Fund are expected to be institutional and intermediary investors with a medium or long term horizon who want to gain exposure to the performance of European equity markets and are prepared to accept the risks associated with an investment of this type.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the **"Risk Information**" section of the Prospectus. The following are the principal risks of investing in the Fund:

Concentration Risk: When the Fund focuses its investments in a particular region, the financial, economic, business, and other developments affecting issuers in that region will have a greater effect on the Fund than if it was more diversified. This concentration may also limit the liquidity of the Fund. Investors may buy or sell substantial amounts of the Fund's shares in response to factors affecting or expected to affect a region in which the Fund focuses its investments.

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund's hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund's assets or share classes are denominated appreciates.

Equity and Equity related securities Risk: The market prices of equity and equity related securities may go up or down, sometimes rapidly or unpredictably. The value of these securities may decline for reasons that directly relate to the issuer and/or due to general industry or market, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates, or adverse investor sentiment generally. Equity markets tend to move in cycles, which may cause stock prices to fall over short or extended periods of time.

Index Tracking Risk: The Fund's return may not match the return of the Index. The Fund's ability to track the Index will be affected by Fund expenses, the amount of cash and cash equivalents held in its portfolio, and the frequency and the timing of purchases and sales of interests in the Fund. The Investment Manager may attempt to replicate the Index return by investing in a sub-set of the securities in the Index, or in some securities not included in the Index, potentially increasing the risk of divergence between the Fund's return and that of the Index.

Integrating Sustainability Risk: Integrating Sustainability Risk into the Fund's investment process does not assure the mitigation of any or all Sustainability Risk. Any deterioration in the financial profile of an underlying investment affected by a Sustainability Risk may have a corresponding negative impact on the Net Asset Value and/or performance of the investing Fund.

Screened Indices Risk: There is a risk that the index provider may make errors, such as incorrect assessment of the screen criteria and/or include incorrect/exclude correct constituents, in the screening process or amend or discontinue its screening services. In such circumstances, the Company may change the Index although there is no guarantee that a replacement Index would result in a similar screening process to that intended or would be available at all.

Securities Lending Risk: If the Fund engages in securities lending, there is a risk that the borrower may default its obligations to return equivalent securities to the loaned securities. In this way the Fund is exposed to counterparty risk. In this event, the Fund could also experience delays in recovering the securities and may incur a capital loss. The Fund could also lose money if the value of collateral held against the loaned securities falls.

SFDR – Fund Classification Risk: The SFDR has phased implementation from 10 March 2021 and imposes new disclosure obligations on financial market participants. As at the date of this Prospectus, the implementing Regulatory Technical Standards (Level 2) for SFDR have been adopted by the European Commission but certain concepts introduced by SFDR are not currently the subject of centralised implementing standards, local guidance or established market practice. The Fund has been assessed and classified in good faith based on the relevant information currently available. As these standards and guidance develop, the SFDR related disclosures and the Article 8 classification indicated in this Supplement and on the Website are subject to change and may no longer apply.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Subscriptions, Redemptions and Switches

Investors may subscribe for, redeem or switch launched Share Classes on each Dealing Day at the Subscription Price or Redemption Price as applicable. For all subscription, redemption, and switch requests, the relevant form must be received by the UCI Administrator by the Dealing Deadline. Shareholders should refer to section "**Shares**" of the Prospectus for further information.

Fees, expressed as a percentage of NAV, are accrued daily and paid monthly in arrears. Shareholders should refer to section "Fees and Expenses**" of the Prospectus for further information.

Investment Objective and Policy

Investment Objective: The objective of the Fund is to track the performance of the Pacific ex-Japan equity markets.

Investment Policy: The investment policy of the Fund is to track the performance of the Index (or any other index determined by the Directors from time to time to track substantially the same market as the Index) as closely as possible while seeking to minimise as far as possible the tracking difference between the Fund's performance and that of the Index.

The Index measures the performance of equities from Pacific ex Japan. Securities are weighted by market capitalisation after screening out securities based on an assessment of their adherence to ESG criteria as further detailed in the Index methodology and Annex 12. Please refer to the "**ESG Screening**" sub-section of the "**ESG Investing**" section of the Prospectus for further details.

The Investment Manager, on behalf of the Fund, will invest using the Replication Strategy as further described in the **"Investment Strategies"** section of the Prospectus, primarily in the securities of the Index, at all times in accordance with the Investment Restrictions set forth in the Prospectus. The Investment Manager also may, in exceptional circumstances, invest in securities not included in the Index but that it believes closely reflect the risk and distribution characteristics of securities of the Index. From time to time securities are added to or removed from the Index. The Investment Manager may sell securities that are represented in the Index, or purchase securities that are not yet represented in the Index, in anticipation of their removal from or addition to the Index. Where such securities remain non-Index constituents, they will be sold or transferred as soon as reasonably practicable.

The Investment Manager integrates Sustainability Risk into its investment decisions as further described in the "**ESG Integration**" sub-section of the "**ESG Investing**" section of the Prospectus.

As at the date of this Supplement the Investment Manager and/or Sub-Investment Manager consider the principal adverse impacts of its investment decisions at the Fund level in order to seek to reduce negative externalities that may be caused by its underlying investments.

This Fund promotes environmental or social characteristics in accordance with SFDR Article 8. More information about the environmental and social characteristics can be found in Annex 12.

Permitted Investments

In order to achieve its investment objective, this Fund will only invest in:

- Equities and equity-related securities such as ADRs or GDRs. ADRs and GDRs are typically used instead of local shares, where owning the local shares represented in the Index is not possible or prohibitively expensive;
- Other UCITS authorised in accordance with the UCITS Directive and/or other UCIs within the meaning of Article 1(2), (a) and (b) of the UCITS Directive whether or not established in an EU Member State;
- Ancillary liquid assets, notably cash, for cash management purposes; and
- Derivatives for efficient portfolio management limited to swaps, options, futures and forward foreign exchange contracts.

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the 2010 Law and further described in the "**Investment Restrictions and Limits**" section of the Prospectus.

Securities Financing Transactions

	Expected	Maximum
Securities lending	0%-30%*	40%

*Securities lending transactions will be entered into depending on the market opportunities and in particular depending on the market demand to borrow the securities held in the Fund's portfolio at any time and the expected revenues of the transaction. Market demand depends on the specific securities and the reason borrowers enter into the transaction, such as hedging against market risk, use as collateral or to meet required liquidity standards. Market demand is also subject to volatility, seasonality, and liquidity of the underlying securities in the Fund's portfolio. Revenues vary according to the specific security and the demand to borrow them. The maximum exposure could be reached when there is high demand for many securities held in the Fund's portfolio. Listing

All Share Classes are listed on the Euro MTF Market.

Investor Profile

The typical investors of the Fund are expected to be institutional and intermediary investors with a medium or long term horizon who want to gain exposure to the performance of the Pacific ex-Japan equity market and are prepared to accept the risks associated with an investment of this type.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the **"Risk Information**" section of the

Prospectus. The following are the principal risks of investing in the Fund:

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund's hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund's assets or share classes are denominated appreciates.

Equity and Equity related securities Risk: The market prices of equity and equity related securities may go up or down, sometimes rapidly or unpredictably. The value of these securities may decline for reasons that directly relate to the issuer and/or due to general industry or market, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates, or adverse investor sentiment generally. Equity markets tend to move in cycles, which may cause stock prices to fall over short or extended periods of time.

Index Tracking Risk: The Fund's return may not match the return of the Index. The Fund's ability to track the Index will be affected by Fund expenses, the amount of cash and cash equivalents held in its portfolio, and the frequency and the timing of purchases and sales of interests in the Fund. The Investment Manager may attempt to replicate the Index return by investing in a sub-set of the securities in the Index, or in some securities not included in the Index, potentially increasing the risk of divergence between the Fund's return and that of the Index.

Integrating Sustainability Risk: Integrating Sustainability Risk into the Fund's investment process does not assure the mitigation of any or all Sustainability Risk. Any deterioration in the financial profile of an underlying investment affected by a Sustainability Risk may have a corresponding negative impact on the Net Asset Value and/or performance of the investing Fund.

Screened Indices Risk: There is a risk that the index provider may make errors, such as incorrect assessment of the screen criteria and/or include incorrect/exclude correct constituents, in the screening process or amend or discontinue its screening services. In such circumstances, the Company may change the Index although there is no guarantee that a replacement Index would result in a similar screening process to that intended or would be available at all.

Securities Lending Risk: If the Fund engages in securities lending, there is a risk that the borrower may default its obligations to return equivalent securities to the loaned securities. In this way the Fund is exposed to counterparty risk. In this event, the Fund could also experience delays in recovering the securities and may incur a capital loss. The Fund could also lose money if the value of collateral held against the loaned securities falls.

SFDR – Fund Classification Risk: The SFDR has phased implementation from 10 March 2021 and imposes new disclosure obligations on financial market participants. As at the date of this Prospectus, the implementing Regulatory Technical Standards (Level 2) for SFDR have been adopted by the European Commission but certain concepts introduced by SFDR are not currently the subject of centralised implementing standards, local guidance or established market practice. The Fund has been assessed and classified in good faith based on the relevant information currently available. As these standards and guidance develop, the SFDR related disclosures and the Article 8 classification indicated in this Supplement and on the Website are subject to change and may no longer apply.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Investment Objective and Policy

Investment Objective: The objective of the Fund is to track the performance of global developed equity markets.

Investment Policy: The investment policy of the Fund is to track the performance of the Index (or any other index determined by the Directors from time to time to track substantially the same market as the Index) as closely as possible. The Investment Manager seeks to minimise as far as possible the tracking difference between the Fund's performance and that of the Index.

The Index measures the performance of global developed equity market securities, reweighting from free-float market cap weights using certain Environmental, Social and Governance (ESG) metrics to tilt the index towards securities demonstrating both a robust ESG profile and a positive trend in improving that ESG profile and integrates Sustainability Risk. Please refer to the "**ESG Screening**" and "**ESG Best in Class Investing**" sub-sections of the "**ESG Investing**" section of the Prospectus for further details.

The Investment Manager, on behalf of the Fund, will invest using the Replication Strategy as further described in the "**Investment Strategies**" section of the Prospectus, primarily in the securities of the Index, at all times in accordance with the Investment Restrictions set forth in the Prospectus. The Investment Manager also may, in exceptional circumstances, invest in securities not included in the Index but that it believes closely reflect the risk and distribution characteristics of securities of the Index. From time to time securities are added to or removed from the Index. The Investment Manager may sell securities that are represented in the Index, or purchase securities that are not yet represented in the Index, in anticipation of their removal from or addition to the Index. Where such securities remain non-Index constituents, they will be sold or transferred as soon as reasonably practicable.

The Investment Manager integrates Sustainability Risk into its investment decisions as further described in the "**ESG Integration**", sub-section of the "**ESG Investing**" section of the Prospectus.

As at the date of this Supplement the Investment Manager and/or Sub-Investment Manager consider the principal adverse impacts of its investment decisions at the Fund level in order to seek to reduce negative externalities that may be caused by its underlying investments.

This Fund promotes environmental or social characteristics in accordance with SFDR Article 8. More information about the environmental and social characteristics can be found in Annex 14.

Permitted Investments

In order to achieve its investment objective, this Fund will only invest in:

- Equities and equity-related securities such ADRs or GDRs. ADRs and GDRs are typically used instead of local shares, where owning the local shares represented in the Index is not possible or prohibitively expensive;
- Other UCITS authorised in accordance with the UCITS Directive and/or other UCIs within the meaning of Article 1(2), (a) and (b) of the UCITS Directive whether or not established in an EU Member State;
- Ancillary liquid assets, notably cash, for cash management purposes; and
- Derivatives for efficient portfolio management limited to swaps, options, futures and forward foreign exchange contracts.

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the 2010 Law and further described in the "**Investment Restrictions and Limits**" section of the Prospectus.

Securities Financing Transactions

	Expected	Maximum
Securities lending	0%-30%*	40%

*Securities lending transactions will be entered into depending on the market opportunities and in particular depending on the market demand to borrow the securities held in the Fund's portfolio at any time and the expected revenues of the transaction. Market demand depends on the specific securities and the reason borrowers enter into the transaction, such as hedging against market risk, use as collateral or to meet required liquidity standards. Market demand is also subject to volatility, seasonality, and liquidity of the underlying securities in the Fund's portfolio. Revenues vary according to the specific security and the demand to borrow them. The maximum exposure could be reached when there is high demand for many securities held in the Fund's portfolio. Each of these factors may vary and cannot be predicted with certainty. Securities lending transactions to be entered into exclusively aim to generate additional capital or income. As such, there is no restriction on the frequency under which the Fund may engage into such type of transactions.

Listing

All Share Classes are listed on the Euro MTF Market.

Investor Profile

The typical investors of the Fund are expected to be institutional and intermediary investors with a medium or long term horizon who want to gain exposure to the performance of global developed equity markets and are prepared to accept the risks associated with an investment of this type.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the **"Risk Information**" section of the Prospectus. The following are the principal risks of investing in the Fund:

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund's hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund's assets or share classes are denominated appreciates.

Equity and Equity related securities Risk: The market prices of equity and equity related securities may go up or

down, sometimes rapidly or unpredictably. The value of these securities may decline for reasons that directly relate to the issuer and/or due to general industry or market, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates, or adverse investor sentiment generally. Equity markets tend to move in cycles, which may cause stock prices to fall over short or extended periods of time.

Index Tracking Risk: The Fund's return may not match the return of the Index. The Fund's ability to track the Index will be affected by Fund expenses, the amount of cash and cash equivalents held in its portfolio, and the frequency and the timing of purchases and sales of interests in the Fund. The Investment Manager may attempt to replicate the Index return by investing in a sub-set of the securities in the Index, or in some securities not included in the Index, potentially increasing the risk of divergence between the Fund's return and that of the Index.

Integrating Sustainability Risk: Integrating Sustainability Risk into the Fund's investment process does not assure the mitigation of any or all Sustainability Risk. Any deterioration in the financial profile of an underlying investment affected by a Sustainability Risk may have a corresponding negative impact on the Net Asset Value and/or performance of the investing Fund.

Screened Indices Risk: There is a risk that the index provider may make errors, such as incorrect assessment of the screen criteria and/or include incorrect/exclude correct constituents, in the screening process or amend or discontinue its screening services. In such circumstances, the Company may change the Index although there is no guarantee that a replacement Index would result in a similar screening process to that intended or would be available at all.

Securities Lending Risk: If the Fund engages in securities lending, there is a risk that the borrower may default its obligations to return equivalent securities to the loaned securities. In this way the Fund is exposed to counterparty risk. In this event, the Fund could also experience delays in recovering the securities and may incur a capital loss. The Fund could also lose money if the value of collateral held against the loaned securities falls.

SFDR – Fund Classification Risk: The SFDR has phased implementation from 10 March 2021 and imposes new disclosure obligations on financial market participants. As at the date of this Prospectus, the implementing Regulatory Technical Standards (Level 2) for SFDR have been adopted by the European Commission but certain concepts introduced by SFDR are not currently the subject of centralised implementing standards, local guidance or established market practice. The Fund has been assessed and classified in good faith based on the relevant information currently available. As these standards and guidance develop, the SFDR related disclosures and the Article 8 classification indicated in this Supplement and on the Website are subject to change and may no longer apply.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Subscriptions, Redemptions and Switches

Investors may subscribe for, redeem or switch launched Share Classes on each Dealing Day at the Subscription Price or Redemption Price as applicable. For all subscription, redemption, and switch requests, the relevant form must be received by the UCI Administrator by the Dealing Deadline. Shareholders should refer to section "**Shares**" of the Prospectus for further information.

Investment Objective and Policy

Investment Objective: The objective of the Fund is to track the performance of global emerging market equities.

Investment Policy: The investment policy of the Fund is to track the performance of the Index (or any other index determined by the Directors from time to time to track substantially the same market as the Index) as closely as possible while seeking to minimise as far as possible the tracking difference between the Fund's performance and that of the Index.

The Index measures the performance of global emerging market equities. Securities are weighted by market capitalisation after screening out securities based on an assessment of their adherence to ESG criteria as further detailed in the Index methodology and Annex 15. Please refer to the "**ESG Screening**" sub-section of the "**ESG Investing**" section of the Prospectus for further details.

The Investment Manager, on behalf of the Fund, will invest using the Replication Strategy as further described in the **"Investment Strategies"** section of the Prospectus, primarily in the securities of the Index, at all times in accordance with the Investment Restrictions set forth in the Prospectus. The Investment Manager also may, in exceptional circumstances, invest in securities not included in the Index but that it believes closely reflect the risk and distribution characteristics of securities of the Index. From time to time securities are added to or removed from the Index. The Investment Manager may sell securities that are represented in the Index, or purchase securities that are not yet represented in the Index, in anticipation of their removal from or addition to the Index. Where such securities remain non-Index constituents, they will be sold or transferred as soon as reasonably practicable.

The Investment Manager integrates Sustainability Risk into its investment decisions as further described in the "**ESG Integration**" sub-section of the "**ESG Investing**" section of the Prospectus.

As at the date of this Supplement the Investment Manager and/or Sub-Investment Manager consider the principal adverse impacts of its investment decisions at the Fund level in order to seek to reduce negative externalities that may be caused by its underlying investments.

This Fund promotes environmental or social characteristics in accordance with SFDR Article 8. More information about the environmental and social characteristics can be found in Annex 15.

Permitted Investments

In order to achieve its investment objective, this Fund will only invest in:

- Equities and equity-related securities such as ADRs or GDRs. ADRs and GDRs are typically used instead of local shares, where owning the local shares represented in the Index is not possible or prohibitively expensive. The Fund may invest in China A Shares both via Stock Connect and RQFII regime;

- Other UCITS authorized in accordance with the UCITS Directive and/or other UCIs within the meaning of Article 1(2), (a) and (b) of the UCITS Directive whether or not established in an EU Member State;

- Ancillary liquid assets, notably cash, for cash management purposes; and

- Derivatives for efficient portfolio management limited to swaps, options, futures and forward foreign exchange contracts.

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the 2010 Law and further described in the "**Investment Restrictions and Limits**" section of the Prospectus.

Securities Financing Transactions

	Expected	Maximum
Securities lending	0%-30%*	40%

*Securities lending transactions will be entered into depending on the market opportunities and in particular depending on the market demand to borrow the securities held in the Fund's portfolio at any time and the expected revenues of the transaction. Market demand depends on the specific securities and the reason borrowers enter into the transaction, such as hedging against market risk, use as collateral or to meet required liquidity standards. Market demand is also subject to volatility, seasonality, and liquidity of the underlying securities in the Fund's portfolio. Revenues vary according to the specific security and the demand to borrow them. The maximum exposure could be reached when there is high demand for many securities held in the Fund's portfolio. Each of these factors may vary and cannot be predicted with certainty. Securities lending transactions to be entered into exclusively aim to generate additional capital or income. Listing

All Share Classes are listed on the Euro MTF Market.

Investor Profile

The typical investors of the Fund are expected to be institutional and intermediary investors with a medium or long term horizon who want to gain exposure to the performance of global emerging market equities and are prepared to accept the risks associated with an investment of this type.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the **"Risk Information**" section of the Prospectus. The following are the principal risks of investing in the Fund:

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund's hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund's assets or share classes are denominated appreciates.

Emerging Markets Risk: Risks of investing in emerging markets include, among others, greater political and economic instability, possible trade barriers, less governmental supervision and regulation, greater volatility in currency exchange rates, currency transfer restrictions or difficulties in gaining currency exposure, less developed

securities markets, legal systems and financial services industries, differences in auditing and financial reporting standards, and greater dependence on revenue from particular commodities or international aid.

Equity and Equity related securities Risk: The market prices of equity and equity related securities may go up or down, sometimes rapidly or unpredictably. The value of these securities may decline for reasons that directly relate to the issuer and/or due to general industry or market, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates, or adverse investor sentiment generally. Equity markets tend to move in cycles, which may cause stock prices to fall over short or extended periods of time.

Index Tracking Risk: The Fund's return may not match the return of the Index. The Fund's ability to track the Index will be affected by Fund expenses, the amount of cash and cash equivalents held in its portfolio, and the frequency and the timing of purchases and sales of interests in the Fund. The Investment Manager may attempt to replicate the Index return by investing in a sub-set of the securities in the Index, or in some securities not included in the Index, potentially increasing the risk of divergence between the Fund's return and that of the Index.

Integrating Sustainability Risk: Integrating Sustainability Risk into the Fund's investment process does not assure the mitigation of any or all Sustainability Risk. Any deterioration in the financial profile of an underlying investment affected by a Sustainability Risk may have a corresponding negative impact on the Net Asset Value and/or performance of the investing Fund.

PRC Investments Risk: In addition to the risks of investing in emerging markets, risks of investing in PRC Investments include, among others, trading suspensions, currency transfer/exposure restrictions, limits on holdings of PRC Investments and use of brokers, untested concepts regarding treatment of beneficial ownership, reliance on Access Programmes which may be discontinued or substantially changed, custody risks including lack of sufficient segregation of assets from those of the RQFII licence holder and Sub-Custodian and tax uncertainty.

Screened Indices Risk: There is a risk that the index provider may make errors, such as incorrect assessment of the screen criteria and/or include incorrect/exclude correct constituents, in the screening process or amend or discontinue its screening services. In such circumstances, the Company may change the Index although there is no guarantee that a replacement Index would result in a similar screening process to that intended or would be available at all.

Securities Lending Risk: If the Fund engages in securities lending, there is a risk that the borrower may default its obligations to return equivalent securities to the loaned securities. In this way the Fund is exposed to counterparty risk. In this event, the Fund could also experience delays in recovering the securities and may incur a capital loss. The Fund could also lose money if the value of collateral held against the loaned securities falls.

SFDR - Fund Classification Risk: The SFDR has phased implementation from 10 March 2021 and imposes new disclosure obligations on financial market participants. As at the date of this Prospectus, the implementing Regulatory Technical Standards (Level 2) for SFDR have been adopted by the European Commission but certain concepts introduced by SFDR are not currently the subject of centralised implementing standards, local guidance or established market practice. The Fund has been assessed and classified in good faith based on the relevant information currently available. As these standards and guidance develop, the SFDR related disclosures and the Article 8 classification indicated in this Supplement and on the Website are subject to change and may no longer apply.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

	NAV Hedged	**0.87%**	**1.01%**
	Portfolio Hedged	**0.88%**	**1.02%**

Investment Objective and Policy

Investment Objective: The objective of the Fund is to generate capital growth over the medium to long term through exposure to a broad range of asset classes.

Investment Policy: The investment policy of the Fund is to provide an investment return in excess of the performance of the one month EURIBOR rate.

The Investment Manager, on behalf of the Fund, will invest actively using the Flexible Asset Allocation Strategy as further described in the **"Investment Strategies"** section of the Prospectus, integrates Sustainability Risk into its investment decisions and may consider certain Environmental, Social and Governance (ESG) criteria when determining the asset allocation. These ESG criteria are further described in the "**ESG Investing**" section of the Prospectus. Where the Fund is directly invested in corporate bonds or money market instruments within the portfolio, the Investment Manager employs a negative and norms-based ESG screen prior to the purchase of the security and on an ongoing basis, as further described in the "**ESG Screening**" subsection of the "**ESG Investing**" section of the Prospectus and in the "Exclusion List Methodology for screened Funds in SSGA Luxemburg SICAV" document. The Fund may gain exposure to commodities through the investment in index futures contracts on commodities.

The investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities as per the Taxonomy Regulation.

Permitted Investments

In order to achieve its investment objective, this Fund will only invest in:

- Equities and equity-related securities such as ADRs) or GDRs. ADRs and GDRs are typically used instead of local shares, where owning the local shares represented in the Index is not possible or prohibitively expensive;
- Government and government-related bonds, corporate bonds;
- Other UCITS authorised in accordance with the UCITS Directive and/or other UCIs within the meaning of Article 1(2), (a) and (b) of the UCITS Directive whether or not established in an EU Member State;
- Ancillary liquid assets, notably cash, for cash management purposes; and
- Derivatives for efficient portfolio management and investment purposes, limited to swaps, options, futures and forward foreign exchange contracts.

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the 2010 Law and further described in the "**Investment Restrictions and Limits**" section of the Prospectus.

Securities Financing Transactions

	Expected	Maximum
Securities lending	0%-30%*	40%

*Securities lending transactions will be entered into depending on the market opportunities and in particular depending on the market demand to borrow the securities held in the Fund's portfolio at any time and the expected revenues of the transaction. Market demand depends on the specific securities and the reason borrowers enter into the transaction, such as hedging against market risk, use as collateral or to meet required liquidity standards. Market demand is also subject to volatility, seasonality, and liquidity of the underlying securities in the Fund's portfolio. Revenues vary according to the specific security and the demand to borrow them. The maximum exposure could be reached when there is high demand for many securities held in the Fund's portfolio. Each of these factors may vary and cannot be predicted with certainty. Securities lending transactions to be entered into exclusively aim to generate additional capital or income. As such, there is no restriction on the frequency under which the Fund may engage into such type of transactions.

Investor Profile

The typical investors of the Fund are expected to be institutional and intermediary investors with a medium or long term horizon who want to gain exposure to the performance of a broad range of asset classes and are prepared to accept the risks associated with an investment of this type.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the **"Risk Information**" section of the Prospectus. The following are the principal risks of investing in the Fund:

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund's hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund's assets or share classes are denominated appreciates.

Debt Securities Risk: The value of debt securities may change significantly depending on economic and interest rate conditions as well as the credit worthiness of the issuer. Issuers of debt securities may fail to meet payment obligations or the credit rating of debt securities may be downgraded. Returns on investments in debt securities could trail the returns on other investment options, including investments in equity securities.

Derivatives Risk: The Fund's use of derivative instruments involves risks different from, and possibly greater than, the risks associated with investing directly in securities. Derivative transactions typically involve leverage and may have significant volatility. It is possible that the derivative transaction will have a different or less favourable effect than the Investment Manager anticipated and that a derivative transaction will result in a loss greater than the principal amount invested.

Equity and Equity related Securities Risk: The market prices of equity and equity related securities may go up or down, sometimes rapidly or unpredictably. The value of these securities may decline for reasons that directly relate to the issuer and/or due to general industry or market, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in

interest or currency rates, or adverse investor sentiment generally. Equity markets tend to move in cycles, which may cause stock prices to fall over short or extended periods of time.

ESG Investing Risk: The Investment Manager's incorporation of ESG considerations in its methodology may cause the Fund to make different investments than funds that do not incorporate such considerations in their strategy or investment processes. Under certain economic conditions, this could cause the Fund's investment performance to be worse than funds that do not incorporate such considerations. The Investment Manager's incorporation of ESG considerations may affect the Fund's exposure to certain sectors and/or types of investments, and may adversely impact the Fund's performance depending on whether such sectors or investments are in or out of favor in the market. In constructing the Fund's portfolio, the Investment Manager is dependent upon information and data that may be incomplete, inaccurate or unavailable, which could cause the Investment Manager to incorrectly assess a company's and/or issuer's ESG characteristics**.**

Integrating Sustainability Risk: Integrating Sustainability Risk into the Fund's investment process does not assure the mitigation of any or all Sustainability Risk. Any deterioration in the financial profile of an underlying investment affected by a Sustainability Risk may have a corresponding negative impact on the Net Asset Value and/or performance of the investing Fund.

Liquidity Risk: Lack of a ready market or restrictions on resale may limit the ability of the Fund to sell a security at an advantageous time or price or at all. Illiquid securities may trade at a discount from comparable, more liquid investments and may be subject to wide fluctuations in market value. Illiquidity of the Fund's holdings may limit the ability of the Fund to obtain cash to meet redemptions on a timely basis.

Modelling Risk: The Investment Manager uses quantitative models in an effort to enhance returns and manage risk. Any imperfections, errors or limitations in these models or in their programming could limit any benefit to the Fund from the use of the models, or could result in incorrect outputs or in investment outcomes different from or opposite to those expected or desired by the Investment Manager. Such imperfections, errors or limitations might never be detected, or might be detected only after a Fund has sustained a loss (or reduced performance). Further, there can be no assurance that the models will behave as expected in all market conditions.

Securities Lending Risk: If the Fund engages in securities lending, there is a risk that the borrower may default its obligations to return equivalent securities to the loaned securities. In this way the Fund is exposed to counterparty risk. In this event, the Fund could also experience delays in recovering the securities and may incur a capital loss. The Fund could also lose money if the value of collateral held against the loaned securities falls.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Subscriptions, Redemptions and Switches

Investment Objective and Policy

Investment Objective: The objective of the Fund is to generate capital growth over long term through investment in European equity securities.

Investment Policy: The Investment Manager and/or Sub-Investment Manager, on behalf of the Fund, will invest actively using the Fundamental Value Equity Strategy as further described in the **"Investment Strategies"** section of the Prospectus, to build a concentrated portfolio of 30-40 securities. The investment policy will also involve screening out securities based on an assessment of their adherence to certain ESG criteria defined by the Investment Manager and further detailed in Annex 16.

The Investment Manager integrates Sustainability Risk into its investment decisions and employs a negative and norms-based ESG screen prior to the construction of the portfolio of the Fund and on an ongoing basis, as further described in the "**ESG Integration**" and "**ESG Screening**" sub-sections of the "**ESG Investing**" section of the Prospectus.

The performance of the Fund will be measured against the Index.

As at the date of this Supplement, the Investment Manager and / or Sub-Investment Manager consider the principal adverse impacts of its investment decisions at the Fund level in order to seek to reduce the negative externalities that may be caused by its underlying investments.

The Fund promotes environmental or social characteristics in accordance with SFDR Article 8. More information about the environmental and social characteristics can be found in Annex 16.

Permitted Investments

In order to achieve its investment objective, this Fund will only invest in:

- Equities and equity-related securities such ADRs or GDRs. ADRs and GDRs are typically used instead of local shares, where owning the local shares represented in the Index is not possible or prohibitively expensive;
- Other UCITS authorised in accordance with the UCITS Directive and/or other UCIs within the meaning of Article 1(2), (a) and (b) of the UCITS Directive whether or not established in an EU Member State;
- Ancillary liquid assets, notably cash, for cash management purposes; and
- Derivatives for efficient portfolio management limited to swaps, options, futures and forward foreign exchange contracts.

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the 2010 Law and further described in the "**Investment Restrictions and Limits**" section of the Prospectus.

Securities Financing Transactions

The Fund currently does not engage in the Securities Lending Programme, though it is entitled to do so. The Fund's exposure to securities lending is as set out below (as a percentage of Net Asset Value).

	Expected	Maximum
Securities lending	0%-10%*	40%

*Securities lending transactions will be entered into depending on the market opportunities and in particular depending on the market demand to borrow the securities held in the Fund's portfolio at any time and the expected revenues of the transaction. Market demand depends on the specific securities and the reason borrowers enter into the transaction, such as hedging against market risk, use as collateral or to meet required liquidity standards. Market demand is also subject to volatility, seasonality, and liquidity of the underlying securities in the Fund's portfolio. Revenues vary according to the specific security and the demand to borrow them. The maximum exposure could be reached when there is high demand for many securities held in the Fund's portfolio. Each of these factors may vary and cannot be predicted with certainty. Securities lending transactions to be entered into exclusively aim to generate additional capital or income. As such, there is no restriction on the frequency under which the Fund may engage into such type of transactions.

Investor Profile

The typical investors of the Fund are expected to be institutional and intermediary investors with a medium or long term horizon who want to gain exposure to the performance of a concentrated portfolio of European equities and are prepared to accept the risks associated with an investment of this type.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the **"Risk Information**" section of the Prospectus. The following are the principal risks of investing in the Fund:

Concentration Risk: When the Fund focuses its investments in a small number of stocks, the financial, economic, business, and other developments affecting that small number of stocks will have a greater effect on the Fund than if it was more diversified. This concentration may also limit the liquidity of the Fund. Investors may buy or sell substantial amounts of the Fund's shares in response to factors affecting or expected to affect the stocks in which the Fund focuses its investments.

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund's hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund's assets or share classes are denominated appreciates.

Equity and Equity related securities Risk: The market prices of equity and equity related securities may go up or down, sometimes rapidly or unpredictably. The value of these securities may decline for reasons that directly relate to the issuer and/or due to general industry or market, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates, or adverse investor sentiment generally. Equity markets tend to move in cycles, which may cause stock prices to fall over short or extended periods of time.

Integrating Sustainability Risk: Integrating Sustainability Risk into the Fund's investment process does not assure the mitigation of any or all Sustainability Risk. Any deterioration in the financial profile of an underlying investment affected by a Sustainability Risk may have a corresponding negative impact on the Net Asset Value and/or performance of the investing Fund.

Management Risk: The Investment Manager's and/or Sub-Investment Manager's judgment about the implementation of the investment strategy or a hedging strategy may prove to be incorrect, and may cause the Fund to incur losses. There can be no assurance that the Investment Manager and/or Sub-Investment Manager's investment techniques and decisions will produce the desired results.

Screening Risk: There is a risk that the screen provider may make errors, such as incorrect assessment of the screen criteria and/or include incorrect/exclude correct constituents in the screening process or discontinue its screening services. In such circumstances, the Company may change the screen provider although there is no guarantee that a replacement screen provided would result in a similar screening process to that intended or would be available at all.

Securities Lending Risk: If the Fund engages in securities lending, there is a risk that the borrower may default its obligations to return equivalent securities to the loaned securities. In this way the Fund is exposed to counterparty risk. In this event, the Fund could also experience delays in recovering the securities and may incur a capital loss. The Fund could also lose money if the value of collateral held against the loaned securities falls.

SFDR - Fund Classification Risk: The SFDR has phased implementation from 10 March 2021 and imposes new disclosure obligations on financial market participants. As at the date of this Prospectus, the implementing Regulatory Technical Standards (Level 2) for SFDR have been adopted by the European Commission but certain concepts introduced by SFDR are not currently the subject of centralised implementing standards, local guidance or established market practice. The Fund has been assessed and classified in good faith based on the relevant information currently available. As these standards and guidance develop, the SFDR related disclosures and the Article 8 classification indicated in this Supplement and on the Website are subject to change and may no longer apply.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager and/or Sub-Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Subscriptions, Redemptions and Switches

Investors may subscribe for, redeem or switch launched Share Classes on each Dealing Day at the Subscription Price or Redemption Price as applicable. For all subscription, redemption, and switch requests, the relevant form must be received by the UCI Administrator by the Dealing Deadline. Shareholders should refer to section "**Shares**" of the Prospectus for further information.

Index Disclaimer

Please see Appendix 1 of the Prospectus for the MSCI index disclaimer.

Investment Objective and Policy

Investment Objective: The objective of the Fund is to generate capital growth over long term through investment in Eurozone equity securities.

Investment Policy: The Investment Manager and/or Sub-Investment Manager, on behalf of the Fund, will invest actively using the Fundamental Value Equity Strategy as further described in the **"Investment Strategies"** section of the Prospectus, to build a concentrated portfolio of 30-40 securities. The investment policy will also involve screening out securities based on an assessment of their adherence to certain ESG criteria defined by the Investment Manager and further detailed in Annex 17.

The Investment Manager integrates Sustainability Risk into its investment decisions and employs a negative and norms-based ESG screen prior to the construction of the portfolio of the Fund and on an ongoing basis, as further described in the "**ESG Integration**" and "**ESG Screening**" sub-sections of the "**ESG Investing**" section of the Prospectus.

The performance of the Fund will be measured against the Index.

As at the date of this Supplement, the Investment Manager and / or Sub-Investment Manager consider the principal adverse impacts of its investment decisions at the Fund level in order to seek to reduce the negative externalities that may be caused by its underlying investments.

The Fund promotes environmental or social characteristics in accordance with SFDR Article 8. More information about the environmental and social characteristics can be found in Annex 17.

Permitted Investments

In order to achieve its investment objective, this Fund will only invest in:

- Equities and equity-related securities such as ADRs or GDRs. ADRs and GDRs are typically used instead of local shares, where owning the local shares represented in the Index is not possible or prohibitively expensive;
- Other UCITS authorized in accordance with the UCITS Directive and/or other UCIs within the meaning of Article 1(2), (a) and (b) of the UCITS Directive whether or not established in an EU Member State;
- Ancillary liquid assets, notably cash, for cash management purposes; and
- Derivatives for efficient portfolio management limited to swaps, options, futures and forward foreign exchange contracts.

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the 2010 Law and further described in the "**Investment Restrictions and Limits**" section of the Prospectus.

Securities Financing Transactions

The Fund currently does not engage in the Securities Lending Programme, though it is entitled to do so. The Fund's exposure to securities lending is as set out below (as a percentage of Net Asset Value).

	Expected	Maximum
Securities lending	0%-10%*	40%

*Securities lending transactions will be entered into depending on the market opportunities and in particular depending on the market demand to borrow the securities held in the Fund's portfolio at any time and the expected revenues of the transaction. Market demand depends on the specific securities and the reason borrowers enter into the transaction, such as hedging against market risk, use as collateral or to meet required liquidity standards. Market demand is also subject to volatility, seasonality, and liquidity of the underlying securities in the Fund's portfolio. Revenues vary according to the specific security and the demand to borrow them. The maximum exposure could be reached when there is high demand for many securities held in the Fund's portfolio. Each of these factors may vary and cannot be predicted with certainty. Securities lending transactions to be entered into exclusively aim to generate additional capital or income. As such, there is no restriction on the frequency under which the Fund may engage into such type of transactions.

Investor Profile

The typical investors of the Fund are expected to be institutional and intermediary investors with a medium or long term horizon who want to gain exposure to the performance of a concentrated portfolio of Eurozone equities and are prepared to accept the risks associated with an investment of this type.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the **"Risk Information**" section of the Prospectus. The following are the principal risks of investing in the Fund:

Concentration Risk: When the Fund focuses its investments in a small number of stocks, the financial, economic, business, and other developments affecting that small number of stocks will have a greater effect on the Fund than if it was more diversified. This concentration may also limit the liquidity of the Fund. Investors may buy or sell substantial amounts of the Fund's shares in response to factors affecting or expected to affect the stocks in which the Fund focuses its investments.

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund's hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund's assets or share classes are denominated appreciates.

Equity and Equity related securities Risk: The market prices of equity and equity related securities may go up or down, sometimes rapidly or unpredictably. The value of these securities may decline for reasons that directly relate to the issuer and/or due to general industry or market, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates, or adverse investor sentiment generally. Equity markets tend to move in cycles, which may cause stock prices to fall over short or extended periods of time.

Integrating Sustainability Risk: Integrating Sustainability Risk into the Fund's investment process does not assure the mitigation of any or all Sustainability Risk. Any deterioration in the financial profile of an underlying investment affected by a Sustainability Risk may have a corresponding negative impact on the Net Asset Value and/or performance of the investing Fund.

Management Risk: The Investment Manager's and/or Sub-Investment Manager's judgment about the implementation of the investment strategy or a hedging strategy may prove to be incorrect, and may cause the Fund to incur losses. There can be no assurance that the Investment Manager and/or Sub-Investment Manager's investment techniques and decisions will produce the desired results.

Screening Risk: There is a risk that the screen provider may make errors, such as incorrect assessment of the screen criteria and/or include incorrect/exclude correct constituents in the screening process or discontinue its screening services. In such circumstances, the Company may change the screen provider although there is no guarantee that a replacement screen provided would result in a similar screening process to that intended or would be available at all.

Securities Lending Risk: If the Fund engages in securities lending, there is a risk that the borrower may default its obligations to return equivalent securities to the loaned securities. In this way the Fund is exposed to counterparty risk. In this event, the Fund could also experience delays in recovering the securities and may incur a capital loss. The Fund could also lose money if the value of collateral held against the loaned securities falls.

SFDR - Fund Classification Risk: The SFDR has phased implementation from 10 March 2021 and imposes new disclosure obligations on financial market participants. As at the date of this Prospectus, the implementing Regulatory Technical Standards (Level 2) for SFDR have been adopted by the European Commission but certain concepts introduced by SFDR are not currently the subject of centralised implementing standards, local guidance or established market practice. The Fund has been assessed and classified in good faith based on the relevant information currently available. As these standards and guidance develop, the SFDR related disclosures and the Article 8 classification indicated in this Supplement and on the Website are subject to change and may no longer apply.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager and/or Sub-Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Subscriptions, Redemptions and Switches

Investors may subscribe for, redeem or switch launched Share Classes on each Dealing Day at the Subscription Price or Redemption Price as applicable. For all subscription, redemption, and switch requests, the relevant form must be received by the UCI Administrator by the Dealing Deadline. Shareholders should refer to section "**Shares**" of the Prospectus for further information.

Investment Objective and Policy

Investment Objective: The objective of the Fund is to generate capital growth over long term through investment in North American equity securities.

Investment Policy: The Investment Manager and/or Sub-Investment Manager, on behalf of the Fund, will invest actively using the Fundamental Value Equity Strategy as further described in the **"Investment Strategies"** section of the Prospectus, to build a concentrated portfolio of 30-40 securities. The investment policy will also involve screening out securities based on an assessment of their adherence to certain ESG criteria defined by the Investment Manager and further detailed in Annex 18.

The Investment Manager integrates Sustainability Risk into its investment decisions and employs a negative and norms-based ESG screen prior to the construction of the portfolio of the Fund and on an ongoing basis, as further described in the "**ESG Integration**" and "**ESG Screening**" sub-sections of the "**ESG Investing**" section of the Prospectus.

The performance of the Fund will be measured against the Index.

As at the date of this Supplement, the Investment Manager and / or Sub-Investment Manager consider the principal adverse impacts of its investment decisions at the Fund level in order to seek to reduce the negative externalities that may be caused by its underlying investments.

The Fund promotes environmental or social characteristics in accordance with SFDR Article 8. More information about the environmental and social characteristics can be found in Annex 18.

Permitted Investments

In order to achieve its investment objective, this Fund will only invest in:

- Equities and equity-related securities such as ADRs or GDRs. ADRs and GDRs are typically used instead of local shares, where owning the local shares represented in the Index is not possible or prohibitively expensive;
- Other UCITS authorised in accordance with the UCITS Directive and/or other UCIs within the meaning of Article 1(2), (a) and (b) of the UCITS Directive whether or not established in an EU Member State;
- Ancillary liquid assets, notably cash, for cash management purposes; and
- Derivatives for efficient portfolio management limited to swaps, options, futures and forward foreign exchange contracts.

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the 2010 Law and further described in the "**Investment Restrictions and Limits**" section of the Prospectus.

Securities Financing Transactions

The Fund currently does not engage in the Securities Lending Programme, though it is entitled to do so. The Fund's exposure to securities lending is as set out below (as a percentage of Net Asset Value).

	Expected	Maximum
Securities lending	0%-10%*	40%

*Securities lending transactions will be entered into depending on the market opportunities and in particular depending on the market demand to borrow the securities held in the Fund's portfolio at any time and the expected revenues of the transaction. Investor Profile

The typical investors of the Fund are expected to be institutional and intermediary investors with a medium or long term horizon who want to gain exposure to the performance of a concentrated portfolio of North American equities and are prepared to accept the risks associated with an investment of this type.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the **"Risk Information**" section of the Prospectus. The following are the principal risks of investing in the Fund:

Concentration Risk: When the Fund focuses its investments in a small number of stocks, the financial, economic, business, and other developments affecting that small number of stocks will have a greater effect on the Fund than if it was more diversified. This concentration may also limit the liquidity of the Fund. Investors may buy or sell substantial amounts of the Fund's shares in response to factors affecting or expected to affect the stocks in which the Fund focuses its investments.

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund's hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund's assets are denominated appreciates.

Equity and Equity related securities Risk: The market prices of equity and equity related securities may go up or down, sometimes rapidly or unpredictably. The value of these securities may decline for reasons that directly relate to the issuer and/or due to general industry or market, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates, or adverse investor sentiment generally. Equity markets tend to move in cycles, which may cause stock prices to fall over short or extended periods of time.

Integrating Sustainability Risk: Integrating Sustainability Risk into the Fund's investment process does not assure the

mitigation of any or all Sustainability Risk. Any deterioration in the financial profile of an underlying investment affected by a Sustainability Risk may have a corresponding negative impact on the Net Asset Value and/or performance of the investing Fund.

Management Risk: The Investment Manager's and/or Sub-Investment Manager's judgment about the implementation of the investment strategy or a hedging strategy may prove to be incorrect, and may cause the Fund to incur losses. There can be no assurance that the Investment Manager and/or Sub-Investment Manager's investment techniques and decisions will produce the desired results.

Screening Risk: There is a risk that the screen provider may make errors, such as incorrect assessment of the screen criteria and/or include incorrect/exclude correct constituents in the screening process or discontinue its screening services. In such circumstances, the Company may change the screen provider although there is no guarantee that a replacement screen provided would result in a similar screening process to that intended or would be available at all.

Securities Lending Risk: If the Fund engages in securities lending, there is a risk that the borrower may default its obligations to return equivalent securities to the loaned securities. In this way the Fund is exposed to counterparty risk. In this event, the Fund could also experience delays in recovering the securities and may incur a capital loss. The Fund could also lose money if the value of collateral held against the loaned securities falls.

SFDR - Fund Classification Risk: The SFDR has phased implementation from 10 March 2021 and imposes new disclosure obligations on financial market participants. As at the date of this Prospectus, the implementing Regulatory Technical Standards (Level 2) for SFDR have been adopted by the European Commission but certain concepts introduced by SFDR are not currently the subject of centralised implementing standards, local guidance or established market practice. The Fund has been assessed and classified in good faith based on the relevant information currently available. As these standards and guidance develop, the SFDR related disclosures and the Article 8 classification indicated in this Supplement and on the Website are subject to change and may no longer apply.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager and/or Sub-Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Investment Objective and Policy

Investment Objective: The objective of the Fund is to generate capital growth over long term through investment in Asia Pacific equity securities.

Investment Policy: The Investment Manager and/or Sub-Investment Manager, on behalf of the Fund, will invest actively using the Fundamental Value Equity Strategy as further described in the **"Investment Strategies"** section of the Prospectus to build a concentrated portfolio of 30-40 securities. The investment policy will also involve screening out securities based on an assessment of their adherence to certain ESG criteria defined by the Investment Manager and further detailed in Annex 19.

The Investment Manager integrates Sustainability Risk into its investment decisions and employs a negative and norms-based ESG screen prior to the construction of the portfolio of the Fund and on an ongoing basis, as further described in the "**ESG Integration**" and "**ESG Screening**" sub-sections of the "**ESG Investing**" section of the Prospectus.

The performance of the Fund will be measured against the Index.

As at the date of this Supplement, the Investment Manager and / or Sub-Investment Manager consider the principal adverse impacts of its investment decisions at the Fund level in order to seek to reduce the negative externalities that may be caused by its underlying investments.

The Fund promotes environmental or social characteristics in accordance with SFDR Article 8. More information about the environmental and social characteristics can be found in Annex 19.

Permitted Investments

In order to achieve its investment objective, this Fund will only invest in:

- Equities and equity-related securities such ADRs or GDRs. ADRs and GDRs are typically used instead of local shares, where owning the local shares represented in the Index is not possible or prohibitively expensive. The Fund may invest in China A Shares both via Stock Connect and RQFII regime;

- Other UCITS authorised in accordance with the UCITS Directive and/or other UCIs within the meaning of Article 1(2), (a) and (b) of the UCITS Directive whether or not established in an EU Member State;

- Ancillary liquid assets, notably cash, for cash management purposes; and

- Derivatives for efficient portfolio management limited to swaps, options, futures and forward foreign exchange contracts.

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the 2010 Law and further described in the "**Investment Restrictions and Limits**" section of the Prospectus.

Securities Financing Transactions

The Fund currently does not engage in the Securities Lending Programme, though it is entitled to do so. The Fund's exposure to securities lending is as set out below (as a percentage of Net Asset Value).

	Expected	Maximum
Securities lending	0%-10%*	40%

*Securities lending transactions will be entered into depending on the market opportunities and in particular depending on the market demand to borrow the securities held in the Fund's portfolio at any time and the expected revenues of the transaction. Market demand depends on the specific securities and the reason borrowers enter into the transaction, such as hedging against market risk, use as collateral or to meet required liquidity standards. Market demand is also subject to volatility, seasonality, and liquidity of the underlying securities in the Fund's portfolio. Revenues vary according to the specific security and the demand to borrow them. The maximum exposure could be reached when there is high demand for many securities held in the Fund's portfolio. Each of these factors may vary and cannot be predicted with certainty. Securities lending transactions to be entered into exclusively aim to generate additional capital or income. As such, there is no restriction on the frequency under which the Fund may engage into such type of transactions.

Investor Profile

The typical investors of the Fund are expected to be institutional and intermediary investors with a medium or long term horizon who want to gain exposure to the performance of a concentrated portfolio of Asia Pacific equities and are prepared to accept the risks associated with an investment of this type.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the **"Risk Information"** section of the Prospectus. The following are the principal risks of investing in the Fund:

Concentration Risk: When the Fund focuses its investments in a small number of stocks, the financial, economic, business, and other developments affecting that small number of stocks will have a greater effect on the Fund than if it was more diversified. This concentration may also limit the liquidity of the Fund. Investors may buy or sell substantial amounts of the Fund's shares in response to factors affecting or expected to affect the stocks in which the Fund focuses its investments.

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund's hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund's assets or share classes are denominated appreciates.

Emerging Markets Risk: Risks of investing in emerging markets include, among others, greater political and economic instability, possible trade barriers, less governmental supervision and regulation, greater volatility in currency exchange rates, currency transfer restrictions or difficulties in gaining currency exposure, less developed securities markets, legal systems and financial services industries, differences in auditing and financial reporting standards, and greater dependence on revenue from particular commodities or international aid.

Equity and Equity related securities Risk: The market prices of equity and equity related securities may go up or down, sometimes rapidly or unpredictably. The value of these securities may decline for reasons that directly relate to the issuer and/or due to general industry or market, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates, or adverse investor sentiment generally. Equity markets tend to move in cycles, which may cause stock prices to fall over short or extended periods of time.

Integrating Sustainability Risk: Integrating Sustainability Risk into the Fund's investment process does not assure the mitigation of any or all Sustainability Risk. Any deterioration in the financial profile of an underlying investment affected by a Sustainability Risk may have a corresponding negative impact on the Net Asset Value and/or performance of the investing Fund.

Management Risk: The Investment Manager's and/or Sub-Investment Manager's judgment about the implementation of the investment strategy or a hedging strategy may prove to be incorrect, and may cause the Fund to incur losses. There can be no assurance that the Investment Manager and/or Sub-Investment Manager's investment techniques and decisions will produce the desired results.

PRC Investments Risk: In addition to the risks of investing in emerging markets, risks of investing in PRC Investments include, among others, trading suspensions, currency transfer/exposure restrictions, limits on holdings of PRC Investments and use of brokers, untested concepts regarding treatment of beneficial ownership, reliance on Access Programmes which may be discontinued or substantially changed, custody risks including lack of sufficient segregation of assets from those of the RQFII licence holder and Sub-Custodian and tax uncertainty. As the Fund may have material exposure to emerging markets and PRC Investments, an investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

Screening Risk: There is a risk that the screen provider may make errors, such as incorrect assessment of the screen criteria and/or include incorrect/exclude correct constituents in the screening process or discontinue its screening services. In such circumstances, the Company may change the screen provider although there is no guarantee that a replacement screen provided would result in a similar screening process to that intended or would be available at all.

Securities Lending Risk: If the Fund engages in securities lending, there is a risk that the borrower may default its obligations to return equivalent securities to the loaned securities. In this way the Fund is exposed to counterparty risk. In this event, the Fund could also experience delays in recovering the securities and may incur a capital loss. The Fund could also lose money if the value of collateral held against the loaned securities falls.

SFDR - Fund Classification Risk: The SFDR has phased implementation from 10 March 2021 and imposes new disclosure obligations on financial market participants. As at the date of this Prospectus, the implementing Regulatory Technical Standards (Level 2) for SFDR have been adopted by the European Commission but certain concepts introduced by SFDR are not currently the subject of centralised implementing standards, local guidance or established market practice. The Fund has been assessed and classified in good faith based on the relevant information currently available. As these standards and guidance develop, the SFDR related disclosures and the Article 8 classification indicated in this Supplement and on the Website are subject to change and may no longer apply.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager and/or Sub-Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Subscriptions, Redemptions and Switches

Investors may subscribe for, redeem or switch launched Share Classes on each Dealing Day at the Subscription Price or Redemption Price as applicable. For all subscription, redemption, and switch requests, the relevant form must be received by the UCI Administrator by the Dealing Deadline. Shareholders should refer to section "**Shares**" of the Prospectus for further information.

Index Disclaimer

Please see Appendix 1 of the Prospectus for the MSCI index disclaimer.

5. State Street Global Value Spotlight Fund

Unless otherwise defined herein or unless the context otherwise requires, all defined terms used in this Supplement shall bear the same meaning as in the Prospectus. Prospective investors should review the entire Supplement, Prospectus and relevant PRIIPs KID or KIID (as applicable) carefully.

Investment Objective and Policy

Investment Objective: The objective of the Fund is to generate capital growth over long term through investment in global equity securities.

Investment Policy: The Investment Manager and/or Sub-Investment Manager, on behalf of the Fund, will invest actively using the Fundamental Value Equity Strategy as further described in the **"Investment Strategies"** section of the Prospectus to build a concentrated portfolio of 30-40 securities. The investment policy will also involve screening out securities based on an assessment of their adherence to certain ESG criteria defined by the Investment Manager and further detailed in Annex 20.

The Investment Manager integrates Sustainability Risk into its investment decisions and employs a negative and norms-based ESG screen prior to the construction of the portfolio of the Fund and on an ongoing basis, as further described in the "**ESG Integration**" and "**ESG Screening**" sub-sections of the "**ESG Investing**" section of the Prospectus.

The performance of the Fund will be measured against the Index.

As at the date of this Supplement, the Investment Manager and / or Sub-Investment Manager consider the principal adverse impacts of its investment decisions at the Fund level in order to seek to reduce the negative externalities that may be caused by its underlying investments.

The Fund promotes environmental or social characteristics in accordance with SFDR Article 8. More information about the environmental and social characteristics can be found in Annex 20.

Permitted Investments

In order to achieve its investment objective, this Fund will only invest in:

- Equities and equity-related securities such as ADRs or GDRs. ADRs and GDRs are typically used instead of local shares, where owning the local shares represented in the Index is not possible or prohibitively expensive. The Fund may invest less than 30% of its NAV in China A Shares both via Stock Connect and RQFII regime;

- Other UCITS authorised in accordance with the UCITS Directive and/or other UCIs within the meaning of Article 1(2), (a) and (b) of the UCITS Directive whether or not established in an EU Member State;

- Ancillary liquid assets, notably cash, for cash management purposes; and

- Derivatives for efficient portfolio management limited to swaps, options, futures and forward foreign exchange contracts.

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the 2010 Law and further described in the "**Investment Restrictions and Limits**" section of the Prospectus.

Securities Financing Transactions

The Fund currently does not engage in the Securities Lending Programme, though it is entitled to do so. The Fund's exposure to securities lending is as set out below (as a percentage of Net Asset Value).

	Expected	Maximum
Securities lending	0%-10%*	40%

*Securities lending transactions will be entered into depending on the market opportunities and in particular depending on the market demand to borrow the securities held in the Fund's portfolio at any time and the expected revenues of the transaction. Market demand depends on the specific securities and the reason borrowers enter into the transaction, such as hedging against market risk, use as collateral or to meet required liquidity standards. Market demand is also subject to volatility, seasonality, and liquidity of the underlying securities in the Fund's portfolio. Revenues vary according to the specific security and the demand to borrow them. The maximum exposure could be reached when there is high demand for many securities held in the Fund's portfolio. Each of these factors may vary and cannot be predicted with certainty. Securities lending transactions to be entered into exclusively aim to generate additional capital or income. As such, there is no restriction on the frequency under which the Fund may engage into such type of transactions.

Investor Profile

The typical investors of the Fund are expected to be institutional and intermediary investors with a medium or long term horizon who want to gain exposure to the performance of a concentrated portfolio of global equity securities and are prepared to accept the risks associated with an investment of this type.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the **"Risk Information**" section of the Prospectus. The following are the principal risks of investing in the Fund:

Concentration Risk: When the Fund focuses its investments in a small number of stocks, the financial, economic, business, and other developments affecting that small number of stocks will have a greater effect on the Fund than if it was more diversified. This concentration may also limit the liquidity of the Fund. Investors may buy or sell substantial amounts of the Fund's shares in response to factors affecting or expected to affect the stocks in which the Fund focuses its investments.

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund's hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund's assets or share classes are denominated appreciates.

Emerging Markets Risk: Risks of investing in emerging markets include, among others, greater political and economic instability, possible trade barriers, less governmental supervision and regulation, greater volatility in currency exchange rates, currency transfer restrictions or difficulties in gaining currency exposure, less developed securities markets, legal systems and financial services industries, differences in auditing and financial reporting

standards, and greater dependence on revenue from particular commodities or international aid.

Equity and Equity related securities Risk: The market prices of equity and equity related securities may go up or down, sometimes rapidly or unpredictably. The value of these securities may decline for reasons that directly relate to the issuer and/or due to general industry or market, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates, or adverse investor sentiment generally. Equity markets tend to move in cycles, which may cause stock prices to fall over short or extended periods of time.

Integrating Sustainability Risk: Integrating Sustainability Risk into the Fund's investment process does not assure the mitigation of any or all Sustainability Risk. Any deterioration in the financial profile of an underlying investment affected by a Sustainability Risk may have a corresponding negative impact on the Net Asset Value and/or performance of the investing Fund.

Management Risk: The Investment Manager's and/or Sub-Investment Manager's judgment about the implementation of the investment strategy or a hedging strategy may prove to be incorrect, and may cause the Fund to incur losses. There can be no assurance that the Investment Manager and/or Sub-Investment Manager's investment techniques and decisions will produce the desired results.

PRC Investments Risk: In addition to the risks of investing in emerging markets, risks of investing in PRC Investments include, among others, trading suspensions, currency transfer/exposure restrictions, limits on holdings of PRC Investments and use of brokers, untested concepts regarding treatment of beneficial ownership, reliance on Access Programmes which may be discontinued or substantially changed, custody risks including lack of sufficient segregation of assets from those of the RQFII licence holder and Sub-Custodian and tax uncertainty. As the Fund may have material exposure to emerging markets and PRC Investments, an investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

Screening Risk: There is a risk that the screen provider may make errors, such as incorrect assessment of the screen criteria and/or include incorrect/exclude correct constituents in the screening process or discontinue its screening services. In such circumstances, the Company may change the screen provider although there is no guarantee that a replacement screen provided would result in a similar screening process to that intended or would be available at all.

Securities Lending Risk: If the Fund engages in securities lending, there is a risk that the borrower may default its obligations to return equivalent securities to the loaned securities. In this way the Fund is exposed to counterparty risk. In this event, the Fund could also experience delays in recovering the securities and may incur a capital loss. The Fund could also lose money if the value of collateral held against the loaned securities falls.

SFDR - Fund Classification Risk: The SFDR has phased implementation from 10 March 2021 and imposes new disclosure obligations on financial market participants. As at the date of this Prospectus, the implementing Regulatory Technical Standards (Level 2) for SFDR have been adopted by the European Commission but certain concepts introduced by SFDR are not currently the subject of centralised implementing standards, local guidance or established market practice. The Fund has been assessed and classified in good faith based on the relevant information currently available. As these standards and guidance develop, the SFDR related disclosures and the Article 8 classification indicated in this Supplement and on the Website are subject to change and may no longer apply.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager and/or Sub-Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Subscriptions, Redemptions and Switches

Investors may subscribe for, redeem or switch launched Share Classes on each Dealing Day at the Subscription Price or Redemption Price as applicable. For all subscription, redemption, and switch requests, the relevant form must be received by the UCI Administrator by the Dealing Deadline. Shareholders should refer to section "**Shares**" of the Prospectus for further information.

Index Disclaimer

Please see Appendix 1 of the Prospectus for the MSCI index disclaimer.

Investment Objective and Policy

Investment Objective: The objective of the Fund is to generate capital growth over long term through investment in emerging market equities.

Investment Policy: The Investment Manager and/or Sub-Investment Manager, on behalf of the Fund, will invest actively using the Fundamental Opportunities Equity Strategy as further described in the **"Investment Strategies"** section of the Prospectus.

The Investment Manager integrates Sustainability Risk into its investment decisions as further described in the "**ESG Integration**" sub-section of the "**ESG Investing**" section of the Prospectus.

The performance of the Fund will be measured against the Index.

The investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities as per the Taxonomy Regulation.

Permitted Investments

In order to achieve its investment objective, this Fund will only invest in:

- Equities and equity-related securities such as American Depositary Receipts (ADRs) or Global Depositary Receipts (GDRs). ADRs and GDRs are typically used instead of local shares, where owning the local shares represented in the Index is not possible or prohibitively expensive. The Fund may invest in China A Shares both via Stock Connect and RQFII regime;

- Other UCITS authorised in accordance with the UCITS Directive and/or other UCIs within the meaning of Article 1(2), (a) and (b) of the UCITS Directive whether or not established in an EU Member State;

- Ancillary liquid assets, notably cash, for cash management purposes; and

- Derivatives for efficient portfolio management limited to swaps, options, futures and forward foreign exchange contracts.

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the 2010 Law and further described in the "**Investment Restrictions and Limits**" section of the Prospectus.

Securities Financing Transactions

The Fund currently does not engage in the Securities Lending Programme, though it is entitled to do so. The Fund's exposure to securities lending is as set out below (as a percentage of Net Asset Value).

	Expected	Maximum
Securities lending	0%-10%*	40%

*Securities lending transactions will be entered into depending on the market opportunities and in particular depending on the market demand to borrow the securities held in the Fund's portfolio at any time and the expected revenues of the transaction. Market demand depends on the specific securities and the reason borrowers enter into the transaction, such as hedging against market risk, use as collateral or to meet required liquidity standards. Market demand is also subject to volatility, seasonality, and liquidity of the underlying securities in the Fund's portfolio. Revenues vary according to the specific security and the demand to borrow them. The maximum exposure could be reached when there is high demand for many securities held in the Fund's portfolio. Each of these factors may vary and cannot be predicted with certainty. Securities lending transactions to be entered into exclusively aim to generate additional capital or income. As such, there is no restriction on the frequency under which the Fund may engage into such type of transactions.

Investor Profile

The typical investors of the Fund are expected to be institutional and intermediary investors with a medium or long term horizon who want to gain exposure to the performance of emerging market equities and are prepared to accept the risks associated with an investment of this type.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the **"Risk Information**" section of the Prospectus. The following are the principal risks of investing in the Fund:

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund's hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund's assets or share classes are denominated appreciates.

Emerging Markets Risk: Risks of investing in emerging markets include, among others, greater political and economic instability, possible trade barriers, less governmental supervision and regulation, greater volatility in currency exchange rates, currency transfer restrictions or difficulties in gaining currency exposure, less developed securities markets, legal systems and financial services industries, differences in auditing and financial reporting standards, and greater dependence on revenue from particular commodities or international aid.

Equity and Equity related securities Risk: The market prices of equity and equity related securities may go up or down, sometimes rapidly or unpredictably. The value of these securities may decline for reasons that directly relate to the issuer and/or due to general industry or market, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates, or adverse investor sentiment generally. Equity markets tend to move in cycles, which may cause stock prices to fall over short or extended periods of time.

Integrating Sustainability Risk: Integrating Sustainability Risk into the Fund's investment process does not assure the mitigation of any or all Sustainability Risk. Any deterioration in the financial profile of an underlying investment affected by a Sustainability Risk may have a corresponding negative impact on the Net Asset Value and/or performance of the investing Fund.

Management Risk: The Investment Manager's and/or Sub-Investment Manager's judgment about the implementation of the investment strategy or a hedging strategy may prove to be incorrect, and may cause the Fund to incur losses. There can be no assurance that the Investment Manager

and/or Sub-Investment Manager's investment techniques and decisions will produce the desired results.

PRC Investments Risk: In addition to the risks of investing in emerging markets, risks of investing in PRC Investments include, among others, trading suspensions, currency transfer/exposure restrictions, limits on holdings of PRC Investments and use of brokers, untested concepts regarding treatment of beneficial ownership, reliance on Access Programmes which may be discontinued or substantially changed, custody risks including lack of sufficient segregation of assets from those of the RQFII licence holder and Sub-Custodian and tax uncertainty. As the Fund has material exposure to emerging markets and PRC Investments, an investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

Securities Lending Risk: If the Fund engages in securities lending, there is a risk that the borrower may default its obligations to return equivalent securities to the loaned securities. In this way the Fund is exposed to counterparty risk. In this event, the Fund could also experience delays in recovering the securities and may incur a capital loss. The Fund could also lose money if the value of collateral held against the loaned securities falls.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager and/or Sub-Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Subscriptions, Redemptions and Switches

Investors may subscribe for, redeem or switch launched Share Classes on each Dealing Day at the Subscription Price or Redemption Price as applicable. For all subscription, redemption, and switch requests, the relevant form must be received by the UCI Administrator by the Dealing Deadline. Shareholders should refer to section "**Shares**" of the Prospectus for further information.

Index Disclaimer

Please see Appendix 1 of the Prospectus for the MSCI Index disclaimer.

Investment Objective and Policy

Investment Objective: The objective of the Fund is to generate capital growth over long term through investment in global equity securities.

Investment Policy: The Investment Manager and/or Sub-Investment Manager, on behalf of the Fund, will invest actively using the Global Climate Transition Equity Strategy as further described in the "Investment Strategies" section of the Prospectus to build a concentrated portfolio of 30-40 securities by evaluating an investee company's climate positioning and transition plan while screening out securities based on an assessment of their adherence to certain ESG criteria as defined by the Investment Manager and further detailed in Annex 21.

The Investment Manager integrates Sustainability Risk into its investment decisions and employs a negative and norms-based ESG screen prior to the construction of the portfolio of the Fund and on an ongoing basis, as further described in the "**ESG Integration**", "**Thematic ESG Investing**" and "**ESG Screening**" sub-sections of the "**ESG Investing**" section of the Prospectus.

As at the date of this Supplement the Investment Manager and / or Sub-Investment Manager consider the principal adverse impacts of its investment decisions at the Fund level in order to seek to reduce negative externalities that may be caused by its underlying investments.

This Fund promotes environmental or social characteristics in accordance with SFDR Article 8. More information about the environmental and social characteristics can be found in Annex 21.

Permitted Investments

In order to achieve its investment objective, this Fund will only invest in:

- Equities and equity-related securities such as ADRs or GDRs. ADRs and GDRs are typically used instead of local shares, where owning the local shares represented in the Index is not possible or prohibitively expensive. The Fund may invest in China A Shares both via Stock Connect and RQFII regime;

- Other UCITS authorized in accordance with the UCITS Directive and/or other UCIs within the meaning of Article 1(2), (a) and (b) of the UCITS Directive whether or not established in an EU Member State;

- Ancillary liquid assets, notably cash, for cash management purposes; and

- Derivatives for efficient portfolio management limited to swaps, options, futures and forward foreign exchange contracts.

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the 2010 Law and further described in the "**Investment Restrictions and Limits**" section of the Prospectus.

Securities Financing Transactions

The Fund currently does not engage in the Securities Lending Programme, though it is entitled to do so. The Fund's exposure to securities lending is as set out below (as a percentage of Net Asset Value).

	Expected	Maximum
Securities lending	0%-10%*	40%

*Securities lending transactions will be entered into depending on the market opportunities and in particular depending on the market demand to borrow the securities held in the Fund's portfolio at any time and the expected revenues of the transaction. Market demand depends on the specific securities and the reason borrowers enter into the transaction, such as hedging against market risk, use as collateral or to meet required liquidity standards. Market demand is also subject to volatility, seasonality, and liquidity of the underlying securities in the Fund's portfolio. Revenues vary according to the specific security and the demand to borrow them. The maximum exposure could be reached when there is high demand for many securities held in the Fund's portfolio. Each of these factors may vary and cannot be predicted with certainty. Securities lending transactions to be entered into exclusively aim to generate additional capital or income. As such, there is no restriction on the frequency under which the Fund may engage into such type of transactions.

Investor Profile

The typical investors of the Fund are expected to be institutional and intermediary investors with a medium or long term horizon who want to gain exposure to the performance of the global equity market and are prepared to accept the risks associated with an investment of this type.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the **"Risk Information**" section of the Prospectus. The following are the principal risks of investing in the Fund:

Concentration Risk: When the Fund focuses its investments in a small number of stocks, the financial, economic, business, and other developments affecting that small number of stocks will have a greater effect on the Fund than if it was more diversified. This concentration may also limit the liquidity of the Fund. Investors may buy or sell substantial amounts of the Fund's shares in response to factors affecting or expected to affect the stocks in which the Fund focuses its investments.

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund's hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund's assets or share classes are denominated appreciates.

Emerging Markets Risk: Risks of investing in emerging markets include, among others, greater political and economic instability, possible trade barriers, less governmental supervision and regulation, greater volatility in currency exchange rates, currency transfer restrictions or

difficulties in gaining currency exposure, less developed securities markets, legal systems and financial services industries, differences in auditing and financial reporting standards, and greater dependence on revenue from particular commodities or international aid.

Equity and Equity related securities Risk: The market prices of equity and equity related securities may go up or down, sometimes rapidly or unpredictably. The value of these securities may decline for reasons that directly relate to the issuer and/or due to general industry or market, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates, or adverse investor sentiment generally. Equity markets tend to move in cycles, which may cause stock prices to fall over short or extended periods of time.

ESG Risk: If the Fund invests in companies taking into account environmental, social and corporate governance (ESG) criteria, then the performance of the Fund may trail the returns of a portfolio of securities that includes companies that are not excluded as a result of such ESG criteria. Investing only in a portfolio of securities that are not excluded as a result of such ESG criteria may affect the Fund's exposure to certain types of investments and may adversely impact the Fund's performance.

Integrating Sustainability Risk: Integrating Sustainability Risk into the Fund's investment process does not assure the mitigation of any or all Sustainability Risk. Any deterioration in the financial profile of an underlying investment affected by a Sustainability Risk may have a corresponding negative impact on the Net Asset Value and/or performance of the investing Fund.

Management Risk: The Investment Manager's and/or Sub-Investment Manager's judgment about the implementation of the investment strategy or a hedging strategy may prove to be incorrect, and may cause the Fund to incur losses. There can be no assurance that the Investment Manager and/or Sub-Investment Manager's investment techniques and decisions will produce the desired results.

Screening Risk: There is a risk that the screen provider may make errors, such as incorrect assessment of the screen criteria and/or include incorrect/exclude correct constituents in the screening process or discontinue its screening services. In such circumstances, the Company may change the screen provider although there is no guarantee that a replacement screen provided would result in a similar screening process to that intended or would be available at all.

PRC Investments Risk: In addition to the risks of investing in emerging markets, risks of investing in PRC Investments include, among others, trading suspensions, currency transfer/exposure restrictions, limits on holdings of PRC Investments and use of brokers, untested concepts regarding treatment of beneficial ownership, reliance on Access Programmes which may be discontinued or substantially changed, custody risks including lack of sufficient segregation of assets from those of the RQFII licence holder and Sub-Custodian and tax uncertainty. As the Fund has material exposure to emerging markets and PRC Investments, an investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

Securities Lending Risk: If the Fund engages in securities lending, there is a risk that the borrower may default its obligations to return equivalent securities to the loaned securities. In this way the Fund is exposed to counterparty risk. In this event, the Fund could also experience delays in recovering the securities and may incur a capital loss. The Fund could also lose money if the value of collateral held against the loaned securities falls.

SFDR - Fund Classification Risk: The SFDR has phased implementation from 10 March 2021 and imposes new disclosure obligations on financial market participants. As at the date of this Prospectus, the implementing Regulatory Technical Standards (Level 2) for SFDR have been adopted by the European Commission and certain concepts introduced by SFDR are not currently the subject of centralised implementing standards, local guidance or established market practice. The Fund has been assessed and classified in good faith based on the relevant information currently available. As these standards and guidance develop, the SFDR related disclosures and the Article 9 classification indicated in this Supplement and on the Website are subject to change and may no longer apply.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager and/or Sub-Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Subscriptions, Redemptions and Switches

Investors may subscribe for, redeem or switch launched Share Classes on each Dealing Day at the Subscription Price or Redemption Price as applicable. For all subscription, redemption, and switch requests, the relevant form must be received by the UCI Administrator by the Dealing Deadline. Shareholders should refer to section "**Shares**" of the Prospectus for further information.

Investment Objective and Policy

Investment Objective: The objective of the Fund is to provide a return in excess of the performance of global equity securities.

Investment Policy: The investment policy of the Fund is to generate a return in excess of the performance of the Index (or any other index determined by the Directors from time to time to track substantially the same market as the Index) over the long term. The Investment Manager integrates Sustainability Risk while screening out securities based on an assessment of their adherence to certain ESG criteria defined by the Investment Manager and further detailed in Annex 22. Please refer to the "**ESG Screening**" and "**ESG Best in Class Investing**" sub-sections of the "**ESG Investing**" section of the Prospectus for further details.

The Investment Manager, on behalf of the Fund, will invest actively using the Multi-Factor Equity Strategy as further described in the **"Investment Strategies"** section of the Prospectus. The Investment Manager integrates Sustainability Risk into its investment decisions as further described in the "**ESG Integration**" sub-section of the "**ESG Investing**" section of the Prospectus.

As at the date of this Supplement the Investment Manager and/or Sub-Investment Manager consider the principal adverse impacts of its investment decisions at the Fund level in order to seek to reduce negative externalities that may be caused by its underlying investments.

This Fund promotes environmental or social characteristics in accordance with SFDR Article 8. More information about the environmental and social characteristics can be found in Annex 22.

Permitted Investments

In order to achieve its investment objective, this Fund will only invest in:

- Equities and equity-related securities such as ADRs or GDRs. ADRs and GDRs are typically used instead of local shares, where owning the local shares represented in the Index is not possible or prohibitively expensive;
- Other UCITS authorised in accordance with the UCITS Directive and/or other UCIs within the meaning of Article 1(2), (a) and (b) of the UCITS Directive whether or not established in an EU Member State;
- Ancillary liquid assets, notably cash, for cash management purposes; and
- Derivatives for efficient portfolio management and investment purposes, limited to swaps, options, futures and forward foreign exchange contracts.

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the 2010 Law and further described in the "**Investment Restrictions and Limits**" section of the Prospectus.

Securities Financing Transactions

	Expected	Maximum
Securities lending	0%-30%*	40%

*Securities lending transactions will be entered into depending on the market opportunities and in particular depending on the market demand to borrow the securities held in the Fund's portfolio at any time and the expected revenues of the transaction. Market demand depends on the specific securities and the reason borrowers enter into the transaction, such as hedging against market risk, use as collateral or to meet required liquidity standards. Market demand is also subject to volatility, seasonality, and liquidity of the underlying securities in the Fund's portfolio. Revenues vary according to the specific security and the demand to borrow them. The maximum exposure could be reached when there is high demand for many securities held in the Fund's portfolio. Each of these factors may vary and cannot be predicted with certainty. Securities lending transactions to be entered into exclusively aim to generate additional capital or income. As such, there is no restriction on the frequency under which the Fund may engage into such type of transactions.

Investor Profile

The typical investors of the Fund are expected to be institutional and intermediary investors with a medium or long term horizon who want to gain exposure to the performance of the global equity markets and are prepared to accept the risks associated with an investment of this type.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the **"Risk Information**" section of the Prospectus. The following are the principal risks of investing in the Fund:

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund's hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund's assets or share classes are denominated appreciates.

Equity and Equity related Securities Risk: The market prices of equity and equity related securities may go up or down, sometimes rapidly or unpredictably. The value of these securities may decline for reasons that directly relate to the issuer and/or due to general industry or market, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates, or adverse investor sentiment generally. Equity markets tend to move in cycles, which may cause stock prices to fall over short or extended periods of time.

Integrating Sustainability Risk: Integrating Sustainability Risk into the Fund's investment process does not assure the mitigation of any or all Sustainability Risk. Any deterioration in the financial profile of an underlying investment affected by a Sustainability Risk may have a corresponding negative impact on the Net Asset Value and/or performance of the investing Fund.

Modelling Risk: The Investment Manager uses quantitative models in an effort to enhance returns and manage risk. Any imperfections, errors or limitations in these models or in their programming could limit any benefit to the Fund from the use of the models, or could result in incorrect outputs or in investment outcomes different from or opposite to those expected or desired by the Investment Manager. Such imperfections, errors or limitations might never be detected, or might be detected only after a Fund has sustained a loss (or reduced performance). Further, there can be no assurance that the models will behave as expected in all market conditions.

Screening Risk: There is a risk that the screen provider may make errors, such as incorrect assessment of the screen criteria and/or include incorrect/exclude correct constituents in the screening process or discontinue its screening services. In such circumstances, the Company may change the screen provider although there is no guarantee that a replacement screen provided would result in a similar screening process to that intended or would be available at all.

Securities Lending Risk: If the Fund engages in securities lending, there is a risk that the borrower may default its obligations to return equivalent securities to the loaned securities. In this way the Fund is exposed to counterparty risk. In this event, the Fund could also experience delays in recovering the securities and may incur a capital loss. The Fund could also lose money if the value of collateral held against the loaned securities falls.

SFDR – Fund Classification Risk: The SFDR has phased implementation from 10 March 2021 and imposes new disclosure obligations on financial market participants. As at the date of this Prospectus, the implementing Regulatory Technical Standards (Level 2) for SFDR have been adopted by the European Commission but certain concepts introduced by SFDR are not currently the subject of centralised implementing standards, local guidance or established market practice. The Fund has been assessed and classified in good faith based on the relevant information currently available. As these standards and guidance develop, the SFDR related disclosures and the Article 8 classification indicated in this Supplement and on the Website are subject to change and may no longer apply.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Subscriptions, Redemptions and Switches

Investors may subscribe for, redeem or switch launched Share Classes on each Dealing Day at the Subscription Price or Redemption Price as applicable. Investment Objective and Policy

Investment Objective: The objective of the Fund is to provide a return in excess of the performance of European equity markets.

Investment Policy: The investment policy of the Fund is to outperform the Index (or any other index determined by the Directors from time to time to represent substantially the same market as the Index) over the medium and long term. The investment policy will also involve screening out securities based on an assessment of their adherence to certain ESG criteria defined by the Investment Manager and further detailed in Annex 23.

The Investment Manager, on behalf of the Fund, will invest actively with limited risk parameters relative to the Index, using the Quantitative Equity Strategy as further described in the **"Investment Strategies"** section of the Prospectus. The Investment Manager integrates Sustainability Risk into its investment decisions and employs a negative and norms-based ESG screen prior to the construction of the portfolio of the Fund and on an ongoing basis, as further described in the "**ESG Integration**" and "**ESG Screening**" subsections, respectively, of the "**ESG Investing**" section of the Prospectus.

As at the date of this Supplement the Investment Manager and/or Sub-Investment Manager consider the principal adverse impacts of its investment decisions at the Fund level in order to seek to reduce negative externalities that may be caused by its underlying investments.

This Fund promotes environmental or social characteristics in accordance with SFDR Article 8. More information about the environmental and social characteristics can be found in Annex 23.

Permitted Investments

In order to achieve its investment objective, this Fund will only invest in:

- Equities and equity-related securities such as ADRs or GDRs. ADRs and GDRs are typically used instead of local shares, where owning the local shares represented in the Index is not possible or prohibitively expensive;
- Other UCITS authorised in accordance with the UCITS Directive and/or other UCIs within the meaning of Article 1(2), (a) and (b) of the UCITS Directive whether or not established in an EU Member State;
- Ancillary liquid assets, notably cash, for cash management purposes; and
- Derivatives for efficient portfolio management and investment purposes, limited to futures and forward foreign exchange contracts.

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the 2010 Law and further described in the "**Investment Restrictions and Limits**" section of the Prospectus.

Securities Financing Transactions

	Expected	Maximum
Securities lending	0%-30%*	40%

*Securities lending transactions will be entered into depending on the market opportunities and in particular depending on the market demand to borrow the securities held in the Fund's portfolio at any time and the expected revenues of the transaction. Market demand depends on the specific securities and the reason borrowers enter into the transaction, such as hedging against market risk, use as collateral or to meet required liquidity standards. Market demand is also subject to volatility, seasonality, and liquidity of the underlying securities in the Fund's portfolio. Revenues vary according to the specific security and the demand to borrow them. The maximum exposure could be reached when there is high demand for many securities held in the Fund's portfolio. Each of these factors may vary and cannot be predicted with certainty. Securities lending transactions to be entered into exclusively aim to generate additional capital or income. As such, there is no restriction on the frequency under which the Fund may engage into such type of transactions.

Listing

Once launched, all UCITS ETF Share Classes will be listed on Borsa Italiana and SIX Swiss Exchange, further details of which will be available on the Website.

Investor Profile

The typical investors of the Fund are expected to be institutional, intermediary and retail investors with a medium or long term horizon who want to gain exposure to the performance of the European equity markets and are prepared to accept the risks associated with an investment of this type.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the **"Risk Information**" section of the Prospectus. The following are the principal risks of investing in the Fund:

Concentration Risk: When the Fund focuses its investments in a particular region, the financial, economic, business, and other developments affecting issuers in that region will have a greater effect on the Fund than if it was more diversified. This concentration may also limit the liquidity of the Fund. Investors may buy or sell substantial amounts of the Fund's shares in response to factors affecting or expected to affect a region in which the Fund focuses its investments.

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund's hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund's assets or share classes are denominated appreciates.

Equity and Equity related securities Risk: The market prices of equity and equity related securities may go up or down, sometimes rapidly or unpredictably. The value of these securities may decline for reasons that directly relate to the issuer and/or due to general industry or market, such

as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates, or adverse investor sentiment generally. Equity markets tend to move in cycles, which may cause stock prices to fall over short or extended periods of time.

Integrating Sustainability Risk: Integrating Sustainability Risk into the Fund's investment process does not assure the mitigation of any or all Sustainability Risk. Any deterioration in the financial profile of an underlying investment affected by a Sustainability Risk may have a corresponding negative impact on the Net Asset Value and/or performance of the investing Fund.

Modelling Risk: The Investment Manager uses quantitative models in an effort to enhance returns and manage risk. Any imperfections, errors or limitations in these models or in their programming could limit any benefit to the Fund from the use of the models, or could result in incorrect outputs or in investment outcomes different from or opposite to those expected or desired by the Investment Manager. Such imperfections, errors or limitations might never be detected, or might be detected only after a Fund has sustained a loss (or reduced performance). Further, there can be no assurance that the models will behave as expected in all market conditions.

Screening Risk: There is a risk that the screen provider may make errors, such as incorrect assessment of the screen criteria and/or include incorrect/exclude correct constituents in the screening process or discontinue its screening services. In such circumstances, the Company may change the screen provider although there is no guarantee that a replacement screen provided would result in a similar screening process to that intended or would be available at all.

Securities Lending Risk: If the Fund engages in securities lending, there is a risk that the borrower may default its obligations to return equivalent securities to the loaned securities. In this way the Fund is exposed to counterparty risk. In this event, the Fund could also experience delays in recovering the securities and may incur a capital loss. The Fund could also lose money if the value of collateral held against the loaned securities falls.

SFDR - Fund Classification Risk: The SFDR has phased implementation from 10 March 2021 and imposes new disclosure obligations on financial market participants. As at the date of this Prospectus, the implementing Regulatory Technical Standards (Level 2) for SFDR have been adopted by the European Commission but certain concepts introduced by SFDR are not currently the subject of centralised implementing standards, local guidance or established market practice. The Fund has been assessed and classified in good faith based on the relevant information currently available. As these standards and guidance develop, the SFDR related disclosures and the Article 8 classification indicated in this Supplement and on the Website are subject to change and may no longer apply.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Liquidity Risk & ETF Liquidity Risk: Lack of a ready market or restrictions on resale may limit the ability of the Fund to sell a security at an advantageous time or price or at all. Illiquid securities may trade at a discount from comparable, more liquid investments and may be subject to wide fluctuations in market value. Illiquidity of the Fund's holdings may limit the ability of the Fund to obtain cash to meet redemptions on a timely basis. Where the Fund invests in illiquid securities or does not trade in large volumes, the bid offer spreads of the Fund may widen, the Fund may be exposed to increased valuation risk and reduced ability to trade. Shares in the Fund may also trade at prices that are materially different to the last available NAV.

Subscriptions, Redemptions and Switches

Investors may subscribe for, redeem or switch launched Share Classes on each Dealing Day at the Subscription Price or Redemption Price as applicable. For all subscription, redemption, and switch requests, the relevant form must be received by the UCI Administrator by the Dealing Deadline. Shareholders should refer to section "**Shares**" of the Prospectus for further information.

The switch of the Non-ETF Shares into ETF Shares and vice versa is not permitted.

Switches of all or part of an investor's holdings from one Share Class of a Fund into Shares of another Class of the same Fund are permitted provided that the Shareholder is eligible to invest in the requested Class.

Investment Objective and Policy

Investment Objective: The objective of the Fund is to provide a return in excess of the performance of global developed equity markets.

Investment Policy: The investment policy of the Fund is to outperform the Index (or any other index determined by the Directors from time to time to represent substantially the same market as the Index) over the medium and long term. The investment policy will also involve screening out securities based on an assessment of their adherence to certain ESG criteria defined by the Investment Manager and further detailed in Annex 24.

The Investment Manager, on behalf of the Fund, will invest actively with limited risk parameters relative to the Index, using the Quantitative Equity Strategy as further described in the **"Investment Strategies"** section of the Prospectus. The Investment Manager integrates Sustainability Risk into its investment decisions and employs a negative and norms-based ESG screen prior to the construction of the portfolio of the Fund and on an ongoing basis, as further described in the "**ESG Integration**" and "**ESG Screening**" subsections, respectively, of the "**ESG Investing**" section of the Prospectus.

As at the date of this Supplement the Investment Manager and/or Sub-Investment Manager consider the principal adverse impacts of its investment decisions at the Fund level in order to seek to reduce negative externalities that may be caused by its underlying investments.

This Fund promotes environmental or social characteristics in accordance with SFDR Article 8. More information about the environmental and social characteristics can be found in Annex 24.

Permitted Investments

In order to achieve its investment objective, this Fund will only invest in:

- Equities and equity-related securities such as ADRs or GDRs. ADRs and GDRs are typically used instead of local shares, where owning the local shares represented in the Index is not possible or prohibitively expensive;
- Other UCITS authorised in accordance with the UCITS Directive and/or other UCIs within the meaning of Article 1(2), (a) and (b) of the UCITS Directive whether or not established in an EU Member State;
- Ancillary liquid assets, notably cash, for cash management purposes; and
- Derivatives for efficient portfolio management and investment purposes, limited to futures and forward foreign exchange contracts

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the 2010 Law and further described in the "**Investment Restrictions and Limits**" section of the Prospectus.

Securities Financing Transactions

	Expected	Maximum
Securities lending	0%-30%*	40%

*Securities lending transactions will be entered into depending on the market opportunities and in particular depending on the market demand to borrow the securities held in the Fund's portfolio at any time and the expected revenues of the transaction. Market demand depends on the specific securities and the reason borrowers enter into the transaction, such as hedging against market risk, use as collateral or to meet required liquidity standards. Market demand is also subject to volatility, seasonality, and liquidity of the underlying securities in the Fund's portfolio. Revenues vary according to the specific security and the demand to borrow them. The maximum exposure could be reached when there is high demand for many securities held in the Fund's portfolio. Each of these factors may vary and cannot be predicted with certainty. Securities lending transactions to be entered into exclusively aim to generate additional capital or income. As such, there is no restriction on the frequency under which the Fund may engage into such type of transactions.

Listing

Once launched, all UCITS ETF Share Classes will be listed on Borsa Italiana and SIX Swiss Exchange, further details of which will be available on the Website.

Investor Profile

The typical investors of the Fund are expected to be institutional, intermediary and retail investors with a medium or long term horizon who want to gain exposure to the performance of global developed equity markets and are prepared to accept the risks associated with an investment of this type.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the **"Risk Information**" section of the Prospectus. The following are the principal risks of investing in the Fund:

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund's hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund's assets or share classes are denominated appreciates.

Equity and Equity related securities Risk: The market prices of equity and equity related securities may go up or down, sometimes rapidly or unpredictably. The value of these securities may decline for reasons that directly relate to the issuer and/or due to general industry or market, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates, or adverse investor sentiment generally. Equity markets tend to move in cycles, which may cause stock prices to fall over short or extended periods of time.

Integrating Sustainability Risk: Integrating Sustainability Risk into the Fund's investment process does not assure the

mitigation of any or all Sustainability Risk. Any deterioration in the financial profile of an underlying investment affected by a Sustainability Risk may have a corresponding negative impact on the Net Asset Value and/or performance of the investing Fund.

Modelling Risk: The Investment Manager uses quantitative models in an effort to enhance returns and manage risk. Any imperfections, errors or limitations in these models or in their programming could limit any benefit to the Fund from the use of the models, or could result in incorrect outputs or in investment outcomes different from or opposite to those expected or desired by the Investment Manager. Such imperfections, errors or limitations might never be detected, or might be detected only after a Fund has sustained a loss (or reduced performance). Further, there can be no assurance that the models will behave as expected in all market conditions.

Screening Risk: There is a risk that the screen provider may make errors, such as incorrect assessment of the screen criteria and/or include incorrect/exclude correct constituents in the screening process or discontinue its screening services. In such circumstances, the Company may change the screen provider although there is no guarantee that a replacement screen provided would result in a similar screening process to that intended or would be available at all.

Securities Lending Risk: If the Fund engages in securities lending, there is a risk that the borrower may default its obligations to return equivalent securities to the loaned securities. In this way the Fund is exposed to counterparty risk. In this event, the Fund could also experience delays in recovering the securities and may incur a capital loss. The Fund could also lose money if the value of collateral held against the loaned securities falls.

SFDR - Fund Classification Risk: The SFDR has phased implementation from 10 March 2021 and imposes new disclosure obligations on financial market participants. As at the date of this Prospectus, the implementing Regulatory Technical Standards (Level 2) for SFDR have been adopted by the European Commission but certain concepts introduced by SFDR are not currently the subject of centralised implementing standards, local guidance or established market practice. The Fund has been assessed and classified in good faith based on the relevant information currently available. As these standards and guidance develop, the SFDR related disclosures and the Article 8 classification indicated in this Supplement and on the Website are subject to change and may no longer apply.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Liquidity Risk & ETF Liquidity Risk: Lack of a ready market or restrictions on resale may limit the ability of the Fund to sell a security at an advantageous time or price or at all. Illiquid securities may trade at a discount from comparable, more liquid investments and may be subject to wide fluctuations in market value. Illiquidity of the Fund's holdings may limit the ability of the Fund to obtain cash to meet redemptions on a timely basis. Where the Fund invests in illiquid securities or does not trade in large volumes, the bid offer spreads of the Fund may widen, the Fund may be exposed to increased valuation risk and reduced ability to trade. Shares in the Fund may also trade at prices that are materially different to the last available NAV.

Subscriptions, Redemptions and Switches

Investors may subscribe for, redeem or switch launched Share Classes on each Dealing Day at the Subscription Price or Redemption Price as applicable. For all subscription, redemption, and switch requests, the relevant form must be received by the UCI Administrator by the Dealing Deadline. Shareholders should refer to section "**Shares**" of the Prospectus for further information.

The switch of the Non-ETF Shares into ETF Shares and vice versa is not permitted.

Switches of all or part of an investor's holdings from one Share Class of a Fund into Shares of another Class of the same Fund are permitted provided that the Shareholder is eligible to invest in the requested Class.

Index Disclaimer

Please see Appendix 1 of the Prospectus for the MSCI index disclaimer.

Investment Objective and Policy

Investment Objective: The objective of the Fund is to provide a return in excess of the performance of emerging market equities.

Investment Policy: The investment policy of the Fund is to outperform the Index (or any other index determined by the Directors from time to time to represent substantially the same market as the Index) over the medium and long term while investing in companies which exhibit lower carbon emissions in the way of current emissions and future emissions (measured by fossil fuel reserves), produce green revenues, and are better positioned for the physical risks posed by climate change and screening out securities based on an assessment of their adherence to certain ESG criteria defined by the Investment Manager and further detailed in Annex 25.

The Investment Manager and/or the Sub-Investment Manager, on behalf of the Fund, will invest actively with limited risk parameters relative to the Index, using the Climate Transition Quantitative Equity Enhanced Strategy as further described in the **"Investment Strategies"** section of the Prospectus. The Investment Manager integrates Sustainability Risk into its investment decisions and employs both Thematic ESG Investing and employs a negative and norms-based ESG screen prior to the construction of the portfolio of the Fund and on an ongoing basis, as further described in the "**ESG Integration**", "**Thematic ESG Investing**" and "**ESG Screening**" subsection, respectively, of the "**ESG Investing**" section of the Prospectus.

As at the date of this Supplement the Investment Manager and/or Sub-Investment Manager consider the principal adverse impacts of its investment decisions at the Fund level in order to seek to reduce negative externalities that may be caused by its underlying investments.

This Fund promotes environmental or social characteristics in accordance with SFDR Article 8. More information about the environmental and social characteristics can be found in Annex 25.

Permitted Investments

In order to achieve its investment objective, this Fund will only invest in:

- Equities and equity-related securities such as ADRs or GDRs. ADRs and GDRs are typically used instead of local shares, where owning the local shares represented in the Index is not possible or prohibitively expensive. The Fund may invest in China A Shares both via Stock Connect and RQFII regime;

- Other UCITS authorised in accordance with the UCITS Directive and/or other UCIs within the meaning of Article 1(2), (a) and (b) of the UCITS Directive whether or not established in an EU Member State;

- Ancillary liquid assets, notably cash, for cash management purposes; and

- Derivatives for efficient portfolio management and investment purposes, limited to futures and forward foreign exchange contracts.

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the 2010 Law and further described in the "**Investment Restrictions and Limits**" section of the Prospectus. The Fund may hold up to 5% of its net assets in unhedged cash.

Securities Financing Transactions

	Expected	Maximum
Securities lending	0%-30%*	40%

*Securities lending transactions will be entered into depending on the market opportunities and in particular depending on the market demand to borrow the securities held in the Fund's portfolio at any time and the expected revenues of the transaction. Market demand depends on the specific securities and the reason borrowers enter into the transaction, such as hedging against market risk, use as collateral or to meet required liquidity standards. Market demand is also subject to volatility, seasonality, and liquidity of the underlying securities in the Fund's portfolio. Revenues vary according to the specific security and the demand to borrow them. The maximum exposure could be reached when there is high demand for many securities held in the Fund's portfolio. Each of these factors may vary and cannot be predicted with certainty. Securities lending transactions to be entered into exclusively aim to generate additional capital or income. As such, there is no restriction on the frequency under which the Fund may engage into such type of transactions.

Listing

Once launched, all UCITS ETF Share Classes will be listed on Borsa Italiana and SIX Swiss Exchange, further details of which will available on the Website.

Investor Profile

The typical investors of the Fund are expected to be institutional, intermediary and retail investors with a medium or long term horizon who want to gain exposure to the performance of emerging market equities and are prepared to accept the risks associated with an investment of this type.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the **"Risk Information**" section of the Prospectus. The following are the principal risks of investing in the Fund:

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund's hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund's assets or share classes are denominated appreciates.

Emerging Markets Risk: Risks of investing in emerging markets include, among others, greater political and economic instability, possible trade barriers, less governmental supervision and regulation, greater volatility in currency exchange rates, currency transfer restrictions or difficulties in gaining currency exposure, less developed securities markets, legal systems and financial services industries, differences in auditing and financial reporting standards, and greater dependence on revenue from particular commodities or international aid.

Equity and Equity related securities Risk: The market prices of equity and equity related securities may go up or down, sometimes rapidly or unpredictably. The value of these securities may decline for reasons that directly relate to the issuer and/or due to general industry or market, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates, or adverse investor sentiment generally. Equity markets tend to move in cycles, which may cause stock prices to fall over short or extended periods of time.

ESG Risk: If the Fund invests in companies taking into account environmental, social and corporate governance (ESG) criteria, then the performance of the Fund may trail the returns of a portfolio of securities that includes companies that are not excluded as a result of such ESG criteria. Investing only in a portfolio of securities that are not excluded as a result of such ESG criteria may affect the Fund's exposure to certain types of investments and may adversely impact the Fund's performance.

Integrating Sustainability Risk: Integrating Sustainability Risk into the Fund's investment process does not assure the mitigation of any or all Sustainability Risk. Any deterioration in the financial profile of an underlying investment affected by a Sustainability Risk may have a corresponding negative impact on the Net Asset Value and/or performance of the investing Fund.

Modelling Risk: The Investment Manager and/or Sub-Investment Manager uses quantitative models in an effort to enhance returns and manage risk. Any imperfections, errors or limitations in these models or in their programming could limit any benefit to the Fund from the use of the models, or could result in incorrect outputs or in investment outcomes different from or opposite to those expected or desired by the Investment Manager and/or Sub-Investment Manager. Such imperfections, errors or limitations might never be detected, or might be detected only after a Fund has sustained a loss (or reduced performance). Further, there can be no assurance that the models will behave as expected in all market conditions.

PRC Investments Risk: In addition to the risks of investing in emerging markets, risks of investing in PRC Investments include, among others, trading suspensions, currency transfer/exposure restrictions, limits on holdings of PRC Investments and use of brokers, untested concepts regarding treatment of beneficial ownership, reliance on Access Programmes which may be discontinued or substantially changed, custody risks including lack of sufficient segregation of assets from those of the RQFII licence holder and Sub-Custodian and tax uncertainty. As the Fund has material exposure to emerging markets and PRC Investments, an investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

Screening Risk: There is a risk that the screen provider may make errors, such as incorrect assessment of the screen criteria and/or include incorrect/exclude correct constituents in the screening process or discontinue its screening services. In such circumstances, the Company may change the screen provider although there is no guarantee that a replacement screen provided would result in a similar screening process to that intended or would be available at all.

Securities Lending Risk: If the Fund engages in securities lending, there is a risk that the borrower may default its obligations to return equivalent securities to the loaned securities. In this way the Fund is exposed to counterparty risk. In this event, the Fund could also experience delays in recovering the securities and may incur a capital loss. The Fund could also lose money if the value of collateral held against the loaned securities falls.

SFDR - Fund Classification Risk: The SFDR has phased implementation from 10 March 2021 and imposes new disclosure obligations on financial market participants. As at the date of this Prospectus, the implementing Regulatory Technical Standards (Level 2) for SFDR have been adopted by the European Commission but certain concepts introduced by SFDR are not currently the subject of centralised implementing standards, local guidance or established market practice. The Fund has been assessed and classified in good faith based on the relevant information currently available. As these standards and guidance develop, the SFDR related disclosures and the Article 8 classification indicated in this Supplement and on the Website are subject to change and may no longer apply.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager and/or Sub-Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Liquidity Risk & ETF Liquidity Risk: Lack of a ready market or restrictions on resale may limit the ability of the Fund to sell a security at an advantageous time or price or at all. Illiquid securities may trade at a discount from comparable, more liquid investments and may be subject to wide fluctuations in market value. Illiquidity of the Fund's holdings may limit the ability of the Fund to obtain cash to meet redemptions on a timely basis. Where the Fund invests in illiquid securities or does not trade in large volumes, the bid offer spreads of the Fund may widen, the Fund may be exposed to increased valuation risk and reduced ability to trade. Shares in the Fund may also trade at prices that are materially different to the last available NAV.

Subscriptions, Redemptions and Switches

Investors may subscribe for, redeem or switch launched Share Classes on each Dealing Day at the Subscription Price or Redemption Price as applicable. For all subscription, redemption, and switch requests, the relevant form must be received by the UCI Administrator by the Dealing Deadline. Shareholders should refer to section "**Shares**" of the Prospectus for further information.

The switch of the Non-ETF Shares into ETF Shares and vice versa is not permitted.

Switches of all or part of an investor's holdings from one Share Class of a Fund into Shares of another Class of the same Fund are permitted provided that the Shareholder is eligible to invest in the requested Class.

Index Disclaimer

Investment Objective and Policy

Investment Objective: The objective of the Fund is to provide a return in excess of the performance of emerging market equities.

Investment Policy: The investment policy of the Fund is to outperform the Index (or any other index determined by the Directors from time to time to represent substantially the same market as the Index) over the medium and long term. The investment policy will also involve screening out securities based on an assessment of their adherence to certain ESG criteria defined by the Investment Manager and further detailed in Annex 26.

The Investment Manager and/or the Sub-Investment Manager, on behalf of the Fund, will invest actively with limited risk parameters relative to the Index, using the Quantitative Equity Strategy as further described in the **"Investment Strategies"** section of the Prospectus. The Investment Manager integrates Sustainability Risk into its investment decisions and employs a negative and norms-based ESG screen prior to the construction of the portfolio of the Fund and on an ongoing basis, as further described in the "**ESG Integration**" and "**ESG Screening**" subsections, respectively, of the "**ESG Investing**" section of the Prospectus.

As at the date of this Supplement the Investment Manager and/or Sub-Investment Manager consider the principal adverse impacts of its investment decisions at the Fund level in order to seek to reduce negative externalities that may be caused by its underlying investments.

This Fund promotes environmental or social characteristics in accordance with SFDR Article 8. More information about the environmental and social characteristics can be found in Annex 26.

Permitted Investments

In order to achieve its investment objective, this Fund will only invest in:

- Equities and equity-related securities such as ADRs or GDRs. ADRs and GDRs are typically used instead of local shares, where owning the local shares represented in the Index is not possible or prohibitively expensive. The Fund may invest in China A Shares both via Stock Connect and RQFII regime;

- Other UCITS authorised in accordance with the UCITS Directive and/or other UCIs within the meaning of Article 1(2), (a) and (b) of the UCITS Directive whether or not established in an EU Member State;

- Ancillary liquid assets, notably cash, for cash management purposes; and

- Derivatives for efficient portfolio management and investment purposes, limited to futures and forward foreign exchange contracts.

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the 2010 Law and further described in the "**Investment Restrictions and Limits**" section of the Prospectus, and in accordance with the German Regulation on the investment of the security assets of pension funds, funeral expenses funds and small insurance undertakings and circular R 11/2017 issued by the German Federal Financial Supervisory Authority, as these may amended from time to time. The Fund may not invest in a UCITS or other UCI with a management fee exceeding 1.50% per annum.

Securities Financing Transactions

	Expected	Maximum
Securities lending	0%-30%*	40%

*Securities lending transactions will be entered into depending on the market opportunities and in particular depending on the market demand to borrow the securities held in the Fund's portfolio at any time and the expected revenues of the transaction. Market demand depends on the specific securities and the reason borrowers enter into the transaction, such as hedging against market risk, use as collateral or to meet required liquidity standards. Market demand is also subject to volatility, seasonality, and liquidity of the underlying securities in the Fund's portfolio. Revenues vary according to the specific security and the demand to borrow them. The maximum exposure could be reached when there is high demand for many securities held in the Fund's portfolio. Each of these factors may vary and cannot be predicted with certainty. Securities lending transactions to be entered into exclusively aim to generate additional capital or income. As such, there is no restriction on the frequency under which the Fund may engage into such type of transactions.

Listing

Once launched, all UCITS ETF Share Classes will be listed on Borsa Italiana and SIX Swiss Exchange further, details of which will available on the Website.

Investor Profile

The typical investors of the Fund are expected to be institutional, intermediary and retail investors with a medium or long term horizon who want to gain exposure to the performance of emerging market equities and are prepared to accept the risks associated with an investment of this type.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the **"Risk Information**" section of the Prospectus. The following are the principal risks of investing in the Fund:

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund's hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund's assets or share classes are denominated appreciates.

Emerging Markets Risk: Risks of investing in emerging markets include, among others, greater political and economic instability, possible trade barriers, less governmental supervision and regulation, greater volatility in currency exchange rates, currency transfer restrictions or difficulties in gaining currency exposure, less developed securities markets, legal systems and financial services industries, differences in auditing and financial reporting standards, and greater dependence on revenue from particular commodities or international aid.

Equity and Equity related securities Risk: The market prices of equity and equity related securities may go up or down, sometimes rapidly or unpredictably. The value of these securities may decline for reasons that directly relate to the issuer and/or due to general industry or market, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates, or adverse investor sentiment generally. Equity markets tend to move in cycles, which may cause stock prices to fall over short or extended periods of time.

Integrating Sustainability Risk: Integrating Sustainability Risk into the Fund's investment process does not assure the mitigation of any or all Sustainability Risk. Any deterioration in the financial profile of an underlying investment affected by a Sustainability Risk may have a corresponding negative impact on the Net Asset Value and/or performance of the investing Fund.

Modelling Risk: The Investment Manager and/or Sub-Investment Manager uses quantitative models in an effort to enhance returns and manage risk. Any imperfections, errors or limitations in these models or in their programming could limit any benefit to the Fund from the use of the models, or could result in incorrect outputs or in investment outcomes different from or opposite to those expected or desired by the Investment Manager and/or Sub-Investment Manager. Such imperfections, errors or limitations might never be detected, or might be detected only after a Fund has sustained a loss (or reduced performance). Further, there can be no assurance that the models will behave as expected in all market conditions.

PRC Investments Risk: In addition to the risks of investing in emerging markets, risks of investing in PRC Investments include, among others, trading suspensions, currency transfer/exposure restrictions, limits on holdings of PRC Investments and use of brokers, untested concepts regarding treatment of beneficial ownership, reliance on Access Programmes which may be discontinued or substantially changed, custody risks including lack of sufficient segregation of assets from those of the RQFII licence holder and Sub-Custodian and tax uncertainty. As the Fund has material exposure to emerging markets and PRC Investments, an investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

Screening Risk: There is a risk that the screen provider may make errors, such as incorrect assessment of the screen criteria and/or include incorrect/exclude correct constituents in the screening process or discontinue its screening services. In such circumstances, the Company may change the screen provider although there is no guarantee that a replacement screen provided would result in a similar screening process to that intended or would be available at all.

Securities Lending Risk: If the Fund engages in securities lending, there is a risk that the borrower may default its obligations to return equivalent securities to the loaned securities. In this way the Fund is exposed to counterparty risk. In this event, the Fund could also experience delays in recovering the securities and may incur a capital loss. The Fund could also lose money if the value of collateral held against the loaned securities falls.

SFDR - Fund Classification Risk: The SFDR has phased implementation from 10 March 2021 and imposes new disclosure obligations on financial market participants. As at the date of this Prospectus, the implementing Regulatory Technical Standards (Level 2) for SFDR have been adopted by the European Commission but certain concepts introduced by SFDR are not currently the subject of centralised implementing standards, local guidance or established market practice. The Fund has been assessed and classified in good faith based on the relevant information currently available. As these standards and guidance develop, the SFDR related disclosures and the Article 8 classification indicated in this Supplement and on the Website are subject to change and may no longer apply.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager and/or Sub-Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Liquidity Risk & ETF Liquidity Risk: Lack of a ready market or restrictions on resale may limit the ability of the Fund to sell a security at an advantageous time or price or at all. Illiquid securities may trade at a discount from comparable, more liquid investments and may be subject to wide fluctuations in market value. Illiquidity of the Fund's holdings may limit the ability of the Fund to obtain cash to meet redemptions on a timely basis. Where the Fund invests in illiquid securities or does not trade in large volumes, the bid offer spreads of the Fund may widen, the Fund may be exposed to increased valuation risk and reduced ability to trade. Shares in the Fund may also trade at prices that are materially different to the last available NAV.

Subscriptions, Redemptions and Switches

Investors may subscribe for, redeem or switch launched Share Classes on each Dealing Day at the Subscription Price or Redemption Price as applicable. For all subscription, redemption, and switch requests, the relevant form must be received by the UCI Administrator by the Dealing Deadline. Shareholders should refer to section "**Shares**" of the Prospectus for further information.

The switch of the Non-ETF Shares into ETF Shares and vice versa is not permitted.

Switches of all or part of an investor's holdings from one Share Class of a Fund into Shares of another Class of the same Fund are permitted provided that the Shareholder is eligible to invest in the requested Class.

Index Disclaimer

Please see Appendix 1 of the Prospectus for the MSCI index disclaimer.

	Portfolio Hedged	1.53%	1.67%

Investment Objective and Policy

Investment Objective: The objective of the Fund is to provide a return in excess of the performance of Eurozone equity markets.

Investment Policy: The investment policy of the Fund is to outperform the Index (or any other index determined by the Directors from time to time to track substantially the same market as the Index) over the medium and long term while the investment policy will also involve screening out securities based on an assessment of their adherence to certain ESG criteria defined by the Investment Manager and further detailed in Annex 27.

The Investment Manager, on behalf of the Fund, will invest actively using the Quantitative Equity Strategy as further described in the **"Investment Strategies"** section of the Prospectus. The Investment Manager integrates Sustainability Risk into its investment decisions and employs a negative and norms-based ESG screen prior to the construction of the portfolio of the Fund and on an ongoing basis, as further described in the "**ESG Integration**" and "**ESG Screening**" subsections, respectively, of the "**ESG Investing**" section of the Prospectus.

As at the date of this Supplement the Investment Manager and/or Sub-Investment Manager consider the principal adverse impacts of its investment decisions at the Fund level in order to seek to reduce negative externalities that may be caused by its underlying investments.

This Fund promotes environmental or social characteristics in accordance with SFDR Article 8. More information about the environmental and social characteristics can be found in Annex 27.

Permitted Investments

In order to achieve its investment objective, this Fund will only invest in:

- Equities and equity-related securities such as ADRs or GDRs. ADRs and GDRs are typically used instead of local shares, where owning the local shares represented in the Index is not possible or prohibitively expensive;
- Other UCITS authorised in accordance with the UCITS Directive and/or other UCIs within the meaning of Article 1(2), (a) and (b) of the UCITS Directive whether or not established in an EU Member State;
- Ancillary liquid assets, notably cash, for cash management purposes; and
- Derivatives for efficient portfolio management and investment purposes, limited to swaps, options, futures and forward foreign exchange contracts.

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the 2010 Law and further described in the "**Investment Restrictions and Limits**" section of the Prospectus.

Securities Financing Transactions

	Expected	Maximum
Securities lending	0%-30%*	40%

*Securities lending transactions will be entered into depending on the market opportunities and in particular depending on the market demand to borrow the securities held in the Fund's portfolio at any time and the expected revenues of the transaction. Market demand depends on the specific securities and the reason borrowers enter into the transaction, such as hedging against market risk, use as collateral or to meet required liquidity standards. Market demand is also subject to volatility, seasonality, and liquidity of the underlying securities in the Fund's portfolio. Revenues vary according to the specific security and the demand to borrow them. The maximum exposure could be reached when there is high demand for many securities held in the Fund's portfolio. Each of these factors may vary and cannot be predicted with certainty. Securities lending transactions to be entered into exclusively aim to generate additional capital or income. As such, there is no restriction on the frequency under which the Fund may engage into such type of transactions.

Listing

Once launched, all UCITS ETF Share Classes will be listed on Borsa Italiana and SIX Swiss Exchange, further details of which will available on the Website.

Investor Profile

The typical investors of the Fund are expected to be institutional, intermediary and retail investors with a medium or long term horizon who want to gain exposure to the performance of the Eurozone equity markets and are prepared to accept the risks associated with an investment of this type.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the **"Risk Information**" section of the Prospectus. The following are the principal risks of investing in the Fund:

Concentration Risk: When the Fund focuses its investments in a particular region, the financial, economic, business, and other developments affecting issuers in that region will have a greater effect on the Fund than if it was more diversified. This concentration may also limit the liquidity of the Fund. Investors may buy or sell substantial amounts of the Fund's shares in response to factors affecting or expected to affect a region in which the Fund focuses its investments.

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund's hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund's assets or share classes are denominated appreciates.

Equity and Equity related securities Risk: The market prices of equity and equity related securities may go up or down, sometimes rapidly or unpredictably. The value of these securities may decline for reasons that directly relate to the issuer and/or due to general industry or market, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates, or adverse investor sentiment generally. Equity markets tend to move in cycles, which may cause stock prices to fall over short or extended periods of time.

Integrating Sustainability Risk: Integrating Sustainability Risk into the Fund's investment process does not assure the mitigation of any or all Sustainability Risk. Any deterioration in the financial profile of an underlying investment affected by a Sustainability Risk may have a corresponding negative impact on the Net Asset Value and/or performance of the investing Fund.

Modelling Risk: The Investment Manager uses quantitative models in an effort to enhance returns and manage risk. Any imperfections, errors or limitations in these models or in their programming could limit any benefit to the Fund from the use of the models, or could result in incorrect outputs or in investment outcomes different from or opposite to those expected or desired by the Investment Manager. Such imperfections, errors or limitations might never be detected, or might be detected only after a Fund has sustained a loss (or reduced performance). Further, there can be no assurance that the models will behave as expected in all market conditions.

Screening Risk: There is a risk that the screen provider may make errors, such as incorrect assessment of the screen criteria and/or include incorrect/exclude correct constituents in the screening process or discontinue its screening services. In such circumstances, the Company may change the screen provider although there is no guarantee that a replacement screen provided would result in a similar screening process to that intended or would be available at all.

Securities Lending Risk: If the Fund engages in securities lending, there is a risk that the borrower may default its obligations to return equivalent securities to the loaned securities. In this way the Fund is exposed to counterparty risk. In this event, the Fund could also experience delays in recovering the securities and may incur a capital loss. The Fund could also lose money if the value of collateral held against the loaned securities falls.

SFDR - Fund Classification Risk: The SFDR has phased implementation from 10 March 2021 and imposes new disclosure obligations on financial market participants. As at the date of this Prospectus, the implementing Regulatory Technical Standards (Level 2) for SFDR have been adopted by the European Commission but certain concepts introduced by SFDR are not currently the subject of centralised implementing standards, local guidance or established market practice. The Fund has been assessed and classified in good faith based on the relevant information currently available. As these standards and guidance develop, the SFDR related disclosures and the Article 8 classification indicated in this Supplement and on the Website are subject to change and may no longer apply.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Liquidity Risk & ETF Liquidity Risk: Lack of a ready market or restrictions on resale may limit the ability of the Fund to sell a security at an advantageous time or price or at all. Illiquid securities may trade at a discount from comparable, more liquid investments and may be subject to wide fluctuations in market value. Illiquidity of the Fund's holdings may limit the ability of the Fund to obtain cash to meet redemptions on a timely basis. Where the fund invests in illiquid securities or does not trade in large volumes, the bid offer spreads of the Fund may widen, the Fund may be exposed to increased valuation risk and reduced ability to trade. Shares in the Fund may also trade at prices that are materially different to the last available NAV.

Subscriptions, Redemptions and Switches

Investors may subscribe for, redeem or switch launched Share Classes on each Dealing Day at the Subscription Price or Redemption Price as applicable. For all subscription, redemption, and switch requests, the relevant form must be received by the UCI Administrator by the Dealing Deadline. Shareholders should refer to section "**Shares**" of the Prospectus for further information.

The switch of the Non-ETF Shares into ETF Shares and vice versa is not permitted.

Switches of all or part of an investor's holdings from one Share Class of a Fund into Shares of another Class of the same Fund are permitted provided that the Shareholder is eligible to invest in the requested Class.

Listing

Once launched, all UCITS ETF Share Classes will be listed on Borsa Italiana and SIX Swiss Exchange further, details of which will available on the Website.

Investor Profile

The typical investors of the Fund are expected to be institutional, intermediary and retail investors with a medium or long term horizon who want to gain exposure to the performance of the European small cap equity markets and are prepared to accept the risks associated with an investment of this type.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the **"Risk Information**" section of the Prospectus. The following are the principal risks of investing in the Fund:

Concentration Risk: When the Fund focuses its investments in a particular region, the financial, economic, business, and other developments affecting issuers in that region will have a greater effect on the Fund than if it was more diversified. This concentration may also limit the liquidity of the Fund. Investors may buy or sell substantial amounts of the Fund's shares in response to factors affecting or expected to affect a region in which the Fund focuses its investments.

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund's hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund's assets or share classes are denominated appreciates.

Equity and Equity related securities Risk: The market prices of equity and equity related securities may go up or down, sometimes rapidly or unpredictably. The value of these securities may decline for reasons that directly relate to the issuer and/or due to general industry or market, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates, or adverse investor sentiment generally. Equity markets tend to move in cycles, which may cause stock prices to fall over short or extended periods of time.

Integrating Sustainability Risk: Integrating Sustainability Risk into the Fund's investment process does not assure the mitigation of any or all Sustainability Risk. Any deterioration in the financial profile of an underlying investment affected by a Sustainability Risk may have a corresponding negative impact on the Net Asset Value and/or performance of the investing Fund.

Modelling Risk: The Investment Manager uses quantitative models in an effort to enhance returns and manage risk. Any imperfections, errors or limitations in these models or in their programming could limit any benefit to the Fund from the use of the models, or could result in incorrect outputs or in investment outcomes different from or opposite to those expected or desired by the Investment Manager. Such imperfections, errors or limitations might never be detected, or might be detected only after a Fund has sustained a loss (or reduced performance). Further, there can be no assurance that the models will behave as expected in all market conditions.

Screening Risk: There is a risk that the screen provider may make errors, such as incorrect assessment of the screen criteria and/or include incorrect/exclude correct constituents in the screening process or discontinue its screening services. In such circumstances, the Company may change the screen provider although there is no guarantee that a replacement screen provided would result in a similar screening process to that intended or would be available at all.

Securities Lending Risk: If the Fund engages in securities lending, there is a risk that the borrower may default its obligations to return equivalent securities to the loaned securities. In this way the Fund is exposed to counterparty risk. In this event, the Fund could also experience delays in recovering the securities and may incur a capital loss. The Fund could also lose money if the value of collateral held against the loaned securities falls.

SFDR - Fund Classification Risk: The SFDR has phased implementation from 10 March 2021 and imposes new disclosure obligations on financial market participants. As at the date of this Prospectus, the implementing Regulatory Technical Standards (Level 2) for SFDR have been adopted by the European Commission but certain concepts introduced by SFDR are not currently the subject of centralised implementing standards, local guidance or established market practice. The Fund has been assessed and classified in good faith based on the relevant information currently available. As these standards and guidance develop, the SFDR related disclosures and the Article 8 classification indicated in this Supplement and on the Website are subject to change and may no longer apply.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it

is intended, the transactions could result in liabilities for other Classes.

Smaller Companies Risk: The securities of small-, mid-, and micro-capitalisation companies may be more volatile and trade less frequently and in smaller volumes than the securities of larger companies. These companies may have limited product lines, markets or financial resources, may lack the competitive strength of larger companies, and may depend on a few key employees. In addition, these companies may have little or no track record of success.

Liquidity Risk & ETF Liquidity Risk: Lack of a ready market or restrictions on resale may limit the ability of the Fund to sell a security at an advantageous time or price or at all. Illiquid securities may trade at a discount from comparable, more liquid investments and may be subject to wide fluctuations in market value. Illiquidity of the Fund's holdings may limit the ability of the Fund to obtain cash to meet redemptions on a timely basis. Where the fund invests in illiquid securities or does not trade in large volumes, the bid offer spreads of the Fund may widen, the Fund may be exposed to increased valuation risk and reduced ability to trade. Shares in the Fund may also trade at prices that are materially different to the last available NAV.

Subscriptions, Redemptions and Switches

Investors may subscribe for, redeem or switch launched Share Classes on each Dealing Day at the Subscription Price or Redemption Price as applicable. For all subscription, redemption, and switch requests, the relevant form must be received by the UCI Administrator by the Dealing Deadline. Shareholders should refer to section "**Shares**" of the Prospectus for further information.

The switch of the Non-ETF Shares into ETF Shares and vice versa is not permitted.

Switches of all or part of an investor's holdings from one Share Class of a Fund into Shares of another Class of the same Fund are permitted provided that the Shareholder is eligible to invest in the requested Class.

Investment Objective and Policy

Investment Objective: The objective of the Fund is to provide a return in excess of the performance of emerging market small capitalisation equities.

Investment Policy: The investment policy of the Fund is to outperform the Index (or any other index determined by the Directors from time to time to track substantially the same market as the Index) over the medium and long term while the investment policy will also involve screening out securities based on an assessment of their adherence to certain ESG criteria defined by the Investment Manager and further detailed in Annex 29.

The Investment Manager and/or Sub-Investment Manager, on behalf of the Fund, will invest actively using the Quantitative Equity Strategy as further described in the **"Investment Strategies"** section of the Prospectus. The Investment Manager integrates Sustainability Risk into its investment decisions and employs a negative and norms-based ESG screen prior to the construction of the portfolio of the Fund and on an ongoing basis, as further described in the "**ESG Integration**" and "**ESG Screening**" subsections, respectively, of the "**ESG Investing**" section of the Prospectus.

As at the date of this Supplement the Investment Manager and/or Sub-Investment Manager consider the principal adverse impacts of its investment decisions at the Fund level in order to seek to reduce negative externalities that may be caused by its underlying investments.

This Fund promotes environmental or social characteristics in accordance with SFDR Article 8. More information about the environmental and social characteristics can be found in Annex 29.

Permitted Investments

In order to achieve its investment objective, this Fund will only invest in:

- Equities and equity-related securities such as ADRs or GDRs. ADRs and GDRs are typically used instead of local shares, where owning the local shares represented in the Index is not possible or prohibitively expensive. The Fund may invest in China A Shares both via Stock Connect and RQFII regime;

- Other UCITS authorised in accordance with the UCITS Directive and/or other UCIs within the meaning of Article 1(2), (a) and (b) of the UCITS Directive whether or not established in an EU Member State;

- Ancillary liquid assets, notably cash, for cash management purposes; and

- Derivatives for efficient portfolio management and investment purposes, limited to swaps, options, futures and forward foreign exchange contracts.

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the 2010 Law and further described in the "**Investment Restrictions and Limits**" section of the Prospectus.

Securities Financing Transactions

	Expected	Maximum
Securities lending	0%-30%*	40%

*Securities lending transactions will be entered into depending on the market opportunities and in particular depending on the market demand to borrow the securities held in the Fund's portfolio at any time and the expected revenues of the transaction. Market demand depends on the specific securities and the reason borrowers enter into the transaction, such as hedging against market risk, use as collateral or to meet required liquidity standards. Market demand is also subject to volatility, seasonality, and liquidity of the underlying securities in the Fund's portfolio. Revenues vary according to the specific security and the demand to borrow them. The maximum exposure could be reached when there is high demand for many securities held in the Fund's portfolio. Each of these factors may vary and cannot be predicted with certainty. Securities lending transactions to be entered into exclusively aim to generate additional capital or income. As such, there is no restriction on the frequency under which the Fund may engage into such type of transactions.

Investor Profile

The typical investors of the Fund are expected to be institutional and intermediary investors with a medium or long term horizon who want to gain exposure to the performance of the emerging market small cap equitiesand are prepared to accept the risks associated with an investment of this type.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the **"Risk Information**" section of the Prospectus. The following are the principal risks of investing in the Fund:

Concentration Risk: When the Fund focuses its investments in a particular region, the financial, economic, business, and other developments affecting issuers in that region will have a greater effect on the Fund than if it was more diversified. This concentration may also limit the liquidity of the Fund. Investors may buy or sell substantial amounts of the Fund's shares in response to factors affecting or expected to affect a region in which the Fund focuses its investments.

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund's hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund's assets or share classes are denominated appreciates.

Emerging Markets Risk: Risks of investing in emerging markets include, among others, greater political and economic instability, possible trade barriers, less governmental supervision and regulation, greater volatility in currency exchange rates, currency transfer restrictions or difficulties in gaining currency exposure, less developed securities markets, legal systems and financial services industries, differences in auditing and financial reporting standards, and greater dependence on revenue from particular commodities or international aid.

Equity and Equity related securities Risk: The market prices of equity and equity related securities may go up or down, sometimes rapidly or unpredictably. The value of these securities may decline for reasons that directly relate to the issuer and/or due to general industry or market, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates, or adverse investor sentiment generally. Equity markets tend to move in cycles, which may cause stock prices to fall over short or extended periods of time.

Integrating Sustainability Risk: Integrating Sustainability Risk into the Fund's investment process does not assure the mitigation of any or all Sustainability Risk. Any deterioration in the financial profile of an underlying investment affected by a Sustainability Risk may have a corresponding negative impact on the Net Asset Value and/or performance of the investing Fund.

Modelling Risk: The Investment Manager and/or Sub-Investment Manager uses quantitative models in an effort to enhance returns and manage risk. Any imperfections, errors or limitations in these models or in their programming could limit any benefit to the Fund from the use of the models, or could result in incorrect outputs or in investment outcomes different from or opposite to those expected or desired by the Investment Manager and/or Sub-Investment Manager. Such imperfections, errors or limitations might never be detected, or might be detected only after a Fund has sustained a loss (or reduced performance). Further, there can be no assurance that the models will behave as expected in all market conditions.

PRC Investments Risk: In addition to the risks of investing in emerging markets, risks of investing in PRC Investments include, among others, trading suspensions, currency transfer/exposure restrictions, limits on holdings of PRC Investments and use of brokers, untested concepts regarding treatment of beneficial ownership, reliance on Access Programmes which may be discontinued or substantially changed, custody risks including lack of sufficient segregation of assets from those of the RQFII licence holder and Sub-Custodian and tax uncertainty. As the Fund has material exposure to emerging markets and PRC Investments, an investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

Screening Risk: There is a risk that the screen provider may make errors, such as incorrect assessment of the screen criteria and/or include incorrect/exclude correct constituents in the screening process or discontinue its screening services. In such circumstances, the Company may change the screen provider although there is no guarantee that a replacement screen provided would result in a similar screening process to that intended or would be available at all.

Securities Lending Risk: If the Fund engages in securities lending, there is a risk that the borrower may default its obligations to return equivalent securities to the loaned securities. In this way the Fund is exposed to counterparty risk. In this event, the Fund could also experience delays in recovering the securities and may incur a capital loss. The Fund could also lose money if the value of collateral held against the loaned securities falls.

SFDR - Fund Classification Risk: The SFDR has phased implementation from 10 March 2021 and imposes new disclosure obligations on financial market participants. As at the date of this Prospectus, the implementing Regulatory Technical Standards (Level 2) for SFDR have been adopted by the European Commission but certain concepts introduced by SFDR are not currently the subject of centralised implementing standards, local guidance or established market practice. The Fund has been assessed and classified in good faith based on the relevant information currently available. As these standards and guidance develop, the SFDR related disclosures and the Article 8 classification indicated in this Supplement and on the Website are subject to change and may no longer apply.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager and/or Sub-Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Smaller Companies Risk: The securities of small-, mid-, and micro-capitalisation companies may be more volatile and trade less frequently and in smaller volumes than the securities of larger companies. These companies may have limited product lines, markets or financial resources, may lack the competitive strength of larger companies, and may depend on a few key employees. In addition, these companies may have little or no track record of success.

Subscriptions, Redemptions and Switches

Investors may subscribe for, redeem or switch launched Share Classes on each Dealing Day at the Subscription Price or Redemption Price as applicable. For all subscription, redemption, and switch requests, the relevant form must be received by the UCI Administrator by the Dealing Deadline. Shareholders should refer to section "**Shares**" of the Prospectus for further information.

Investment Objective and Policy

Investment Objective: The objective of the Fund is to generate lower volatility returns than, and performance comparable to, global equity markets over the long term.

Investment Policy: The investment policy of the Fund is to generate returns that exhibit lower volatility than the performance of the Index (or any other index determined by the Directors from time to time to track substantially the same market as the Index) while remaining comparable to the Index over the long term. The investment policy will also involve screening out securities based on an assessment of their adherence to certain ESG criteria defined by the Investment Manager and further detailed in Annex 30.

The Investment Manager and/or Sub-Investment Manager, on behalf of the Fund, will invest actively using the Managed Volatility Equity Strategy as further described in the "**Investment Strategies**" section of the Prospectus. The Investment Manager integrates Sustainability Risk into its investment decisions and employs a negative and norms-based ESG screen prior to the construction of the portfolio of the Fund and on an ongoing basis, as further described in the "**ESG Integration**" and "**ESG Screening**" subsections, respectively, of the "**ESG Investing**" section of the Prospectus.

As at the date of this Supplement the Investment Manager and/or Sub-Investment Manager consider the principal adverse impacts of its investment decisions at the Fund level in order to seek to reduce negative externalities that may be caused by its underlying investments.

This Fund promotes environmental or social characteristics in accordance with SFDR Article 8. More information about the environmental and social characteristics can be found in Annex 30.

Permitted Investments

In order to achieve its investment objective, this Fund will only invest in:

- Equities and equity-related securities such as ADRs or GDRs. ADRs and GDRs are typically used instead of local shares, where owning the local shares represented in the Index is not possible or prohibitively expensive;
- Other UCITS authorised in accordance with the UCITS Directive and/or other UCIs within the meaning of Article 1(2), (a) and (b) of the UCITS Directive whether or not established in an EU Member State;
- Ancillary liquid assets, notably cash, for cash management purposes; and
- Derivatives for efficient portfolio management and investment purposes, limited to swaps, options, futures and forward foreign exchange contracts.

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the 2010 Law and further described in the "**Investment Restrictions and Limits**" section of the Prospectus.

Securities Financing Transactions

	Expected	Maximum
Securities lending	0%-30%*	40%

*Securities lending transactions will be entered into depending on the market opportunities and in particular depending on the market demand to borrow the securities held in the Fund's portfolio at any time and the expected revenues of the transaction. Market demand depends on the specific securities and the reason borrowers enter into the transaction, such as hedging against market risk, use as collateral or to meet required liquidity standards. Market demand is also subject to volatility, seasonality, and liquidity of the underlying securities in the Fund's portfolio. Revenues vary according to the specific security and the demand to borrow them. The maximum exposure could be reached when there is high demand for many securities held in the Fund's portfolio. Each of these factors may vary and cannot be predicted with certainty. Securities lending transactions to be entered into exclusively aim to generate additional capital or income. As such, there is no restriction on the frequency under which the Fund may engage into such type of transactions.

Investor Profile

The typical investors of the Fund are expected to be institutional and intermediary investors with a medium or long term horizon who want to gain exposure to the performance of global equity markets and are prepared to accept the risks associated with an investment of this type.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the **"Risk Information**" section of the Prospectus. The following are the principal risks of investing in the Fund:

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund's hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund's assets or share classes are denominated appreciates.

Equity and Equity related securities Risk: The market prices of equity and equity related securities may go up or down, sometimes rapidly or unpredictably. The value of these securities may decline for reasons that directly relate to the issuer and/or due to general industry or market, such

as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates, or adverse investor sentiment generally. Equity markets tend to move in cycles, which may cause stock prices to fall over short or extended periods of time.

Integrating Sustainability Risk: Integrating Sustainability Risk into the Fund's investment process does not assure the mitigation of any or all Sustainability Risk. Any deterioration in the financial profile of an underlying investment affected by a Sustainability Risk may have a corresponding negative impact on the Net Asset Value and/or performance of the investing Fund.

Modelling Risk: The Investment Manager and/or Sub-Investment Manager uses quantitative models in an effort to enhance returns and manage risk. Any imperfections, errors or limitations in these models or in their programming could limit any benefit to the Fund from the use of the models, or could result in incorrect outputs or in investment outcomes different from or opposite to those expected or desired by the Investment Manager and/or Sub-Investment Manager. Such imperfections, errors or limitations might never be detected, or might be detected only after a Fund has sustained a loss (or reduced performance). Further, there can be no assurance that the models will behave as expected in all market conditions.

Screening Risk: There is a risk that the screen provider may make errors, such as incorrect assessment of the screen criteria and/or include incorrect/exclude correct constituents in the screening process or discontinue its screening services. In such circumstances, the Company may change the screen provider although there is no guarantee that a replacement screen provided would result in a similar screening process to that intended or would be available at all.

Securities Lending Risk: If the Fund engages in securities lending, there is a risk that the borrower may default its obligations to return equivalent securities to the loaned securities. In this way the Fund is exposed to counterparty risk. In this event, the Fund could also experience delays in recovering the securities and may incur a capital loss. The Fund could also lose money if the value of collateral held against the loaned securities falls.

SFDR - Fund Classification Risk: The SFDR has phased implementation from 10 March 2021 and imposes new disclosure obligations on financial market participants. As at the date of this Prospectus, the implementing Regulatory Technical Standards (Level 2) for SFDR have been adopted by the European Commission but certain concepts introduced by SFDR are not currently the subject of centralised implementing standards, local guidance or established market practice. The Fund has been assessed and classified in good faith based on the relevant information currently available. As these standards and guidance develop, the SFDR related disclosures and the Article 8 classification indicated in this Supplement and on the Website are subject to change and may no longer apply.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager and/or Sub-Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Investment Objective and Policy

Investment Objective: The objective of the Fund is to generate capital growth over the medium to long term through investment in global equity securities while exhibiting lower volatility and a reduced impact from market drawdowns.

Investment Policy: The investment policy of the Fund is to outperform the Index (or any other index determined by the Directors from time to time to track substantially the same market as the Index) over the long term with lower volatility and reduced impact from market drawdowns. The investment policy will also involve screening out securities based on an assessment of their adherence to certain ESG criteria defined by the Investment Manager and further detailed in Annex 31.

The Investment Manager and/or Sub-Investment Manager, on behalf of the Fund, will invest actively using the Defensive Equity Strategy as further described in the **"Investment Strategies"** section of the Prospectus. The Investment Manager integrates Sustainability Risk into its investment decisions and employs a negative and norms-based ESG screen prior to the construction of the portfolio of the Fund and on an ongoing basis, as further described in the "**ESG Integration**" and "**ESG Screening**" subsections, respectively, of the "**ESG Investing**" section of the Prospectus.

As at the date of this Supplement the Investment Manager and/or Sub-Investment Manager consider the principal adverse impacts of its investment decisions at the Fund level in order to seek to reduce negative externalities that may be caused by its underlying investments.

This Fund promotes environmental or social characteristics in accordance with SFDR Article 8. More information about the environmental and social characteristics can be found in Annex 31.

Permitted Investments

In order to achieve its investment objective, this Fund will only invest in:

- Equities and equity-related securities such as ADRs or GDRs. ADRs and GDRs are typically used instead of local shares, where owning the local shares represented in the Index is not possible or prohibitively expensive;
- Other UCITS authorised in accordance with the UCITS Directive and/or other UCIs within the meaning of Article 1(2), (a) and (b) of the UCITS Directive whether or not established in an EU Member State;
- Ancillary liquid assets, notably cash, for cash management purposes; and
- Derivatives for efficient portfolio management and investment purposes, limited to swaps, options, futures and forward foreign exchange contracts.

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the 2010 Law and further described in the "**Investment Restrictions and Limits**" section of the Prospectus.

Securities Financing Transactions

	Expected	Maximum
Securities lending	0%-30%*	40%

*Securities lending transactions will be entered into depending on the market opportunities and in particular depending on the market demand to borrow the securities held in the Fund's portfolio at any time and the expected revenues of the transaction. Market demand depends on the specific securities and the reason borrowers enter into the transaction, such as hedging against market risk, use as collateral or to meet required liquidity standards. Market demand is also subject to volatility, seasonality, and liquidity of the underlying securities in the Fund's portfolio. Revenues vary according to the specific security and the demand to borrow them. The maximum exposure could be reached when there is high demand for many securities held in the Fund's portfolio. Each of these factors may vary and cannot be predicted with certainty. Securities lending transactions to be entered into exclusively aim to generate additional capital or income. As such, there is no restriction on the frequency under which the Fund may engage into such type of transactions.

Investor Profile

The typical investors of the Fund are expected to be institutional and intermediary investors with a medium or long term horizon who want to gain exposure to the performance of global equity markets and are prepared to accept the risks associated with an investment of this type.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the **"Risk Information**" section of the Prospectus. The following are the principal risks of investing in the Fund:

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund's hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund's assets or share classes are denominated appreciates.

Equity and Equity related securities Risk: The market prices of equity and equity related securities may go up or down, sometimes rapidly or unpredictably. The value of these securities may decline for reasons that directly relate to the issuer and/or due to general industry or market, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates, or adverse investor sentiment generally. Equity markets tend to move in cycles, which may cause stock prices to fall over short or extended periods of time.

Integrating Sustainability Risk: Integrating Sustainability Risk into the Fund's investment process does not assure the mitigation of any or all Sustainability Risk. Any deterioration in the financial profile of an underlying investment affected by a Sustainability Risk may have a corresponding negative impact on the Net Asset Value and/or performance of the investing Fund.

Modelling Risk: The Investment Manager and/or Sub-Investment Manager uses quantitative models in an effort to enhance returns and manage risk. Any imperfections, errors or limitations in these models or in their programming could limit any benefit to the Fund from the use of the models, or could result in incorrect outputs or in investment outcomes different from or opposite to those expected or desired by the Investment Manager and/or Sub-Investment Manager. Such imperfections, errors or limitations might never be detected, or might be detected only after a Fund has sustained a loss (or reduced performance). Further, there can be no assurance that the models will behave as expected in all market conditions.

Screening Risk: There is a risk that the screen provider may make errors, such as incorrect assessment of the screen criteria and/or include incorrect/exclude correct constituents in the screening process or discontinue its screening services. In such circumstances, the Company may change the screen provider although there is no guarantee that a replacement screen provided would result in a similar screening process to that intended or would be available at all.

Securities Lending Risk: If the Fund engages in securities lending, there is a risk that the borrower may default its obligations to return equivalent securities to the loaned securities. In this way the Fund is exposed to counterparty risk. In this event, the Fund could also experience delays in recovering the securities and may incur a capital loss. The Fund could also lose money if the value of collateral held against the loaned securities falls.

SFDR - Fund Classification Risk: The SFDR has phased implementation from 10 March 2021 and imposes new disclosure obligations on financial market participants. As at the date of this Prospectus, the implementing Regulatory Technical Standards (Level 2) for SFDR have been adopted by the European Commission but certain concepts introduced by SFDR are not currently the subject of centralised implementing standards, local guidance or established market practice. The Fund has been assessed and classified in good faith based on the relevant information currently available. As these standards and guidance develop, the SFDR related disclosures and the Article 8 classification indicated in this Supplement and on the Website are subject to change and may no longer apply.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager and/or Sub-Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Subscriptions, Redemptions and Switches

Investors may subscribe for, redeem or switch launched Share Classes on each Dealing Day at the Subscription Price or Redemption Price as applicable. For all subscription, redemption, and switch requests, the relevant form must be received by the UCI Administrator by the Dealing Deadline. Shareholders should refer to section "**Shares**" of the Prospectus for further information.

Investment Objective and Policy

Investment Objective: The objective of the Fund is to generate capital growth over the long term through investment in global equity securities.

Investment Policy: The investment policy of the Fund is to invest in companies which exhibit lower carbon emissions in the way of current emissions and future emissions (measured by fossil fuel reserves), produce green revenues, and are better positioned for the risks posed by climate change while screening out securities based on an assessment of their adherence to certain ESG criteria defined by the Investment Manager and further detailed in Annex 32.

he Investment Manager on behalf of the Fund, will invest actively using the Climate Transition Equity Beta Strategy as further described in the "**Investment Strategies**" section of the Prospectus. The Investment Manager integrates Sustainability Risk into its investment decisions and employs both Thematic ESG Investing and employs a negative and norms-based ESG screen prior to the construction of the portfolio of the Fund and on an ongoing basis, as further described in the "**ESG Integration**", "**Thematic ESG Investing**" and "**ESG Screening**" subsections, respectively, of the "**ESG Investing**" section of the Prospectus.

As at the date of this Supplement the Investment Manager and/or Sub-Investment Manager consider the principal adverse impacts of its investment decisions at the Fund level in order to seek to reduce negative externalities that may be caused by its underlying investments.

This Fund promotes environmental or social characteristics in accordance with SFDR Article 8. More information about the environmental and social characteristics can be found in Annex 32.

Permitted Investments

In order to achieve its investment objective, this Fund will only invest in:

- Equities and equity-related securities such as ADRs or GDRs. ADRs and GDRs are typically used instead of local shares, where owning the local shares represented in the Index is not possible or prohibitively expensive;
- Other UCITS authorised in accordance with the UCITS Directive and/or other UCIs within the meaning of Article 1(2), (a) and (b) of the UCITS Directive whether or not established in an EU Member State;
- Ancillary liquid assets, notably cash, for cash management purposes; and
- Derivatives for efficient portfolio management and investment purposes, limited to swaps, options, futures and forward foreign exchange contracts.

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the 2010 Law and further described in the "**Investment Restrictions and Limits**" section of the Prospectus.

Securities Financing Transactions

	Expected	Maximum
Securities lending	0%-30%*	40%

*Securities lending transactions will be entered into depending on the market opportunities and in particular depending on the market demand to borrow the securities held in the Fund's portfolio at any time and the expected revenues of the transaction. Market demand depends on the specific securities and the reason borrowers enter into the transaction, such as hedging against market risk, use as collateral or to meet required liquidity standards. Market demand is also subject to volatility, seasonality, and liquidity of the underlying securities in the Fund's portfolio. Revenues vary according to the specific security and the demand to borrow them. The maximum exposure could be reached when there is high demand for many securities held in the Fund's portfolio. Each of these factors may vary and cannot be predicted with certainty. Securities lending transactions to be entered into exclusively aim to generate additional capital or income. As such, there is no restriction on the frequency under which the Fund may engage into such type of transactions.

Investor Profile

The typical investors of the Fund are expected to be institutional and intermediary investors with a medium or long term horizon who want to gain exposure to the performance of global equity markets and are prepared to accept the risks associated with an investment of this type.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the **"Risk Information**" section of the Prospectus. The following are the principal risks of investing in the Fund:

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund's hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund's assets or share classes are denominated appreciates.

Equity and Equity related securities Risk: The market prices of equity and equity related securities may go up or down, sometimes rapidly or unpredictably. The value of these securities may decline for reasons that directly relate to the issuer and/or due to general industry or market, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates, or adverse investor sentiment generally. Equity markets tend to move in cycles, which may

cause stock prices to fall over short or extended periods of time.

ESG Risk: If the Fund invests in companies taking into account environmental, social and corporate governance (ESG) criteria, then the performance of the Fund may trail the returns of a portfolio of securities that includes companies that are not excluded as a result of such ESG criteria. Investing only in a portfolio of securities that are not excluded as a result of such ESG criteria may affect the Fund's exposure to certain types of investments and may adversely impact the Fund's performance.

Integrating Sustainability Risk: Integrating Sustainability Risk into the Fund's investment process does not assure the mitigation of any or all Sustainability Risk. Any deterioration in the financial profile of an underlying investment affected by a Sustainability Risk may have a corresponding negative impact on the Net Asset Value and/or performance of the investing Fund.

Modelling Risk: The Investment Manager and/or Sub-Investment Manager uses quantitative models in an effort to enhance returns and manage risk. Any imperfections, errors or limitations in these models or in their programming could limit any benefit to the Fund from the use of the models, or could result in incorrect outputs or in investment outcomes different from or opposite to those expected or desired by the Investment Manager and/or Sub-Investment Manager. Such imperfections, errors or limitations might never be detected, or might be detected only after a Fund has sustained a loss (or reduced performance). Further, there can be no assurance that the models will behave as expected in all market conditions.

Screening Risk: There is a risk that the screen provider may make errors, such as incorrect assessment of the screen criteria and/or include incorrect/exclude correct constituents in the screening process or discontinue its screening services. In such circumstances, the Company may change the screen provider although there is no guarantee that a replacement screen provided would result in a similar screening process to that intended or would be available at all.

Securities Lending Risk: If the Fund engages in securities lending, there is a risk that the borrower may default its obligations to return equivalent securities to the loaned securities. In this way the Fund is exposed to counterparty risk. In this event, the Fund could also experience delays in recovering the securities and may incur a capital loss. The Fund could also lose money if the value of collateral held against the loaned securities falls.

SFDR - Fund Classification Risk: The SFDR has phased implementation from 10 March 2021 and imposes new disclosure obligations on financial market participants. As at the date of this Prospectus, the implementing Regulatory Technical Standards (Level 2) for SFDR have been adopted by the European Commission but certain concepts introduced by SFDR are not currently the subject of centralised implementing standards, local guidance or established market practice. The Fund has been assessed and classified in good faith based on the relevant information currently available. As these standards and guidance develop, the SFDR related disclosures and the Article 8 classification indicated in this Supplement and on the Website are subject to change and may no longer apply.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager and/or Sub-Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Subscriptions, Redemptions and Switches

Investors may subscribe for, redeem or switch launched Share Classes on each Dealing Day at the Subscription Price or Redemption Price as applicable. For all subscription, redemption, and switch requests, the relevant form must be received by the UCI Administrator by the Dealing Deadline. Shareholders should refer to section "**Shares**" of the Prospectus for further information.

Investment Objective and Policy

Investment Objective: The objective of the Fund is to generate capital growth over the long term through investment in the fixed-rate, investment grade, Euro-denominated corporate bond market.

Investment Policy: The investment policy of the Fund is to invest in bonds of companies which exhibit lower carbon emissions in the way of current emissions and future emissions (measured by fossil fuel reserves), green labelled bonds and corporate bonds issued by companies that are better positioned for the risks posed by climate change while screening out securities based on an assessment of their adherence to certain ESG criteria defined by the Investment Manager and further detailed in Annex 33.

The Investment Manager, on behalf of the Fund, will invest actively using the Climate Transition Corporate Bond Beta Strategy as further described in the "**Investment Strategies**" section of the Prospectus. The Investment Manager integrates Sustainability Risk into its investment decisions and employs both Thematic ESG Investing and employs a negative and norms-based ESG screen prior to the construction of the portfolio of the Fund and on an ongoing basis, as further described in the "**ESG Integration**", "**Thematic ESG Investing**" and "**ESG Screening**" subsections, respectively, of the "**ESG Investing**" section of the Prospectus.

As at the date of this Supplement the Investment Manager and/or Sub-Investment Manager consider the principal adverse impacts of its investment decisions at the Fund level in order to seek to reduce negative externalities that may be caused by its underlying investments.

This Fund promotes environmental or social characteristics in accordance with SFDR Article 8. More information about the environmental and social characteristics can be found in Annex 33.

Permitted Investments

In order to achieve its investment objective, this Fund will only invest in:

- Fixed-rate, investment grade, Euro-denominated corporate bonds;
- Other UCITS authorised in accordance with the UCITS Directive and/or other UCIs within the meaning of Article 1(2), (a) and (b) of the UCITS Directive whether or not established in an EU Member State;
- Ancillary liquid assets, notably cash, for cash management purposes; and
- Derivatives for efficient portfolio management and investment purposes, limited to swaps, options, futures and forward foreign exchange contracts.

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the 2010 Law and further described in the "**Investment Restrictions and Limits**" section of the Prospectus.

Securities Financing Transactions

	Expected	Maximum
Securities lending	0%-40%*	70%

*Securities lending transactions will be entered into depending on the market opportunities and in particular depending on the market demand to borrow the securities held in the Fund's portfolio at any time and the expected revenues of the transaction. Market demand depends on the specific securities and the reason borrowers enter into the transaction, such as hedging against market risk, use as collateral or to meet required liquidity standards. Market demand is also subject to volatility, seasonality, and liquidity of the underlying securities in the Fund's portfolio. Revenues vary according to the specific security and the demand to borrow them. The maximum exposure could be reached when there is high demand for many securities held in the Fund's portfolio. Each of these factors may vary and cannot be predicted with certainty. Securities lending transactions to be entered into exclusively aim to generate additional capital or income. As such, there is no restriction on the frequency under which the Fund may engage into such type of transactions.

Investor Profile

The typical investors of the Fund are expected to be institutional and intermediary investors with a medium or long term horizon who want to gain exposure to the performance of fixed-rate, investment grade, Euro-denominated corporate bond market and are prepared to accept the risks associated with an investment of this type.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the **"Risk Information**" section of the Prospectus. The following are the principal risks of investing in the Fund:

Concentration Risk: When the Fund focuses its investments in a particular region, the financial, economic, business, and other developments affecting issuers in that region will have a greater effect on the Fund than if it was more diversified. This concentration may also limit the liquidity of the Fund. Investors may buy or sell substantial amounts of the Fund's shares in response to factors affecting or expected to affect a region in which the Fund focuses its investments.

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund's hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund's assets are denominated appreciates.

Debt Securities Risk: The value of debt securities may change significantly depending on economic and interest rate conditions as well as the credit worthiness of the issuer. Issuers of debt securities may fail to meet payment obligations or the credit rating of debt securities may be downgraded. Returns on investments in debt securities could trail the returns on other investment options, including investments in equity securities.

ESG Risk: If the Fund invests in companies and/or issuers taking into account environmental, social and corporate governance (ESG) criteria, then the performance of the Fund may trail the returns of a portfolio of securities that includes companies and/or issuers that are not excluded as a result of such ESG criteria. Investing only in a portfolio of securities that are not excluded as a result of such ESG criteria may affect the Fund's exposure to certain types of investments and may adversely impact the Fund's performance.

Integrating Sustainability Risk: Integrating Sustainability Risk into the Fund's investment process does not assure the mitigation of any or all Sustainability Risk. Any deterioration in the financial profile of an underlying investment affected by a Sustainability Risk may have a corresponding negative impact on the Net Asset Value and/or performance of the investing Fund.

Liquidity Risk: Lack of a ready market or restrictions on resale may limit the ability of the Fund to sell a security at an advantageous time or price or at all. Illiquid securities may trade at a discount from comparable, more liquid investments and may be subject to wide fluctuations in market value. Illiquidity of the Fund's holdings may limit the ability of the Fund to obtain cash to meet redemptions on a timely basis.

Modelling Risk: The Investment Manager uses quantitative models in an effort to enhance returns and manage risk. Any imperfections, errors or limitations in these models or in their programming could limit any benefit to the Fund from the use of the models, or could result in incorrect outputs or in investment outcomes different from or opposite to those expected or desired by the Investment Manager. Such imperfections, errors or limitations might never be detected, or might be detected only after a Fund has sustained a loss (or reduced performance). Further, there can be no assurance that the models will behave as expected in all market conditions.

Screening Risk: There is a risk that the screen provider may make errors, such as incorrect assessment of the screen criteria and/or include incorrect/exclude correct constituents in the screening process or discontinue its screening services. In such circumstances, the Company may change the screen provider although there is no guarantee that a replacement screen provided would result in a similar screening process to that intended or would be available at all.

Securities Lending Risk: If the Fund engages in securities lending, there is a risk that the borrower may default its obligations to return equivalent securities to the loaned securities. In this way the Fund is exposed to counterparty risk. In this event, the Fund could also experience delays in recovering the securities and may incur a capital loss. The Fund could also lose money if the value of collateral held against the loaned securities falls.

SFDR - **Fund Classification Risk**: The SFDR has phased implementation from 10 March 2021 and imposes new disclosure obligations on financial market participants. As at the date of this Prospectus, the implementing Regulatory Technical Standards (Level 2) for SFDR have been adopted by the European Commission but certain concepts introduced by SFDR are not currently the subject of centralised implementing standards, local guidance or established market practice. The Fund has been assessed and classified in good faith based on the relevant information currently available. As these standards and guidance develop, the SFDR related disclosures and the Article 8 classification indicated in this Supplement and on the Website are subject to change and may no longer apply.

Share Class Risk: There is no segregation of liabilities between Classes of the Fund. While the Investment Manager will seek to ensure that gains/losses on and the costs of the relevant FDI associated with any currency hedging strategy will accrue solely to the Class for which it is intended, the transactions could result in liabilities for other Classes.

Subscriptions, Redemptions and Switches

Investors may subscribe for, redeem or switch launched Share Classes on each Dealing Day at the Subscription Price or Redemption Price as applicable, with an appropriate provision for any Redemption Fee, as determined by the Board of Directors. For all subscription, redemption, and switch requests, the relevant form must be received by the UCI Administrator by the Dealing Deadline. Shareholders should refer to section "**Shares**" of the Prospectus for further information.

Investment Objective and Policy

Investment Objective: The objective of the Fund is to generate capital growth over the long term through investment in the fixed-rate, investment grade, US Dollar-denominated corporate bond market.

Investment Policy: The investment policy of the Fund is to invest in bonds of companies which exhibit lower carbon emissions in the way of current emissions and future emissions (measured by fossil fuel reserves), green labelled bonds and corporate bonds issued by companies that are better positioned for the risks posed by climate change while screening out securities based on an assessment of their adherence to certain ESG criteria defined by the Investment Manager and further detailed in Annex 34.

The Investment Manager, on behalf of the Fund, will invest actively using the Climate Transition Corporate Bond Beta Strategy as further described in the "**Investment Strategies**" section of the Prospectus. The Investment Manager integrates Sustainability Risk into its investment decisions and employs both Thematic ESG Investing and employs a negative and norms-based ESG screen prior to the construction of the portfolio of the Fund and on an ongoing basis, as further described in the "**ESG Integration**", "**Thematic ESG Investing**" and "**ESG Screening**" subsections, respectively, of the "**ESG Investing**" section of the Prospectus.

As at the date of this Supplement the Investment Manager and/or Sub-Investment Manager consider the principal adverse impacts of its investment decisions at the Fund level in order to seek to reduce negative externalities that may be caused by its underlying investments.

This Fund promotes environmental or social characteristics in accordance with SFDR Article 8. More information about the environmental and social characteristics can be found in Annex 34.

Permitted Investments

In order to achieve its investment objective, this Fund will only invest in:

- Fixed-rate, investment grade, US Dollar-denominated corporate bonds;
- Other UCITS authorised in accordance with the UCITS Directive and/or other UCIs within the meaning of Article 1(2), (a) and (b) of the UCITS Directive whether or not established in an EU Member State;
- Ancillary liquid assets, notably cash, for cash management purposes; and
- Derivatives for efficient portfolio management and investment purposes, limited to swaps, options, futures and forward foreign exchange contracts.

All investments will be in accordance with the investment objective and policy of the Fund and the investment and borrowing restrictions set forth in the 2010 Law and further described in the "**Investment Restrictions and Limits**" section of the Prospectus.

Securities Financing Transactions

	Expected	Maximum
Securities lending	0%-40%*	70%

*Securities lending transactions will be entered into depending on the market opportunities and in particular depending on the market demand to borrow the securities held in the Fund's portfolio at any time and the expected revenues of the transaction. Market demand depends on the specific securities and the reason borrowers enter into the transaction, such as hedging against market risk, use as collateral or to meet required liquidity standards. Market demand is also subject to volatility, seasonality, and liquidity of the underlying securities in the Fund's portfolio. Revenues vary according to the specific security and the demand to borrow them. The maximum exposure could be reached when there is high demand for many securities held in the Fund's portfolio. Each of these factors may vary and cannot be predicted with certainty. Securities lending transactions to be entered into exclusively aim to generate additional capital or income. As such, there is no restriction on the frequency under which the Fund may engage into such type of transactions.

Investor Profile

The typical investors of the Fund are expected to be institutional and intermediary investors with a medium or long term horizon who want to gain exposure to the performance of fixed-rate, investment-grade, US-Dollar-denominated corporate bond market and are prepared to accept the risks associated with an investment of this type.

Investment Risks

Investment in the Fund carries with it a degree of risk. Investors should read the **"Risk Information**" section of the Prospectus. The following are the principal risks of investing in the Fund:

Concentration Risk: When the Fund focuses its investments in a particular region, the financial, economic, business, and other developments affecting issuers in that region will have a greater effect on the Fund than if it was more diversified. This concentration may also limit the liquidity of the Fund. Investors may buy or sell substantial amounts of the Fund's shares in response to factors affecting or expected to affect a region in which the Fund focuses its investments.

Currency Hedging Risk: Hedges are sometimes subject to imperfect matching between the hedging transaction and the risk sought to be hedged. There can be no assurance that the Fund's hedging transactions will be effective. As the purpose of currency hedging is to try to reduce or eliminate losses caused by exchange rate fluctuations, it can also reduce or eliminate gains where the currency in which the Fund's assets are denominated appreciates.

Debt Securities Risk: The value of debt securities may change significantly depending on economic and interest rate conditions as well as the credit worthiness of the issuer. Issuers of debt securities may fail to meet payment obligations or the credit rating of debt securities may be downgraded. Returns on investments in debt securities could trail the returns on other investment options, including investments in equity securities.

ESG Risk: If the Fund invests in companies and/or issuers taking into account environmental, social and corporate governance (ESG) criteria, then the performance of the Fund may trail the returns of a portfolio of securities that includes companies and/or issuers that are not excluded as a result of such ESG criteria. Investing only in a portfolio of securities that are not excluded as a result of such ESG criteria may affect the Fund's exposure to certain types of investments and may adversely impact the Fund's performance.

Integrating Sustainability Risk: Integrating Sustainability Risk into the Fund's investment process does not assure the mitigation of any or all Sustainability Risk. Any deterioration in the financial profile of an underlying investment affected by a Sustainability Risk may have a corresponding negative impact on the Net Asset Value and/or performance of the investing Fund.

Liquidity Risk: Lack of a ready market or restrictions on resale may limit the ability of the Fund to sell a security at an advantageous time or price or at all. Illiquid securities may trade at a discount from comparable, more liquid investments and may be subject to wide fluctuations in market value. Illiquidity of the Fund's holdings may limit the ability of the Fund to obtain cash to meet redemptions on a timely basis.

Modelling Risk: The Investment Manager uses quantitative models in an effort to enhance returns and manage risk. Any imperfections, errors or limitations in these models or in their programming could limit any benefit to the Fund from the use of the models, or could result in incorrect outputs or in investment outcomes different from or opposite to those expected or desired by the Investment Manager. Such imperfections, errors or limitations might never be detected, or might be detected only after a Fund has sustained a loss (or reduced performance). Further, there can be no assurance that the models will behave as expected in all market conditions.

Screening Risk: There is a risk that the screen provider may make errors, such as incorrect assessment of the screen criteria and/or include incorrect/exclude correct constituents in the screening process or discontinue its screening services. In such circumstances, the Company may change the screen provider although there is no guarantee that a replacement screen provided would result in a similar screening process to that intended or would be available at all.

Securities Lending Risk: If the Fund engages in securities lending, there is a risk that the borrower may default its obligations to return equivalent securities to the loaned securities. In this way the Fund is exposed to counterparty risk. In this event, the Fund could also experience delays in recovering the securities and may incur a capital loss. The Fund could also lose money if the value of collateral held against the loaned securities falls.

SFDR - **Fund Classification Risk**: The SFDR has phased implementation from 10 March 2021 and imposes new disclosure obligations on financial market participants. As at the date of this Prospectus, the implementing Regulatory Technical Standards (Level 2) for SFDR have been adopted by the European Commission but certain concepts introduced by SFDR are not currently the subject of centralised implementing standards, local guidance or established market practice. SFDR Annexes

ANNEX 1

Template pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: State Street Euro Corporate Bond Screened Index Fund (the "Fund")

Legal entity identifier: BGDNQR0UF4DXP46WRG43

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☐ **Yes**

☒ **No**

☐ It will make a minimum of **sustainable investments with an environmental objective**: ___%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of **sustainable investments with a social objective: ___%**

☒ **It promotes Environmental/ Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 30% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The environmental and social characteristics promoted by the Fund is a negative and norms-based screen applied to the portfolio of the Fund to screen out securities based on an assessment of their adherence to ESG criteria, i.e. international norms in relation to environmental and social protection. Specifically, the Fund promotes certain environmental characteristics through exclusion of investments in companies identified as being non-compliant with UNGC Principles relating to environment (Principles 7 to 9), companies associated with Severe ESG Controversies and companies which are active in thermal coal, arctic oil & gas exploration, and oil sands extraction.

The Fund also promotes certain social characteristics through exclusion of investments in companies identified as being non-compliant with UNGC Principles relating to human rights (Principles 1 and 2), labour standards (Principles 3 to 6) , anti-corruption (Principle 10) and companies associated with Severe ESG Controversies, controversial weapons, civilian firearms and tobacco. The UNGC Principles is the world largest corporate sustainability initiative aimed at companies to align their strategies and operations with universal principles on human rights, labour, environment and anti-corruption, and take actions that advance societal goals.

The Fund may use additional ESG screens from time to time in order to exclude securities of issuers based on their involvement with an activity that is deemed non-compliant with one or more of such ESG criteria.

The Fund further promotes environmental and social characteristics through its allocation of a portion

of the portfolio to sustainable investments. In order for the security to qualify as a sustainable investment, it must be classified as a "Leader" or "Outperformer" as determined by the Investment Manager using the ESG score generated by its proprietary process. No reference benchmark has been designated to attain the environmental and social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The attainment of the environmental characteristics is measured through:

- % of the portfolio invested in securities that are included in the negative and norms based screen specifically related to environmental characteristics, namely companies identified as being non-compliant with UNGC Principles in regards to the environment, companies associated with Severe ESG Controversies and companies which are active in thermal coal, arctic oil & gas exploration, and oil sands extraction.

The attainment of the social characteristics promoted by the Fund is measured through:

- % of the portfolio invested in securities that are included in the negative and norms based screen specifically related to social characteristics, namely companies identified as being non-compliant with UNGC Principles and companies associated with Severe ESG Controversies, controversial weapons, civilian firearms, and tobacco.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The objectives of the sustainable investments made by the Fund are to invest in securities that are classified as:

- Aligned to the Climate Bonds Initiatives (CBI) green bond database screening process and / or
- Leaders or Outperformers according to the ESG of the Investment Manager's proprietary ESG scoring system.

The CBI is a mature, globally accepted standard for screening and determining that a bond is financing assets consistent with achieving the goals of the Paris Climate Agreement. In order for the security to qualify as a sustainable investment, the bond must meet the standards required by the CBI to be included in its green bond database. Please note that the screening methodology applied to the portfolio of the Fund by the Investment Manager may not always fully apply to the green bonds held by the Fund that meet the standards required by the CBI to be included in the green bond database.

The ESG scoring system developed by the Investment Manager leverages multiple data sources and aligns them to widely accepted, transparent materiality frameworks to generate a unique ESG score for listed companies. It measures the performance of a company's business operations and governance as it relates to financially material ESG challenges facing the company's industry.

The Investment Manager draws on data from multiple ESG data providers and leverages the Sustainable Accounting Standards Board's ("SASB") - widely accepted, transparent materiality framework to generate the unique score that measures the performance of a company's business operations and governance as it relates to industry-specific ESG Factors. The SASB materiality framework focuses on financial materiality of certain ESG metrics as defined by specific industry. The company's ESG score allows for a global comparison of companies' ESG performance within a sector or industry.

In order for the security to qualify as a sustainable investment, the company must be a "Leader" or "Outperformer" as determined by the Investment Manager using the ESG score generated by its proprietary process. Companies qualified as "Leaders" or "Outperformers" are deemed to manage and mitigate long-term, financially-material sustainable risks better than its peers and thus operate a more sustainable business model.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager applies a negative and norms-based screen to the Fund to screen out securities based on an assessment of their adherence to ESG criteria including securities of companies identified as being non-compliant with UNGC Principles (relating to environmental protection, human rights, labour standards, anti-corruption), securities of companies associated with Severe ESG Controversies, thermal coal, arctic oil & gas exploration, oil sands extraction, civilian firearms, controversial weapons and tobacco. By applying the relevant negative and norms-based screen, the Investment Manager deems the Fund's sustainable investments not to cause significant harm to any environmental or social sustainable investment objective.

How have the indicators for adverse impacts on sustainability factors been taken into account?

As described below, the Fund considers Principal Adverse Impacts ("PAIs") on sustainability factors by applying the negative and norms-based ESG screen prior to the construction of the portfolio.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund excludes companies that the Investment Manager has identified as being non-compliant with UNGC Principles as part of the negative screening utilised by the Fund. The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are considered as part of the UNGC principles assessment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

X **Yes,**

The Fund considers Principal Adverse Impacts ("PAI") on sustainability factors by applying the negative and norms-based ESG screen prior to the construction of the portfolio. Specifically, the Fund considers

- Exposure to companies active in the fossil fuel sector
- Violations of UN Global Compact Principles
- Exposure to controversial weapons

Further information on the PAIs will be found in the periodic reports for the Fund.

No

What investment strategy does this financial product follow?

The investment policy of the Fund is to track the performance of the Bloomberg Euro Aggregate Corporate Index as closely as possible using the Stratified Sampling Strategy, as further described in section 8.1 of the Prospectus and the Relevant Supplement, while seeking to minimise as far as possible the tracking difference between the Fund's performance and that of the Index while screening out securities based on an assessment of their adherence to certain ESG criteria. The Fund will seek to build a representative portfolio that matches the risk and return characteristics of the applicable Index in the most efficient way, including, but not limited to, risks related to currencies, countries, sectors, quality, maturity duration and issuers. Consequently, a Fund using this strategy will typically hold only a subset of the securities included in the Index.

In implementing this strategy, securities in the Fund are selected primarily from the constituents of the Index and the Investment Manager applies the negative and norms-based ESG screen prior to the construction of the portfolio of the Fund and on an ongoing basis. This results in the exclusion of any securities from the portfolio based on an assessment of their adherence to certain ESG criteria defined by the Investment Manager. The Fund will screen out securities of issuers that fail to comply with UNGC Principles relating to environmental protection, human rights, labour standards and anti-corruption or are associated with Severe ESG Controversies, controversial weapons, civilian firearms, tobacco, thermal coal, arctic oil & gas exploration, and oil sands extraction. The Fund may use additional ESG screens from time to time in order to exclude securities of issuers based on their involvement with an activity that is deemed non-compliant with one or more of such ESG criteria referred to in the previous sentence.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

In order to attain the environmental and social characteristics promoted by the Fund, the Investment Manager applies a binding negative and norms-based ESG screen prior to the construction of the portfolio and on an ongoing basis described in the previous section.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

N/A

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The assessment of good governance practices is implemented through the negative screening utilised by the Fund. Companies deemed by the Investment Manager to comply with UNGC Principles are considered to exhibit good governance.

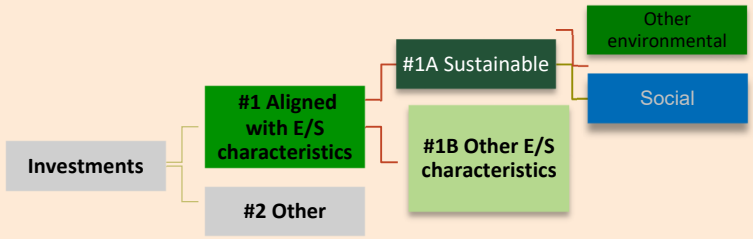

What is the asset allocation planned for this financial product?

Asset allocation describes the share of investments in specific assets.

The Investment Manager employs a binding ESG methodology which aims to build a portfolio where at least 90% of the Fund's assets are invested in securities which are #1 Aligned with environmental and social characteristics as outlined in the table below. . It is intended that, within such portion of the portfolio, at least 30% of the Fund's assets are invested in securities which are sustainable investments with environmental and / or social objectives, at the point of rebalance of the portfolio which typically occurs on a monthly basis. The remaining portion (<10%) of the portfolio, consisting of cash as well as cash equivalents in place held at the Investment Manager's discretion, will be classified under #2 Other in the below table and will not be aligned with the promoted environmental and social characteristics.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

To the extent that the Fund may use financial derivative instruments, these will not be used to attain the environmental or social characteristics promoted by the Fund.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to invest in any "sustainable investment" within the meaning of the EU Taxonomy, but only within the meaning of the SFDR regulation. However, the position will be kept under periodic review giving due consideration to market

not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

developments as the availability of reliable data increases over time.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]

[ ] **Yes:**

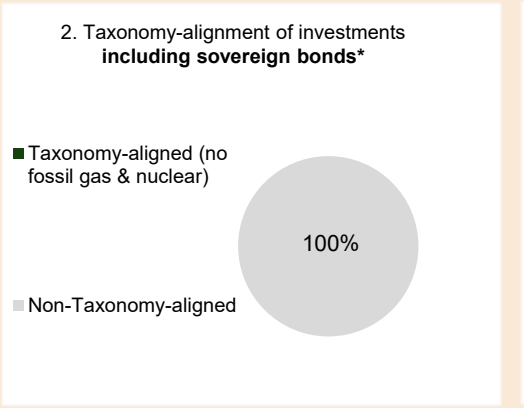

[ ] In fossil gas [ ] In nuclear energy

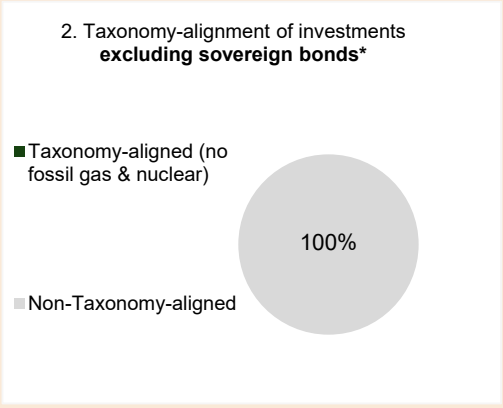

[X] **No**

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What is the minimum share of investments in transitional and enabling activities?

As the Fund does not commit to invest any "sustainable investment" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy is therefore also set at 0%.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The Fund intends to invest a minimum of 0% of the Fund's securities in sustainable investments with an environmental objective, that are not aligned with the EU Taxonomy. The assessment of the Fund's investments qualifying as sustainable is determined on or around each portfolio rebalance which typically occurs on a quarterly basis.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulations (EU) 2022/1214.

What is the minimum share of socially sustainable investments?

The Fund intends to invest a minimum of 0% of the Fund's securities in sustainable investments with a social objective, that are not aligned with the EU Taxonomy. The assessment of the Fund's investments qualifying as sustainable is determined on or around each portfolio rebalance which typically occurs on a quarterly basis.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The Fund may hold a portion of its assets in cash or cash equivalents or use financial derivative instruments at the Investment Manager's discretion, which would be classified under #2 Other in the above table. Such assets will not be aligned with environmental and social characteristics nor will there be any environmental or social safeguards in place.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

N/A

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

More product-specific information can be found on the website:

Fund Finder (ssga.com)

Please search for State Street Euro Corporate Bond Screened Index Fund under the "Fund Groups" heading.

ANNEX 2

Template pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name: State Street SRI Euro Corporate Bond Index Fund (the "Fund")

Legal entity identifier: 5493004EVBREZGIHMC71

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☐ **Yes**

☒ **No**

☐ It will make a minimum of **sustainable investments with an environmental objective**: ___%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of **sustainable investments with a social objective: ___%**

☒ **It promotes Environmental/ Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 30% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promotes E/S characteristics, but **will not make any sustainable investments**

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

What environmental and/or social characteristics are promoted by this financial product?

The State Street SRI Euro Corporate Bond Index Fund is an index fund tracking the performance of the Markit iBoxx Euro SRI Corporate Bond Custom Index ("Index"). The environmental and social characteristics promoted by the Fund is the Index designated by the Fund and more specifically the Sustainable and Responsible Investment (SRI) overlay which is used in the index construction.

The Fund further promotes environmental and social characteristics through its allocation of a portion of the portfolio to sustainable investments. In order for the security to qualify as a sustainable investment, it must be classified as aligned to the Climate Bond Initiative green bond database screening process and/or be classified as a "Leader" or "Outperformer" as determined by the Investment Manager using the ESG score generated by its proprietary process.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by the Fund is the SRI overlay produced by the Index provider and incorporated into the index construction methodology. The proportion of the Fund's portfolio

invested in securities included in the Index will constitute sustainability indicator used to measure the attainment of each of the environmental or social characteristics promoted by the Fund.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The objectives of the sustainable investments made by the Fund are to invest in securities that are classified as:

- Aligned to the Climate Bond Initiatives (CBI) green bond database screening process and / or
- Leaders or Outperformers according to the ESG score of the Investment Manager's proprietary ESG scoring system.

The CBI is a mature, globally accepted standard for screening and determining that a bond is financing assets consistent with achieving the goals of the Paris Climate Agreement. In order for the security to qualify as a sustainable investment, the bond must meet the standards required by the CBI to be included in its green bond database. Please note that the screening methodology applied to the portfolio of the Fund by the Investment Manager may not always fully apply to the green bonds held by the Fund that meet the standards required by the CBI to be included in the green bond database.

The ESG scoring system developed by the Investment Manager leverages multiple data sources and aligns them to widely accepted, transparent materiality frameworks to generate a unique ESG score for listed companies. It measures the performance of a company's business operations and governance as it relates to financially material ESG challenges facing the company's industry.

The Investment Manager draws on data from multiple ESG data providers and leverages the Sustainable Accounting Standards Board's ("SASB") widely accepted, transparent materiality framework to generate the unique score that measures the performance of a company's business operations and governance as it relates to industry-specific ESG Factors. The SASB materiality framework focuses on financial materiality of certain ESG metrics as defined by specific industry. The company's ESG score allows for a global comparison of companies' ESG performance within a sector or industry.

In order for the security to qualify as a sustainable investment, the company must be a "Leader" or "Outperformer" as determined by the Investment Manager using the ESG score generated by its proprietary process. Companies qualified as "Leaders" or "Outperformers" are deemed to manage and mitigate long-term, financially-material sustainable risks better than its peers and thus operate a more sustainable business model.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

The Fund is an index tracking fund. The Index methodology, and more specifically the Sustainable and Responsible Investment (SRI) overlay which is used in the index construction, ensures that the Fund's sustainable investments do not cause significant harm to any environmental or social sustainable investment objective.

How have the indicators for adverse impacts on sustainability factors been taken into account?

The Index provider considers Principal Adverse Impacts ("PAIs") on sustainability factors by applying the Sustainable and Responsible Investment (SRI) overlay on all of the Index constituents.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Index methodology applies Sustainable and Responsible Investment (SRI) overlay as part of the Index construction process. The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are considered as part of the SRI overlay assessment process.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

X **Yes,**

The Fund considers Principal Adverse Impacts ("PAI") on sustainability factors in the application of the SRI overlay methodology to the Index constituents. Specifically, the Index considers:

- Violations of UN Global Compact Principles
- Exposure to controversial weapons

Further information on the PAIs will be found in the periodic reports for the Fund.

No

What investment strategy does this financial product follow?

The investment policy of the Fund is to track the performance of the Index as closely as possible using the Stratified Sampling Strategy as further described in the "Investment Strategies" section of the Prospectus, while seeking to minimise as far as possible the tracking difference between the Fund's performance and that of the Index. The Fund will seek to build a representative portfolio that matches the risk and return characteristics of the applicable Index in the most efficient way, including, but not limited to, risks related to currencies, countries, sectors, quality, maturity duration and issuers. Consequently, a Fund using this strategy will typically hold only a subset of the securities included in the Index.

Securities in the Fund are selected primarily from the constituents of the Index. The Fund also may, in exceptional circumstances, invest in securities not included in the Index but that are believed to closely reflect the risk and distribution characteristics of securities of the Index. The Index measures the performance of the Euro corporate bond market, screened based on sustainability criteria. The Index applies an SRI overlay to construct the Index and screen out issuers based on global standards, controversies, product involvement and ESG

Risk Ratings.

For the avoidance of doubt, the exclusions applied by the Fund are aligned with the Paris-aligned Benchmark (PAB) exclusions contained in Article 12(1) of CDR (EU) 2020/1818, which are applied in the context of the ESMA Guidelines on funds' names.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

Securities in the Fund are selected primarily from the constituents of the Index, while the Index provider applies the SRI overlay on all of the Index constituents.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

N/A

What is the policy to assess good governance practices of the investee companies?

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

The assessment of good governance practices is implemented through the SRI overlay utilised by the Index. Companies deemed by the Index provider to comply with UNGC Principles are considered to exhibit good governance.

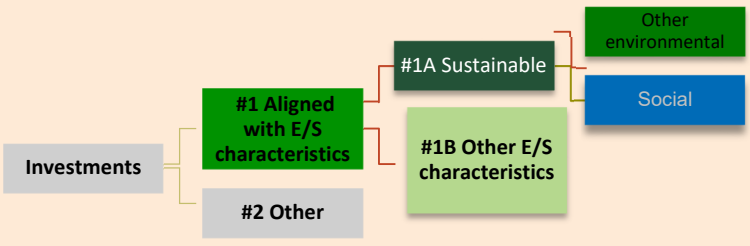

What is the asset allocation planned for this financial product?

Asset allocation describes the share of investments in specific assets.

The Investment Manager employs a binding ESG methodology which aims to build a portfolio where at least 90% of the Fund's assets are invested in securities which are #1 Aligned with environmental and social characteristics as outlined in the table below. It is intended that, within such portion of the portfolio, at least 30% of the Fund's assets are invested in securities which are sustainable investments with environmental and / or social objectives, at the point of rebalance of the portfolio which typically occurs on a monthly basis. The remaining portion (<10%) of the portfolio, consisting of cash as well as cash equivalents in place held at the Investment Manager's discretion, will be classified under #2 Other in the below table and will not be aligned with the promoted environmental and social characteristics.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product*?**

To the extent that the Fund may use financial derivative instruments, these will not be used to attain the environmental or social characteristics promoted by the Fund.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to invest in any "sustainable investment" within the meaning of the EU Taxonomy, but only within the meaning of the SFDR regulation. However, the position will be kept under periodic review giving due consideration to market developments as the availability of reliable data increases over time.

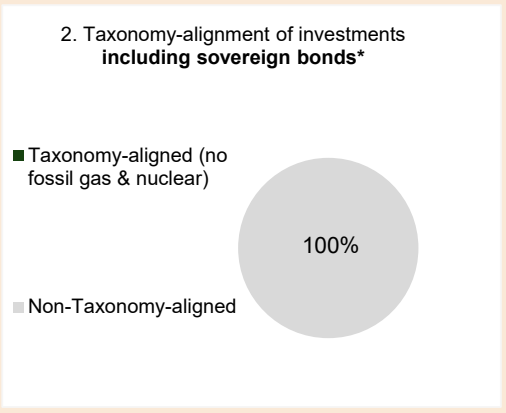

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]

	Yes:
	In fossil gas
	In nuclear energy
X	**No**

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulations (EU) 2022/1214.

What is the minimum share of investments in transitional and enabling activities?

As the Fund does not commit to invest any "sustainable investment" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy is therefore also set at 0%.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The Fund intends to invest a minimum of 0% of the Fund's securities in sustainable investments with an environmental objective, that are not aligned with the EU Taxonomy. The assessment of the Fund's investments qualifying as sustainable is determined on or around each portfolio rebalance which typically occurs on a monthly basis.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of socially sustainable investments?

The Fund intends to invest a minimum of 0% of the Fund's securities in sustainable investments with a social objective, that are not aligned with the EU Taxonomy. The assessment of the Fund's investments qualifying as sustainable is determined on or around each portfolio rebalance which typically occurs on a quarterly basis.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The Fund may hold a portion of its assets in cash or cash equivalents or use financial derivative instruments at the Investment Manager's discretion, which would be classified under #2 Other in the above table. Such assets will not be aligned with environmental and social characteristics nor will there be any environmental or social safeguards in place.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Fund is an index fund tracking the performance of the Markit iBoxx Euro SRI Corporate Bond Custom Index. The Index has been designated for the purpose of attaining the environmental and social characteristics promoted by the Fund. The Index uses an SRI overlay to construct the Index and screen out issuers based on global standards, controversies, product involvement and ESG Risk Ratings.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

The Index is reviewed and rebalanced on a monthly basis on the last business day of the month. The SRI overlay is reviewed semi-annually in March and September month end rebalancings.

Investors should note the Index Risk, Index Error Risk and Tracking Risk disclosures included in the Risk Information section of the Prospectus.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

The Fund rebalances on a monthly basis, in line with the Index rebalancing frequency. Investors should note in this respect the Index Risk, Index Error

Risk and Index Tracking Risk disclosures included in the Risk Information section of the Prospectus.

How does the designated index differ from a relevant broad market index?

The Index is based broadly on the Markit iBoxx EUR Corporates Index, its parent index, which captures the performance of EUR denominated bonds issued by corporate issuers and rated by at least one of the following three ratings services: Fitch Ratings, Moody's Investors Services, or S&P Global Ratings. The Fund's designated Index (i.e., Markit iBoxx Euro SRI Corporate Bond Custom Index) applies an SRI overlay to the to the constituents of the parent index to screen out issuers based on global standards, controversies, product involvement and ESG Risk Ratings.

Where can the methodology used for the calculation of the designated index be found?

Please refer to Markit IBoxx's index methodology description which can be found at the following link:

Indices Web (ihsmarkit.com)

More product-specific information can be found on the website:

Fund Finder (ssga.com)

Please search for State Street SRI Euro Corporate Bond Index Fund under the "Fund Groups" heading.

ANNEX 3

Template pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name: State Street Emerging Markets Tilted Local Currency Government Bond Index Fund (the "Fund")

Legal entity identifier: 5493001XUAOLYG4Z1216

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☐ **Yes** ☒ **No**

☐ It will make a minimum of **sustainable investments with an environmental objective**: ___%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of **sustainable investments with a social objective: ___%**

☐ **It promotes Environmental/ Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of _% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ with a social objective

☒ It promotes E/S characteristics, but **will not make any sustainable investments**

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

What environmental and/or social characteristics are promoted by this financial product?

The State Street Emerging Markets Tilted Local Currency Government Bond Fund is an index fund tracking the performance of the J.P. Morgan ESG-Government Bond Index Emerging Markets Global Diversified ("Index"). The environmental and social characteristics promoted by the Fund is the Index designated by the Fund and more specifically the J.P. Morgan ESG issuer scores ("JESG") which are used in the Index construction.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by the Fund are the ESG ratings produced by the Index provider and incorporated into the index construction methodology. The proportion of the Fund's portfolio invested in securities included in the Index will constitute sustainability indicator used to measure the attainment of each of the environmental or social characteristics promoted by the Fund.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The Fund does not commit to making sustainable investments within the meaning of the SFDR or the Taxonomy Regulation.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

The Fund does not commit to investing in Sustainable Investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

X **Yes,**

The Fund considers Principal Adverse Impacts ("PAI") on sustainability factors in the application of the ESG scoring and screening methodology to the Index constituents. Specifically, the Index considers:

- Greenhouse gas emissions of investee countries
- Investee countries subject to social violations

Further information on the PAIs will be found in the periodic reports for the Fund.

No

What investment strategy does this financial product follow?

The investment policy of the Fund is to track the performance of the Index as closely as possible using the Stratified Sampling Strategy as further described in the "Investment Strategies" section of the Prospectus, while seeking to minimise as far as possible the tracking difference between the Fund's performance and that of the Index. The Fund will seek to build a representative portfolio that matches the risk and return characteristics of the applicable Index in the most efficient way, including, but not limited to, risks related to

currencies, countries, sectors, quality, maturity duration and issuers. Consequently, a Fund using this strategy will typically hold only a subset of the securities included in the Index.

Securities in the Fund are selected primarily from the constituents of the Index. The Fund also may, in exceptional circumstances, invest in securities not included in the Index but that are believed to closely reflect the risk and distribution characteristics of securities of the Index. The Index measures the performance of investible local currency emerging markets government bonds. The Index applies an ESG scoring and screening methodology using the JESG issuer scores to tilt the Index constituents towards issuers ranked higher on ESG criteria and green bond issues, and to underweight and remove issuers that rank lower.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

Securities in the Fund are selected primarily from the constituents of the Index, while the Index provider applies the binding ESG scoring and screening methodology on all of the Index constituents.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

N/A

What is the policy to assess good governance practices of the investee companies?

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

The relevant requirement does not apply to the government bonds in line with the European Commission "Questions related to Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector (SFDR)" published on 25 May 2022.

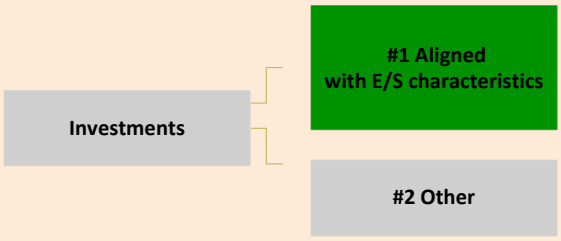

What is the asset allocation planned for this financial product?

Asset allocation describes the share of investments in specific assets.

The Investment Manager employs a binding ESG methodology which aims to build a portfolio where at least 90% of the Fund's assets are invested in securities which are #1 Aligned with environmental and social characteristics as outlined in the table below. The remaining portion (<10%) of the portfolio, consisting of cash as well as cash equivalents in place held at the Investment Manager's discretion, will be classified under #2 Other in the below table and will not be aligned with the promoted environmental and social characteristics.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

To the extent that the Fund may use financial derivative instruments, these will not be used to attain the environmental or social characteristics promoted by the Fund.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]

Yes:

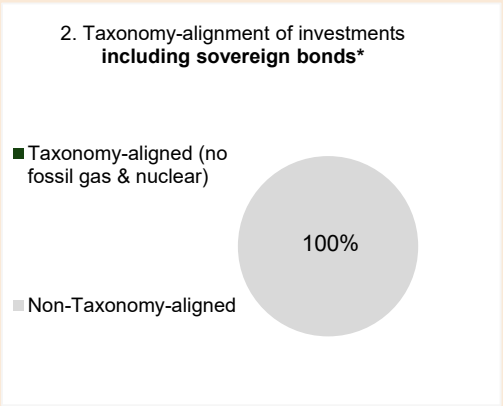

In fossil gas In nuclear energy

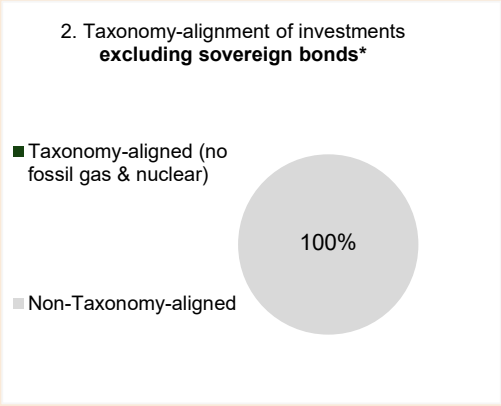

X **No**

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What is the minimum share of investments in transitional and enabling activities?

N/A

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulations (EU) 2022/1214.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The Fund promotes environmental and social characteristics but does not commit to making any sustainable investments. As a consequence, the Fund does not commit to a minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of socially sustainable investments?

N/A

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The Fund may hold a portion of its assets in cash or cash equivalents or use financial derivative instruments at the Investment Manager's discretion, which would be classified under #2 Other in the above table. Such assets will not be aligned with environmental and social characteristics nor will there be any environmental or social safeguards in place.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Fund is an index fund tracking the performance of the J.P. Morgan ESG-Government Bond Index Emerging Markets Global Diversified. The Index has been designated for the purpose of attaining the environmental and social characteristics promoted by the Fund. The Index applies an ESG scoring and screening methodology using the JESG issuer scores to tilt towards issuers ranked higher on ESG criteria and green bond issues, and to underweight and remove issuers that rank lower.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

  The Index methodology provides for ongoing review and rebalances on the last U.S. business day of the month.

  Investors should note the Index Risk, Index Error Risk and Tracking Risk disclosures included in the Risk Information section of the Prospectus.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

  The Fund rebalances on a monthly basis, in line with the Index rebalancing frequency. Investors should note in this respect the Index Risk, Index Error Risk and Index Tracking Risk disclosures included in the Risk Information section of the Prospectus.

How does the designated index differ from a relevant broad market index?

The Index is based on the J.P. Morgan GBI-EM Global Diversified Index, its parent index, which captures the performance of bonds issued by emerging market governments and denominated in the local currency of the issuer. The Fund's designated Index (i.e., J.P. Morgan ESG Government Bond Index Emerging Markets Global Diversified) applies an ESG scoring and screening methodology using the JESG issuer scores to the constituent of the parent index to tilt the Index constituents towards issuers ranked higher on ESG criteria and green bond issues, and to underweight and remove issuers that rank lower.

Where can the methodology used for the calculation of the designated index be found?

Please refer to J.P. Morgan ESG GBI-EM Global Diversified Index methodology:

https://www.jpmorgan.com/country/US/en/jpmorgan/investbk/solutions/research/indices/product

ANNEX 4

Template pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: State Street Global High Yield Bond Screened Index Fund (the "Fund")

Legal entity identifier: 549300WNYUYK9I10ZX34

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☐ **Yes**

☒ **No**

☐ It will make a minimum of **sustainable investments with an environmental objective**: ___%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of **sustainable investments with a social objective: ___%**

☒ **It promotes Environmental/ Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 15% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The environmental and social characteristics promoted by the Fund is a negative and norms-based screen applied to the portfolio of the Fund to screen out securities based on an assessment of their adherence to ESG criteria, i.e. international norms in relation to environmental and social protection. Specifically, the Fund promotes certain environmental characteristics through exclusion of investments in companies identified as being non-compliant with UNGC Principles relating to environment (Principles 7 to 9), companies associated with Severe ESG Controversies and companies which are active in thermal coal, arctic oil & gas exploration, and oil sands extraction.

The Fund also promotes certain social characteristics through exclusion of investments in companies identified as being non-compliant with UNGC Principles relating to human rights (Principles 1 and 2), labour standards (Principles 3 to 6), anti-corruption (Principle 10) and companies associated with Severe ESG Controversies, controversial weapons, civilian firearms and tobacco. The UNGC Principles is the world largest corporate sustainability initiative aimed at companies to align their strategies and operations with universal principles on human rights, labour, environment and anti-corruption, and take actions that advance societal goals.

The Fund may use additional ESG screens from time to time in order to exclude securities of issuers based on their involvement with an activity that is deemed non-compliant with one or more of such ESG criteria.

The Fund further promotes environmental and social characteristics through its allocation of a portion of the portfolio to sustainable investments. In order for the security to qualify as a sustainable investment, it must be classified as a "Leader" or "Outperformer" as determined by the Investment Manager using the ESG score generated by its proprietary process.

No reference benchmark has been designated to attain the environmental and social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The attainment of the environmental characteristics is measured through:

- % of the portfolio invested in securities that are included in the negative and norms based screen specifically related to environmental characteristics, namely companies identified as being non-compliant with UNGC Principles in regards to the environment, companies associated with Severe ESG Controversies and companies which are active in thermal coal, arctic oil & gas exploration, and oil sands extraction.

The attainment of the social characteristics promoted by the Fund is measured through:

- % of the portfolio invested in securities that are included in the negative and norms based screen specifically related to social characteristics, namely companies identified as being non-compliant with UNGC Principles and companies associated with Severe ESG Controversies, controversial weapons, civilian firearms, and tobacco.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The objectives of the sustainable investments made by the Fund are to invest in securities that are classified as:

- Aligned to the Climate Bonds Initiatives (CBI) green bond database screening process and / or
- Leaders or Outperformers according to the ESG of the Investment Manager's proprietary ESG scoring system.

The CBI is a mature, globally accepted standard for screening and determining that a bond is financing assets consistent with achieving the goals of the Paris Climate Agreement. In order for the security to qualify as a sustainable investment, the bond must meet the standards required by the CBI to be included in its green bond database. Please note that the screening methodology applied to the portfolio of the Fund by the Investment Manager may not always fully apply to the green bonds held by the Fund that meet the standards required by the CBI to be included in the green bond database.

The ESG scoring system developed by the Investment Manager leverages multiple data sources and aligns them to widely accepted, transparent materiality frameworks to generate a unique ESG score for listed companies. It measures the performance of a company's business operations and governance as it relates to financially material ESG challenges facing the company's industry.

The Investment Manager draws on data from multiple ESG data providers and leverages the Sustainable Accounting Standards Board's ("SASB") - widely accepted, transparent materiality framework to generate the unique score that measures the performance of a company's business operations and governance as it relates to industry-specific ESG Factors. The SASB materiality framework focuses on financial materiality of certain ESG metrics as defined by specific industry. The company's ESG score allows for a global comparison of companies' ESG performance within a sector or industry.

In order for the security to qualify as a sustainable investment, the company must be a "Leader" or "Outperformer" as determined by the Investment Manager using the ESG score generated by its proprietary process. Companies qualified as "Leaders" or "Outperformers" are deemed to manage and mitigate long-term, financially-material sustainable risks better than its peers and thus operate a more sustainable business model.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager applies a negative and norms-based screen to the Fund to screen out securities based on an assessment of their adherence to ESG criteria including securities of companies identified as being non-compliant with UNGC Principles (relating to environmental protection, human rights, labour standards, anti-corruption), securities of companies associated with Severe ESG Controversies, thermal coal, arctic oil & gas exploration, oil sands extraction civilian firearms, controversial weapons and tobacco. By applying the relevant negative and norms-based screen, the Investment Manager deems the Fund's sustainable investments not to cause significant harm to any environmental or social sustainable investment objective.

How have the indicators for adverse impacts on sustainability factors been taken into account?

As described below, the Fund considers Principal Adverse Impacts ("PAIs") on sustainability factors by applying the negative and norms-based ESG screen prior to the construction of the portfolio.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund excludes companies that the Investment Manager has identified as being non-compliant with UNGC Principles as part of the negative screening utilised by the Fund. The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are considered as part of the UNGC principles assessment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

X **Yes,** The Fund considers Principal Adverse Impacts ("PAI") on sustainability factors by applying the negative and norms-based ESG screen prior to the construction of the portfolio. Specifically, the Fund considers

- Exposure to companies active in the fossil fuel sector
- Violations of UN Global Compact Principles
- Exposure to controversial weapons

Further information on the PAIs will be found in the periodic reports for the Fund.

No

What investment strategy does this financial product follow?

The investment policy of the Fund is to track the performance of the ICE BofA Global High Yield Constrained Index as closely as possible using the Stratified Sampling Strategy, as further described in section 8.1 of the Prospectus and the Relevant Supplement, while seeking to minimise as far as possible the tracking difference between the Fund's performance and that of the Index while screening out securities based on an assessment of their adherence to certain ESG criteria. The Fund will seek to build a representative portfolio that matches the risk and return characteristics of the applicable Index in the most efficient way, including, but not limited to, risks related to currencies, countries, sectors, quality, maturity duration and issuers. Consequently, a Fund using this strategy will typically hold only a subset of the securities included in the Index.

In implementing this strategy, securities in the Fund are selected primarily from the constituents of the Index and the Investment Manager applies the negative and norms-based ESG screen prior to the construction of the portfolio of the Fund and on an ongoing basis. This results in the exclusion of any securities from the portfolio based on an assessment of their adherence to certain ESG criteria defined by the Investment Manager. The Fund will screen out securities of issuers that fail to comply with UNGC principles relating to environmental protection, human rights, labour standards and anti-corruption or are associated with Severe ESG Controversies, controversial weapons, civilian firearms, tobacco, thermal coal, arctic oil & gas exploration, and oil sands extraction. The Fund may use additional ESG screens from time to time in order to exclude securities of issuers based on their involvement with an activity that is deemed non-compliant with one or more of such ESG criteria referred to in the previous sentence.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

In order to attain the environmental and social characteristics promoted by the Fund, the Investment Manager applies a binding negative and norms-based ESG screen prior to the construction of the portfolio and on an ongoing basis described in the previous section.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

N/A

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The assessment of good governance practices is implemented through the negative screening utilised by the Fund. Companies deemed by the Investment Manager to comply with UNGC Principles are considered to exhibit good governance.

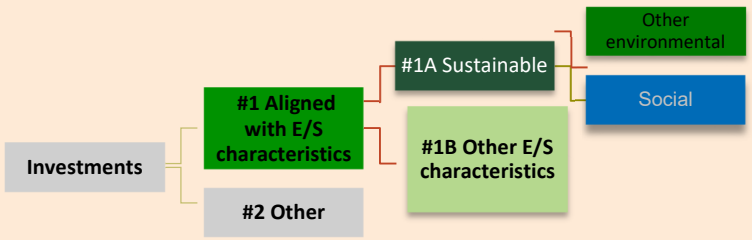

Asset allocation describes the share of investments in specific assets.

What is the asset allocation planned for this financial product?

The Investment Manager employs a binding ESG methodology which aims to build a portfolio where at least 90% of the Fund's assets are invested in securities which are #1 Aligned with environmental and social characteristics as outlined in the table below. It is intended that, within such portion of the portfolio, at least 15% of the Fund's assets are invested in securities which are sustainable investments with environmental and / or social objectives, at the point of rebalance of the portfolio which typically occurs on a monthly basis. The remaining portion (<10%) of the portfolio, consisting of cash as well as cash equivalents in place held at the Investment Manager's discretion, will be classified under #2 Other in the below table and will not be aligned with the promoted environmental and social characteristics.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
  operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

To the extent that the Fund may use financial derivative instruments, these will not be used to attain the environmental or social characteristics promoted by the Fund.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to invest in any "sustainable investment" within the meaning of the EU Taxonomy, but only within the meaning of the SFDR regulation. However, the position will be kept under periodic review giving due consideration to market developments as the availability of reliable data increases over time.

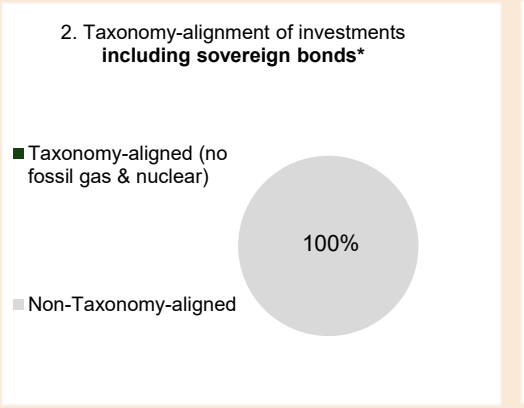

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]

	Yes:
	In fossil gas
	In nuclear energy
X	**No**

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What is the minimum share of investments in transitional and enabling activities?

As the Fund does not commit to invest any "sustainable investment" within the meaning of the EU Taxonomy, the minimum share of investments in transitional andenabling activities within the meaning of the EU Taxonomy is therefore also set at 0%.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulations (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The Fund intends to invest a minimum of 0% of the Fund's securities in sustainable investments with an environmental objective, that are not aligned with the EU Taxonomy. The assessment of the Fund's investments qualifying as sustainable is determined on or around each portfolio rebalance which typically occurs on a quarterly basis.

What is the minimum share of socially sustainable investments?

The Fund intends to invest a minimum of 0% of the Fund's securities in sustainable investments with a social objective, that are not aligned with the EU Taxonomy. The assessment of the Fund's investments qualifying as sustainable is determined on or around each portfolio rebalance which typically occurs on a quarterly basis.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The Fund may hold a portion of its assets in cash or cash equivalents or use financial derivative instruments at the Investment Manager's discretion, which would be classified under #2 Other in the above table. Such assets will not be aligned with environmental and social characteristics nor will there be any environmental or social safeguards in place.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

N/A

Where can I find more product specific information online?

More product-specific information can be found on the website:

Fund Finder (ssga.com)

Please search for State Street Global High Yield Bond Screened Index Fund under the "Fund Groups" heading.

ANNEX 5

Template pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name: State Street Emerging Markets Tilted Hard Currency Government Bond Index Fund (the "Fund")

Legal entity identifier: 984500B59FHT702E1167

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☐ **Yes** ☒ **No**

☐ It will make a minimum of **sustainable investments with an environmental objective**: ___%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of **sustainable investments with a social objective: ___%**

☐ **It promotes Environmental/ Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of _% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ with a social objective

☒ It promotes E/S characteristics, but **will not make any sustainable investments**

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

What environmental and/or social characteristics are promoted by this financial product?

The State Street Emerging Markets Tilted Hard Currency Government Bond Fund is an index fund tracking the performance of the J.P. Morgan ESG EMBI Global Diversified Index ("Index"). The environmental and social characteristics promoted by the Fund is the Index designated by the Fund and more specifically the J.P. Morgan ESG issuer scores ("JESG") which are used in the Index construction.

In addition, the Index excludes issuers based on their ESG characteristics, considering both their JESG scores and their involvement with certain business activities as outlined in the Index methodology.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by the Fund are the ESG ratings and exclusions and negative screens produced by the Index provider and incorporated into the index construction methodology. The proportion of the Fund's portfolio invested in securities included in the Index will constitute sustainability indicator used to measure the attainment of each of the environmental or social characteristics promoted by the Fund.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The Fund does not commit to making sustainable investments within the meaning of the SFDR or the Taxonomy Regulation.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

The Fund does not commit to investing in Sustainable Investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

X **Yes,**

The Fund considers Principal Adverse Impacts ("PAI") on sustainability factors in the application of the ESG scoring and screening methodology to the Index constituents. Specifically, the Index considers:

- Greenhouse gas emissions of investee countries
- Investee countries subject to social violations

Further information on the PAIs will be found in the periodic reports for the Fund.

No

What investment strategy does this financial product follow?

The investment policy of the Fund is to track the performance of the Index as closely as possible using the Stratified Sampling Strategy as further described in the "Investment Strategies" section of the Prospectus, while seeking to minimise as far as possible the

tracking difference between the Fund's performance and that of the Index. The Fund will seek to build a representative portfolio that matches the risk and return characteristics of the applicable Index in the most efficient way, including, but not limited to, risks related to currencies, countries, sectors, quality, maturity duration and issuers. Consequently, a Fund using this strategy will typically hold only a subset of the securities included in the Index.

Securities in the Fund are selected primarily from the constituents of the Index. The Fund also may, in exceptional circumstances, invest in securities not included in the Index but that are believed to closely reflect the risk and distribution characteristics of securities of the Index. The Index measures the performance of publicly issued U.S. dollar-denominated emerging markets government bonds. The Index applies an ESG scoring and screening methodology using the JESG issuer scores and JESG ethical exclusions and negative screening to tilt the Index constituents towards issuers ranked higher on ESG criteria and green bond issues, and to underweight and remove issuers that rank lower.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

Securities in the Fund are selected primarily from the constituents of the Index, while the Index provider applies the binding ESG scoring and screening methodology on all of the Index constituents.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

N/A

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The relevant requirement does not apply to the government bonds in line with the European Commission "Questions related to Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector (SFDR)" published on 25 May 2022.

What is the asset allocation planned for this financial product?

Asset allocation describes the share of investments in specific assets.

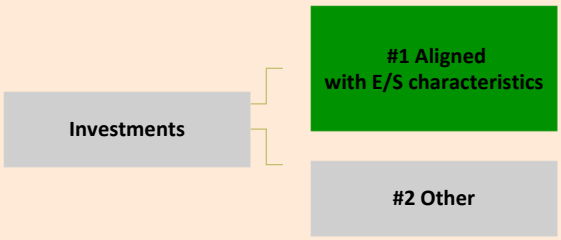

The Investment Manager employs a binding ESG methodology which aims to build a portfolio where at least 90% of the Fund's assets are invested in securities which are #1 Aligned with environmental and social characteristics as outlined in the table below. The remaining portion (<10%) of the portfolio, consisting of cash as well as cash equivalents in place held at the Investment Manager's discretion, will be classified under #2 Other in the below table and will not be aligned with the promoted environmental and social characteristics.

Taxonomy-aligned activities are expressed as a share of:

— **turnover** reflecting the share of revenue from green activities of investee companies

— **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

To the extent that the Fund may use financial derivative instruments, these will not be used to attain the environmental or social characteristics promoted by the Fund.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]

	Yes:
	In fossil gas
	In nuclear energy
X	**No**

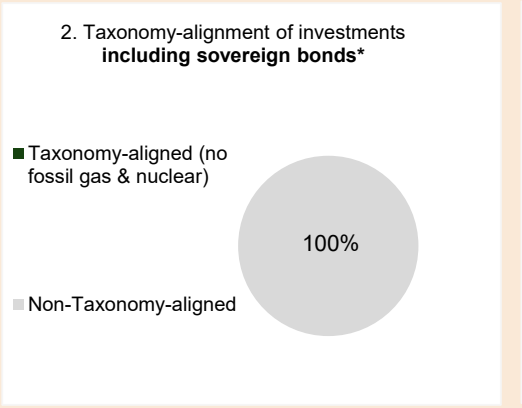

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

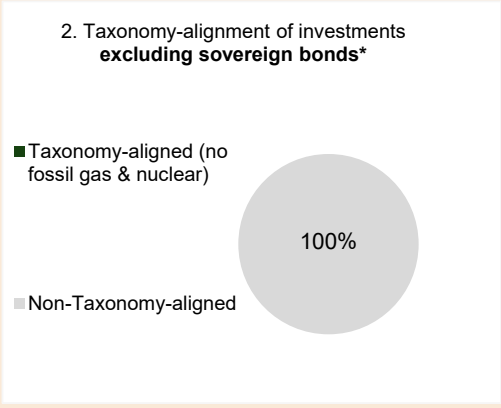

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulations (EU) 2022/1214.

Transitional activities are

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

This graph represents 100% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What is the minimum share of investments in transitional and enabling activities?

N/A

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

The Fund promotes environmental and social characteristics but does not commit to making any sustainable investments. As a consequence, the Fund does not commit to a minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

What is the minimum share of socially sustainable investments?

N/A

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The Fund may hold a portion of its assets in cash or cash equivalents or use financial derivative instruments at the Investment Manager's discretion, which would be classified under #2 Other in the above table. Such assets will not be aligned with environmental and social characteristics nor will there be any environmental or social safeguards in place.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or

The Fund is an index fund tracking the performance of the J.P. Morgan ESG EMBI Global Diversified Index. The Index has been designated for the purpose of attaining the environmental and social characteristics promoted by the Fund. The Index applies an ESG scoring and screening methodology using the JESG issuer scores and JESG ethical exclusions and negative screening to tilt towards issuers

social characteristics that they promote.

ranked higher on ESG criteria and green bond issues, and to underweight and remove issuers that rank lower.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

  The Index methodology provides for ongoing review and rebalances on the last U.S. business day of the month.

  Investors should note the Index Risk, Index Error Risk and Tracking Risk disclosures included in the Risk Information section of the Prospectus.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

  The Fund rebalances on a monthly basis, in line with the Index rebalancing frequency. Investors should note in this respect the Index Risk, Index Error Risk and Index Tracking Risk disclosures included in the Risk Information section of the Prospectus.

- ***How does the designated index differ from a relevant broad market index?***

  The Index is based on the J.P. Morgan EMBI Global Diversified Index, its parent index, which captures the performance of publicly issued U.S dollar-denominated emerging market government bonds. The Fund's designated Index (i.e., J.P. Morgan ESG EMBI Global Diversified Index) applies an ESG scoring and screening methodology using the JESG issuer scores and JESG ethical exclusions and negative screening to the constituent of the parent index to tilt the Index constituents towards issuers ranked higher on ESG criteria and green bond issues, and to underweight and remove issuers that rank lower.

- ***Where can the methodology used for the calculation of the designated index be found?***

  Please refer to J.P. Morgan ESG EMBI Global Diversified Index methodology:

ANNEX 6

Template pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: State Street Japan Screened Index Equity Fund (the "Fund")

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It will make a minimum of **sustainable investments with an environmental objective**: ___%	☒ **It promotes Environmental/ Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 25% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It will make a minimum of **sustainable investments with a social objective: ___%**	☐ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The State Street Japan Screened Index Equity Fund is an index fund tracking the performance of the MSCI Japan Screened Choice Index ("Index"). The environmental and social characteristics are promoted by a negative and norms-based screen applied to the Index designated by the Fund to screen out securities based on an assessment of their adherence to ESG criteria. The Index represents the performance of the broad Japanese equity market while excluding companies that are associated with controversial weapons, nuclear weapons, civilian firearms, fossil fuel extraction, thermal coal power, and tobacco or fail to comply with United Nations Global Compact (UNGC) Principles. The UNGC Principles is the world largest corporate sustainability initiative aimed at companies to align their strategies and operations with universal principles on human rights, labour, environment and anti-corruption, and take actions that advance societal goals.

The Fund further promotes environmental and social characteristics through its allocation of a portion of the portfolio to sustainable investments. In order for the security to qualify as a sustainable investment, it must be classified as a "Leader" or "Outperformer" as determined by the Investment Manager using the ESG score generated by its proprietary process.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The Index represents the performance of the broad Japanese equity market while excluding companies that fail to comply with UNGC Principles or are associated with controversial weapons, civilian firearms, nuclear weapons, fossil fuel extraction, thermal coal power, and tobacco. Consequently, the attainment of the associated environmental and social characteristics is measured through the Index exclusions of companies that are associated with controversial weapons, civilian firearms, nuclear weapons, fossil fuel extraction, thermal coal power and tobacco; and the companies that fail to comply with the UNGC Principles. The proportion of the Fund's portfolio invested in securities included in the Index will constitute sustainability indicator used to measure the attainment of each of the environmental or social characteristics promoted by the Fund.

As such, the Fund does not intend to hold any securities that do not meet the relevant ESG criteria above.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The objectives of the sustainable investments made by the Fund are to invest in securities that are classified as:

- Leaders or Outperformers according to the ESG score of the Investment Manager's proprietary ESG scoring system.

The ESG scoring system developed by the Investment Manager leverages multiple data sources and aligns them to widely accepted, transparent materiality frameworks to generate a unique ESG score for listed companies. It measures the performance of a company's business operations and governance as it relates to financially material ESG challenges facing the company's industry.

The Investment Manager draws on data from multiple ESG data providers and leverages the Sustainable Accounting Standards Board's ("SASB") widely accepted, transparent materiality framework to generate the unique score that measures the performance of a company's business operations and governance as it relates to industry-specific ESG Factors. The SASB materiality framework focuses on financial materiality of certain ESG metrics as defined by specific industry. The company's ESG score allows for a global comparison of companies' ESG performance within a sector or industry.

In order for the security to qualify as a sustainable investment, the company must be a "Leader" or "Outperformer" as determined by the Investment Manager using the ESG score generated by its proprietary process. Companies qualified as "Leaders" or "Outperformers" are deemed to manage and mitigate long-term, financially-material sustainable risks better than its peers and thus operate a more sustainable business model.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

The Fund is an index tracking fund. The Index methodology applies negative and norms-based screen to screen out securities based on an assessment of their adherence to ESG criteria including securities of companies identified as being non-compliant with UNGC Principles (relating to environmental protection, human rights, labour standards, anti-corruption), and securities of companies associated with controversial weapons, nuclear weapons, civilian firearms, fossil fuel extraction, thermal coal power, and tobacco. The Index methodology, therefore, ensures that the Fund's sustainable investments do not cause significant harm to any environmental or social sustainable investment objective.

How have the indicators for adverse impacts on sustainability factors been taken into account?

The Index provider considers Principal Adverse Impacts ("PAIs") on sustainability factors by applying the negative and norms-based ESG screen on all of the Index constituents.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Index methodology excludes companies identified as being non-compliant with UNGC Principles as part of the applicable negative screening. The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are considered as part of the UNGC Principles assessment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

X **Yes,**

The Fund considers Principal Adverse Impacts ("PAI") on sustainability factors in the application of the Index exclusions. Specifically, the Index considers

- Exposure to companies active in the fossil fuel sector
- Violations of UN Global Compact Principles
- Exposure to controversial weapons

Further information on the PAIs will be found in the periodic reports for the Fund.

No

What investment strategy does this financial product follow?

The investment policy of the Fund is to track the performance of the Index as closely as possible using the Replication Strategy as further described in the "Investment Strategies" section of the Prospectus, while seeking to minimise as far as possible the tracking difference between the Fund's performance and that of the Index.

Securities in the Fund are selected primarily from the constituents of the Index. Essentially, the portfolio of the Fund would be a near mirror-image of the Index. The Fund also may, in exceptional circumstances, invest in securities not included in the Index but that are believed to closely reflect the risk and distribution characteristics of securities of the Index. The Fund may also hold (i) securities which, in the opinion of the Investment Manager, are likely to become part of the Index and (ii) securities acquired through corporate activity which may not form part of the Index. Securities in the Index are weighted by free float-adjusted market capitalisation after screening out securities based on an assessment of their adherence to ESG criteria i.e., non-compliance with UNGC Principles, association with controversial weapons, civilian firearms, nuclear weapons, fossil fuel extraction, and tobacco.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

Securities in the Fund are selected primarily from the constituents of the Index, while the Index provider applies the exclusion criteria on all of the Index constituents. This results in the exclusion of any securities considered as not compliant with the UNGC Principles (international norms in relation to the environment, human rights & communities, labour rights & supply chains, customers and governance). Additionally, any securities associated with Severe ESG Controversies, controversial weapons, civilian firearms, nuclear weapons, fossil fuel extraction, thermal coal power or tobacco are excluded from the Index.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

N/A

What is the policy to assess good governance practices of the investee companies?

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

The assessment of good governance practices is implemented through the negative screening utilised by the Index. Companies deemed by the Index provider to comply with UNGC Principles are considered to exhibit good governance.

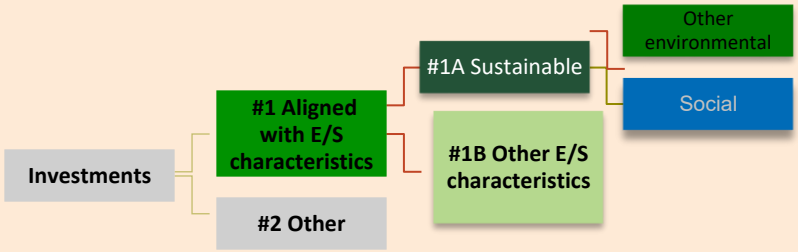

What is the asset allocation planned for this financial product?

Asset allocation describes the share of investments in specific assets.

The Investment Manager employs a binding ESG methodology which aims to build a portfolio where at least 90% of the Fund's assets are invested in securities which are #1 Aligned with environmental and social characteristics as outlined in the table below. It is intended that, within such portion of the portfolio, at least 25% of the Fund's assets are invested in securities which are sustainable investments with environmental and / or social objectives, at the point of rebalance of the portfolio which typically occurs on a quarterly basis. The remaining portion (<10%) of the portfolio, consisting of cash as well as cash equivalents in place held at the Investment Manager's discretion, will be classified under #2 Other in the below table and will not be aligned with the promoted environmental and social characteristics.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

To the extent that the Fund may use financial derivative instruments, these will not be used to attain the environmental or social characteristics promoted by the Fund.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to invest in any "sustainable investment" within the meaning of the EU Taxonomy, but only within the meaning of the SFDR regulation. However, the position will be kept under periodic review giving due consideration to market developments as the availability of reliable data increases over time.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]

[ ] **Yes:**

[ ] In fossil gas [ ] In nuclear energy

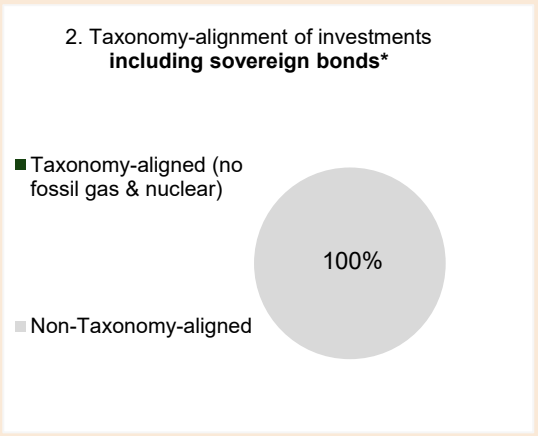

[X] **No**

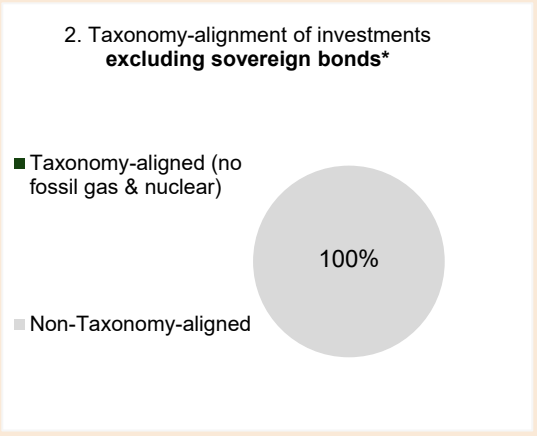

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulations (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What is the minimum share of investments in transitional and enabling activities?

As the Fund does not commit to invest any "sustainable investment" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy is therefore also set at 0%.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

The Fund intends to invest a minimum of 0% of the Fund's securities in sustainable investments with an environmental objective, that are not aligned with the EU Taxonomy. The assessment of the Fund's investments qualifying as sustainable is determined on or around each portfolio rebalance which typically occurs on a quarterly basis.

What is the minimum share of socially sustainable investments?

The Fund intends to invest a minimum of 0% of the Fund's securities in sustainable investments with a social objective, that are not aligned with the EU Taxonomy. The assessment of the Fund's investments qualifying as sustainable is determined on or around each portfolio rebalance which typically occurs on a quarterly basis.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The Fund may hold a portion of its assets in cash or cash equivalents or use financial derivative instruments at the Investment Manager's discretion, which would be classified under #2 Other in the above table. Such assets will not be aligned with

environmental and social characteristics nor will there be any environmental or social safeguards in place.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Fund is an index fund tracking the performance of the MSCI Japan Screened Choice Index. The Index has been designated for the purpose of attaining the environmental and social characteristics promoted by the Fund. The Index integrates exclusion criteria relating to companies that fail to comply with UNGC Principles or are associated with controversial weapons, civilian firearms, nuclear weapons, fossil fuel extraction, thermal coal power, and tobacco.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

  The Index is reviewed and rebalanced on a quarterly basis, with the changes implemented as of the close of the last business day of February, May, August and November.

  Investors should note the Index Risk, Index Error Risk and Tracking Risk disclosures included in the Risk Information section of the Prospectus.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

  The Fund rebalances on a quarterly basis, in line with the Index rebalancing frequency. Investors should note in this respect the Index Risk, Index Error Risk and Index Tracking Risk disclosures included in the Risk Information section of the Prospectus.

- ***How does the designated index differ from a relevant broad market index?***

  The Index is based on MSCI Japan Index, its parent index, which captures large and mid-cap representation across the Japanese equity market. The Fund's designated Index (i.e., MSCI Japan Screened Choice Index) represents the performance of the broad Japanese equity markets while excluding companies that fail to comply with UNGC Principles or are associated with controversial weapons, civilian firearms, nuclear weapons, fossil fuel extraction, thermal coal power, and tobacco. Constituent selection is based on data from MSCI ESG Research.

- ***Where can the methodology used for the calculation of the designated index be found?***

  Please refer to MSCI's index methodology description which can be found at the following link:

  https://www.msci.com/index-methodology (index code 731089)

☐ It will make a minimum of **sustainable investments with a social objective: ___%**

☐ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The State Street Switzerland Screened Index Equity Fund is an index fund tracking the performance of the MSCI Switzerland Screened Choice Index ("Index"). The environmental and social characteristics are promoted by a negative and norms-based screen applied to the Index designated by the Fund to screen out securities based on an assessment of their adherence to ESG criteria. The Index represents the performance of the broad Swiss equity market while excluding companies that are associated with controversial weapons, fossil fuel extraction, thermal coal power, civilian firearms, nuclear weapons and tobacco; or fail to comply with United Nations Global Compact (UNGC) Principles. The UNGC Principles is the world largest corporate sustainability initiative aimed at companies to align their strategies and operations with universal principles on human rights, labour, environment and anti-corruption, and take actions that advance societal goals.
The Fund further promotes environmental and social characteristics through its allocation of a portion of the portfolio to sustainable investments. In order for the security to qualify as a sustainable investment, it must be classified as a "Leader" or "Outperformer" as determined by the Investment Manager using the ESG score generated by its proprietary process.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The Index represents the performance of the broad Swiss equity market while excluding companies that are associated with controversial weapons fossil fuel extraction, thermal coal power, civilian firearms, nuclear weapons and tobacco; or fail to comply with UNGC Principles. Consequently, the attainment of the associated environmental and social characteristics is measured through the Index exclusions of companies that are associated with controversial weapons, fossil fuel extraction, thermal coal power, civilian firearms, nuclear weapons and tobacco; and the companies that fail to comply with the UNGC Principles. The proportion of the Fund's portfolio invested in securities included in the Index will constitute sustainability indicator used to measure the attainment of each of the environmental or social characteristics promoted by the Fund.

As such, the Fund does not intend to hold any securities that do not meet the relevant ESG criteria above.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The objectives of the sustainable investments made by the Fund are to invest in securities that are classified as:

- Leaders or Outperformers according to the ESG score of the Investment Manager's proprietary ESG scoring system.

The ESG scoring system developed by the Investment Manager leverages multiple data sources and aligns them to widely accepted, transparent materiality frameworks to generate a unique ESG score for listed companies. It measures the performance of a company's business operations and governance as it relates to financially material ESG challenges facing the company's industry.

The Investment Manager draws on data from multiple ESG data providers and leverages the Sustainable Accounting Standards Board's ("SASB") widely accepted, transparent materiality framework to generate the unique score that measures the performance of a company's business operations and governance as it relates to industry-specific ESG Factors. The SASB materiality framework focuses on financial materiality of certain ESG metrics as defined by specific industry. The company's ESG score allows for a global comparison of companies' ESG performance within a sector or industry.

In order for the security to qualify as a sustainable investment, the company must be a "Leader" or "Outperformer" as determined by the Investment Manager using the ESG score generated by its proprietary process. Companies qualified as "Leaders" or "Outperformers" are deemed to manage and mitigate long-term, financially-material sustainable risks better than its peers and thus operate a more sustainable business model.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

T The Fund is an index tracking fund. The Index methodology applies negative and norms-based screen to screen out securities based on an assessment of their adherence to ESG criteria including securities of companies identified as being non-compliant with UNGC Principles (relating to environmental protection, human rights, labour standards, anti-corruption), and securities of companies associated with controversial weapons, nuclear weapons, civilian firearms, fossil fuel extraction, thermal coal power, and tobacco. The Index methodology, therefore, ensures that the Fund's sustainable investments do not cause significant harm to any environmental or social sustainable investment objective.

How have the indicators for adverse impacts on sustainability factors been taken into account?

The Index provider considers Principal Adverse Impacts ("PAIs") on sustainability factors by

applying the negative and norms-based ESG screen on all of the Index constituents.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Index methodology excludes companies identified as being non-compliant with UNGC Principles as part of the applicable negative screening. The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are considered as part of the UNGC Principles assessment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

X **Yes,**

The Fund considers Principal Adverse Impacts ("PAI") on sustainability factors in the application of the Index exclusions. Specifically, the Index considers

- Violations of UN Global Compact Principles
- Exposure to controversial weapons
- Exposure to companies active in fossil fuel sector

Further information on the PAIs will be found in the periodic reports for the Fund.

No

What investment strategy does this financial product follow?

The investment policy of the Fund is to track the performance of the Index as closely as possible using the Replication Strategy as further described in the "Investment Strategies" section of the Prospectus, while seeking to minimise as far as possible the tracking difference between the Fund's performance and that of the Index.

Securities in the Fund are selected primarily from the constituents of the Index. Essentially, the portfolio of the Fund would be a near mirror-image of the Index. The Fund also may, in exceptional circumstances, invest in securities not included in the Index but that are believed to closely reflect the risk and distribution characteristics of securities of the Index. The Fund may also hold (i) securities which, in the opinion of the Investment Manager, are likely to become part of the Index and (ii) securities acquired through corporate activity which may not form part of the Index. Securities in the Index are weighted by free float-adjusted market capitalisation after screening out securities based on an assessment of their adherence to ESG criteria i.e., non-compliance with UNGC Principles and association with controversial weapons, fossil fuel extraction, thermal coal power, civilian firearms, nuclear weapons and tobacco;.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

Securities in the Fund are selected primarily from the constituents of the Index, while the Index provider applies the exclusion criteria on all of the Index constituents. This results in the exclusion of any securities considered as not compliant with the UNGC Principles (international norms in relation to the environment, human rights & communities, labour rights & supply chains, customers and governance). Additionally, any securities associated with controversial weapons, fossil fuel extraction, thermal coal power, civilian firearms, nuclear weapons and tobacco are excluded from the Index.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

N/A

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The assessment of good governance practices is implemented through the negative screening utilised by the Index. Companies deemed by the Index provider to comply with UNGC Principles are considered to exhibit good governance.

What is the asset allocation planned for this financial product?

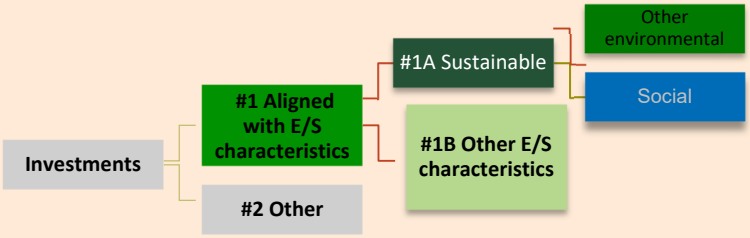

Asset allocation describes the share of investments in specific assets.

The Investment Manager employs a binding ESG methodology which aims to build a portfolio where at least 90% of the Fund's assets are invested in securities which are #1 Aligned with environmental and social characteristics as outlined in the table below. It is intended that, within such portion of the portfolio, at least 35% of the Fund's assets are invested in securities which are sustainable investments with environmental and / or social objectives, at the point of rebalance of the portfolio which typically occurs on a quarterly basis. The remaining portion (<10%) of the portfolio, consisting of cash as well as cash equivalents in place held at the Investment Manager's discretion, will be classified under #2 Other in the below table and will not be aligned with the promoted environmental and social characteristics.

Taxonomy-aligned activities are expressed as a share of:

— **turnover** reflecting the share of revenue from green activities of investee companies

— **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments..

***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product*?**

To the extent that the Fund may use financial derivative instruments, these will not be used to attain the environmental or social characteristics promoted by the Fund.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What is the minimum share of investments in transitional and enabling activities?

As the Fund does not commit to invest any "sustainable investment" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy is therefore also set at 0%.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The Fund intends to invest a minimum of 0% of the Fund's securities in sustainable investments with an environmental objective, that are not aligned with the EU Taxonomy. The assessment of the Fund's investments qualifying as sustainable is determined on or around each portfolio rebalance which typically occurs on a quarterly basis.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of socially sustainable investments?

The Fund intends to invest a minimum of 0% of the Fund's securities in sustainable investments with a social objective, that are not aligned with the EU Taxonomy. The assessment of the Fund's investments qualifying as sustainable is determined on or around each portfolio rebalance which typically occurs on a quarterly basis.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The Fund may hold a portion of its assets in cash or cash equivalents or use financial derivative instruments at the Investment Manager's discretion, which would be classified under #2 Other in the above table. Such assets will not be aligned with environmental and social characteristics nor will there be any environmental or social safeguards in place.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Fund is an index fund tracking the performance of the MSCI Switzerland Screened Choice Index. The Index has been designated for the purpose of attaining the environmental and social characteristics promoted by the Fund. The Index integrates exclusion criteria relating to companies that are associated with controversial weapons, fossil fuel extraction, thermal coal power, civilian firearms, nuclear weapons and tobacco; or that fail to comply with the UNGC Principles.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

  The Index is reviewed and rebalanced on a quarterly basis, with the changes implemented as of the close of the last business day of February, May, August and November.

  Investors should note the Index Risk, Index Error Risk and Tracking Risk disclosures included in the Risk Information section of the Prospectus.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

  The Fund rebalances on a quarterly basis, in line with the Index rebalancing frequency. Investors should note in this respect the Index Risk, Index Error Risk and Index Tracking Risk disclosures included in the Risk Information section of the Prospectus.

- ***How does the designated index differ from a relevant broad market index?***

  The Index is based on MSCI Switzerland Index, its parent index, which captures large and mid-cap representation across the Swiss equity market. The Fund's designated Index (i.e., MSCI Switzerland Screened Choice Index) represents the performance of the broad Swiss equity market while excluding companies that are associated with controversial weapons, fossil fuel extraction, thermal coal power, civilian firearms, nuclear weapons and tobacco or fail to comply with UNGC Principles. Constituent selection is based on data from MSCI ESG Research.

- ***Where can the methodology used for the calculation of the designated index be found?***

  Please refer to MSCI's index methodology description which can be found at the following link:

  https://www.msci.com/index-methodology (index code)

ANNEX 8

Template pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: State Street UK Screened Index Equity Fund (the "Fund")

Legal entity identifier: 549300OYYMMG23TESK26

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☐ **Yes**

☒ **No**

☐ It will make a minimum of **sustainable investments with an environmental objective**: ___%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of **sustainable investments with a social objective: ___%**

☒ **It promotes Environmental/ Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 35% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The State Street UK Screened Index Equity Fund is an index fund tracking the performance of the MSCI UK Screened Choice Index ("Index"). The environmental and social characteristics are promoted by a negative and norms-based screen applied to the Index designated by the Fund to screen out securities based on an assessment of their adherence to ESG criteria. The Index represents the performance of the broad UK equity market while excluding companies that are associated with controversial weapons, fossil fuel extraction, thermal coal power, civilian firearms, nuclear weapons and tobacco; or fail to comply with United Nations Global Compact (UNGC) Principles. The UNGC Principles is the world largest corporate sustainability initiative aimed at companies to align their strategies and operations with universal principles on human rights, labour, environment and anti-corruption, and take actions that advance societal goals.

The Fund further promotes environmental and social characteristics through its allocation of a portion of the portfolio to sustainable investments. In order for the security to qualify as a sustainable investment, it must be classified as a "Leader" or "Outperformer" as determined by the Investment Manager using the ESG score generated by its proprietary process.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The Index represents the performance of the broad UK equity market while excluding companies that are associated with controversial weapons fossil fuel extraction, thermal coal power, civilian firearms, nuclear weapons and tobacco; or fail to comply with UNGC Principles. Consequently, the attainment of the associated environmental and social characteristics is measured through the Index exclusions of companies that are associated with controversial weapons, fossil fuel extraction, thermal coal power, civilian firearms, nuclear weapons and tobacco; and the companies that fail to comply with the UNGC Principles. The proportion of the Fund's portfolio invested in securities included in the Index will constitute sustainability indicator used to measure the attainment of each of the environmental or social characteristics promoted by the Fund.

As such, the Fund does not intend to hold any securities that do not meet the relevant ESG criteria above.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The objectives of the sustainable investments made by the Fund are to invest in securities that are classified as:

- Leaders or Outperformers according to the ESG score of the Investment Manager's proprietary ESG scoring system.

The ESG scoring system developed by the Investment Manager leverages multiple data sources and aligns them to widely accepted, transparent materiality frameworks to generate a unique ESG score for listed companies. It measures the performance of a company's business operations and governance as it relates to financially material ESG challenges facing the company's industry.

The Investment Manager draws on data from multiple ESG data providers and leverages the Sustainable Accounting Standards Board's ("SASB") widely accepted, transparent materiality framework to generate the unique score that measures the performance of a company's business operations and governance as it relates to industry-specific ESG Factors. The SASB materiality framework focuses on financial materiality of certain ESG metrics as defined by specific industry. The company's ESG score allows for a global comparison of companies' ESG performance within a sector or industry.

In order for the security to qualify as a sustainable investment, the company must be a "Leader" or "Outperformer" as determined by the Investment Manager using the ESG score generated by its proprietary process. Companies qualified as "Leaders" or "Outperformers" are deemed to manage and mitigate long-term, financially-material sustainable risks better than its peers and thus operate a more sustainable business model.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

The Fund is an index tracking fund. The Index methodology applies negative and norms-based screen to screen out securities based on an assessment of their adherence to ESG criteria including securities of companies identified as being non-compliant with UNGC Principles (relating to environmental protection, human rights, labour standards, anti-corruption), and securities of companies associated with controversial weapons, nuclear weapons, civilian firearms, fossil fuel extraction, thermal coal power, and tobacco. The Index methodology, therefore, ensures that the Fund's sustainable investments do not cause significant harm to any environmental or social sustainable investment objective.

How have the indicators for adverse impacts on sustainability factors been taken into account?

The Index provider considers Principal Adverse Impacts ("PAIs") on sustainability factors by applying the negative and norms-based ESG screen on all of the Index constituents.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Index methodology excludes companies identified as being non-compliant with UNGC Principles as part of the applicable negative screening. The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are considered as part of the UNGC Principles assessment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

X **Yes,**

The Fund considers Principal Adverse Impacts ("PAI") on sustainability factors in the application of the Index exclusions. Specifically, the Index considers

- Violations of UN Global Compact Principles
- Exposure to controversial weapons
- Exposure to companies active in fossil fuel sector

Further information on the PAIs will be found in the periodic reports for the Fund.

No

What investment strategy does this financial product follow?

The investment policy of the Fund is to track the performance of the Index as closely as possible using the Replication Strategy as further described in the "Investment Strategies" section of the Prospectus, while seeking to minimise as far as possible the tracking difference between the Fund's performance and that of the Index.

Securities in the Fund are selected primarily from the constituents of the Index. Essentially, the portfolio of the Fund would be a near mirror-image of the Index. The Fund

also may, in exceptional circumstances, invest in securities not included in the Index but that are believed to closely reflect the risk and distribution characteristics of securities of the Index. The Fund may also hold (i) securities which, in the opinion of the Investment Manager, are likely to become part of the Index and (ii) securities acquired through corporate activity which may not form part of the Index. Securities in the Index are weighted by free float-adjusted market capitalisation after screening out securities based on an assessment of their adherence to ESG criteria i.e., non-compliance with UNGC Principles and association with controversial weapons, fossil fuel extraction, thermal coal power, civilian firearms, nuclear weapons and tobacco;

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

Securities in the Fund are selected primarily from the constituents of the Index, while the Index provider applies the exclusion criteria on all of the Index constituents. This results in the exclusion of any securities considered as not compliant with the UNGC Principles (international norms in relation to the environment, human rights & communities, labour rights & supply chains, customers and governance). Additionally, any securities associated with controversial weapons, fossil fuel extraction, thermal coal power, civilian firearms, nuclear weapons and tobacco are excluded from the Index.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

N/A

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The assessment of good governance practices is implemented through the negative screening utilised by the Index. Companies deemed by the Index provider to comply with UNGC Principles are considered to exhibit good governance.

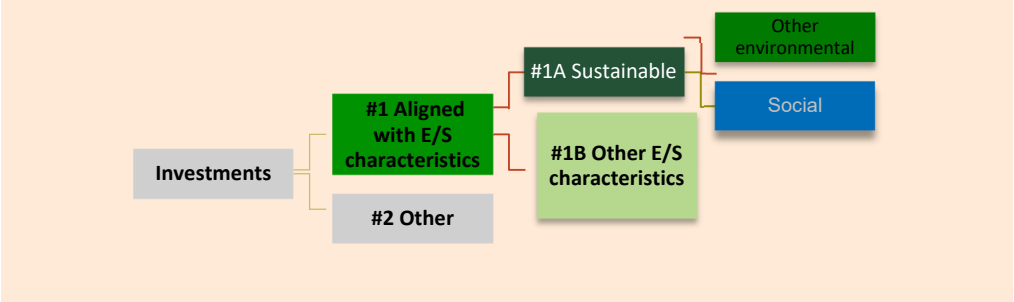

What is the asset allocation planned for this financial product?

Asset allocation describes the share of investments in specific assets.

The Investment Manager employs a binding ESG methodology which aims to build a portfolio where at least 90% of the Fund's assets are invested in securities which are #1 Aligned with environmental and social characteristics as outlined in the table below. It is intended that, within such portion of the portfolio, at least 35% of the Fund's assets are invested in securities which are sustainable investments with environmental and / or social objectives, at the point of rebalance of the portfolio which typically occurs on a quarterly basis. The remaining portion (<10%) of the portfolio, consisting of cash as well as cash equivalents in place held at the Investment Manager's discretion, will be classified under #2 Other in the below table and will not be aligned with the promoted environmental and social characteristics.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure**

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product*?**

To the extent that the Fund may use financial derivative instruments, these will not be used to attain the environmental or social characteristics promoted by the Fund.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to invest in any "sustainable investment" within the meaning of the EU Taxonomy, but only within the meaning of the SFDR regulation. However, the position will be kept under periodic review giving due consideration to market developments as the availability of reliable data increases over time.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]

	Yes:
	In fossil gas
	In nuclear energy
X	**No**

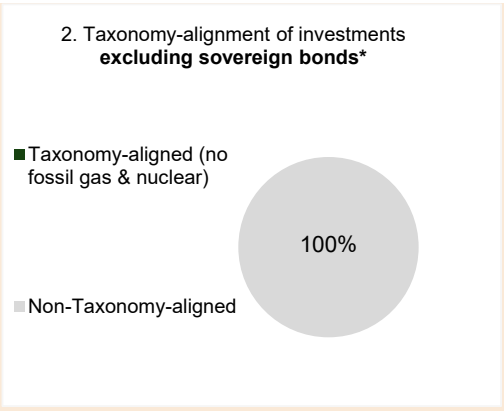

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulations (EU) 2022/1214.

This graph represents 100% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What is the minimum share of investments in transitional and enabling activities?

As the Fund does not commit to invest any "sustainable investment" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy is therefore also set at 0%.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The Fund intends to invest a minimum of 0% of the Fund's securities in sustainable investments with an environmental objective, that are not aligned with the EU Taxonomy. The assessment of the Fund's investments qualifying as sustainable is determined on or around each portfolio rebalance which typically occurs on a quarterly basis.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of socially sustainable investments?

The Fund intends to invest a minimum of 0% of the Fund's securities in sustainable investments with a social objective, that are not aligned with the EU Taxonomy. The assessment of the Fund's investments qualifying as sustainable is determined on or around each portfolio rebalance which typically occurs on a quarterly basis.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The Fund may hold a portion of its assets in cash or cash equivalents or use financial derivative instruments at the Investment Manager's discretion, which would be classified under #2 Other in the above table. Such assets will not be aligned with environmental and social characteristics nor will there be any environmental or social safeguards in place.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Fund is an index fund tracking the performance of the MSCI UK Screened Choice Index. The Index has been designated for the purpose of attaining the environmental and social characteristics promoted by the Fund. The Index integrates exclusion criteria relating to companies that are associated with controversial weapons, fossil fuel extraction, thermal coal power, civilian firearms, nuclear weapons and tobacco; or that fail to comply with the UNGC Principles.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

  The Index is reviewed and rebalanced on a quarterly basis, with the changes implemented as of the close of the last business day of February, May, August and November.

  Investors should note the Index Risk, Index Error Risk and Tracking Risk disclosures included in the Risk Information section of the Prospectus.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

  The Fund rebalances on a quarterly basis, in line with the Index rebalancing frequency. Investors should note in this respect the Index Risk, Index Error Risk and Index Tracking Risk disclosures included in the Risk Information section of the Prospectus.

- ***How does the designated index differ from a relevant broad market index?***

  The Index is based on MSCI UK Index, its parent index, which captures large and mid-cap representation across the UK equity market. The Fund's designated Index (i.e., MSCI UK Screened Choice Index) represents the performance of the broad UK equity market while excluding companies that are associated with controversial weapons, fossil fuel extraction, thermal coal power, civilian firearms, nuclear weapons and tobacco or fail to comply with UNGC Principles. Constituent selection is based on data from MSCI ESG Research.

- ***Where can the methodology used for the calculation of the designated index be found?***

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☐ **Yes**

☒ **No**

☐ It will make a minimum of **sustainable investments with an environmental objective**: ___%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ **It promotes Environmental/ Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 30_% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It will make a minimum of **sustainable investments with a social objective: ___%**

☐ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The State Street US Screened Index Equity Fund is an index fund tracking the performance of the MSCI USA Screened Choice Index ("Index"). The environmental and social characteristics are promoted by a negative and norms-based screen applied to the Index designated by the Fund to screen out securities based on an assessment of their adherence to ESG criteria. The Index represents the performance of the broad U.S. equity market while excluding companies that are associated with controversial weapons, nuclear weapons, civilian firearms, fossil fuel extraction, thermal coal power, and tobacco or fail to comply with United Nations Global Compact (UNGC) Principles. The UNGC Principles is the world largest corporate sustainability initiative aimed at companies to align their strategies and operations with universal principles on human rights, labour, environment and anti-corruption, and take actions that advance societal goals.

The Fund further promotes environmental and social characteristics through its allocation of a portion of the portfolio to sustainable investments. In order for the security to qualify as a sustainable investment, it must be classified as a "Leader" or "Outperformer" as determined by the Investment Manager using the ESG score generated by its proprietary process.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The Index represents the performance of the broad U.S. equity market while excluding companies that fail to comply with UNGC Principles or are associated with controversial weapons, civilian firearms, nuclear weapons, fossil fuel extraction, thermal coal power, and tobacco. Consequently, the attainment of the associated environmental and social characteristics is measured through the Index exclusions of companies that are associated with controversial weapons, civilian firearms, nuclear weapons, fossil fuel extraction, thermal coal power, and tobacco and the companies that fail to comply with the UNGC Principles. The proportion of the Fund's portfolio invested in securities included in the Index will constitute sustainability indicator used to measure the attainment of each of the environmental or social characteristics promoted by the Fund.

As such, the Fund does not intend to hold any securities that do not meet the relevant ESG criteria above.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The objectives of the sustainable investments made by the Fund are to invest in securities that are classified as:

- Leaders or Outperformers according to the ESG score of the Investment Manager's proprietary ESG scoring system.

The ESG scoring system developed by the Investment Manager leverages multiple data sources and aligns them to widely accepted, transparent materiality frameworks to generate a unique ESG score for listed companies. It measures the performance of a company's business operations and governance as it relates to financially material ESG challenges facing the company's industry.

The Investment Manager draws on data from multiple ESG data providers and leverages the Sustainable Accounting Standards Board's ("SASB") widely accepted, transparent materiality framework to generate the unique score that measures the performance of a company's business operations and governance as it relates to industry-specific ESG Factors. The SASB materiality framework focuses on financial materiality of certain ESG metrics as defined by specific industry. The company's ESG score allows for a global comparison of companies' ESG performance within a sector or industry.

In order for the security to qualify as a sustainable investment, the company must be a "Leader" or "Outperformer" as determined by the Investment Manager using the ESG score generated by its proprietary process. Companies qualified as "Leaders" or "Outperformers" are deemed to manage and mitigate long-term, financially-material sustainable risks better than its peers and thus operate a more sustainable business model.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

The Fund is an index tracking fund. The Index methodology applies negative and norms-based screen to screen out securities based on an assessment of their adherence to ESG criteria including securities of companies identified as being non-compliant with UNGC Principles (relating to environmental protection, human rights, labour standards, anti-corruption), and securities of companies associated with controversial weapons, nuclear weapons, civilian firearms, fossil fuel extraction, thermal coal power, and tobacco. The Index methodology, therefore, ensures that the Fund's sustainable investments do not cause significant harm to any environmental or social sustainable investment objective.

How have the indicators for adverse impacts on sustainability factors been taken into account?

The Index provider considers Principal Adverse Impacts ("PAIs") on sustainability factors by applying the negative and norms-based ESG screen on all of the Index constituents.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Index methodology excludes companies identified as being non-compliant with UNGC Principles as part of the applicable negative screening. The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are considered as part of the UNGC Principles assessment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

X **Yes,**

The Fund considers Principal Adverse Impacts ("PAI") on sustainability factors in the application of the Index exclusions. Specifically, the Index considers

- Exposure to companies active in the fossil fuel sector
- Violations of UN Global Compact Principles
- Exposure to controversial weapons

Further information on the PAIs will be found in the periodic reports for the Fund.

No

What investment strategy does this financial product follow?

The investment policy of the Fund is to track the performance of the Index as closely as possible using the Replication Strategy as further described in the "Investment Strategies" section of the Prospectus, while seeking to minimise as far as possible the tracking difference between the Fund's performance and that of the Index.

Securities in the Fund are selected primarily from the constituents of the Index. Essentially, the portfolio of the Fund would be a near mirror-image of the Index. The Fund also may, in exceptional circumstances, invest in securities not included in the Index but that are believed to closely reflect the risk and distribution characteristics of securities of the Index. The Fund may also hold (i) securities which, in the opinion of the Investment Manager, are likely to become part of the Index and (ii) securities acquired through corporate activity which may not form part of the Index. Securities in the Index are weighted by free float-adjusted market capitalisation after screening out securities based on an assessment of their adherence to ESG criteria i.e., non-compliance with UNGC Principles, association with controversial weapons, civilian firearms, nuclear weapons, fossil fuel extraction, thermal coal power and tobacco.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

Securities in the Fund are selected primarily from the constituents of the Index, while the Index provider applies the exclusion criteria on all of the Index constituents. This results in the exclusion of any securities considered as not compliant with the UNGC Principles (international norms in relation to the environment, human rights & communities, labour rights & supply chains, customers and governance). Additionally, any securities associated with Severe ESG Controversies, controversial weapons, civilian firearms, nuclear weapons, fossil fuel extraction, thermal coal power or tobacco are excluded from the Index.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

N/A

What is the policy to assess good governance practices of the investee companies?

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

The assessment of good governance practices is implemented through the negative screening utilised by the Index. Companies deemed by the Index provider to comply with UNGC Principles are considered to exhibit good governance.

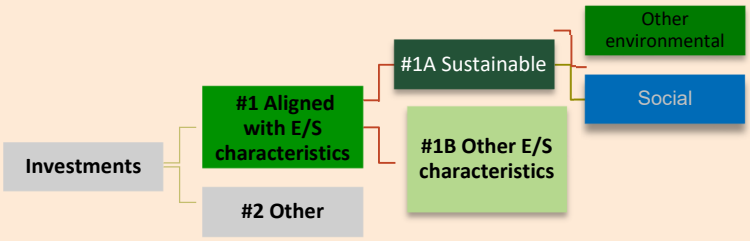

What is the asset allocation planned for this financial product?

Asset allocation describes the share of investments in specific assets.

The Investment Manager employs a binding ESG methodology which aims to build a portfolio where at least 90% of the Fund's assets are invested in securities which are #1 Aligned with environmental and social characteristics as outlined in the table below. It is intended that, within such portion of the portfolio, at least 30% of the Fund's assets are invested in securities which are sustainable investments with environmental and / or social objectives, at the point of rebalance of the portfolio which typically occurs on a quarterly basis. The remaining portion (<10%) of the portfolio, consisting of cash as well as cash equivalents in place held at the Investment Manager's discretion, will be classified under #2 Other in the below table and will not be aligned with the promoted environmental and social characteristics.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product*?**

To the extent that the Fund may use financial derivative instruments, these will not be used to attain the environmental or social characteristics promoted by the Fund.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to invest in any "sustainable investment" within the meaning of the EU Taxonomy, but only within the meaning of the SFDR regulation. However, the position will be kept under periodic review giving due consideration to market developments as the availability of reliable data increases over time.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]

☐ **Yes:**

☐ In fossil gas ☐ In nuclear energy

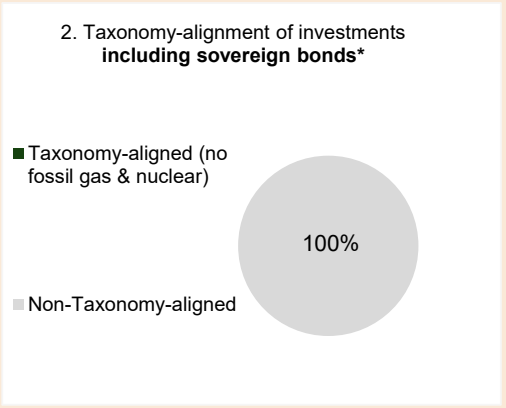

☒ **No**

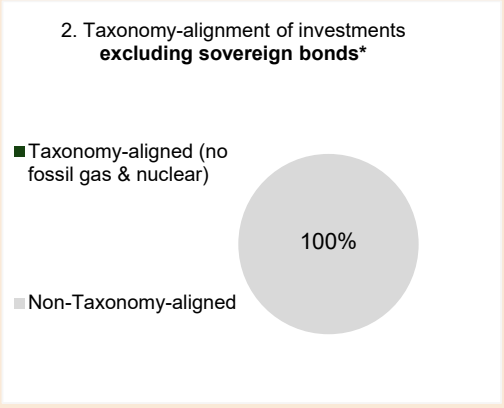

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulations (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What is the minimum share of investments in transitional and enabling activities?

As the Fund does not commit to invest any "sustainable investment" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy is therefore also set at 0%.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

The Fund intends to invest a minimum of 0% of the Fund's securities in sustainable investments with an environmental objective, that are not aligned with the EU Taxonomy. The assessment of the Fund's investments qualifying as sustainable is determined on or around each portfolio rebalance which typically occurs on a quarterly basis.

What is the minimum share of socially sustainable investments?

The Fund intends to invest a minimum of 0% of the Fund's securities in sustainable investments with a social objective, that are not aligned with the EU Taxonomy. The assessment of the Fund's investments qualifying as sustainable is determined on or around each portfolio rebalance which typically occurs on a quarterly basis.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The Fund may hold a portion of its assets in cash or cash equivalents or use financial derivative instruments at the Investment Manager's discretion, which would be classified under #2 Other in the above table. Such assets will not be aligned with environmental and social characteristics nor will there be any environmental or social safeguards in place.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Fund is an index fund tracking the performance of the MSCI USA Screened Choice Index. The Index has been designated for the purpose of attaining the environmental and social characteristics promoted by the Fund. The Index integrates exclusion criteria relating to companies that are associated with controversial weapons, civilian firearms, nuclear weapons, fossil fuel extraction, thermal coal power, and tobacco or that fail to comply with the UNGC Principles.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

  The Index is reviewed and rebalanced on a quarterly basis, with the changes implemented as of the close of the last business day of February, May, August and November.

  Investors should note the Index Risk, Index Error Risk and Tracking Risk disclosures included in the Risk Information section of the Prospectus.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

  The Fund rebalances on a quarterly basis, in line with the Index rebalancing frequency. Investors should note in this respect the Index Risk, Index Error Risk and Index Tracking Risk disclosures included in the Risk Information section of the Prospectus.

- ***How does the designated index differ from a relevant broad market index?***

  The Index is based on MSCI USA Index, its parent index, which captures large and mid-cap representation across the U.S. equity market. The Fund's designated Index (i.e., MSCI USA Screened Choice Index) represents the performance of the broad U.S. equity market while excluding companies that are associated with controversial weapons, civilian firearms, nuclear weapons, fossil fuel extraction, thermal coal power, and tobacco or fail to comply with UNGC Principles. Constituent selection is based on data from MSCI ESG Research.

- ***Where can the methodology used for the calculation of the designated index be found?***

  Please refer to MSCI's index methodology description which can be found at the following link:

  https://www.msci.com/index-methodology (index code 731082)

ANNEX 10

Template pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: State Street EMU Screened Index Equity Fund (the "Fund")

Legal entity identifier: 549300R5J6NJXZ98RS45

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☐ **Yes**

☒ **No**

☐ It will make a minimum of **sustainable investments with an environmental objective**: ___%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ **It promotes Environmental/ Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 35% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It will make a minimum of **sustainable investments with a social objective: ___%**

☐ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The State Street EMU Screened Index Equity Fund is an index fund tracking the performance of the MSCI EMU Screened Choice Index ("Index"). The environmental and social characteristics are promoted by a negative and norms-based screen applied to the Index designated by the Fund to screen out securities based on an assessment of their adherence to ESG criteria. The Index represents the performance of the broad developed EMU equity market while excluding companies that are associated with controversial weapons, nuclear weapons, civilian firearms, fossil fuel extraction, thermal coal power, and tobacco or fail to comply with United Nations Global Compact (UNGC) Principles. The UNGC Principles is the world largest corporate sustainability initiative aimed at companies to align their strategies and operations with universal principles on human rights, labour, environment and anti-corruption, and take actions that advance societal goals.
The Fund further promotes environmental and social characteristics through its allocation of a portion of the portfolio to sustainable investments. In order for the security to qualify as a sustainable investment, it must be classified as a "Leader" or "Outperformer" as determined by the Investment Manager using the ESG score generated by its proprietary process.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The Index represents the performance of the broad developed EMU equity market while excluding companies that fail to comply with UNGC Principles or are associated with controversial weapons, civilian firearms, nuclear weapons, fossil fuel extraction, thermal coal power, and tobacco. Consequently, the attainment of the associated environmental and social characteristics is measured through the Index exclusions of companies that are associated with controversial weapons civilian firearms, nuclear weapons, fossil fuel extraction, thermal coal power and tobacco; and the companies that fail to comply with the UNGC Principles. The proportion of the Fund's portfolio invested in securities included in the Index will constitute sustainability indicator used to measure the attainment of each of the environmental or social characteristics promoted by the Fund.

As such, the Fund does not intend to hold any securities that do not meet the relevant ESG criteria above.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The objectives of the sustainable investments made by the Fund are to invest in securities that are classified as:

- Leaders or Outperformers according to the ESG score of the Investment Manager's proprietary ESG scoring system.

The ESG scoring system developed by the Investment Manager leverages multiple data sources and aligns them to widely accepted, transparent materiality frameworks to generate a unique ESG score for listed companies. It measures the performance of a company's business operations and governance as it relates to financially material ESG challenges facing the company's industry.

The Investment Manager draws on data from multiple ESG data providers and leverages the Sustainable Accounting Standards Board's ("SASB") widely accepted, transparent materiality framework to generate the unique score that measures the performance of a company's business operations and governance as it relates to industry-specific ESG Factors. The SASB materiality framework focuses on financial materiality of certain ESG metrics as defined by specific industry. The company's ESG score allows for a global comparison of companies' ESG performance within a sector or industry.

In order for the security to qualify as a sustainable investment, the company must be a "Leader" or "Outperformer" as determined by the Investment Manager using the ESG score generated by its proprietary process. Companies qualified as "Leaders" or "Outperformers" are deemed to manage and mitigate long-term, financially-material sustainable risks better than its peers and thus operate a more sustainable business model.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

. The Fund is an index tracking fund. The Index' methodology applies negative and norms-based screen to screen out securities based on an assessment of their adherence to ESG criteria including securities of companies identified as being non-compliant with UNGC Principles (relating to environmental protection, human rights, labour standards, anti-corruption), and securities of companies associated with controversial weapons, nuclear weapons, civilian firearms, fossil fuel extraction, thermal coal power, and tobacco. The Index methodology, therefore, ensures that the Fund's sustainable investments do not cause significant harm to any environmental or social sustainable investment objective.

How have the indicators for adverse impacts on sustainability factors been taken into account?

The Index provider considers Principal Adverse Impacts ("PAIs") on sustainability factors by applying the negative and norms-based ESG screen on all of the Index constituents.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Index methodology excludes companies identified as being non-compliant with UNGC Principles as part of the applicable negative screening. The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are considered as part of the UNGC Principles assessment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

X **Yes,**

The Fund considers Principal Adverse Impacts ("PAI") on sustainability factors in the application of the Index exclusions. Specifically, the Index considers

- Exposure to companies active in the fossil fuel sector
- Violations of UN Global Compact Principles
- Exposure to controversial weapons

Further information on the PAIs will be found in the periodic reports for the Fund.

No

What investment strategy does this financial product follow?

The investment policy of the Fund is to track the performance of the Index as closely as possible using the Replication Strategy as further described in the "Investment Strategies" section of the Prospectus, while seeking to minimise as far as possible the tracking difference between the Fund's performance and that of the Index.

Securities in the Fund are selected primarily from the constituents of the Index. Essentially, the portfolio of the Fund would be a near mirror-image of the Index. The Fund also may, in exceptional circumstances, invest in securities not included in the Index but that are believed to closely reflect the risk and distribution characteristics of securities of

the Index. The Fund may also hold (i) securities which, in the opinion of the Investment Manager, are likely to become part of the Index and (ii) securities acquired through corporate activity which may not form part of the Index. Securities in the Index are weighted by free float-adjusted market capitalisation after screening out securities based on an assessment of their adherence to ESG criteria i.e., non-compliance with UNGC Principles, association with controversial weapons civilian firearms, nuclear weapons, fossil fuel extraction, thermal coal power and tobacco.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

Securities in the Fund are selected primarily from the constituents of the Index, while the Index provider applies the exclusion criteria on all of the Index constituents. This results in the exclusion of any securities considered as not compliant with the UNGC Principles (international norms in relation to the environment, human rights & communities, labour rights & supply chains, customers and governance). Additionally, any securities associated with Severe ESG Controversies, controversial weapons civilian firearms, nuclear weapons, fossil fuel extraction, thermal coal power or tobacco are excluded from the Index.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

N/A

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The assessment of good governance practices is implemented through the negative screening utilised by the Index. Companies deemed by the Index provider comply with UNGC Principles are considered to exhibit good governance.

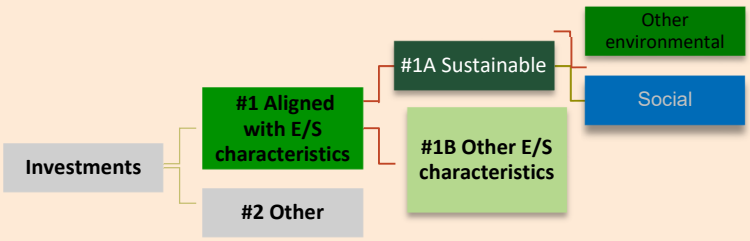

What is the asset allocation planned for this financial product?

Asset allocation describes the share of investments in specific assets.

The Investment Manager employs a binding ESG methodology which aims to build a portfolio where at least 90% of the Fund's assets are invested in securities which are #1 Aligned with environmental and social characteristics as outlined in the table below. It is intended that, within such portion of the portfolio, at least 35% of the Fund's assets are invested in securities which are sustainable investments with environmental and / or social objectives, at the point of rebalance of the portfolio which typically occurs on a quarterly basis. The remaining portion (<10%) of the portfolio, consisting of cash as well as cash equivalents in place held at the Investment Manager's discretion, will be classified under #2 Other in the below table and will not be aligned with the promoted environmental and social characteristics.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

activities of investee companies.

***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product*?**

To the extent that the Fund may use financial derivative instruments, these will not be used to attain the environmental or social characteristics promoted by the Fund.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to invest in any "sustainable investment" within the meaning of the EU Taxonomy, but only within the meaning of the SFDR regulation. However, the position will be kept under periodic review giving due consideration to market developments as the availability of reliable data increases over time.

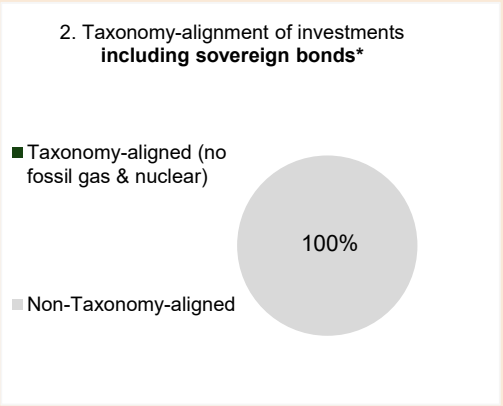

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]

	Yes:
	In fossil gas
	In nuclear energy
X	**No**

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulations (EU) 2022/1214.

What is the minimum share of investments in transitional and enabling activities?

As the Fund does not commit to invest any "sustainable investment" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy is therefore also set at 0%.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The Fund intends to invest a minimum of 0% of the Fund's securities in sustainable investments with an environmental objective, that are not aligned with the EU Taxonomy. The assessment of the Fund's investments qualifying as sustainable is determined on or around each portfolio rebalance which typically occurs on a quarterly basis.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of socially sustainable investments?

The Fund intends to invest a minimum of 0% of the Fund's securities in sustainable investments with a social objective, that are not aligned with the EU Taxonomy. The assessment of the Fund's investments qualifying as sustainable is determined on or around each portfolio rebalance which typically occurs on a quarterly basis.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The Fund may hold a portion of its assets in cash or cash equivalents or use financial derivative instruments at the Investment Manager's discretion, which would be classified under #2 Other in the above table. Such assets will not be aligned with environmental and social characteristics nor will there be any environmental or social safeguards in place.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Fund is an index fund tracking the performance of the MSCI EMU Screened Choice Index. The Index has been designated for the purpose of attaining the environmental and social characteristics promoted by the Fund. The Index integrates exclusion criteria relating to companies that fail to comply with the UNGC Principles or are associated with controversial weapons, civilian firearms, nuclear weapons, fossil fuel extraction, thermal coal power, and tobacco.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

The Index is reviewed and rebalanced on a quarterly basis, with the changes implemented as of the close of the last business day of February, May, August and November.

Investors should note the Index Risk, Index Error Risk and Tracking Risk disclosures included in the Risk Information section of the Prospectus.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

The Fund rebalances on a quarterly basis, in line with the Index rebalancing frequency. Investors should note in this respect the Index Risk, Index Error Risk and Index Tracking Risk disclosures included in the Risk Information section of the Prospectus.

How does the designated index differ from a relevant broad market index?

The Index is based on MSCI EMU Index, its parent index, which captures large and mid-cap representation across the Developed Markets countries in EMU. The Fund's designated Index (i.e., MSCI EMU Screened Choice Index) represents the performance of the broad EMU equity market while excluding companies that fail to comply with UNGC Principles or are associated with controversial weapons civilian firearms, nuclear weapons, fossil fuel extraction, thermal coal power, and tobacco. Constituent selection is based on data from MSCI ESG Research.

Where can the methodology used for the calculation of the designated index be found?

Please refer to MSCI's index methodology description which can be found at the following link:

https://www.msci.com/index-methodology (index code 731087)

☐ It will make a minimum of **sustainable investments with a social objective: ___%**

☐ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The State Street Europe Screened Index Equity Fund is an index fund tracking the performance of the MSCI Europe Screened Choice Index ("Index"). The environmental and social characteristics are promoted by a negative and norms-based screen applied to the Index designated by the Fund to screen out securities based on an assessment of their adherence to ESG criteria. The Index represents the performance of the broad developed European equity markets while excluding companies that are associated with controversial weapons, nuclear weapons, civilian firearms, fossil fuel extraction, thermal coal power, and tobacco or fail to comply with United Nations Global Compact (UNGC) Principles. The UNGC Principles is the world largest corporate sustainability initiative aimed at companies to align their strategies and operations with universal principles on human rights, labour, environment and anti-corruption, and take actions that advance societal goals.

The Fund further promotes environmental and social characteristics through its allocation of a portion of the portfolio to sustainable investments. In order for the security to qualify as a sustainable investment, it must be classified as a "Leader" or "Outperformer" as determined by the Investment Manager using the ESG score generated by its proprietary process.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The Index represents the performance of the broad developed European equity markets while excluding companies that fail to comply with UNGC Principles or are associated with controversial weapons civilian firearms, nuclear weapons, fossil fuel extraction, thermal coal power, and tobacco. Consequently, the attainment of the associated environmental and social characteristics is measured through the Index exclusions of companies that are associated with controversial weapons civilian firearms, nuclear weapons, fossil fuel extraction, thermal coal power, and tobacco and the companies that fail to comply with the UNGC Principles. The proportion of the Fund's portfolio invested in securities included in the Index will constitute sustainability indicator used to measure the attainment of each of the environmental or social characteristics promoted by the Fund.

As such, the Fund does not intend to hold any securities that do not meet the relevant ESG criteria above.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The objectives of the sustainable investments made by the Fund are to invest in securities that are classified as:

- Leaders or Outperformers according to the ESG score of the Investment Manager's proprietary ESG scoring system.

The ESG scoring system developed by the Investment Manager leverages multiple data sources and aligns them to widely accepted, transparent materiality frameworks to generate a unique ESG score for listed companies. It measures the performance of a company's business operations and governance as it relates to financially material ESG challenges facing the company's industry.

The Investment Manager draws on data from multiple ESG data providers and leverages the Sustainable Accounting Standards Board's ("SASB") widely accepted, transparent materiality framework to generate the unique score that measures the performance of a company's business operations and governance as it relates to industry-specific ESG Factors. The SASB materiality framework focuses on financial materiality of certain ESG metrics as defined by specific industry. The company's ESG score allows for a global comparison of companies' ESG performance within a sector or industry.

In order for the security to qualify as a sustainable investment, the company must be a "Leader" or "Outperformer" as determined by the Investment Manager using the ESG score generated by its proprietary process. Companies qualified as "Leaders" or "Outperformers" are deemed to manage and mitigate long-term, financially-material sustainable risks better than its peers and thus operate a more sustainable business model.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

The Fund is an index tracking fund. The Index methodology applies negative and norms-based screen to screen out securities based on an assessment of their adherence to ESG criteria including securities of companies identified as being non-compliant with UNGC Principles (relating to environmental protection, human rights, labour standards, anti-corruption), and securities of companies associated with controversial weapons, nuclear weapons, civilian firearms, fossil fuel extraction, thermal coal power, and tobacco. The Index methodology, therefore, ensures that the Fund's sustainable investments do not cause significant harm to any environmental or social sustainable investment objective.

How have the indicators for adverse impacts on sustainability factors been taken into account?

The Index provider considers Principal Adverse Impacts ("PAIs") on sustainability factors by applying the negative and norms-based ESG screen on all of the Index constituents.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Index methodology excludes companies identified as being non-compliant with UNGC Principles as part of the applicable negative screening. The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are considered as part of the UNGC Principles assessment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

X **Yes,**

The Fund considers Principal Adverse Impacts ("PAI") on sustainability factors in the application of the Index exclusions. Specifically, the Index considers

- Exposure to companies active in the fossil fuel sector
- ations of UN Global Compact Principles
- Exposure to controversial weapons

Further information on the PAIs will be found in the periodic reports for the Fund.

No

What investment strategy does this financial product follow?

The investment policy of the Fund is to track the performance of the Index as closely as possible using the Replication Strategy as further described in the "Investment Strategies" section of the Prospectus, while seeking to minimise as far as possible the tracking difference between the Fund's performance and that of the Index.

Securities in the Fund are selected primarily from the constituents of the Index. Essentially, the portfolio of the Fund would be a near mirror-image of the Index. The Fund also may, in exceptional circumstances, invest in securities not included in the Index but that are believed to closely reflect the risk and distribution characteristics of securities of the Index. X	**No**

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulations (EU) 2022/1214.

What is the minimum share of investments in transitional and enabling activities?

As the Fund does not commit to invest any "sustainable investment" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy is therefore also set at 0%.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The Fund intends to invest a minimum of 0% of the Fund's securities in sustainable investments with an environmental objective, that are not aligned with the EU Taxonomy. The assessment of the Fund's investments qualifying as sustainable is determined on or around each portfolio rebalance which typically occurs on a quarterly basis.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of socially sustainable investments?

The Fund intends to invest a minimum of 0% of the Fund's securities in sustainable investments with a social objective, that are not aligned with the EU Taxonomy. The assessment of the Fund's investments qualifying as sustainable is determined on or around each portfolio rebalance which typically occurs on a quarterly basis.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The Fund may hold a portion of its assets in cash or cash equivalents or use financial derivative instruments at the Investment Manager's discretion, which would be classified under #2 Other in the above table. Such assets will not be aligned with environmental and social characteristics nor will there be any environmental or social safeguards in place.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Fund is an index fund tracking the performance of the MSCI Europe Screened Choice Index. The Index has been designated for the purpose of attaining the environmental and social characteristics promoted by the Fund. The Index integrates exclusion criteria relating to companies that fail to comply with the UNGC Principles or are associated with controversial weapons, civilian firearms, nuclear weapons, fossil fuel extraction, thermal coal power, and tobacco.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

The Index is reviewed and rebalanced on a quarterly basis, with the changes implemented as of the close of the last business day of February, May, August and November.

Investors should note the Index Risk, Index Error Risk and Tracking Risk disclosures included in the Risk Information section of the Prospectus.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

The Fund rebalances on a quarterly basis, in line with the Index rebalancing frequency. Investors should note in this respect the Index Risk, Index Error Risk and Index Tracking Risk disclosures included in the Risk Information section of the Prospectus.

How does the designated index differ from a relevant broad market index?

The Index is based on MSCI Europe Index, its parent index, which captures large and mid-cap representation across the Developed Markets countries in Europe. The Fund's designated Index (i.e., MSCI Europe Screened Choice Index) represents the performance of the broad developed European equity markets while excluding companies that fail to comply with UNGC Principles or are associated with controversial weapons civilian firearms, nuclear weapons, fossil fuel extraction, thermal coal power, and tobacco. Constituent selection is based on data from MSCI ESG Research.

Where can the methodology used for the calculation of the designated index be found?

Please refer to MSCI's index methodology description which can be found at the following link:

https://www.msci.com/index-methodolo index code 731085

ANNEX 12

Template pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name: State Street Pacific Ex-Japan Screened Index Equity Fund (the "Fund")

Legal entity identifier: 549300ADYHHVDGUHHI73

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☐ **Yes** ☒ **No**

☐ It will make a minimum of **sustainable investments with an environmental objective**: ___%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of **sustainable investments with a social objective: ___%**

☒ **It promotes Environmental/ Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 30_% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promotes E/S characteristics, but **will not make any sustainable investments**

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

What environmental and/or social characteristics are promoted by this financial product?

The State Street Pacific Ex-Japan Screened Index Equity Fund is an index fund tracking the performance of the MSCI Pacific Screened Choice Index ("Index"). The environmental and social characteristics are promoted by a negative and norms-based screen applied to the Index designated by the Fund to screen out securities based on an assessment of their adherence to ESG criteria. The Index represents the performance of the broad developed Pacific (excluding Japan) equity markets while excluding companies that are associated with controversial weapons, nuclear weapons, civilian firearms, fossil fuel extraction, thermal coal power, and tobacco or fail to comply with United Nations Global Compact (UNGC) Principles. The UNGC Principles is the world largest corporate sustainability initiative aimed at companies to align their strategies and operations with universal principles on human rights, labour, environment and anti-corruption, and take actions that advance societal goals.

The Fund further promotes environmental and social characteristics through its allocation of a portion of the portfolio to sustainable investments. In order for the security to qualify as a sustainable investment, it must be classified as a "Leader" or "Outperformer" as determined by the Investment Manager using the ESG score generated by its proprietary process.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The Index represents the performance of the broad developed Pacific (excluding Japan) equity markets while excluding companies that fail to comply with UNGC Principles or are associated with controversial weapons, civilian firearms, nuclear weapons, fossil fuel extraction, thermal coal power, and tobacco. Consequently, the attainment of the associated environmental and social characteristics is measured through the Index exclusions of companies that are associated with controversial weapons, civilian firearms, nuclear weapons, fossil fuel extraction, thermal coal power and tobacco; and the companies that fail to comply with the UNGC Principles. The proportion of the Fund's portfolio invested in securities included in the Index will constitute sustainability indicator used to measure the attainment of each of the environmental or social characteristics promoted by the Fund.

As such, the Fund does not intend to hold any securities that do not meet the relevant ESG criteria above.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The objectives of the sustainable investments made by the Fund are to invest in securities that are classified as:

- Leaders or Outperformers according to the ESG score of the Investment Manager's proprietary ESG scoring system.

The ESG scoring system developed by the Investment Manager leverages multiple data sources and aligns them to widely accepted, transparent materiality frameworks to generate a unique ESG score for listed companies. It measures the performance of a company's business operations and governance as it relates to financially material ESG challenges facing the company's industry.

The Investment Manager draws on data from multiple ESG data providers and leverages the Sustainable Accounting Standards Board's ("SASB") widely accepted, transparent materiality framework to generate the unique score that measures the performance of a company's business operations and governance as it relates to industry-specific ESG Factors. The SASB materiality framework focuses on financial materiality of certain ESG metrics as defined by specific industry. The company's ESG score allows for a global comparison of companies' ESG performance within a sector or industry.

In order for the security to qualify as a sustainable investment, the company must be a "Leader" or "Outperformer" as determined by the Investment Manager using the ESG score generated by its proprietary process. Companies qualified as "Leaders" or "Outperformers" are deemed to manage and mitigate long-term, financially-material sustainable risks better than its peers and thus operate a more sustainable business model.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

The Fund is an index tracking fund. The Index methodology applies negative and norms-based screen to screen out securities based on an assessment of their adherence to ESG criteria including securities of companies identified as being non-compliant with UNGC Principles (relating to environmental protection, human rights, labour standards, anti-corruption), and securities of companies associated with controversial weapons, nuclear weapons, civilian firearms, fossil fuel extraction, thermal coal power, and tobacco. The Index methodology, therefore, ensures that the Fund's sustainable investments do not cause significant harm to any environmental or social sustainable investment objective.

How have the indicators for adverse impacts on sustainability factors been taken into account?

The Index provider considers Principal Adverse Impacts ("PAIs") on sustainability factors by applying the negative and norms-based ESG screen on all of the Index constituents.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Index methodology excludes companies identified as being non-compliant with UNGC Principles as part of the applicable negative screening. The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are considered as part of the UNGC Principles assessment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

X **Yes,**

The Fund considers Principal Adverse Impacts ("PAI") on sustainability factors in the application of the Index exclusions. Specifically, the Index considers

- Exposure to companies active in the fossil fuel sector
- Violations of UN Global Compact Principles
- Exposure to controversial weapons

Further information on the PAIs will be found in the periodic reports for the Fund.

No

What investment strategy does this financial product follow?

The investment policy of the Fund is to track the performance of the Index as closely as possible using the Replication Strategy as further described in the "Investment Strategies" section of the Prospectus, while seeking to minimise as far as possible the tracking difference between the Fund's performance and that of the Index.

Securities in the Fund are selected primarily from the constituents of the Index. Essentially, the portfolio of the Fund would be a near mirror-image of the Index. The Fund also may, in exceptional circumstances, invest in securities not included in the Index but that are believed to closely reflect the risk and distribution characteristics of securities of the Index. The Fund may also hold (i) securities which, in the opinion of the Investment

Manager, are likely to become part of the Index and (ii) securities acquired through corporate activity which may not form part of the Index. Securities in the Index are weighted by free float-adjusted market capitalisation after screening out securities based on an assessment of their adherence to ESG criteria i.e., non-compliance with UNGC Principles, association with controversial weapons, civilian firearms, nuclear weapons, fossil fuel extraction, thermal coal power and tobacco.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

Securities in the Fund are selected primarily from the constituents of the Index, while the Index provider applies the exclusion criteria on all of the Index constituents. This results in the exclusion of any securities considered as not compliant with the UNGC Principles (international norms in relation to the environment, human rights & communities, labour rights & supply chains, customers and governance). Additionally, any securities associated with Severe ESG Controversies, controversial weapons, civilian firearms, nuclear weapons, fossil fuel extraction, thermal coal power and tobacco are excluded from the Index.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

N/A

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The assessment of good governance practices is implemented through the negative screening utilised by the Index. Companies deemed by the Index provider to comply with UNGC Principles are considered to exhibit good governance.

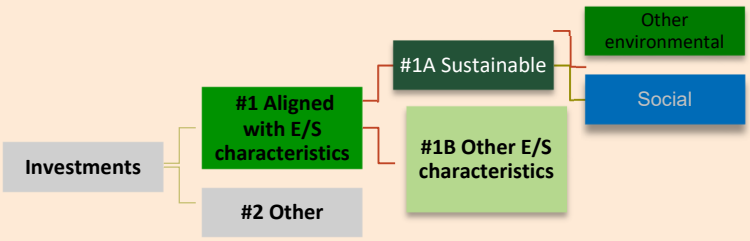

Asset allocation describes the share of investments in specific assets.

What is the asset allocation planned for this financial product?

The Investment Manager employs a binding ESG methodology which aims to build a portfolio where at least 90% of the Fund's assets are invested in securities which are #1 Aligned with environmental and social characteristics as outlined in the table below. It is intended that, within such portion of the portfolio, at least 30% of the Fund's assets are invested in securities which are sustainable investments with environmental and / or social objectives, at the point of rebalance of the portfolio which typically occurs on a quarterly basis. The remaining portion (<10%) of the portfolio, consisting of cash as well as cash equivalents in place held at the Investment Manager's discretion, will be classified under #2 Other in the below table and will not be aligned with the promoted environmental and social characteristics.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investeee companies

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product*?**

To the extent that the Fund may use financial derivative instruments, these will not be used to attain the environmental or social characteristics promoted by the Fund.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to invest in any "sustainable investment" within the meaning of the EU Taxonomy, but only within the meaning of the SFDR regulation. However, the position will be kept under periodic review giving due consideration to market developments as the availability of reliable data increases over time.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]

☐ **Yes:**

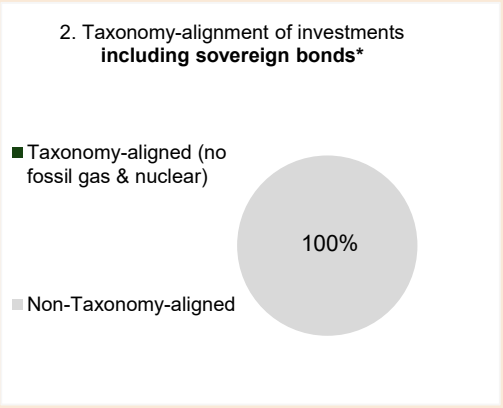

☐ In fossil gas ☐ In nuclear energy

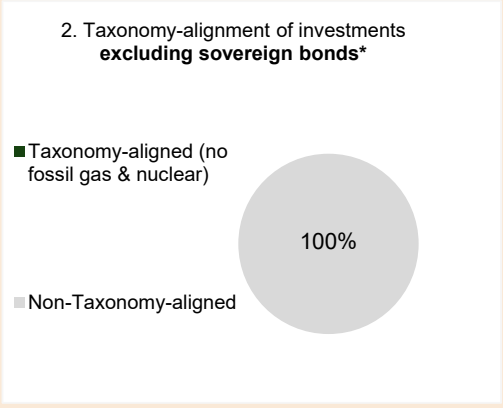

☒ **No**

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulations (EU) 2022/1214.

What is the minimum share of investments in transitional and enabling activities?

As the Fund does not commit to invest any "sustainable investment" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy is therefore also set at 0%.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The Fund intends to invest a minimum of 0% of the Fund's securities in sustainable investments with an environmental objective, that are not aligned with the EU Taxonomy. The assessment of the Fund's investments qualifying as sustainable is determined on or around each portfolio rebalance which typically occurs on a quarterly basis.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of socially sustainable investments?

The Fund intends to invest a minimum of 0% of the Fund's securities in sustainable investments with a social objective, that are not aligned with the EU Taxonomy. The assessment of the Fund's investments qualifying as sustainable is determined on or around each portfolio rebalance which typically occurs on a quarterly basis.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The Fund may hold a portion of its assets in cash or cash equivalents or use financial derivative instruments at the Investment Manager's discretion, which would be classified under #2 Other in the above table. Such assets will not be aligned with environmental and social characteristics nor will there be any environmental or social safeguards in place.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Fund is an index fund tracking the performance of the MSCI Pacific ex Japan Screened Choice Index. The Index has been designated for the purpose of attaining the environmental and social characteristics promoted by the Fund. The Index integrates exclusion criteria relating to companies that fail to comply with the UNGC Principles or are associated with controversial weapons, civilian firearms, nuclear weapons, fossil fuel extraction, thermal coal power and tobacco;

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

The Index is reviewed and rebalanced on a quarterly basis, with the changes implemented as of the close of the last business day of February, May, August and November.

Investors should note the Index Risk, Index Error Risk and Tracking Risk disclosures included in the Risk Information section of the Prospectus.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

The Fund rebalances on a quarterly basis, in line with the Index rebalancing frequency. Investors should note in this respect the Index Risk, Index Error Risk and Index Tracking Risk disclosures included in the Risk Information section of the Prospectus.

- ***How does the designated index differ from a relevant broad market index?***

The Index is based on MSCI Pacific ex Japan Index, its parent index, which captures large and mid-cap representation across the Developed Markets countries in the Pacific region (excluding Japan). The Fund's designated Index (i.e., MSCI Pacific ex Japan Screened Choice Index) represents the performance of the broad developed Pacific (excluding Japan) equity markets while excluding companies that fail to comply with UNGC Principles or are associated with controversial weapons, civilian firearms, nuclear weapons, fossil fuel extraction, thermal coal power and tobacco. Constituent selection is based on data from MSCI ESG Research.

Legal entity identifier: 549300EBNZR6OL5DHO74

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☐ **Yes**

☒ **No**

☐ It will make a minimum of **sustainable investments with an environmental objective**: ___%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of **sustainable investments with a social objective: ___%**

☒ **It promotes Environmental/ Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 30% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The State Street World Screened Index Equity Fund is an index fund tracking the performance of the MSCI World Screened Choice Index ("Index"). The environmental and social characteristics are promoted by a negative and norms-based screen applied to the Index designated by the Fund to screen out securities based on an assessment of their adherence to ESG criteria. The Index represents the performance of the broad global developed equity markets while excluding companies that are associated with controversial weapons, nuclear weapons, civilian firearms, fossil fuel extraction, thermal coal power, and tobacco or fail to comply with United Nations Global Compact (UNGC) principles. The UNGC Principles is the world largest corporate sustainability initiative aimed at companies to align their strategies and operations with universal principles on human rights, labour, environment and anti-corruption, and take actions that advance societal goals.
The Fund further promotes environmental and social characteristics through its allocation of a portion of the portfolio to sustainable investments. In order for the security to qualify as a sustainable investment, it must be classified as a "Leader" or "Outperformer" as determined by the Investment Manager using the ESG score generated by its proprietary process.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The Index represents the performance of the broad global developed equity markets while excluding companies that fail to comply with UNGC Principles or are associated with controversial weapons, civilian firearms, nuclear weapons, fossil fuel extraction, thermal coal power, and tobacco. Consequently, the attainment of the associated environmental and social characteristics is measured through the Index exclusions of companies that are associated with controversial weapons, civilian firearms, nuclear weapons, fossil fuel extraction, thermal coal power, and tobacco and the companies that fail to comply with the UNGC Principles. The proportion of the Fund's portfolio invested in securities included in the Index will constitute sustainability indicator used to measure the attainment of each of the environmental or social characteristics promoted by the Fund.

As such, the Fund does not intend to hold any securities that do not meet the relevant ESG criteria

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The objectives of the sustainable investments made by the Fund are to invest in securities that are classified as:

- Leaders or Outperformers according to the ESG score of the Investment Manager's proprietary ESG scoring system.

The ESG scoring system developed by the Investment Manager leverages multiple data sources and aligns them to widely accepted, transparent materiality frameworks to generate a unique ESG score for listed companies. It measures the performance of a company's business operations and governance as it relates to financially material ESG challenges facing the company's industry.

The Investment Manager draws on data from multiple ESG data providers and leverages the Sustainable Accounting Standards Board's ("SASB") widely accepted, transparent materiality framework to generate the unique score that measures the performance of a company's business operations and governance as it relates to industry-specific ESG Factors. The SASB materiality framework focuses on financial materiality of certain ESG metrics as defined by specific industry. The company's ESG score allows for a global comparison of companies' ESG performance within a sector or industry.

In order for the security to qualify as a sustainable investment, the company must be a "Leader" or "Outperformer" as determined by the Investment Manager using the ESG score generated by its proprietary process. Companies qualified as "Leaders" or "Outperformers" are deemed to manage and mitigate long-term, financially-material sustainable risks better than its peers and thus operate a

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

The Fund is an index tracking fund. The Index methodology applies negative and norms-based screen to screen out securities based on an assessment of their adherence to ESG criteria including securities of companies identified as being non-compliant with UNGC Principles (relating to environmental protection, human rights, labour standards, anti-corruption), and securities of companies associated with controversial weapons, nuclear weapons, civilian firearms, fossil fuel extraction, thermal coal power, and tobacco. The Index methodology, therefore, ensures that the Fund's sustainable investments do not cause significant harm to any environmental or social sustainable investment objective.

How have the indicators for adverse impacts on sustainability factors been taken into account?

The Index provider considers Principal Adverse Impacts ("PAIs") on sustainability factors by applying the negative and norms-based ESG screen on all of the Index constituents.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Index methodology excludes companies identified as being non-compliant with UNGC Principles as part of the applicable negative screening. The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are considered as part of the UNGC Principles assessment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

X **Yes,**

The Fund considers Principal Adverse Impacts ("PAI") on sustainability factors in the application of the Index exclusions. Specifically, the Index considers

- Exposure to companies active in the fossil fuel sector
- Violations of UN Global Compact Principles
- Exposure to controversial weapons

Further information on the PAIs will be found in the periodic reports for the Fund.

No

What investment strategy does this financial product follow?

The investment policy of the Fund is to track the performance of the Index as closely as possible using the Replication Strategy as further described in the "Investment Strategies" section of the Prospectus, while seeking to minimise as far as possible the tracking difference between the Fund's performance and that of the Index.

Securities in the Fund are selected primarily from the constituents of the Index. Essentially, the portfolio of the Fund would be a near mirror-image of the Index. The Fund also may, in exceptional circumstances, invest in securities not included in the Index but that are believed to closely reflect the risk and distribution characteristics of securities of the Index. The Fund may also hold (i) securities which, in the opinion of the Investment Manager, are likely to become part of the Index and (ii) securities acquired through corporate activity which may not form part of the Index. Securities in the Index are weighted by free float-adjusted market capitalisation after screening out securities based on an assessment of their adherence to ESG criteria i.e., non-compliance with UNGC Principles, association with controversial weapons, civilian firearms, nuclear weapons, fossil fuel extraction, thermal coal power, and tobacco.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

Securities in the Fund are selected primarily from the constituents of the Index, while the Index provider applies the exclusion criteria on all of the Index constituents. This results in the exclusion of any securities considered as not compliant with the UNGC Principles (international norms in relation to the environment, human rights & communities, labour rights & supply chains, customers and governance). Additionally, any securities associated with Severe ESG Controversies, controversial weapons, civilian firearms, nuclear weapons, fossil fuel extraction, thermal coal power, and tobacco are excluded from the Index.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

N/A

What is the policy to assess good governance practices of the investee companies?

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

The assessment of good governance practices is implemented through the negative screening utilised by the Index. Companies deemed by the Index provider to comply with UNGC Principles are considered to exhibit good governance.

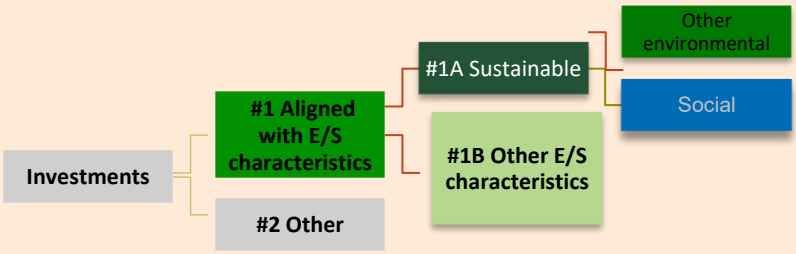

What is the asset allocation planned for this financial product?

Asset allocation describes the share of investments in specific assets.

The Investment Manager employs a binding ESG methodology which aims to build a portfolio where at least 90% of the Fund's assets are invested in securities which are #1 Aligned with environmental and social characteristics as outlined in the table below. It is intended that, within such portion of the portfolio, at least 30% of the Fund's assets are invested in securities which are sustainable investments with environmental and / or social objectives, at the point of rebalance of the portfolio which typically occurs on a quarterly basis. The remaining portion (<10%) of the portfolio, consisting of cash as well as cash equivalents in place held at the Investment Manager's discretion, will be classified under #2 Other in the below table and will not be aligned with the promoted environmental and social characteristics.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product*?**

To the extent that the Fund may use financial derivative instruments, these will not be used to attain the environmental or social characteristics promoted by the Fund.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to invest in any "sustainable investment" within the meaning of the EU Taxonomy, but only within the meaning of the SFDR regulation. However, the position will be kept under periodic review giving due consideration to market developments as the availability of reliable data increases over time.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]

☐ **Yes:**

☐ In fossil gas ☐ In nuclear energy

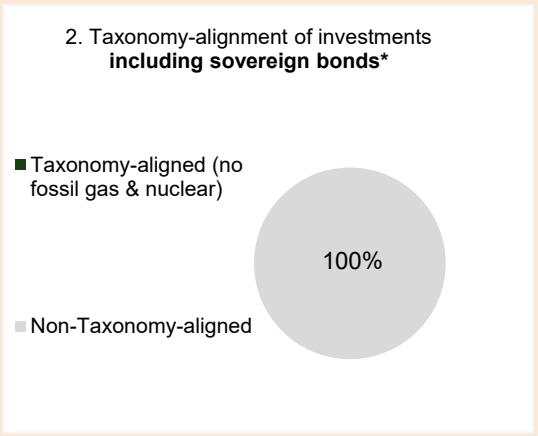

☒ **No**

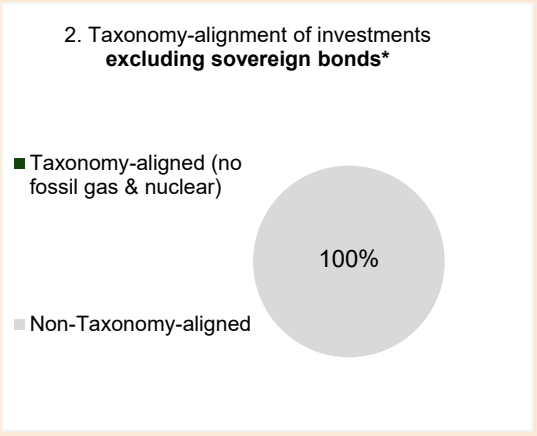

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulations (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What is the minimum share of investments in transitional and enabling activities?

As the Fund does not commit to invest any "sustainable investment" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy is therefore also set at 0%.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

The Fund intends to invest a minimum of 0% of the Fund's securities in sustainable investments with an environmental objective, that are not aligned with the EU Taxonomy. The assessment of the Fund's investments qualifying as sustainable is determined on or around each portfolio rebalance which typically occurs on a quarterly basis.

What is the minimum share of socially sustainable investments?

The Fund intends to invest a minimum of 0% of the Fund's securities in sustainable investments with a social objective, that are not aligned with the EU Taxonomy. The assessment of the Fund's investments qualifying as sustainable is determined on or around each portfolio rebalance which typically occurs on a quarterly basis.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The Fund may hold a portion of its assets in cash or cash equivalents or use financial derivative instruments at the Investment Manager's discretion, which would be classified under #2 Other in the above table. Such assets will not be aligned with environmental and social characteristics nor will there be any environmental or social safeguards in place.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Fund is an index fund tracking the performance of the MSCI World Screened Choice Index. The Index has been designated for the purpose of attaining the environmental and social characteristics promoted by the Fund. The Index integrates exclusion criteria relating to companies that are that fail to comply with the UNGC Principles or are associated with controversial weapons, civilian firearms, nuclear weapons, fossil fuel extraction, thermal coal power, and tobacco.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

  The Index is reviewed and rebalanced on a quarterly basis, with the changes implemented as of the close of the last business day of February, May, August and November.

  Investors should note the Index Risk, Index Error Risk and Tracking Risk disclosures included in the Risk Information section of the Prospectus.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

  The Fund rebalances on a quarterly basis, in line with the Index rebalancing frequency. Investors should note in this respect the Index Risk, Index Error Risk and Index Tracking Risk disclosures included in the Risk Information section of the Prospectus.

- ***How does the designated index differ from a relevant broad market index?***

  The Index is based on MSCI World Index, its parent index, which captures large and mid-cap representation across the global developed equity markets. The Fund's designated Index (i.e., MSCI World Screened Choice Index) represents the performance of the broad global developed equity markets while excluding companies that fail to comply with the UNGC Principles or are associated with controversial weapons civilian firearms, nuclear weapons, fossil fuel extraction, thermal coal power, and tobacco. Constituent selection is based on data from MSCI ESG Research.

- ***Where can the methodology used for the calculation of the designated index be found?***

  Please refer to MSCI's index methodology description which can be found at the following link:

  https://www.msci.com/index-methodology (index code 731077)

Where can I find more product specific information online?

ANNEX 14

Template pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name: State Street World Universal Index Equity Fund (the "Fund")

Legal entity identifier: 5493006KP30YBI4QYQ78

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☐ **Yes**

☒ **No**

☐ It will make a minimum of **sustainable investments with an environmental objective**: ___%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of **sustainable investments with a social objective: ___%**

☒ **It promotes Environmental/ Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 30% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promotes E/S characteristics, but **will not make any sustainable investments**

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

What environmental and/or social characteristics are promoted by this financial product?

The State Street World Universal Index Equity Fund is an index fund tracking the performance of the MSCI World Universal Index ("Index"). The environmental and social characteristics promoted by the Fund are those included in the MSCI ESG Ratings which are used in the index construction.

In addition, the Index excludes securities based on MSCI ESG Controversies scores as well as their involvement with certain business activities based on MSCI ESG Business Involvement Screening Research as outlined in the Index methodology.

The Fund further promotes environmental and social characteristics through its allocation of a portion of the portfolio to sustainable investments. In order for the security to qualify as a sustainable investment, it must be classified as a "Leader" or "Outperformer" as determined by the Investment Manager using the ESG score generated by its proprietary process.

Sustainability indicators measure how the environmental or

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by the Fund are the ESG ratings and exclusions produced by

social characteristics promoted by the financial product are attained.

the Index provider and incorporated into the index construction methodology. The proportion of the Fund's portfolio invested in securities included in the Index will constitute sustainability indicator used to measure the attainment of each of the environmental or social characteristics promoted by the Fund.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The objectives of the sustainable investments made by the Fund are to invest in securities that are classified as:

- Leaders or Outperformers according to the ESG score of the Investment Manager's proprietary ESG scoring system.

The ESG scoring system developed by the Investment Manager leverages multiple data sources and aligns them to widely accepted, transparent materiality frameworks to generate a unique ESG score for listed companies. It measures the performance of a company's business operations and governance as it relates to financially material ESG challenges facing the company's industry.

The Investment Manager draws on data from multiple ESG data providers and leverages the Sustainable Accounting Standards Board's ("SASB") widely accepted, transparent materiality framework to generate the unique score that measures the performance of a company's business operations and governance as it relates to industry-specific ESG Factors. The SASB materiality framework focuses on financial materiality of certain ESG metrics as defined by specific industry. The company's ESG score allows for a global comparison of companies' ESG performance within a sector or industry.

In order for the security to qualify as a sustainable investment, the company must be a "Leader" or "Outperformer" as determined by the Investment Manager using the ESG score generated by its proprietary process. Companies qualified as "Leaders" or "Outperformers" are deemed to manage and mitigate long-term, financially-material sustainable risks better than its peers and thus operate a more sustainable business model.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

The Fund is an index tracking fund. The Index methodology, and more specifically the MSCI ESG Ratings and exclusion of securities based on the MSCI ESG Controversies scores and the MSCI ESG Business Involvement Screening Research applied in the Index construction, ensures that the Fund's sustainable investments do not cause significant harm to any environmental or social sustainable investment objective.

How have the indicators for adverse impacts on sustainability factors been taken into account?

The Index provider considers Principal Adverse Impacts ("PAIs") on sustainability factors by applying the MSCI ESG Ratings on all of the Index constituents and exclusion of securities based on the MSCI ESG Controversies scores and the MSCI ESG Business Involvement Screening Research.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Index methodology applies the MSCI ESG Ratings and excludes securities based on the MSCI ESG Controversies scores and the MSCI ESG Business Involvement Screening Research. The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are considered as part of the MSCI ESG Ratings, MSCI ESG Controversies and the MSCI ESG Buisness Involvement Screening Research assessment process.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

X **Yes,**

The Fund considers Principal Adverse Impacts ("PAI") on sustainability factors in the application of the Index exclusions. Specifically, the Index considers

- Violations of UN Global Compact Principles
- Exposure to controversial weapons

Further information on the PAIs will be found in the periodic reports for the Fund.

No

What investment strategy does this financial product follow?

The investment policy of the Fund is to track the performance of the Index as closely as possible using the Replication Strategy as further described in the "Investment Strategies" section of the Prospectus, while seeking to minimise as far as possible the tracking difference between the Fund's performance and that of the Index.

Securities in the Fund are selected primarily from the constituents of the Index. Essentially, the portfolio of the Fund would be a near mirror-image of the Index. The Fund also may, in exceptional circumstances, invest in securities not included in the Index but that are believed to closely reflect the risk and distribution characteristics of securities of the Index. The Fund may also hold (i) securities which, in the opinion of the Investment Manager, are likely to become part of the Index and (ii) securities acquired through corporate activity which may not form part of the Index. The Index measures the performance of global developed equity securities, re-weighting from free-float market cap weights using certain ESG metrics, in particular MSCI ESG Ratings, MSCI ESG Controversies and MSCI ESG Business Involvement Screening Research to tilt the index towards securities demonstrating both a robust ESG profile and positive trend in improving that ESG profile.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

Securities in the Fund are selected primarily from the constituents of the Index, while the Index provider applies the ESG scoring and screening methodology on all of the Index constituents.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

N/A

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The assessment of good governance practices is implemented through the negative screening utilised by the Index. Companies deemed by the Index provider to comply with UNGC Principles are considered to exhibit good governance.

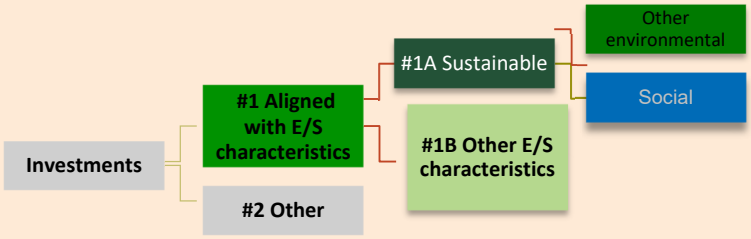

Asset allocation describes the share of investments in specific assets.

What is the asset allocation planned for this financial product?

The Investment Manager employs a binding ESG methodology which aims to build a portfolio where at least 90% of the Fund's assets are invested in securities which are #1 Aligned with environmental and social characteristics as outlined in the table below. It is intended that, within such portion of the portfolio, at least 30% of the Fund's assets are invested in securities which are sustainable investments with environmental and / or social objectives, at the point of rebalance of the portfolio which typically occurs on a quarterly basis. The remaining portion (<10%) of the portfolio, consisting of cash as well as cash equivalents in place held at the Investment Manager's discretion, will be classified under #2 Other in the below table and will not be aligned with the promoted environmental and social characteristics.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

To the extent that the Fund may use financial derivative instruments, these will not be used to attain the environmental or social characteristics promoted by the Fund.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to invest in any "sustainable investment" within the meaning of the EU Taxonomy, but only within the meaning of the SFDR regulation. However, the position will be kept under periodic review giving due consideration to market developments as the availability of reliable data increases over time.

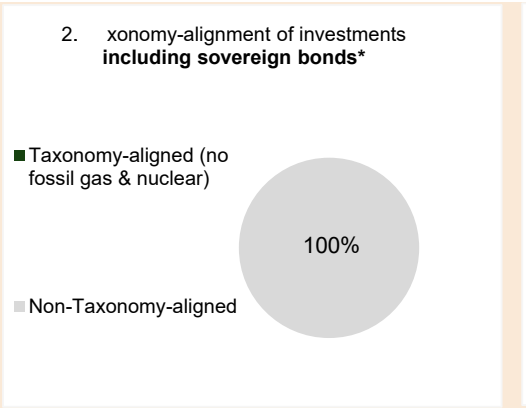

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]

	Yes:
	In fossil gas
	In nuclear energy
X	**No**

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulations (EU) 2022/1214.

What is the minimum share of investments in transitional and enabling activities?

As the Fund does not commit to invest any "sustainable investment" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enablin activities within the meanin of the EU Taxonom is therefore also set at 0%.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The Fund intends to invest a minimum of 0% of the Fund's securities in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. The assessment of the Fund's investments qualifying as sustainable is determined on or around each portfolio rebalance which typically occurs on a quarterly basis.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of socially sustainable investments?

The Fund intends to invest a minimum of 0% of the Fund's securities in sustainable investments with a social objective that are not aligned with the EU Taxonomy. The assessment of the Fund's investments qualifying as sustainable is determined on or around each portfolio rebalance which t picall occurs on a quarterl basis.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The Fund may hold a portion of its assets in cash or cash equivalents or use financial derivative instruments at the Investment Manager's discretion, which would be classified under #2 Other in the above table. Such assets will not be aligned with environmental and social characteristics nor will there be any environmental or social safeguards in place.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Fund is an index fund tracking the performance of the MSCI World Universal Index. The Index has been designated for the purpose of attaining the environmental and social characteristics promoted by the Fund. The Index uses MSCI ESG Ratings, MSCI ESG Controversies scores and MSCI ESG Business Involvement Screening Research to tilt the index towards securities demonstrating both a robust ESG profile and a positive trend in improving that ESG profile.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

The Index is reviewed and rebalanced on a quarterly basis, with the changes implemented as of the close of the last business day of February, May, August and November.

Investors should note the Index Risk, Index Error Risk and Tracking Risk disclosures included in the Risk Information section of the Prospectus.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

  The Fund rebalances on a quarterly basis, in line with the Index rebalancing frequency. Investors should note in this respect the Index Risk, Index Error Risk and Index Tracking Risk disclosures included in the Risk Information section of the Prospectus.

- ***How does the designated index differ from a relevant broad market index?***

  The Index is based on the MSCI World Index, its parent index, which captures the performance of global developed equity market securities. The Fund's designated Index (i.e., MSCI World Universal Index) applies MSCI ESG Ratings, MSCI ESG Controversies scores and MSCI ESG Business Involvement Screening Research to the constituent of the parent index to tilt the Index constituents towards securities demonstrating both a robust ESG profile and a positive trend in improving that ESG profile.

- ***Where can the methodology used for the calculation of the designated index be found?***

  Please refer to MSCI's index methodology description which can be found at the following link:

  https://www.msci.com/index-methodolo index code 712650

Where can I find more product specific information online?

ANNEX 15

Template pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: State Street Global Emerging Markets Screened Index Equity Fund (the "Fund")

Legal entity identifier: 549300SZ163CFCUHTR64

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☐ **Yes**

☒ **No**

☐ It will make a minimum of **sustainable investments with an environmental objective**: ___%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of **sustainable investments with a social objective: ___%**

☒ **It promotes Environmental/ Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 20% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The State Street Global Emerging Markets Screened Index Equity Fund is an index fund tracking the performance of the MSCI Emerging Markets Screened Choice Index ("Index"). The environmental and social characteristics are promoted by a negative and norms-based screen applied to the Index designated by the Fund to screen out securities based on an assessment of their adherence to ESG criteria. The Index represents the performance of the broad global emerging equity markets while excluding companies that are associated with controversial weapons, nuclear weapons, civilian firearms, fossil fuel extraction, thermal coal power and tobacco or fail to comply with United Nations Global Compact (UNGC) Principles. The UNGC Principles is the world largest corporate sustainability initiative aimed at companies to align their strategies and operations with universal principles on human rights, labour, environment and anti-corruption, and take actions that advance societal goals.

The Fund further promotes environmental and social characteristics through its allocation of a portion of the portfolio to sustainable investments. In order for the security to qualify as a sustainable investment, it must be classified as a "Leader" or "Outperformer" as determined by the Investment Manager using the ESG score generated by its proprietary process.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The Index represents the performance of the broad global emerging equity markets while excluding companies that fail to comply with UNGC Principles or are associated with controversial weapons civilian firearms, nuclear weapons, fossil fuel extraction, thermal coal power, and tobacco. Consequently, the attainment of the associated environmental and social characteristics is measured through the Index exclusions of companies that are associated with controversial weapons, civilian firearms, nuclear weapons, fossil fuel extraction, thermal coal power and tobacco and the companies that fail to comply with the UNGC Principles. The proportion of the Fund's portfolio invested in securities included in the Index will constitute sustainability indicator used to measure the attainment of each of the environmental or social characteristics promoted by the Fund.

As such, the Fund does not intend to hold any securities that do not meet the relevant ESG criteria above.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The objectives of the sustainable investments made by the Fund are to invest in securities that are classified as:

- Leaders or Outperformers according to the ESG score of the Investment Manager's proprietary ESG scoring system.

The ESG scoring system developed by the Investment Manager leverages multiple data sources and aligns them to widely accepted, transparent materiality frameworks to generate a unique ESG score for listed companies. It measures the performance of a company's business operations and governance as it relates to financially material ESG challenges facing the company's industry.

The Investment Manager draws on data from multiple ESG data providers and leverages the Sustainable Accounting Standards Board's ("SASB") widely accepted, transparent materiality framework to generate the unique score that measures the performance of a company's business operations and governance as it relates to industry-specific ESG Factors. The SASB materiality framework focuses on financial materiality of certain ESG metrics as defined by specific industry. The company's ESG score allows for a global comparison of companies' ESG performance within a sector or industry.

In order for the security to qualify as a sustainable investment, the company must be a "Leader" or "Outperformer" as determined by the Investment Manager using the ESG score generated by its proprietary process. Companies qualified as "Leaders" or "Outperformers" are deemed to manage and mitigate long-term, financially-material sustainable risks better than its peers and thus operate a more sustainable business model.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

The Fund is an index tracking fund. The Index methodology applies negative and norms-based screen to screen out securities based on an assessment of their adherence to ESG criteria including securities of companies identified as being non-compliant with UNGC Principles (relating to environmental protection, human rights, labour standards, anti-corruption), and securities of companies associated with controversial weapons, nuclear weapons, civilian firearms, fossil fuel extraction, thermal coal power, and tobacco. The Index methodology, therefore, ensures that the Fund's sustainable investments do not cause significant harm to any environmental or social sustainable investment objective.

How have the indicators for adverse impacts on sustainability factors been taken into account?

The Index provider considers Principal Adverse Impacts ("PAIs") on sustainability factors by applying the negative and norms-based ESG screen on all of the Index

constituents.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Index methodology excludes companies identified as being non-compliant with UNGC Principles as part of the applicable negative screening. The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are considered as part of the UNGC Principles assessment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

X **Yes,**

The Fund considers Principal Adverse Impacts ("PAI") on sustainability factors in the application of the Index exclusions. Specifically, the Index considers

- Exposure to companies active in the fossil fuel sector
- Violations of UN Global Compact Principles
- Exposure to controversial weapons

Further information on the PAIs will be found in the periodic reports for the Fund.

No

What investment strategy does this financial product follow?

The investment policy of the Fund is to track the performance of the Index as closely as possible using the Replication Strategy as further described in the "Investment Strategies" section of the Prospectus, while seeking to minimise as far as possible the tracking difference between the Fund's performance and that of the Index.

Securities in the Fund are selected primarily from the constituents of the Index. Essentially, the portfolio of the Fund would be a near mirror-image of the Index. The Fund also may, in exceptional circumstances, invest in securities not included in the Index but that are believed to closely reflect the risk and distribution characteristics of securities of the Index. The Fund may also hold (i) securities which, in the opinion of the Investment Manager, are likely to become part of the Index and (ii) securities acquired through corporate activity which may not form part of the Index. Securities in the Index are weighted by free float-adjusted market capitalisation after screening out securities based on an assessment of their adherence to ESG criteria i.e., non-compliance with UNGC Principles, association with controversial weapons, civilian firearms, nuclear weapons, fossil fuel extraction, and tobacco.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

Securities in the Fund are selected primarily from the constituents of the Index, while the Index provider applies the exclusion criteria on all of the Index constituents. This results in the exclusion of any securities considered as not compliant with the UNGC Principles (international norms in relation to the environment, human rights & communities, labour rights & supply chains, customers and governance). Additionally, any securities associated with Severe ESG Controversies, controversial weapons, civilian firearms, nuclear weapons, fossil fuel extraction, thermal coal power or tobacco are excluded from the Index.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

N/A

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The assessment of good governance practices is implemented through the negative screening utilised by the Index. Companies deemed by the Index provider to comply with UNGC Principles are considered to exhibit good governance.

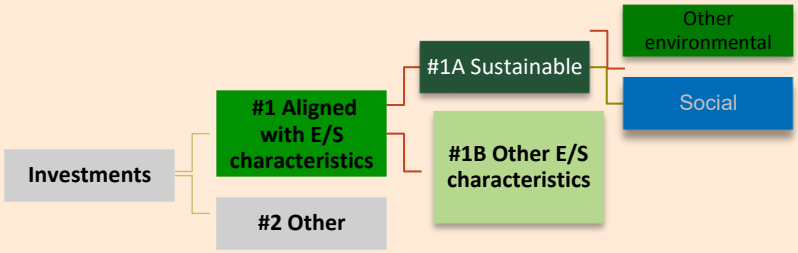

What is the asset allocation planned for this financial product?

Asset allocation describes the share of investments in specific assets.

The Investment Manager employs a binding ESG methodology which aims to build a portfolio where at least 90% of the Fund's assets are invested in securities which are #1 Aligned with environmental and social characteristics as outlined in the table below. It is intended that, within such portion of the portfolio, at least 20% of the Fund's assets are invested in securities which are sustainable investments with environmental and / or social objectives, at the point of rebalance of the portfolio which typically occurs on a quarterly basis. The remaining portion (<10%) of the portfolio, consisting of cash as well as cash equivalents in place held at the Investment Manager's discretion, will be classified under #2 Other in the below table and will not be aligned with the promoted environmental and social characteristics.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product*?**

To the extent that the Fund may use financial derivative instruments, these will not be used to attain the environmental or social characteristics promoted by the Fund.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to invest in any “sustainable investment” within the meaning of the EU Taxonomy, but only within the meaning of the SFDR regulation. However, the position will be kept under periodic review giving due consideration to market developments as the availability of reliable data increases over time.

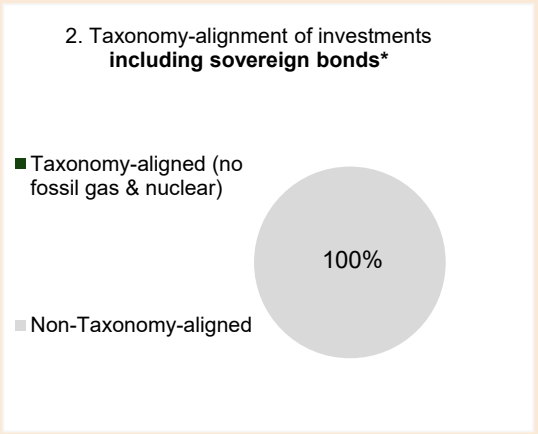

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]

	Yes:
	In fossil gas
	In nuclear energy
X	**No**

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What is the minimum share of investments in transitional and enabling activities?

As the Fund does not commit to invest any "sustainable investment" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy is therefore also set at 0%.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomie

The Fund intends to invest a minimum of 0% of the Fund's securities in sustainable investments with an environmental objective, that are not aligned with the EU Taxonomy. The assessment of the Fund's investments qualifying as sustainable is determined on or around each portfolio rebalance which typically occurs on a quarterly basis.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulations (EU) 2022/1214.

What is the minimum share of socially sustainable investments?

The Fund intends to invest a minimum of 0% of the Fund's securities in sustainable investments with a social objective, that are not aligned with the EU Taxonomy. The assessment of the Fund's investments qualifying as sustainable is determined on or around each portfolio rebalance which typically occurs on a quarterly basis.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The Fund may hold a portion of its assets in cash or cash equivalents or use financial derivative instruments at the Investment Manager's discretion, which would be classified under #2 Other in the above table. Such assets will not be aligned with environmental and social characteristics nor will there be any environmental or social safeguards in place.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Fund is an index fund tracking the performance of the MSCI Emerging Markets Screened Choice Index. The Index has been designated for the purpose of attaining the environmental and social characteristics promoted by the Fund. The Index integrates exclusion criteria relating to companies that fail to comply with the UNGC Principles or are associated with controversial weapons, civilian firearms, nuclear weapons, fossil fuel extraction, thermal coal power, and tobacco.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

  The Index is reviewed and rebalanced on a quarterly basis, with the changes implemented as of the close of the last business day of February, May, August and November.

  Investors should note the Index Risk, Index Error Risk and Tracking Risk disclosures included in the Risk Information section of the Prospectus.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

  The Fund rebalances on a quarterly basis, in line with the Index rebalancing frequency. Investors should note in this respect the Index Risk, Index Error Risk and Index Tracking Risk disclosures included in the Risk Information section of the Prospectus.

- ***How does the designated index differ from a relevant broad market index?***

  The Index is based on MSCI Emerging Markets Index, its parent index, which captures large and mid-cap representation across the global Emerging Market countries. The Fund's designated Index (i.e., MSCI Emerging Markets Screened Choice Index) represents the performance of the broad global emerging equity markets while excluding companies that fail to comply with UNGC Principles or are associated with controversial weapons, civilian firearms, nuclear weapons, fossil fuel extraction, thermal coal power, and

tobacco. Constituent selection is based on data from MSCI ESG Research.

Where can the methodology used for the calculation of the designated index be found?

Please refer to MSCI's index methodology description which can be found at the following link:

https://www.msci.com/index-methodology (index code 731080)

ANNEX 16

Template pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: State Street Europe Value Spotlight Fund (the "Fund")

Legal entity identifier: 5493004AZ2T2RL1Z6V82

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☐ **Yes**

☒ **No**

☐ It will make a minimum of **sustainable investments with an environmental objective**: ___%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ **It promotes Environmental/ Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 25% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It will make a minimum of **sustainable investments with a social objective: ___%**

☐ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The environmental and social characteristics promoted by the Fund are negative and norms-based screens applied to the portfolio of the Fund to screen out securities based on an assessment of their adherence to ESG criteria, i.e. international norms in relation to environmental and social protection. Specifically, the Fund promotes environmental characteristics through exclusion of investments in companies which fail to comply with UNGC Principles relating to environment (Principles 7 to 9), companies associated with Severe ESG Controversies, and which are active in thermal coal, arctic oil & gas exploration, and oil sands extraction.

The Fund also promotes social characteristics through exclusion of investments in companies which fail to comply with UNGC Principles relating to human rights (Principles 1 and 2), labour standards (Principles 3 to 6), anti-corruption (Principle 10) and companies associated with Severe ESG Controversies, controversial weapons, civilian firearms and tobacco. The UNGC Principles is the world largest corporate sustainability initiative aimed at companies to align their strategies and operations with universal principles on human rights, labour, environment and anti-corruption, and take actions that advance societal goals.

The Fund may use additional ESG screens from time to time in order to exclude securities based on their involvement with an activity that is deemed non-compliant with one or more of such ESG criteria.

The Fund further promotes environmental and social characteristics through its allocation of a portion of the portfolio to sustainable investments. In order for the security to qualify as a sustainable investment, it must be classified as a "Leader" or "Outperformer" as determined by the Investment Manager using the ESG score generated by its proprietary process.

In addition, the Fund promotes environmental characteristics through investments in companies which exhibit lower carbon emissions than the Index as measured using Weighted Average Carbon Intensity ("WACI").

No reference benchmark has been designated to attain the environmental and social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The attainment of the environmental characteristics is measured through achieving a higher exposure of the Fund's portfolio to companies such that the Fund's overall portfolio exhibits lower carbon emissions (relative to the MSCI World Index) as measured using Weighted Average Carbon Intensity ("WACI").

A further attainment of the environmental characteristics promoted by the Fund is measured through:

- % of the portfolio invested in securities that are included in the negative and norms based screen specifically related to environmental characteristics, namely companies identified as being non-compliant with UNGC Principles in regards to the environment, companies associated with Severe ESG Controversies and companies which are active in thermal coal, arctic oil & gas exploration, and oil sands extraction

The attainment of the social characteristics promoted by the Fund is measured through:

- % of the portfolio invested in securities that are included in the negative and norms based screen specifically related to social characteristics, namely companies identified as being non-compliant with UNGC Principles and companies associated with Severe ESG Controversies, controversial weapons, civilian firearms and tobacco.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The objectives of the sustainable investments made by the Fund are to invest in securities that are classified as:

- Leaders or Outperformers according to the ESG score of the Investment Manager's proprietary ESG scoring system.

The ESG scoring system developed by the Investment Manager leverages multiple data sources and aligns them to widely accepted, transparent materiality frameworks to generate a unique ESG score for listed companies. It measures the performance of a company's business operations and governance as it relates to financially material ESG challenges facing the company's industry.

The Investment Manager draws on data from multiple ESG data providers and leverages the Sustainable Accounting Standards Board's ("SASB") - widely accepted, transparent materiality framework to generate the unique score that measures the performance of a company's business operations and governance as it relates to industry-specific ESG Factors. The SASB materiality framework focuses on financial materiality of certain ESG metrics as defined by specific industry. The company's ESG score allows for a global comparison of companies' ESG performance within a sector or industry.

In order for the security to qualify as a sustainable investment, the company must be a "Leader" or "Outperformer" as determined by the Investment Manager using the ESG score generated by its proprietary process. Companies qualified as "Leaders" or "Outperformers" are deemed to manage and mitigate long-term, financially-material sustainable risks better than its peers and thus operate a more sustainable business model.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager applies a negative and norms-based screen to the Fund to screen out securities based on an assessment of their adherence to ESG criteria including securities of

companies identified as being non-compliant with UNGC Principles (relating to environmental protection, human rights, labour standards, anti-corruption), and securities of companies associated with Severe ESG Controversies, controversial weapons, civilian firearms, thermal coal, arctic oil & gas exploration, oil sands extraction and tobacco. By applying the relevant negative and norms-based screen, the Investment Manager deems the Fund's sustainable investments not to cause significant harm to any environmental or social sustainable investment objective.

— *How have the indicators for adverse impacts on sustainability factors been taken into account?*

As described below, the Fund considers Principal Adverse Impacts ("PAIs") on sustainability factors by applying the negative and norms-based ESG screen prior to the construction of the portfolio.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The Fund excludes companies that the Investment Manager has identified as being non-compliant with UNGC Principles as part of the negative screening utilised by the Fund. The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are considered as part of the UNGC Principles assessment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

X **Yes,**

The Fund considers Principal Adverse Impacts on sustainability factors by applying the negative and norms-based ESG screen prior to the construction of the portfolio. Specifically, the Fund considers

- Exposure to companies active in the fossil fuel sector
- Violations of UN Global Compact Principles
- Exposure to controversial weapons

Further information on the PAIs will be found in the periodic reports for the Fund.

No

What investment strategy does this financial product follow?

The Investment Manager, on behalf of the Fund, will invest actively using the Fundamental Value Equity Strategy as further described in section 8.1 of the Prospectus and the Relevant Supplement. This strategy

uses a proprietary fundamentally driven and bottom up research process to identify companies with a dislocation between the intrinsic value of the company and the price of its equity security.

In implementing this strategy, the Investment Manager builds a concentrated portfolio of 30-40 securities. The securities in the Fund are selected without taking into account the securities in the Index and the Investment Manager applies the negative and norms-based ESG screen prior to the construction of the portfolio of the Fund and on an ongoing basis.

Application of the ESG screens results in the exclusion of any securities from the portfolio based on an assessment of their adherence to ESG criteria defined by the Investment Manager. The Fund will screen out securities identified as being non-compliant with UNGC Principles relating to environmental protection, human rights, labour standards and anti-corruption, as well as companies associated with Severe ESG Controversies, controversial weapons, civilian firearms, tobacco, thermal coal, arctic oil & gas exploration and oil sands extraction. The Fund may use additional ESG screening techniques from time to time in order to exclude securities based on their involvement with an activity that is deemed non-compliant with one or more of such ESG criteria referred to in the previous sentence.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

In order to attain the environmental and social characteristics promoted by the Fund, the Investment Manager implements the Fundamental Value Equity Strategy to build a concentrated portfolio of 30-40 securities for the Fund while evaluating an investee company's carbon emissions.

Another binding element of the investment strategy utilised by the Fund consists of the application of the ESG screens as above and further listed below:

1. Controversial Weapons
2. UNGC Violations
3. Thermal Coal
4. Arctic Oil & Gas Exploration
5. Oil Sands Extraction
6. Severe ESG Controversies
7. Civilian firearms
8. Tobacco

The above list is a non-exhaustive set of exclusions and the Investment Manager may employ additional ESG screens from time to time in order to exclude securities from the portfolio based on an assessment of their non-compliance with one or more ESG criteria defined by the Investment Manager.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

N/A

What is the policy to assess good governance practices of the investee companies?

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

The assessment of good governance practices is implemented by the Investment Manager through the assessment of potential investments when implementing the Fundamental Value Equity strategy. The Investment Manager deploys a proprietary governance assessment framework that includes a governance scorecard and a qualitative assessment. The framework considers factors such as board independence, diversity and experience as well as the configuration of executive compensation and accounting and tax compliance, The assessment of good governance practices is further implemented through the negative screening utilised by the Fund. Companies deemed by the Investment Manager to comply with UNGC Principles are considered to exhibit good governance. The Investment Manager will only invest in companies that they deem to follow good governance practices.

What is the asset allocation planned for this financial product?

Asset allocation describes the share of investments in specific assets.

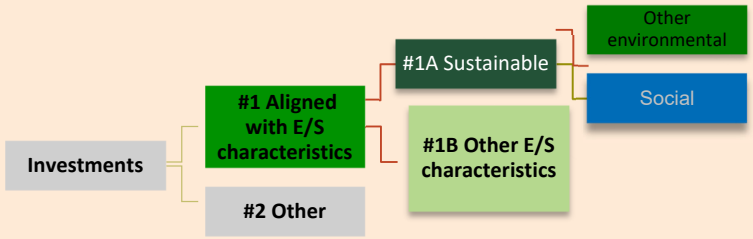

The Investment Manager employs a binding ESG methodology which aims to build a portfolio where at least 90% of the Fund's assets are invested in securities which are "#1 Aligned with environmental and social characteristics as outlined in the table below. It is intended that, within such portion of the portfolio, at least 25% of the Fund's assets are invested in securities which are sustainable investments with environmental and / or social objectives. The remaining portion (<10%) of the portfolio, consisting of cash as well as cash equivalents in place held at the Investment Manager's discretion, will be classified under #2 Other in the below table and will not be aligned with the promoted environmental and social characteristics.

Taxonomy-aligned activities are expressed as a share of:

— **turnover** reflecting the share of revenue from green activities of investee companies

— **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product*?**

To the extent that the Fund may use financial derivative instruments, these will not be used to attain the environmental or social characteristics promoted by the Fund.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to invest in any "sustainable investment" within the meaning of the EU Taxonomy, but only within the meaning of the SFDR regulation. However, the position will be kept under periodic review giving due consideration to market developments as the availability of reliable data increases over time

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]

☐ **Yes:**

☐ In fossil gas ☐ In nuclear energy

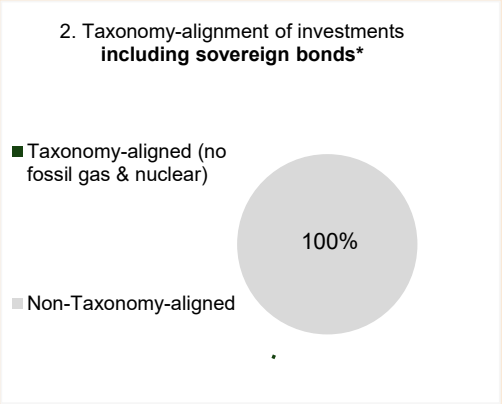

☒ **No**

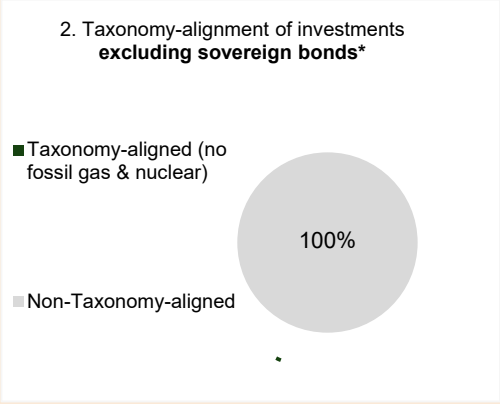

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulations (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of investments in transitional and enabling activities?

As the Fund does not commit to invest any "sustainable investment" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy is therefore also set at 0%.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The Fund intends to invest a minimum of 0% of the Fund's securities in sustainable investments with an environmental objective, that are not aligned with the EU Taxonomy. The assessment of the Fund's investments qualifying as sustainable is typically determined on a monthly basis as ESG scores are updated.

What is the minimum share of socially sustainable investments?

The Fund intends to invest a minimum of 0% of the Fund's securities in sustainable investments with a social objective, that are not aligned with the EU Taxonomy. The assessment of the Fund's investments qualifying as sustainable is typically determined on a monthly basis as ESG scores are updated.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The Fund may hold a portion of its assets in cash or cash equivalents or use financial derivative instruments at the Investment Manager's discretion, which would be classified under #2 Other in the above table. Such assets will not be aligned with environmental and social characteristics nor will there be any environmental or social safeguards in place.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

N/A

Asset allocation describes the share of investments in specific assets.

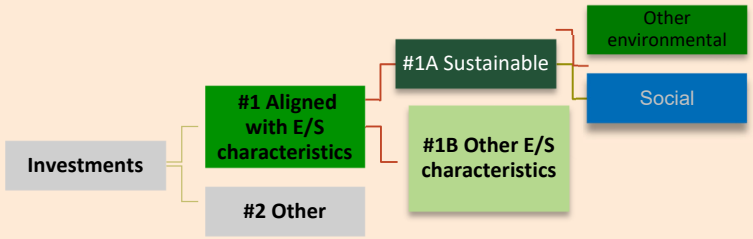

The Investment Manager employs a binding ESG methodology which aims to build a portfolio where at least 90% of the Fund's assets are invested in securities which are "#1 Aligned with environmental and social characteristics as outlined in the table below. It is intended that, within such portion of the portfolio, at least 25% of the Fund's assets are invested in securities which are sustainable investments with environmental and / or social objectives. The remaining portion (<10%) of the portfolio, consisting of cash as well as cash equivalents in place held at the Investment Manager's discretion, will be classified under #2 Other in the below table and will not be aligned with the promoted environmental and social characteristics.

Taxonomy-aligned activities are expressed as a share of:

— **turnover** reflecting the share of revenue from green activities of investee companies

— **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product*?**

To the extent that the Fund may use financial derivative instruments, these will not be used to attain the environmental or social characteristics promoted by the Fund.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to invest in any "sustainable investment" within the meaning of the EU Taxonomy, but only within the meaning of the SFDR regulation. However, the position will be kept under periodic review giving due consideration to market developments as the availability of reliable data increases over time

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]

[ ] **Yes:**

[ ] In fossil gas [ ] In nuclear energy

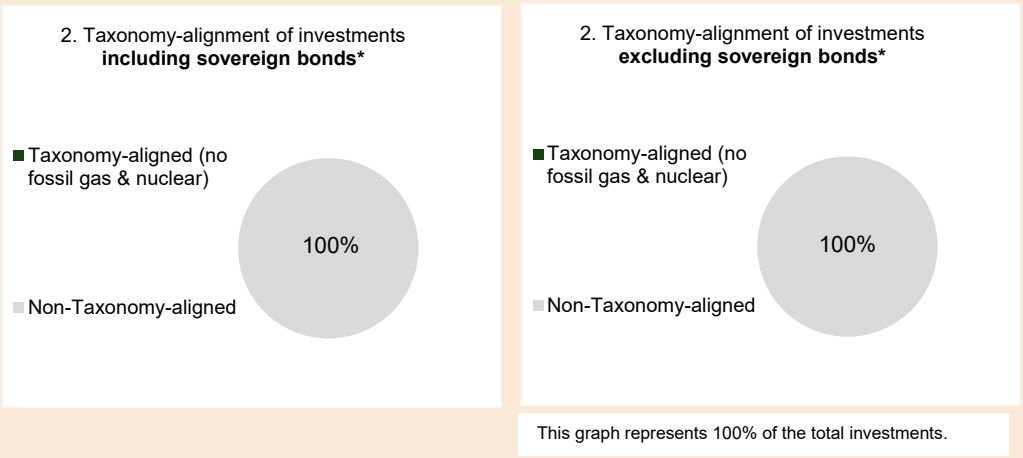

[X] **No**

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulations (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What is the minimum share of investments in transitional and enabling activities?

As the Fund does not commit to invest any "sustainable investment" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy is therefore also set at 0%.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The Fund intends to invest a minimum of 0% of the Fund's securities in sustainable investments with an environmental objective, that are not aligned with the EU Taxonomy. The assessment of the Fund's investments qualifying as sustainable is typically determined on a monthly basis as ESG scores are updated.

What is the minimum share of socially sustainable investments?

The Fund intends to invest a minimum of 0% of the Fund's securities in sustainable investments with a social objective, that are not aligned with the EU Taxonomy. The assessment of the Fund's investments qualifying as sustainable is typically determined on a monthly basis as ESG scores are updated.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The Fund may hold a portion of its assets in cash or cash equivalents or use financial derivative instruments at the Investment Manager's discretion, which would be classified under #2 Other in the above table. Such assets will not be aligned with environmental and social characteristics nor will there be any environmental or social safeguards in place.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

N/A

ANNEX 18

Template pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: State Street US Value Spotlight Fund (the "Fund")

Legal entity identifier: 549300CNEPQC6D3LR119

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☐ **Yes**

☒ **No**

☐ It will make a minimum of **sustainable investments with an environmental objective**: ___%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of **sustainable investments with a social objective: ___%**

☒ **It promotes Environmental/ Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 25% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The environmental and social characteristics promoted by the Fund are negative and norms-based screens applied to the portfolio of the Fund to screen out securities based on an assessment of their adherence to ESG criteria, i.e. international norms in relation to environmental and social protection. Specifically, the Fund promotes environmental characteristics through exclusion of investments in companies which fail to comply with UNGC Principles relating to environment (Principles 7 to 9), companies associated with Severe ESG Controversies and which are active in thermal coal, arctic oil & gas exploration, and oil sands extraction.

The Fund also promotes social characteristics through exclusion of investments in companies which fail to comply with UNGC Principles relating to human rights (Principles 1 and 2), labour standards (Principles 3 to 6), anti-corruption (Principle 10) and companies associated with Severe, ESG Controversies, controversial weapons, civilian firearms and tobacco. The UNGC Principles is the world largest corporate sustainability initiative aimed at companies to align their strategies and operations with universal principles on human rights, labour, environment and anti-corruption, and take actions that advance societal goals.

The Fund may use additional ESG screens from time to time in order to exclude securities based on their involvement with an activity that is deemed non-compliant with one or more of such ESG criteria.

The Fund further promotes environmental and social characteristics through its allocation of a portion of the portfolio to sustainable investments. In order for the security to qualify as a sustainable investment, it must be classified as a "Leader" or "Outperformer" as determined by the Investment Manager using the ESG score generated by its proprietary process.

In addition, the Fund promotes environmental characteristics through investments in companies which exhibit lower carbon emissions than the Index as measured using Weighted Average Carbon Intensity ("WACI") .

No reference benchmark has been designated to attain the environmental and social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The attainment of the environmental characteristics is measured through achieving a higher exposure of the Fund's portfolio to companies such that the Fund's overall portfolio exhibits lower carbon emissions (relative to the MSCI World Index) as measured using Weighted Average Carbon Intensity ("WACI").

A further attainment of the environmental characteristics promoted by the Fund is measured through:

- % of the portfolio invested in securities that are included in the negative and norms based screen specifically related to environmental characteristics, namely companies identified as being non-compliant with UNGC Principles in regards to the environment, companies associated with Severe ESG Controversies and companies which are active in thermal coal, arctic oil & gas exploration, and oil sands extraction

The attainment of the social characteristics promoted by the Fund is measured through:

- % of the portfolio invested in securities that are included in the negative and norms based screen specifically related to social characteristics, namely companies identified as being non-compliant with UNGC Principles and companies associated with Severe ESG Controversies, controversial weapons, civilian firearms and tobacco.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The objectives of the sustainable investments made by the Fund are to invest in securities that are classified as:

- Leaders or Outperformers according to the ESG score of the Investment Manager's proprietary ESG scoring system.

The ESG scoring system developed by the Investment Manager leverages multiple data sources and aligns them to widely accepted, transparent materiality frameworks to generate a unique ESG score for listed companies. It measures the performance of a company's business operations and governance as it relates to financially material ESG challenges facing the company's industry.

The Investment Manager draws on data from multiple ESG data providers and leverages the Sustainable Accounting Standards Board's ("SASB") - widely accepted, transparent materiality framework to generate the unique score that measures the performance of a company's business operations and governance as it relates to industry-specific ESG Factors. The SASB materiality framework focuses on financial materiality of certain ESG metrics as defined by specific industry. The company's ESG score allows for a global comparison of companies' ESG performance within a sector or industry.

In order for the security to qualify as a sustainable investment, the company must be a "Leader" or "Outperformer" as determined by the Investment Manager using the ESG score generated by its proprietary process. Companies qualified as "Leaders" or "Outperformers" are deemed to manage and mitigate long-term, financially-material sustainable risks better than its peers and thus operate a more sustainable business model.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager applies a negative and norms-based screen to the Fund to screen out securities based on an assessment of their adherence to ESG criteria including securities of

companies identified as being non-compliant with UNGC Principles (relating to environmental protection, human rights, labour standards, anti-corruption), and securities of companies associated with Severe ESG Controversies, controversial weapons, civilian firearms, thermal coal, arctic oil & gas exploration, oil sands extraction and tobacco. By applying the relevant negative and norms-based screen, the Investment Manager deems the Fund's sustainable investments not to cause significant harm to any environmental or social sustainable investment objective.

— *How have the indicators for adverse impacts on sustainability factors been taken into account?*

As described below, the Fund considers Principal Adverse Impacts ("PAIs") on sustainability factors by applying the negative and norms-based ESG screen prior to the construction of the portfolio.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The Fund excludes companies that the Investment Manager has identified as being non-compliant with UNGC Principles as part of the negative screening utilised by the Fund. The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are considered as part of the UNGC Principles assessment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

X **Yes,**

The Fund considers Principal Adverse Impacts on sustainability factors by applying the negative and norms-based ESG screen prior to the construction of the portfolio. Specifically, the Fund considers

- Exposure to companies active in the fossil fuel sector
- Violations of UN Global Compact Principles
- Exposure to controversial weapons

Further information on the PAIs will be found in the periodic reports for the Fund.

No

What investment strategy does this financial product follow?

The Investment Manager, on behalf of the Fund, will invest actively using the Fundamental Value Equity Strategy as further described in section 8.1 of the Prospectus and the Relevant Supplement. This strategy

uses a proprietary fundamentally driven and bottom up research process to identify companies with a dislocation between the intrinsic value of the company and the price of its equity security.

In implementing this strategy, the Investment Manager builds a concentrated portfolio of 30-40 securities. The securities in the Fund are selected without taking into account the securities in the Index and the Investment Manager applies the negative and norms-based ESG screen prior to the construction of the portfolio of the Fund and on an ongoing basis.

Application of the ESG screens results in the exclusion of any securities from the portfolio based on an assessment of their adherence to ESG criteria defined by the Investment Manager. The Fund will screen out securities identified as being non-compliant with UNGC Principles relating to environmental protection, human rights, labour standards and anti-corruption, as well as companies associated with Severe ESG Controversies, controversial weapons, civilian firearms, tobacco thermal coal, arctic oil & gas exploration and oil sands extraction. The Fund may use additional ESG screening techniques from time to time in order to exclude securities based on their involvement with an activity that is deemed non-compliant with one or more of such ESG criteria referred to in the previous sentence.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

In order to attain the environmental and social characteristics promoted by the Fund, the Investment Manager implements the Fundamental Value Equity Strategy to build a concentrated portfolio of 30-40 securities for the Fund while evaluating an investee company's carbon emissions.

Another binding element of the investment strategy utilised by the Fund consists of the application of the ESG screens as above and further listed below:

1. Controversial Weapons
2. UNGC Violations
3. Thermal Coal
4. Arctic Oil & Gas Exploration
5. Oil Sands Extraction
6. Severe ESG Controversies
7. Civilian firearms
8. Tobacco

The above list is a non-exhaustive set of exclusions and the Investment Manager may employ additional ESG screens from time to time in order to exclude securities from the portfolio based on an assessment of their non-compliance with one or more ESG criteria defined by the Investment Manager.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

N/A

What is the policy to assess good governance practices of the investee companies?

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

The assessment of good governance practices is implemented by the Investment Manager through the assessment of potential investments when implementing the Fundamental Value Equity strategy. The Investment Manager deploys a proprietary governance assessment framework that includes a governance scorecard and a qualitative assessment. The framework considers factors such as board independence, diversity and experience as well as the configuration of executive compensation and accounting and tax compliance, The assessment of good governance practices is further implemented through the negative screening utilised by the Fund. Companies deemed by the Investment Manager to comply with UNGC Principles are considered to exhibit good governance. The Investment Manager will only invest in companies that they deem to follow good governance practices.

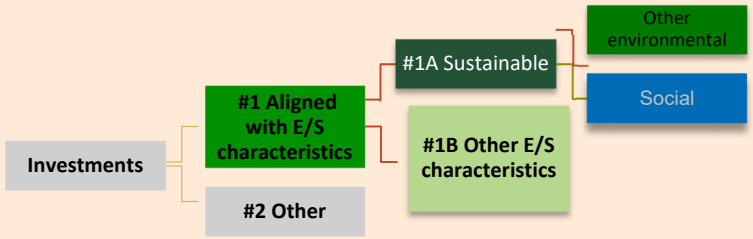

What is the asset allocation planned for this financial product?

Asset allocation describes the share of investments in specific assets.

The Investment Manager employs a binding ESG methodology which aims to build a portfolio where at least 90% of the Fund's assets are invested in securities which are "#1 Aligned with environmental and social characteristics as outlined in the table below. It is intended that, within such portion of the portfolio, at least 25% of the Fund's assets are invested in securities which are sustainable investments with environmental and / or social objectives. The remaining portion (<10%) of the portfolio, consisting of cash as well as cash equivalents in place held at the Investment Manager's discretion, will be classified under #2 Other in the below table and will not be aligned with the promoted environmental and social characteristics.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product*?**

To the extent that the Fund may use financial derivative instruments, these will not be used to attain the environmental or social characteristics promoted by the Fund.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to invest in any "sustainable investment" within the meaning of the EU Taxonomy, but only within the meaning of the SFDR regulation. However, the position will be kept under periodic review giving due consideration to market developments as the availability of reliable data increases over time

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]

☐ **Yes:**

☐ In fossil gas ☐ In nuclear energy

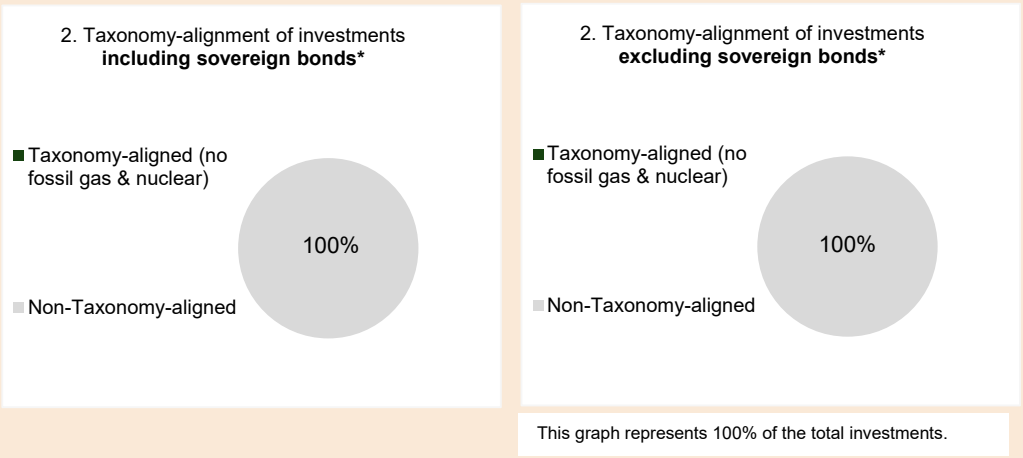

☒ **No**

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The Investment Manager deploys a proprietary governance assessment framework that includes a governance scorecard and a qualitative assessment. The framework considers factors such as board independence, diversity and experience as well as the configuration of executive compensation and accounting and tax compliance, The assessment of good governance practices is further implemented through the negative screening utilised by the Fund. Companies deemed by the Investment Manager to comply with UNGC Principles are considered to exhibit good governance. The Investment Manager will only invest in companies that they deem to follow good governance practices.

What is the asset allocation planned for this financial product?

Asset allocation describes the share of investments in specific assets.

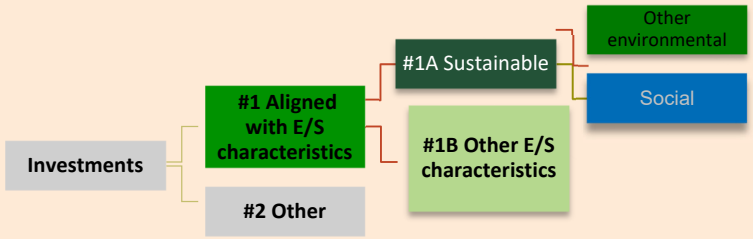

The Investment Manager employs a binding ESG methodology which aims to build a portfolio where at least 90% of the Fund's assets are invested in securities which are "#1 Aligned with environmental and social characteristics as outlined in the table below. It is intended that, within such portion of the portfolio, at least 25% of the Fund's assets are invested in securities which are sustainable investments with environmental and / or social objectives. The remaining portion (<10%) of the portfolio, consisting of cash as well as cash equivalents in place held at the Investment Manager's discretion, will be classified under #2 Other in the below table and will not be aligned with the promoted environmental and social characteristics.

Taxonomy-aligned activities are expressed as a share of:

— **turnover** reflecting the share of revenue from green activities of investee companies

— **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product*?**

To the extent that the Fund may use financial derivative instruments, these will not be used to attain the environmental or social characteristics promoted by the Fund.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to invest in any "sustainable investment" within the meaning of the EU Taxonomy, but only within the meaning of the SFDR regulation. However, the position will be kept under periodic review giving due consideration to market developments as the availability of reliable data increases over time

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]

☐ **Yes:**

☐ In fossil gas ☐ In nuclear energy

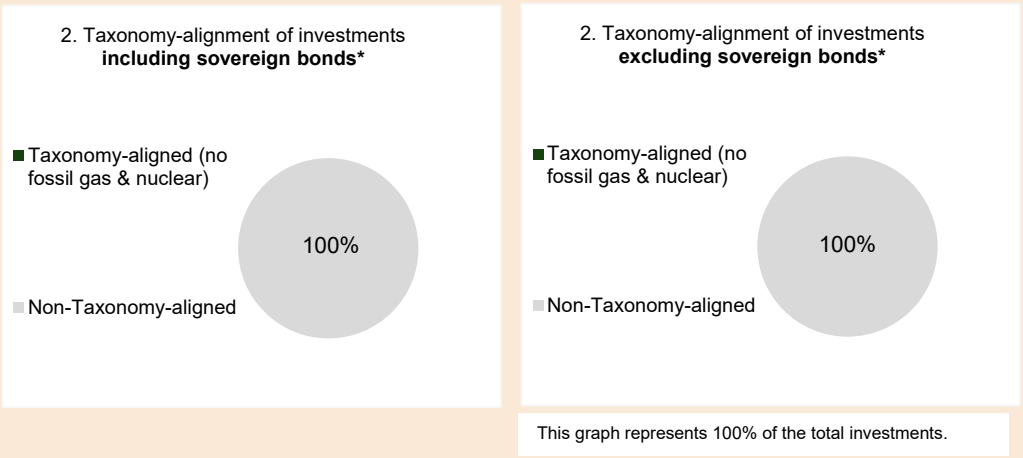

☒ **No**

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulations (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What is the minimum share of investments in transitional and enabling activities?

As the Fund does not commit to invest any "sustainable investment" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy is therefore also set at 0%.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The Fund intends to invest a minimum of 0% of the Fund's securities in sustainable investments with an environmental objective, that are not aligned with the EU Taxonomy. The assessment of the Fund's investments qualifying as sustainable is typically determined on a monthly basis as ESG scores are updated.

What is the minimum share of socially sustainable investments?

The Fund intends to invest a minimum of 0% of the Fund's securities in sustainable investments with a social objective, that are not aligned with the EU Taxonomy. The assessment of the Fund's investments qualifying as sustainable is typically determined on a monthly basis as ESG scores are updated.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The Fund may hold a portion of its assets in cash or cash equivalents or use financial derivative instruments at the Investment Manager's discretion, which would be classified under #2 Other in the above table. Such assets will not be aligned with environmental and social characteristics nor will there be any environmental or social safeguards in place.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

N/A

ANNEX 20

Template pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: State Street Global Value Spotlight Fund (the "Fund")

Legal entity identifier: 549300L2LSYOQY60YO56

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☐ **Yes**

☒ **No**

☐ It will make a minimum of **sustainable investments with an environmental objective**: ___%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of **sustainable investments with a social objective: ___%**

☒ **It promotes Environmental/ Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 25% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The environmental and social characteristics promoted by the Fund are negative and norms-based screens applied to the portfolio of the Fund to screen out securities based on an assessment of their adherence to ESG criteria, i.e. international norms in relation to environmental and social protection. Specifically, the Fund promotes environmental characteristics through exclusion of investments in companies which fail to comply with UNGC Principles relating to environment (Principles 7 to 9), companies associated with Severe ESG Controversies and which are active in thermal coal, arctic oil & gas exploration, and oil sands extraction.

The Fund also promotes social characteristics through exclusion of investments in companies which fail to comply with UNGC Principles relating to human rights (Principles 1 and 2), labour standards (Principles 3 to 6), anti-corruption (Principle 10) and companies associated with Severe ESG Controversies, controversial weapons, civilian firearms and tobacco. The UNGC Principles is the world largest corporate sustainability initiative aimed at companies to align their strategies and operations with universal principles on human rights, labour, environment and anti-corruption, and take actions that advance societal goals.

The Fund may use additional ESG screens from time to time in order to exclude securities based on their involvement with an activity that is deemed non-compliant with one or more of such ESG criteria.

The Fund further promotes environmental and social characteristics through its allocation of a portion of the portfolio to sustainable investments. In order for the security to qualify as a sustainable investment, it must be classified as a "Leader" or "Outperformer" as determined by the Investment Manager using the ESG score generated by its proprietary process.

In addition, the Fund promotes environmental characteristics through investments in companies which exhibit lower carbon emissions than the Index as measured using Weighted Average Carbon Intensity ("WACI").

No reference benchmark has been designated to attain the environmental and social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The attainment of the environmental characteristics is measured through achieving a higher exposure of the Fund's portfolio to companies such that the Fund's overall portfolio exhibits lower carbon emissions (relative to the MSCI World Index) as measured using Weighted Average Carbon Intensity ("WACI").

A further attainment of the environmental characteristics promoted by the Fund is measured through:

- % of the portfolio invested in securities that are included in the negative and norms based screen specifically related to environmental characteristics, namely companies identified as being non-compliant with UNGC Principles in regards to the environment, companies associated with Severe ESG Controversies and companies which are active in thermal coal, arctic oil & gas exploration, and oil sands extraction

The attainment of the social characteristics promoted by the Fund is measured through:

- % of the portfolio invested in securities that are included in the negative and norms based screen specifically related to social characteristics, namely companies identified as being non-compliant with UNGC Principles and companies associated with Severe ESG Controversies, controversial weapons, civilian firearms and tobacco.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The objectives of the sustainable investments made by the Fund are to invest in securities that are classified as:

- Leaders or Outperformers according to the ESG score of the Investment Manager's proprietary ESG scoring system.

The ESG scoring system developed by the Investment Manager leverages multiple data sources and aligns them to widely accepted, transparent materiality frameworks to generate a unique ESG score for listed companies. It measures the performance of a company's business operations and governance as it relates to financially material ESG challenges facing the company's industry.

The Investment Manager draws on data from multiple ESG data providers and leverages the Sustainable Accounting Standards Board's ("SASB") - widely accepted, transparent materiality framework to generate the unique score that measures the performance of a company's business operations and governance as it relates to industry-specific ESG Factors. The SASB materiality framework focuses on financial materiality of certain ESG metrics as defined by specific industry. The company's ESG score allows for a global comparison of companies' ESG performance within a sector or industry.

In order for the security to qualify as a sustainable investment, the company must be a "Leader" or "Outperformer" as determined by the Investment Manager using the ESG score generated by its proprietary process. Companies qualified as "Leaders" or "Outperformers" are deemed to manage and mitigate long-term, financially-material sustainable risks better than its peers and thus operate a more sustainable business model.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager applies a negative and norms-based screen to the Fund to screen out securities based on an assessment of their adherence to ESG criteria including securities of

companies identified as being non-compliant with UNGC Principles (relating to environmental protection, human rights, labour standards, anti-corruption), and securities of companies associated with Severe ESG Controversies, controversial weapons, civilian firearms, thermal coal, arctic oil & gas exploration, oil sands extraction and tobacco. By applying the relevant negative and norms-based screen, the Investment Manager deems the Fund's sustainable investments not to cause significant harm to any environmental or social sustainable investment objective.

— *How have the indicators for adverse impacts on sustainability factors been taken into account?*

As described below, the Fund considers Principal Adverse Impacts ("PAIs") on sustainability factors by applying the negative and norms-based ESG screen prior to the construction of the portfolio.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The Fund excludes companies that the Investment Manager has identified as being non-compliant with UNGC Principles as part of the negative screening utilised by the Fund. The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are considered as part of the UNGC Principles assessment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

X **Yes,**

The Fund considers Principal Adverse Impacts on sustainability factors by applying the negative and norms-based ESG screen prior to the construction of the portfolio. Specifically, the Fund considers

- Exposure to companies active in the fossil fuel sector
- Violations of UN Global Compact Principles
- Exposure to controversial weapons

Further information on the PAIs will be found in the periodic reports for the Fund.

No

What investment strategy does this financial product follow?

The Investment Manager, on behalf of the Fund, will invest actively using the Fundamental Value Equity Strategy as further described in section 8.1 of the Prospectus and the Relevant Supplement. This strategy

uses a proprietary fundamentally driven and bottom up research process to identify companies with a dislocation between the intrinsic value of the company and the price of its equity security.

In implementing this strategy, the Investment Manager builds a concentrated portfolio of 30-40 securities. The securities in the Fund are selected without taking into account the securities in the Index and the Investment Manager applies the negative and norms-based ESG screen prior to the construction of the portfolio of the Fund and on an ongoing basis.

Application of the ESG screens results in the exclusion of any securities from the portfolio based on an assessment of their adherence to ESG criteria defined by the Investment Manager. The Fund will screen out securities identified as being non-compliant with UNGC Principles relating to environmental protection, human rights, labour standards and anti-corruption, as well as companies associated with Severe ESG Controversies, controversial weapons, civilian firearms, tobacco, tobacco thermal coal, arctic oil & gas exploration and oil sands extraction. The Fund may use additional ESG screening techniques from time to time in order to exclude securities based on their involvement with an activity that is deemed non-compliant with one or more of such ESG criteria referred to in the previous sentence.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

In order to attain the environmental and social characteristics promoted by the Fund, the Investment Manager implements the Fundamental Value Equity Strategy to build a concentrated portfolio of 30-40 securities for the Fund while evaluating an investee company's carbon emissions.

Another binding element of the investment strategy utilised by the Fund consists of the application of the ESG screens as above and further listed below:

1. Controversial Weapons
2. UNGC Violations
3. Thermal Coal
4. Arctic Oil & Gas Exploration
5. Oil Sands Extraction
6. Severe ESG Controversies
7. Civilian firearms
8. Tobacco

The above list is a non-exhaustive set of exclusions and the Investment Manager may employ additional ESG screens from time to time in order to exclude securities from the portfolio based on an assessment of their non-compliance with one or more ESG criteria defined by the Investment Manager.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

N/A

What is the policy to assess good governance practices of the investee companies?

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

The assessment of good governance practices is implemented by the Investment Manager through the assessment of potential investments when implementing the Fundamental Value Equity strategy. The Investment Manager deploys a proprietary governance assessment framework that includes a governance scorecard and a qualitative assessment. The framework considers factors such as board independence, diversity and experience as well as the configuration of executive compensation and accounting and tax compliance, The assessment of good governance practices is further implemented through the negative screening utilised by the Fund. Companies deemed by the Investment Manager to comply with UNGC Principles are considered to exhibit good governance. The Investment Manager will only invest in companies that they deem to follow good governance practices.

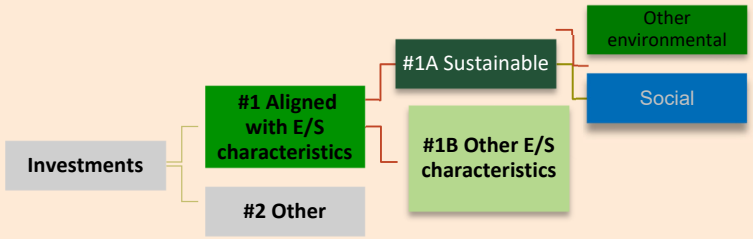

What is the asset allocation planned for this financial product?

Asset allocation describes the share of investments in specific assets.

The Investment Manager employs a binding ESG methodology which aims to build a portfolio where at least 90% of the Fund's assets are invested in securities which are "#1 Aligned with environmental and social characteristics as outlined in the table below. It is intended that, within such portion of the portfolio, at least 25% of the Fund's assets are invested in securities which are sustainable investments with environmental and / or social objectives. The remaining portion (<10%) of the portfolio, consisting of cash as well as cash equivalents in place held at the Investment Manager's discretion, will be classified under #2 Other in the below table and will not be aligned with the promoted environmental and social characteristics.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product*?**

To the extent that the Fund may use financial derivative instruments, these will not be used to attain the environmental or social characteristics promoted by the Fund.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to invest in any "sustainable investment" within the meaning of the EU Taxonomy, but only within the meaning of the SFDR regulation. However, the position will be kept under periodic review giving due consideration to market developments as the availability of reliable data increases over time

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]

☐ **Yes:**

☐ In fossil gas ☐ In nuclear energy

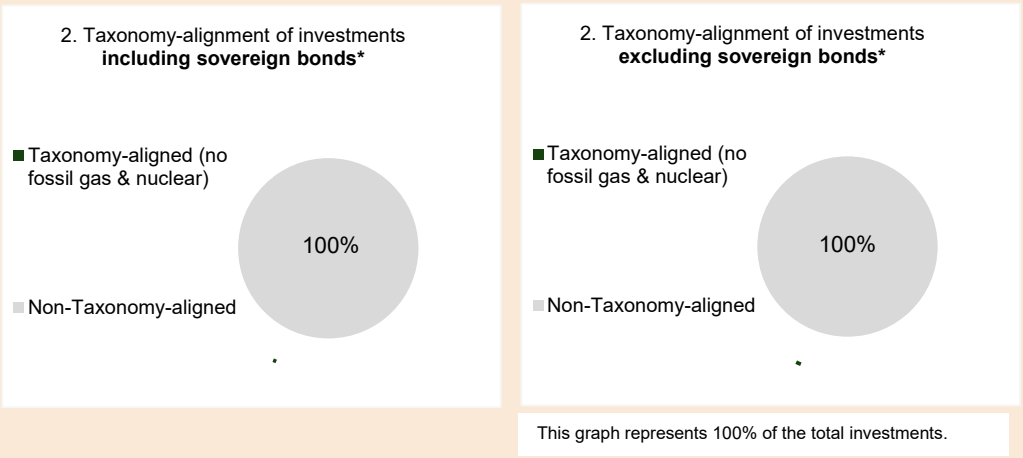

☒ **No**

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. Legal entity identifier: 984500460994DAAD9138

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☐ **Yes**

☒ **No**

☐ It will make a minimum of **sustainable investments with an environmental objective**: ___%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of **sustainable investments with a social objective: ___%**

☒ **It promotes Environmental/ Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 25% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The Fund promotes environmental characteristics through investments in companies which have been identified through the Investment Manager's proprietary fundamentally driven and bottom-up research process to offer the best combination of quality, durable growth and reasonable valuation, and that are well positioned for the risks posed by climate change and the transition to a low-carbon economy.

In addition to this, environmental and social characteristics promoted by the Fund are negative and norms-based screens applied to the portfolio of the Fund to screen out securities based on an assessment of their adherence to ESG criteria, i.e. international norms in relation to environmental and social protection. Specifically, the Fund promotes environmental characteristics through exclusion of investments in companies which fail to comply with UNGC Principles relating to environment (Principles 7 to 9), companies associated with Severe ESG Controversies and which are active in thermal coal, arctic oil & gas exploration, and oil sands extraction.

The Fund also promotes social characteristics through exclusion of investments in companies which fail to comply with UNGC Principles relating to human rights (Principles 1 and 2), labour standards (Principles 3 to 6), anti-corruption (Principle 10) and companies associated with Severe ESG Controversies, controversial weapons, civilian firearms and tobacco. The UNGC Principles is the world largest corporate sustainability initiative aimed at companies to align their strategies and operations with universal principles on human rights, labour, environment and anti-corruption, and take actions that advance societal goals.

The Fund may use additional ESG screens from time to time in order to exclude securities based on their involvement with an activity that is deemed non-compliant with one or more of such ESG criteria.

The Fund further promotes environmental and social characteristics through its allocation of a portion of the portfolio to sustainable investments. In order for the security to qualify as a sustainable investment, it must be classified as a "Leader" or "Outperformer" as determined by the Investment Manager using the ESG score generated by its proprietary process.

No reference benchmark has been designated to attain the environmental and social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The attainment of the environmental characteristics is measured through a higher exposure of the Fund's portfolio (relative to the MSCI All Country World Index ("Index") to companies that have set emissions reduction targets aligned with climate science, as validated by the Science-Based Targets Initiative ("SBTI"). The SBTI is a partnership between CDP, the UNGC, World Resources Institution ("WRI") and the World Wide Fund for Nature ("WWF").

A further attainment of the environmental characteristics promoted by the Fund is measured through:

- % of the portfolio invested in securities that are included in the negative and norms based screen specifically related to environmental characteristics, namely companies identified as being non-compliant with UNGC Principles in regards to the environment, companies associated with Severe ESG Controversies and companies which are active in thermal coal, arctic oil & gas exploration, and oil sands extraction

The attainment of the social characteristics promoted by the Fund is measured through:

- % of the portfolio invested in securities that are included in the negative and norms based screen specifically related to social characteristics, namely companies identified as being non-compliant with UNGC Principles and companies associated with Severe ESG Controversies, controversial weapons, civilian firearms and tobacco.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The objectives of the sustainable investments made by the Fund are to invest in securities that are classified as:

- Leaders or Outperformers according to the ESG score of the Investment Manager's proprietary ESG scoring system.

The ESG scoring system developed by the Investment Manager leverages multiple data sources and aligns them to widely accepted, transparent materiality frameworks to generate a unique ESG score for listed companies. It measures the performance of a company's business operations and governance as it relates to financially material ESG challenges facing the company's industry.

The Investment Manager draws on data from multiple ESG data providers and leverages the Sustainable Accounting Standards Board's ("SASB") - widely accepted, transparent materiality framework to generate the unique score that measures the performance of a company's business operations and governance as it relates to industry-specific ESG Factors. The SASB materiality framework focuses on financial materiality of certain ESG metrics as defined by specific industry. The company's ESG score allows for a global comparison of companies' ESG performance within a sector or industry.

In order for the security to qualify as a sustainable investment, the company must be a "Leader" or "Outperformer" as determined by the Investment Manager using the ESG score generated by its proprietary process. Companies qualified as "Leaders" or "Outperformers" are deemed to manage and mitigate long-term, financially-material sustainable risks better than its peers and thus operate a more sustainable business model.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager applies a negative and norms-based screen to the Fund to screen out securities based on an assessment of their adherence to ESG criteria including securities of companies identified as being non-compliant with UNGC Principles (relating to environmental protection, human rights, labour standards, anti-corruption), and securities of companies associated with Severe ESG Controversies, controversial weapons, civilian firearms, thermal coal, arctic oil & gas exploration, oil sands extraction and tobacco. By applying the relevant negative and norms-based screen, the Investment Manager deems the Fund's sustainable investments not to cause significant harm to any environmental or social sustainable investment objective.

— *How have the indicators for adverse impacts on sustainability factors been taken into account?*

As described below, the Fund considers Principal Adverse Impacts ("PAIs") on sustainability factors by applying the negative and norms-based ESG screen prior to the construction of the portfolio.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The Fund excludes companies that the Investment Manager has identified as being non-compliant with UNGC Principles as part of the negative screening utilised by the Fund. The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are considered as part of the UNGC Principles assessment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

X **Yes,** The Fund considers Principal Adverse Impacts on sustainability factors by applying the negative and norms-based ESG screen prior to the construction of the portfolio. Specifically, the Fund considers

- Exposure to companies active in the fossil fuel sector
- Violations of UN Global Compact Principles
- Exposure to controversial weapons

Further information on the PAIs will be found in the periodic reports for the Fund.

No

What investment strategy does this financial product follow?

The Investment Manager, on behalf of the Fund, will invest actively using the Global Climate Transition Equity Strategy as further described in section 8.1 of the Prospectus and the Relevant Supplement. This strategy uses a proprietary fundamentally driven and bottom up research process to identify companies that the Investment Manager considers to offer the best combination of quality, durable growth and reasonable valuations that are positioned for the risks posed by climate change and the transition to a low-carbon economy.

In implementing this strategy, the Investment Manager builds a concentrated portfolio of 30-40 securities by evaluating an investee company's climate positioning and transition plan. The securities in the Fund are selected primarily from the constituents of the Index and the Investment Manager applies the negative and norms-based ESG screen prior to the construction of the portfolio of the Fund and on an ongoing basis.

Application of the ESG screens results in the exclusion of any securities from the portfolio based on an assessment of their adherence to ESG criteria defined by the Investment Manager. The Fund will screen out securities identified as being non-compliant with UNGC Principles relating to environmental protection, human rights, labour standards and anti-corruption, as well as companies associated with Severe ESG Controversies, controversial weapons, civilian firearms, tobacco, thermal coal, arctic oil & gas exploration and oil sands extraction. The Fund may use additional ESG screening techniques from time to time in order to exclude securities based on their involvement with an activity that is deemed non-compliant with one or more of such ESG criteria referred to in the previous sentence.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

In order to attain the environmental and social characteristics promoted by the Fund, the Investment Manager implements the Global Climate Transition Equity Strategy to build a concentrated portfolio of 30-40 securities by evaluating an investee company's climate positioning and transition plan.

Another binding element of the investment strategy utilised by the Fund consists of the application of the ESG screens as above and further listed below:

1. Controversial Weapons
2. UNGC Violations
3. Thermal Coal
4. Arctic Oil & Gas Extraction
5. Oil Sands Extraction
6. Severe ESG Controversies
7. Civilian firearms
8. Tobacco

The above list is a non-exhaustive set of exclusions and the Investment Manager may employ additional ESG screens from time to time in order to exclude securities from the portfolio based on an assessment of their non-compliance with one or more ESG criteria defined by the Investment Manager.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

N/A

What is the policy to assess good governance practices of the investee companies?

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

The assessment of good governance practices is implemented by the Investment Manager through the assessment of potential investments when implementing the Global Climate Transition Equity strategy. The Investment Manager deploys a proprietary quality assessment framework that includes governance criteria. The framework considers factors such as board independence, diversity, experience, executive compensation, code of conduct and anti-corruption policies, share class structure, and transparency. Good governance practices will improve a company's quality score in the Investment Manager's framework increasing the likelihood of investment. The assessment of good governance practices is further implemented through the negative screening utilised by the Fund. Companies deemed by the Investment Manager to comply with UNGC Principles are considered to exhibit good governance.

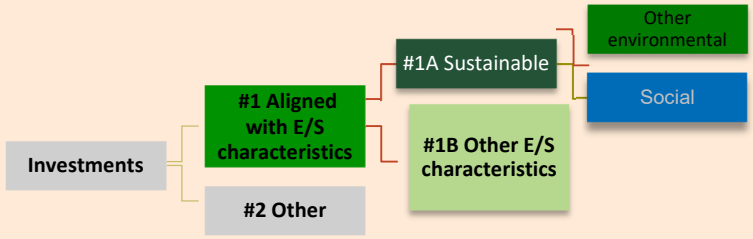

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

What is the asset allocation planned for this financial product?

The Investment Manager employs a binding ESG methodology which aims to build a portfolio where at least 90% of the Fund's assets are invested in securities which are "#1 Aligned with environmental and social characteristics as outlined in the table below. It is intended that, within such portion of the portfolio, at least 25% of the Fund's assets are invested in securities which are sustainable investments with environmental and / or social objectives. The remaining portion (<10%) of the portfolio, consisting of cash as well as cash equivalents in place held at the Investment Manager's discretion, will be classified under #2 Other in the below table and will not be aligned with the promoted environmental and social characteristics.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product*?**

To the extent that the Fund may use financial derivative instruments, these will not be used to attain the environmental or social characteristics promoted by the Fund.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to invest in any "sustainable investment" within the meaning of the EU Taxonomy, but only within the meaning of the SFDR regulation. However, the position will be kept under periodic review giving due consideration to market developments as the availability of reliable data increases over time.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]

	Yes:
	In fossil gas
	In nuclear energy
X	**No**

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulations (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What is the minimum share of investments in transitional and enabling activities?

As the Fund does not commit to invest any "sustainable investment" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy is therefore also set at 0%.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The Fund intends to invest a minimum of 0% of the Fund's securities in sustainable investments with an environmental objective, that are not aligned with the EU Taxonomy. The assessment of the Fund's investments qualifying as sustainable is typically determined on a monthly basis as ESG scores are updated.

What is the minimum share of socially sustainable investments?

The Fund intends to invest a minimum of 0% of the Fund's securities in sustainable investments with a social objective, that are not aligned with the EU Taxonomy. The assessment of the Fund's investments qualifying as sustainable is typically determined on a monthly basis as ESG scores are updated.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The Fund may hold a portion of its assets in cash or cash equivalents or use financial derivative instruments at the Investment Manager's discretion, which would be classified under #2 Other in the above table. Such assets will not be aligned with environmental and social characteristics nor will there be any environmental or social safeguards in place.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

N/A

ANNEX 22

Template pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: State Street Multi-Factor Global Equity Fund (the "Fund")

Legal entity identifier: 54930045LRIINCB32V69

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☐ **Yes**

☐ It will make a minimum of **sustainable investments with an environmental objective**: ___%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of **sustainable investments with a social objective: ___%**

☒ **No**

☐ **It promotes Environmental/ Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 25% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The environmental and social characteristics promoted by the Fund is the use of ESG ratings and other ESG data metrics to tilt the composition of the portfolio towards securities with favourable exposures to the relevant ESG criteria. In addition to this, further environmental or social characteristics are promoted by a negative and norms-based screen applied to the portfolio of the Fund to screen out securities based on an assessment of their adherence to ESG criteria, i.e. international norms in relation to environmental and social protection. Specifically, the Fund promotes certain environmental characteristics through exclusion of investments in companies which fail to comply with UNGC Principles relating to environment (Principles 7 to 9), companies associated with Severe ESG Controversies and which are active in thermal coal, arctic oil & gas exploration, and oil sands extraction. The Fund also promotes certain social characteristics through exclusion of investments in companies which fail to comply with UNGC Principles relating to human rights (Principles 1 and 2), labour standards (Principles 3 to 6), anti-corruption (Principle 10) and companies associated with Severe ESG Controversies, controversial weapons, civilian firearms and tobacco. The UNGC Principles is the world largest corporate sustainability initiative aimed at companies to align their strategies and operations with universal principles on human rights, labour, environment and anti-corruption, and take actions that advance societal goals.

The Fund may use additional ESG screens from time to time in order to exclude securities based on their involvement with an activity that is deemed non-compliant with one or more of such ESG criteria. The Fund further promotes environmental and social characteristics through its allocation of a portion of the portfolio to sustainable investments. In order for the security to qualify as a sustainable

investment, it must be classified as a "Leader" or "Outperformer" as determined by the Investment Manager using the ESG score generated by its proprietary process.

No reference benchmark has been designated to attain the environmental and social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The attainment of the environmental and social characteristics is measured through the ESG ratings score of the portfolio.

A further attainment of the environmental characteristics promoted by the Fund is measured through:

- % of the portfolio invested in securities that are included in the negative and norms based screen specifically related to environmental characteristics, namely companies identified as being non-compliant with UNGC Principles in regards to the environment, companies associated with Severe ESG Controversies and companies which are active in thermal coal, arctic oil & gas exploration, and oil sands extraction.

The attainment of the social characteristics promoted by the Fund is measured through:

- % of the portfolio invested in securities that are included in the negative and norms based screen specifically related to social characteristics, namely companies identified as being non-compliant with UNGC Principles and companies associated with Severe ESG Controversies, controversial weapons, civilian firearms, and tobacco.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The objectives of the sustainable investments made by the Fund are to invest in securities that are classified as:

- Leaders or Outperformers according to the ESG score of the Investment Manager's proprietary ESG scoring system.

The ESG scoring system developed by the Investment Manager leverages multiple data sources and aligns them to widely accepted, transparent materiality frameworks to generate a unique ESG score for listed companies. It measures the performance of a company's business operations and governance as it relates to financially material ESG challenges facing the company's industry.

The Investment Manager draws on data from multiple ESG data providers and leverages the Sustainable Accounting Standards Board's ("SASB") - widely accepted, transparent materiality framework to generate the unique score that measures the performance of a company's business operations and governance as it relates to industry-specific ESG Factors. The SASB materiality framework focuses on financial materiality of certain ESG metrics as defined by specific industry. The company's ESG score allows for a global comparison of companies' ESG performance within a sector or industry.

In order for the security to qualify as a sustainable investment, the company must be a "Leader" or "Outperformer" as determined by the Investment Manager using the ESG score generated by its proprietary process. Companies qualified as "Leaders" or "Outperformers" are deemed to manage and mitigate long-term, financially-material sustainable risks better than its peers and thus operate a more sustainable business model.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager applies a negative and norms-based screen to the Fund to screen out securities based on an assessment of their adherence to ESG criteria including securities of companies identified as being non-compliant with UNGC Principles (relating to environmental protection, human rights, labour standards, anti-corruption),and securities of companies associated with Severe ESG Controversies, controversial weapons civilian firearms, tobacco, thermal coal, arctic oil & gas exploration, and oil sands extraction. By applying the relevant negative and norms-based screen, the Investment Manager deems the Fund's sustainable investments not to cause significant harm to any environmental or social sustainable investment objective.

How have the indicators for adverse impacts on sustainability factors been taken int account?

As described below, the Fund considers Principal Adverse Impacts ("PAIs") on sustainability factors by applying the negative and norms-based ESG screen prior to the construction of the portfolio.

- *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The Fund excludes companies that the Investment Manager has identified as being non-complian with UNGC Principles as part of the negative screening utilised by the Fund. The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are considered as part of the UNGC Principles assessment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

X **Yes,**

The Fund considers Principal Adverse Impacts ("PAI") on sustainability factors as part of the Multi-Factor Equity Strategy and by applying the negative and norms-based ESG screen prior to the construction of the portfolio. Specifically, the Fund considers

- Greenhouse Gas emissions
- Carbon footprint
- Greenhouse gas intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Share of non-renewable energy consumption and production
- Energy consumption intensity per high impact climate sector
- Activities negatively affecting biodiversity-sensitive areas
- Emissions to water
- Hazardous waste and radioactive waste ratio
- Violations of UN Global Compact Principles
- Unadjusted gender pay gap
- Board gender diversity
- Exposure to controversial weapons

Further information on the PAIs will be found in the periodic reports for the Fund.

No

What investment strategy does this financial product follow?

The Investment Manager, on behalf of the Fund, will invest actively using the Multi-Factor Equity Strategy as further described in section 8.1 of the Prospectus and the Relevant Supplement. This strategy uses quantitative stock selection and multi-factor models to evaluate stocks based on their exposure to certain factors that the Investment Manager has evaluated to be the most persistent in driving excess returns.

In implementing this strategy, the Investment Manager will utilise optimisation techniques to tilt the composition of the portfolio towards securities with favourable exposure to the relevant factors considered in the investment process, as well as ESG criteria. The securities in the Fund are selected primarily from the constituents of the Index and the Investment Manager applies the negative and norms-based ESG screen prior to the construction of the portfolio of the Fund and on an ongoing basis.

Application of the ESG screens results in the exclusion of any securities from the portfolio based on an assessment of their adherence to certain ESG criteria defined by the Investment Manager. The Fund will screen out securities of issuers that fail to comply with UNGC Principles relating to environmental protection, human rights, labour standards and anti-corruption and are associated with Severe ESG Controversies, controversial weapons, civilian firearms, tobacco, thermal coal, arctic oil & gas exploration, and oil sands extraction. The Fund may use additional ESG screens from time to time in order to exclude securities based on their involvement with an activity that is deemed non-compliant with one or more of such ESG criteria referred to in the previous sentence.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

In order to attain the environmental and social characteristics promoted by the Fund, the Investment Manager applies a binding negative and norms-based ESG screen prior to the construction of the portfolio and on an ongoing basis and considers ESG ratings for the purposes of conducting the multi-factor model evaluation during the portfolio construction process.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

N/A

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The assessment of good governance practices is implemented through the negative screening utilised by the Fund. Companies deemed by the Investment Manager to comply with UNGC Principles are considered to exhibit good governance.

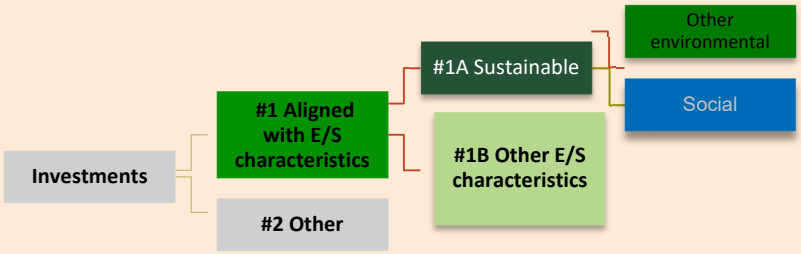

What is the asset allocation planned for this financial product?

Asset allocation describes the share of investments in specific assets.

The Investment Manager employs a binding ESG methodology which aims to build a portfolio where at least 90% of the Fund's assets are invested in securities which are #1 Aligned with environmental and social characteristics as outlined in the table below. It is intended that, within such portion of the portfolio, at least 25% of the Fund's assets are invested in securities which are sustainable investments with environmental and / or social objectives, at the point of rebalance of the portfolio which typically occurs on a quarterly basis. The remaining portion (<10%) of the portfolio, consisting of cash as well as cash equivalents in place held at the Investment Manager's discretion, will be classified under #2 Other in the below table and will not be aligned with the promoted environmental and social characteristics.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product*?**

To the extent that the Fund may use financial derivative instruments, these will not be used to attain the environmental or social characteristics promoted by the Fund.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to invest in any "sustainable investment" within the meaning of the EU Taxonomy, but only within the meaning of the SFDR regulation. However, the position will be kept under periodic review giving due consideration to market developments as the availability of reliable data increases over time.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]

[ ] **Yes:**

[ ] In fossil gas [ ] In nuclear energy

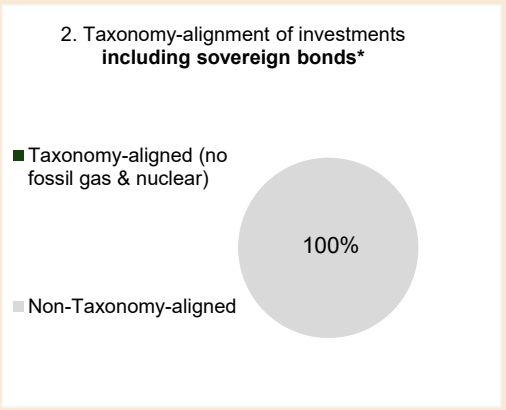

[X] **No**

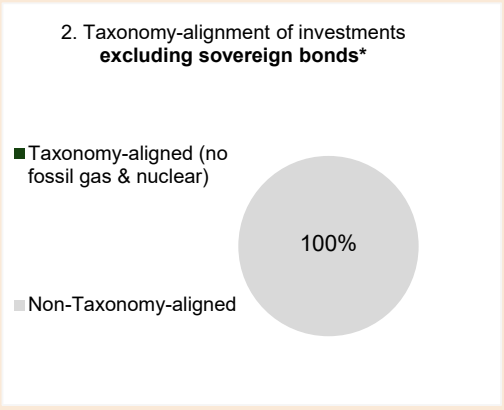

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulations (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What is the minimum share of investments in transitional and enabling activities?

As the Fund does not commit to invest any "sustainable investment" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy is therefore also set at 0%.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

The Fund intends to invest a minimum of 0% of the Fund's securities in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. The assessment of the Fund's investments qualifying as sustainable is determined on or around each portfolio rebalance which typically occurs on a quarterly basis.

What is the minimum share of socially sustainable investments?

The Fund intends to invest a minimum of 0% of the Fund's securities in sustainable investments with a social objective that are not aligned with the EU Taxonomy. The assessment of the Fund's investments qualifying as sustainable is determined on or around each portfolio rebalance which typically occurs on a quarterly basis.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The Fund may hold a portion of its assets in cash or cash equivalents or use financial derivative instruments at the Investment Manager's discretion, which would be classified under #2 Other in the above table. Such assets will not be aligned with environmental and social characteristics nor will there be any environmental or social safeguards in place.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

N/A

Where can I find more product specific information online?

More product-specific information can be found on the website:

Fund Finder (ssga.com)

Please search for State Street Multi-Factor Global Equity Fund under the "Fund Groups" heading.

ANNEX 23

Template pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: State Street Europe Screened Enhanced Equity Fund (the "Fund")

Legal entity identifier: 54930076IJU42ZJN9M77

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☐ **Yes**

☒ **No**

☐ It will make a minimum of **sustainable investments with an environmental objective**: ___%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of **sustainable investments with a social objective: ___%**

☒ **It promotes Environmental/ Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 25% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The environmental and social characteristics promoted by the Fund is a negative and norms-based screen applied to the portfolio of the Fund to screen out securities based on an assessment of their adherence to ESG criteria, i.e. international norms in relation to environmental and social protection. Specifically, The Fund promotes certain environmental characteristics through exclusion of investments in companies which fail to comply with UNGC Principles relating to environment (Principles 7 to 9), companies associated with Severe ESG Controversies and which are active in thermal coal, arctic oil & gas exploration, and oil sands extraction.

The Fund also promotes certain social characteristics through exclusion of investments in companies which fail to comply with UNGC Principles relating to human rights (Principles 1 and 2), labour standards (Principles 3 to 6), anti-corruption (Principle 10) and companies associated with Severe ESG Controversies, controversial weapons, civilian firearms and tobacco. The UNGC Principles is the world largest corporate sustainability initiative aimed at companies to align their strategies and operations with universal principles on human rights, labour, environment and anti-corruption, and take actions that advance societal goals.

The Fund may use additional ESG screens from time to time in order to exclude securities based on their involvement with an activity that is deemed non-compliant with one or more of such ESG criteria. The specific list of applicable exclusions may evolve and may be amended.

The Fund further promotes environmental and social characteristics through its allocation of a portion of the portfolio to sustainable investments. In order for the security to qualify as a sustainable investment, it must be classified as a "Leader" or "Outperformer" as determined by the Investment Manager using the ESG score generated by its proprietary process.

In addition, the Fund promotes environmental and social characteristics by using an ESG ratings score to tilt the composition of the portfolio towards securities with favourable exposures to the relevant ESG criteria.

No reference benchmark has been designated to attain the environmental and social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The attainment of the environmental and social characteristics is measured through the ESG ratings score of the portfolio.

The attainment of the environmental characteristics promoted by the Fund is measured through:

- % of the portfolio invested in securities that are included in the negative and norms based screen specifically related to environmental characteristics, namely companies identified as being non-compliant with UNGC Principles in regards to the environment, companies associated with Severe ESG Controversies and companies which are active in thermal coal, arctic oil & gas exploration, and oil sands extraction.

The attainment of the social characteristics promoted by the Fund is measured through:

- % of the portfolio invested in securities that are included in the negative and norms based screen specifically related to social characteristics, namely companies identified as being non-compliant with UNGC Principles and companies associated with Severe ESG Controversies, controversial weapons, civilian firearms, and tobacco.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The objectives of the sustainable investments made by the Fund are to invest in securities that are classified as:

- Leaders or Outperformers according to the ESG score of the Investment Manager's proprietary ESG scoring system.

The ESG scoring system developed by the Investment Manager leverages multiple data sources and aligns them to widely accepted, transparent materiality frameworks to generate a unique ESG score for listed companies. It measures the performance of a company's business operations and governance as it relates to financially material ESG challenges facing the company's industry.

The Investment Manager draws on data from multiple ESG data providers and leverages the Sustainable Accounting Standards Board's ("SASB") widely accepted, transparent materiality framework to generate the unique score that measures the performance of a company's business operations and governance as it relates to industry-specific ESG Factors. The SASB materiality framework focuses on financial materiality of certain ESG metrics as defined by specific industry. The company's ESG score allows for a global comparison of companies' ESG performance within a sector or industry.

In order for the security to qualify as a sustainable investment, the company must be a "Leader" or "Outperformer" as determined by the Investment Manager using the ESG score generated by its proprietary process. Companies qualified as "Leaders" or "Outperformers" are deemed to manage and mitigate long-term, financially-material sustainable risks better than its peers and thus operate a more sustainable business model.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager applies a negative and norms-based screen to the Fund to screen out securities based on an assessment of their adherence to ESG criteria including securities of companies identified as being non-compliant with UNGC Principles (relating to environmental protection, human rights, labour standards, anti-corruption) and securities of companies associated with Severe ESG Controversies, controversial weapons, civilian firearms, tobacco, thermal coal, arctic oil & gas exploration, and oil sands extraction. By applying the relevant negative and norms-based screen, the Investment Manager deems the Fund's sustainable investments not to cause significant harm to any environmental or social sustainable investment objective.

How have the indicators for adverse impacts on sustainability factors been taken into account?

As described below, the Fund considers Principal Adverse Impacts ("PAIs") on sustainability factors by applying the negative and norms-based ESG screen prior to the construction of the portfolio.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund excludes companies that the Investment Manager has identified as being non-compliant with UNGC Principles as part of the negative screening utilised by the Fund. The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are considered as part of the UNGC Principles assessment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

X **Yes,**

The Fund considers Principal Adverse Impacts ("PAI") on sustainability factors by applying the negative and norms-based ESG screen prior to the construction of the portfolio. Specifically, the Fund considers

- Exposure to companies active in the fossil fuel sector
- Violations of UN Global Compact Principles
- Exposure to controversial weapons

Further information on the PAIs will be found in the periodic reports for the Fund.

No

What investment strategy does this financial product follow?

The Investment Manager, on behalf of the Fund, will invest actively with limited risk parameters relative to the Index using the Quantitative Equity Strategy as further described in section 8.1 of the Prospectus and the Relevant Supplement. This strategy uses quantitative country allocation, stock selection and multi-factor models to evaluate the attractiveness of stocks and the Investment Manager uses the strategy to build a portfolio to aims to meet the investment objective and investment policy of the Fund.

In implementing this strategy, securities in the Fund are selected primarily from the constituents of the Index and the Investment Manager applies the negative and norms-based ESG screen prior to the construction of the portfolio of the Fund and on an ongoing basis. This results in the exclusion of any securities from the portfolio based on an assessment of their adherence to certain ESG criteria defined by the Investment Manager. The Fund will screen out securities that fail to comply with UNGC Principles (relating to environmental protection, human rights, labour standards and anti-corruption) and are associated with Severe ESG Controversies, controversial weapons, civilian firearms, tobacco, thermal coal, arctic oil & gas exploration, and oil sands extraction. The Fund may use additional ESG screens from time to time in order to exclude securities based on their involvement with an activity that is deemed non-compliant with one or more of such ESG criteria referred to in the previous sentence.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

In order to attain the environmental and social characteristics promoted by the Fund, the Investment Manager applies a binding negative and norms-based ESG screen prior to the construction of the portfolio and on an ongoing basis described in the previous section.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

N/A

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The assessment of good governance practices is implemented through the negative screening utilised by the Fund. Companies deemed by the Investment Manager to comply with UNGC Principles are considered to exhibit good governance.

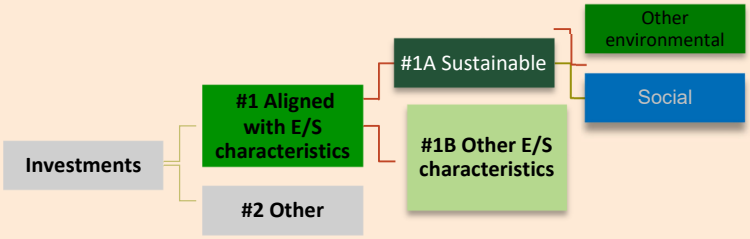

Asset allocation describes the share of investments in specific assets.

What is the asset allocation planned for this financial product?

The Investment Manager employs a binding ESG methodology which aims to build a portfolio where at least 90% of the Fund's assets are invested in securities which are #1 Aligned with environmental and social characteristics as outlined in the table below. It is intended that, within such portion of the portfolio, at least 25% of the Fund's assets are invested in securities which are sustainable investments with environmental and / or social objectives, at the point of rebalance of the portfolio which typically occurs on a monthly basis. The remaining portion (<10%) of the portfolio, consisting of cash as well as cash equivalents in place held at the Investment Manager's discretion, will be classified under #2 Other in the below table and will not be aligned with the promoted environmental and social characteristics.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product*?**

To the extent that the Fund may use financial derivative instruments, these will not be used to attain the environmental or social characteristics promoted by the Fund.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to invest in any "sustainable investment" within the meaning of the EU Taxonomy, but only within the meaning of the SFDR regulation. However, the position will be kept under periodic review giving due consideration to market developments as the availability of reliable data increases over time.

comprehensive safety and waste management rules.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]

Yes:

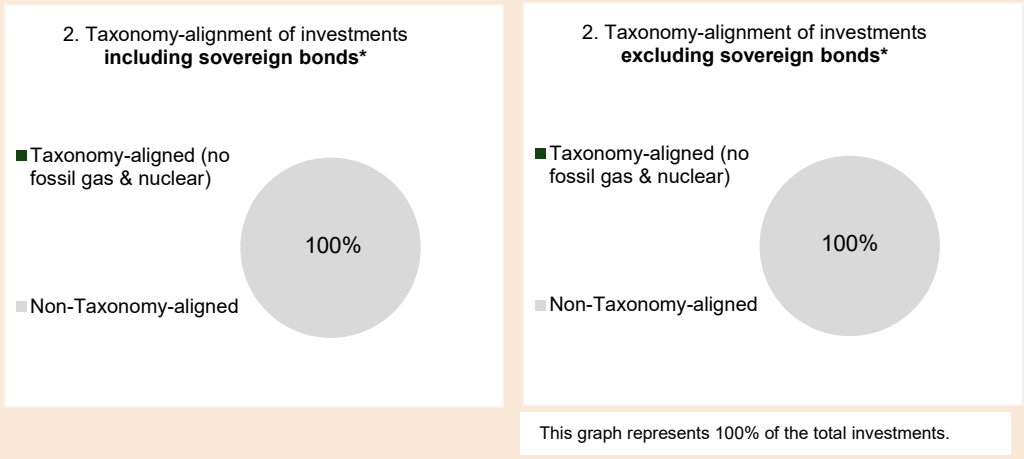

In fossil gas In nuclear energy

X

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What is the minimum share of investments in transitional and enabling activities?

As the Fund does not commit to invest any "sustainable investment" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy is therefore also set at 0%.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The Fund intends to invest a minimum of 0% of the Fund's securities in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. The assessment of the Fund's investments qualifying as sustainable is determined on or around each portfolio rebalance which typically occurs on a monthly basis.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulations (EU) 2022/1214.

What is the minimum share of socially sustainable investments?

The Fund intends to invest a minimum of 0% of the Fund's securities in sustainable investments with a social objective that are not aligned with the EU Taxonomy. The assessment of the Fund's investments qualifying as sustainable is determined on or around each portfolio rebalance which typically occurs on a monthly basis.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The Fund may hold a portion of its assets in cash or cash equivalents or use financial derivative instruments at the Investment Manager's discretion, which would be classified under #2 Other in the above table. Such assets will not be aligned with environmental and social characteristics nor will there be any environmental or social safeguards in place.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

N/A

Where can I find more product specific information online?

More product-specific information can be found on the website:

Fund Finder (ssga.com)

ANNEX 24

Template pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: State Street Global Screened Enhanced Equity Fund (the "Fund")

Legal entity identifier: 549300RJWR8TQWG0T308

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☐ **Yes**

☒ **No**

☐ It will make a minimum of **sustainable investments with an environmental objective**: ___%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of **sustainable investments with a social objective: ___%**

☒ **It promotes Environmental/ Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 25% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The environmental and social characteristics promoted by the Fund is a negative and norms-based screen applied to the portfolio of the Fund to screen out securities based on an assessment of their adherence to ESG criteria, i.e. international norms in relation to environmental and social protection. Specifically, The Fund promotes certain environmental characteristics through exclusion of investments in companies which fail to comply with UNGC Principles relating to environment (Principles 7 to 9) companies associated with Severe ESG Controversies and which are active in thermal coal, arctic oil & gas exploration, and oil sands extraction.

The Fund also promotes certain social characteristics through exclusion of investments in companies which fail to comply with UNGC Principles relating to human rights (Principles 1 and 2), labour standards (Principles 3 to 6), anti-corruption (Principle 10) and companies associated with Severe ESG Controversies, controversial weapons, civilian firearms and tobacco. The UNGC Principles is the world largest corporate sustainability initiative aimed at companies to align their strategies and operations with universal principles on human rights, labour, environment and anti-corruption, and take actions that advance societal goals.

The Fund may use additional ESG screens from time to time in order to exclude securities based on their involvement with an activity that is deemed non-compliant with one or more of such ESG criteria.

The specific list of applicable exclusions may evolve and may be amended.

The Fund further promotes environmental and social characteristics through its allocation of a portion of the portfolio to sustainable investments. In order for the security to qualify as a sustainable investment, it must be classified as a "Leader" or "Outperformer" as determined by the Investment Manager using the ESG score generated by its proprietary process.

In addition, the Fund promotes environmental and social characteristics by using an ESG ratings score to tilt the composition of the portfolio towards securities with favourable exposures to the relevant ESG criteria.

No reference benchmark has been designated to attain the environmental and social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The attainment of the environmental and social characteristics is measured through the ESG ratings score of the portfolio.

The attainment of the environmental characteristics promoted by the Fund is measured through:

- % of the portfolio invested in securities that are included in the negative and norms based screen specifically related to environmental characteristics, namely companies identified as being non-compliant with UNGC Principles in regards to the environment, companies associated with Severe ESG Controversies and companies which are active in thermal coal, arctic oil & gas exploration, and oil sands extraction.

The attainment of the social characteristics promoted by the Fund is measured through:

- % of the portfolio invested in securities that are included in the negative and norms based screen specifically related to social characteristics, namely companies identified as being non-compliant with UNGC Principles and companies associated with Severe ESG Controversies, controversial weapons, civilian firearms, and tobacco.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The objectives of the sustainable investments made by the Fund are to invest in securities that are classified as:

- Leaders or Outperformers according to the ESG score of the Investment Manager's proprietary ESG scoring system.

The ESG scoring system developed by the Investment Manager leverages multiple data sources and aligns them to widely accepted, transparent materiality frameworks to generate a unique ESG score for listed companies. It measures the performance of a company's business operations and governance as it relates to financially material ESG challenges facing the company's industry.

The Investment Manager draws on data from multiple ESG data providers and leverages the Sustainable Accounting Standards Board's ("SASB") widely accepted, transparent materiality framework to generate the unique score that measures the performance of a company's business operations and governance as it relates to industry-specific ESG Factors. The SASB materiality framework focuses on financial materiality of certain ESG metrics as defined by specific industry. The company's ESG score allows for a global comparison of companies' ESG performance within a sector or industry.

In order for the security to qualify as a sustainable investment, the company must be a "Leader" or "Outperformer" as determined by the Investment Manager using the ESG score generated by its proprietary process. Companies qualified as "Leaders" or "Outperformers" are deemed to manage and mitigate long-term, financially-material sustainable risks better than its peers and thus operate a more sustainable business model.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager applies a negative and norms-based screen to the Fund to screen out securities based on an assessment of their adherence to ESG criteria including securities of companies identified as being non-compliant with UNGC Principles (relating to environmental protection, human rights, labour standards, anti-corruption) and securities of companies associated with Severe ESG Controversies, controversial weapons, civilian firearms, tobacco, thermal coal, arctic oil & gas exploration, and oil sands extraction. By applying the relevant negative and norms-based screen, the Investment Manager deems the Fund's sustainable investments not to cause significant harm to any environmental or social sustainable investment objective.

How have the indicators for adverse impacts on sustainability factors been taken into account?

As described below, the Fund considers Principal Adverse Impacts ("PAIs") on sustainability factors by applying the negative and norms-based ESG screen prior to the construction of the portfolio.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund excludes companies that the Investment Manager has identified as beign non-compliant with UNGC Principles as part of the negative screening utilised by the Fund. The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are considered as part of the UNGC Principles assessment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

X **Yes,**

The Fund considers Principal Adverse Impacts ("PAI") on sustainability factors by applying the negative and norms-based ESG screen prior to the construction of the portfolio. Specifically, the Fund considers

- Exposure to companies active in the fossil fuel sector
- Violations of UN Global Compact Principles
- Exposure to controversial weapons

Further information on the PAIs will be found in the periodic reports for the Fund.

No

What investment strategy does this financial product follow?

The Investment Manager, on behalf of the Fund, will invest actively with limited risk parameters relative to the Index using the Quantitative Equity Strategy as further described in section 8.1 of the Prospectus and the Relevant Supplement. This strategy uses quantitative country allocation, stock selection and multi-factor models to evaluate the attractiveness of stocks and the Investment Manager uses the strategy to build a portfolio to aims to meet the investment objective and investment policy of the Fund.

In implementing this strategy, securities in the Fund are selected primarily from the constituents of the Index and the Investment Manager applies the negative and norms-based ESG screen prior to the construction of the portfolio of the Fund and on an ongoing basis. This results in the exclusion of any securities from the portfolio based on an assessment of their adherence to certain ESG criteria defined by the Investment Manager. The Fund will screen out securities that fail to comply with UNGC Principles relating to environmental protection, human rights, labour standards and anti-corruption and are associated with Severe ESG Controversies, controversial weapons, civilian firearms, tobacco, thermal coal, arctic oil & gas exploration, and oil sands extraction. The Fund may use additional ESG screens from time to time in order to exclude securities based on their involvement with an activity that is deemed non-compliant with one or more of such ESG criteria referred to in the previous sentence.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

In order to attain the environmental and social characteristics promoted by the Fund, the Investment Manager applies a binding negative and norms-based ESG screen prior to the construction of the portfolio and on an ongoing basis described in the previous section.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

N/A

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The assessment of good governance practices is implemented through the negative screening utilised by the Fund. Companies deemed by the Investment Manager to comply with UNGC Principles are considered to exhibit good governance.

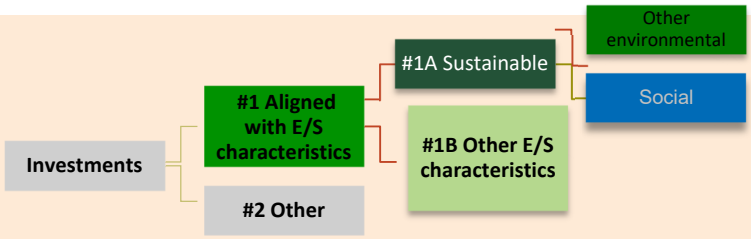

What is the asset allocation planned for this financial product?

Asset allocation describes the share of investments in specific assets.

The Investment Manager employs a binding ESG methodology which aims to build a portfolio where at least 90% of the Fund's assets are invested in securities which are #1 Aligned with environmental and social characteristics as outlined in the table below. It is intended that, within such portion of the portfolio, at least 25% of the Fund's assets are invested in securities which are sustainable investments with environmental and / or social objectives, at the point of rebalance of the portfolio which typically occurs on a monthly basis. The remaining portion (<10%) of the portfolio, consisting of cash as well as cash equivalents in place held at the Investment Manager's discretion, will be classified under #2 Other in the below table and will not be aligned with the promoted environmental and social characteristics.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product*?**

To the extent that the Fund may use financial derivative instruments, these will not be used to attain the environmental or social characteristics promoted by the Fund.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to invest in any "sustainable investment" within the meaning of the EU Taxonomy, but only within the meaning of the SFDR regulation. However, the position will be kept under periodic review giving due consideration to market developments as the availability of reliable data increases over time.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]

☐ **Yes:**

☐ In fossil gas ☐ In nuclear energy

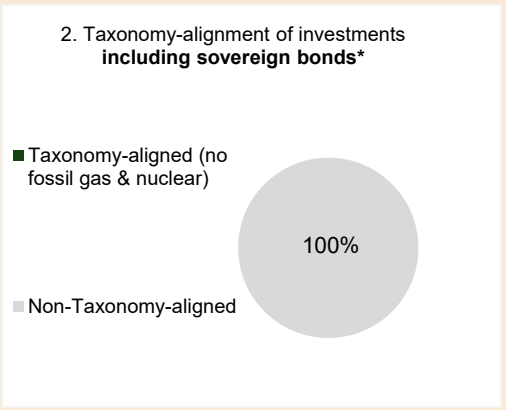

☒ **No**

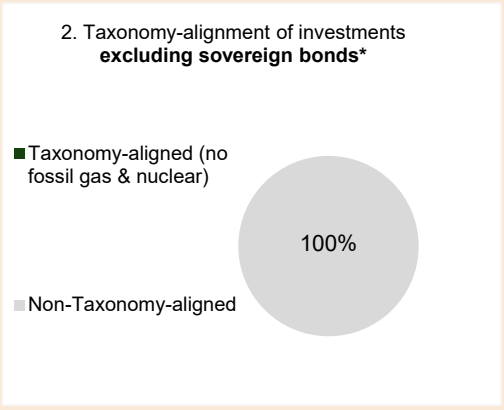

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulations (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What is the minimum share of investments in transitional and enabling activities?

As the Fund does not commit to invest any "sustainable investment" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy is therefore also set at 0%.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The Fund intends to invest a minimum of 0% of the Fund's securities in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. The assessment of the Fund's investments qualifying as sustainable is determined on or around each portfolio rebalance which typically occurs on a monthly basis.

What is the minimum share of socially sustainable investments?

The Fund intends to invest a minimum of 0% of the Fund's securities in sustainable investments with a social objective that are not aligned with the EU Taxonomy. The assessment of the Fund's investments qualifying as sustainable is determined on or around each portfolio rebalance which typically occurs on a monthly basis.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The Fund may hold a portion of its assets in cash or cash equivalents or use financial derivative instruments at the Investment Manager's discretion, which would be classified under #2 Other in the above table. Such assets will not be aligned with environmental and social characteristics nor will there be any environmental or social safeguards in place.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

N/A

Where can I find more product specific information online?

More product-specific information can be found on the website:

Fund Finder (ssga.com)

Please search for State Street Global Screened Enhanced Equity Fund under the “Fund Groups” heading.

ANNEX 25

Template pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: State Street Climate Transition Emerging Markets Enhanced Equity Fund (the "Fund")

Legal entity identifier: 549300IUSON9P4GOA187

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☐ **Yes** ☒ **No**

☐ It will make a minimum of **sustainable investments with an environmental objective**: ___%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of **sustainable investments with a social objective: ___%**

☒ **It promotes Environmental/ Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 25% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The Fund promotes environmental characteristics through investments in companies that are on a clear path to climate transition and which exhibit lower carbon emissions in the way of current emissions and future emissions (measured by fossil fuel reserves), produce green revenues and are better positioned for the risks posed by climate change.
In addition to this, the environmental and social characteristics promoted by the Fund are negative and norms-based screens applied to the portfolio of the Fund to screen out securities based on an assessment of their adherence to ESG criteria, i.e. international norms in relation to environmental and social protection. Specifically, the Fund promotes environmental characteristics through exclusion of investments in companies which fail to comply with UNGC Principles relating to environment (Principles 7 to 9), companies associated with Severe ESG Controversies and which are active in thermal coal, arctic oil & gas exploration, and oil sands extraction. The Fund also promotes social characteristics through exclusion of investments in companies which fail to comply with UNGC Principles relating to human rights (Principles 1 and 2), labour standards (Principles 3 to 6), anti-corruption (Principle 10) and companies associated with Severe ESG Controversies, tobacco, alcohol, adult entertainment, gambling, civilian firearms and controversial weapons. The UNGC Principles is the world largest corporate sustainability initiative aimed at companies to align their strategies and operations with universal principles on human rights, labour, environment and anti-corruption, and take actions that advance societal goals.
The Fund may use additional ESG screens from time to time in order to exclude securities based on their involvement with an activity that is deemed non-compliant with one or more of such ESG criteria.

The Fund further promotes environmental and social characteristics through its allocation of a portion of the portfolio to sustainable investments. In order for the security to qualify as a sustainable investment, the company

must be a “Leader” or “Outperformer” as determined by the Investment Manager using the ESG score generated b its proprietary process.

No reference benchmark has been designated to attain the environmental and social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The attainment of the environmental characteristics is measured through the higher exposure of the Fund’s portfolio (relative to the MSCI Emerging Markets Index (“Index”)) to companies that are mitigating greenhouse gas emissions and adapting to climate related risks by constructing the portfolio that aims to:

a) minimise;
- carbon emission intensity (emissions scaled by revenue);
- brown revenues;
- fossil fuel reserves;
- sensitivity to climate risks;
- and
- climate value at risk.

b) maximise green revenues; and

c) target companies that are positioned to benefit from the transition to the low-carbon economy based on their Implied Temperature Rise.

Implied Temperature Rise (ITR) compares the current and projected greenhouse gas emissions of each company against its carbon budget (as calculated by the IPCC). MSCI calculates the carbon budget overshoot or undershoot, then converts it to an implied rise in global temperature. The Investment Manager uses a portfolio ITR as the Fund's climate transition pathway.

A further attainment of the environmental characteristics promoted by the Fund is measured through:

- % of the portfolio invested in securities that are included in the negative and norms based screen specifically related to environmental characteristics, namely companies identified as being non-compliant with UNGC Principles in regards to the environment, companies associated with Severe ESG Controversies and companies which are active in thermal coal, arctic oil & gas exploration, and oil sands extraction.

The attainment of the social characteristics promoted by the Fund is measured through:

- % of the portfolio invested in securities that are included in the negative and norms based screen specifically related to social characteristics, namely companies identified as being non-compliant with UNGC Principles and companies associated with Severe ESG Controversies, tobacco, alcohol, adult entertainment, gambling, civilian firearms and controversial weapons.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The objectives of the sustainable investments made by the Fund are to invest in securities that are classified as:

- Leaders or Outperformers according to the ESG score of the Investment Manager’s proprietary ESG scoring system.

The ESG scoring system developed by the Investment Manager leverages multiple data sources and aligns them to widely accepted, transparent materiality frameworks to generate a unique ESG score for listed companies. It measures the performance of a company’s business operations and governance as it relates to financially material ESG challenges facing the company’s industry.

The Investment Manager draws on data from multiple ESG data providers and leverages the Sustainable Accounting Standards Board's ("SASB") - widely accepted, transparent materiality framework to generate the unique score that measures the performance of a company's business operations and governance as it relates to industry-specific ESG Factors. The SASB materiality framework focuses on financial materiality of certain ESG metrics as defined by specific industry. The company's ESG score allows for a global comparison of companies' ESG performance within a sector or industry.

In order for the security to qualify as a sustainable investment, the company must be a "Leader" or "Outperformer" as determined by the Investment Manager using the ESG score generated by proprietary process. Companies qualified as "Leaders" or "Outperformers" are deemed to manage and mitigate long-term, financially-material sustainable risks better than its peers and thus operate a more sustainable business model.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager applies a negative and norms-based screen to the Fund to screen out securities based on an assessment of their adherence to
ESG criteria including securities of companies identified as being non-compliant with UNGC Principles (relating to environmental protection, human rights, labour standards, anti-corruption), and securities of companies associated with Severe ESG Controversies, tobacco, alcohol, adult entertainment, gambling, civilian firearms and controversial weapons. By applying the relevant negative and norms-based screen, the Investment Manager deems the Fund's sustainable investments not to cause significant harm to any environmental or social sustainable investment objective.

— *How have the indicators for adverse impacts on sustainability factors been taken into account?*

As described below, the Fund considers Principal Adverse Impacts on sustainability factors as part of the Climate Transition Quantitative Equity Enhanced Strategy and by applying the negative and norms-based ESG screen prior to the construction of the portfolio.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The Fund excludes companies that the Investment Manager has identified as being non-compliant with UNGC Principles as part of the negative screening utilised by the Fund. The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are considered as part of the UNGC Principles assessment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

X **Yes,**

The Fund considers Principal Adverse Impacts ("PAI") on sustainability factors as part of the Climate Transition Quantitative Equity Enhanced Strategy and by applying the negative and norms-based ESG screens and climate transition targets prior to the construction of the portfolio. Specifically, the Fund considers

- Greenhouse Gas emissions
- Carbon footprint
- Greenhouse gas intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Share of non-renewable energy consumption and production
- Violations of UN Global Compact Principles
- Exposure to controversial weapons

Further information on the PAIs will be found in the periodic reports for the Fund.

No

What investment strategy does this financial product follow?

The Investment Manager, on behalf of the Fund, will invest actively using the Climate Transition Quantitative Equity Enhanced Strategy as further described in section 8.1 of the Prospectus and the Relevant Supplement. This strategy uses quantitative country allocation, stock selection and multi-factor models to evaluate the attractiveness of stocks including the use of a systematic methodology to provide higher exposure (relative to the Index) to companies that are mitigating and adapting to climate risk and are on a clear path to climate transition using ITR.

In implementing this strategy, the Investment Manager employs a quantitative process to construct a portfolio of securities taking into account certain ESG factors such as: carbon intensity (emissions scaled by revenue, fossil fuel reserves, green revenues, brown revenues, carbon risk ratings, sensitivity to climate risks, implied temperature rise and climate value at risk. The resulting portfolio of the Fund intends to provide higher exposure (relative to the Index) to companies that are mitigating and adapting to climate related risks and are in a clear path to climate transition using ITR. The securities in the Fund are selected primarily from the constituents of the Index and the Investment Manager applies the negative and norms-based ESG screens and climate transition targets prior to the construction of the portfolio of the Fund and on an ongoing basis.

Application of the ESG screens results in the exclusion of any securities from the portfolio based on an assessment of their adherence to ESG criteria defined by the Investment Manager. The Fund will screen out securities identified as being non-compliant with UNGC Principles relating to environmental protection, human rights, labour standards and anti-corruption, as well as companies associated with Severe ESG Controversies, tobacco, alcohol, adult entertainment, gambling, civilian firearms, controversial weapons, thermal coal, arctic oil & gas exploration and oil sands extraction. The Fund may use additional ESG screening techniques from time to time in order to exclude securities based on their involvement with an activity that is deemed non-compliant with one or more of such ESG criteria referred to in the previous sentence.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

In order to attain the environmental and social characteristics promoted by the Fund, the Investment Manager implements the Climate Transition Quantitative Equity Enhanced Strategy to build a portfolio of securities for the Fund that intends to provide higher exposure (relative to the Index) to companies that are mitigating and adapting to climate risk and are on a clear path to climate transition using climate ITR.

Another binding element of the investment strategy utilised by the Fund consists of the application of the ESG screens as above and further listed below:

1. Controversial Weapons
2. UNGC Violations
3. Thermal Coal

4. Arctic Oil & Gas Exploration
5. Oil Sands Extraction
6. Severe ESG Controversies
7. Tobacco
8. Alcohol
9. Adult Entertainment
10. Gambling
11. Norwegian Government Pension Fund Global exclusions.

The above list is a non-exhaustive set of exclusions and the Investment Manager may employ additional ESG screens from time to time in order to exclude securities from the portfolio based on an assessment of their non-compliance with one or more ESG criteria defined by the Investment Manager.
For the avoidance of doubt, the exclusions applied by the Fund are aligned with the Climate Transition Benchmark (CTB) exclusions contained in Article 12.(1)(a)-(c) of CDR (EU) 2020/1818, which are applied in the context of the ESMA Guidelines on funds' names.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

N/A

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The assessment of good governance practices is implemented through the negative screening utilised by the Fund. Companies deemed by the Investment Manager to comply with UNGC Principles are considered to exhibit good governance.

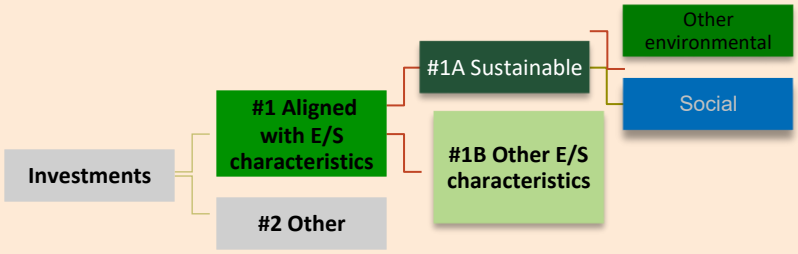

Asset allocation describes the share of investments in specific assets.

What is the asset allocation planned for this financial product?

The Investment Manager employs a binding ESG methodology which aims to build a portfolio where at least 90% of the Fund's assets are invested in securities which are "#1 Aligned with environmental and social characteristics as outlined in the table below. It is intended that, within such portion of the portfolio, at least 25% of the Fund's assets are invested in securities which are sustainable investments with environmental and / or social objectives, at the point of rebalance of the portfolio which typically occurs on a monthly basis. The remaining portion (<10%) of the portfolio, consisting of cash as well as cash equivalents in place held at the Investment Manager's discretion, will be classified under #2 Other in the below table and will not be aligned with the promoted environmental and social characteristics.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

To the extent that the Fund may use financial derivative instruments, these will not be used to attain the environmental or social characteristics promoted by the Fund.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to invest in any "sustainable investment" within the meaning of the EU Taxonomy, but only within the meaning of the SFDR regulation. However, the position will be kept under periodic review giving due consideration to market developments as the availability of reliable data increases over time.

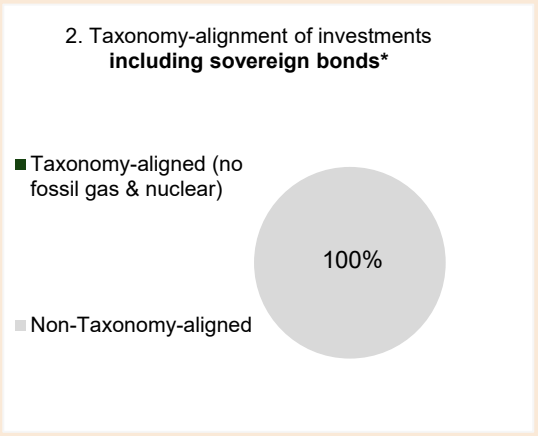

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]

	Yes:
	In fossil gas
	In nuclear energy
X	**No**

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What is the minimum share of investments in transitional and enabling activities?

As the Fund does not commit to invest any "sustainable investment" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy is therefore also set at 0%.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulations (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The Fund intends to invest a minimum of 0% of the Fund's securities in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. The assessment of the Fund's investments qualifying as sustainable is determined on or around each portfolio rebalance which typically occurs on a monthly basis.

What is the minimum share of socially sustainable investments?

The Fund intends to invest a minimum of 0% of the Fund's securities in sustainable investments with a social objective that are not aligned with the EU Taxonomy. The assessment of the Fund's investments qualifying as sustainable is determined on or around each portfolio rebalance which typically occurs on a monthly basis.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The Fund may hold a portion of its assets in cash or cash equivalents or use financial derivative instruments at the Investment Manager's discretion, which would be classified under #2 Other in the above table. Such assets will not be aligned with environmental and social characteristics nor will there be any environmental or social safeguards in place.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

N/A

ANNEX 26

Template pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: State Street Emerging Markets Screened Enhanced Equity Fund (the "Fund")

Legal entity identifier: 549300LBU31V51ZZ5J65

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It will make a minimum of **sustainable investments with an environmental objective**: ___%	☒ **It promotes Environmental/ Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 25% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It will make a minimum of **sustainable investments with a social objective: ___%**	☐ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The environmental and social characteristics promoted by the Fund is a negative and norms-based screen applied to the portfolio of the Fund to screen out securities based on an assessment of their adherence to ESG criteria, i.e. international norms in relation to environmental and social protection. Specifically, The Fund promotes certain environmental characteristics through exclusion of investments in companies which fail to comply with UNGC Principles relating to environment (Principles 7 to 9), companies associated with Severe ESG Controversies and which are active in thermal coal, arctic oil & gas exploration, and oil sands extraction.

The Fund also promotes certain social characteristics through exclusion of investments in companies which fail to comply with UNGC Principles relating to human rights (Principles 1 and 2), labour standards (principles 3 to 6), anti-corruption (Principle 10) and companies associated with Severe ESG Controversies, controversial weapons, civilian firearms and tobacco. The UNGC Principles is the world largest corporate sustainability initiative aimed at companies to align their strategies and operations with universal principles on human rights, labour, environment and anti-corruption, and take actions that advance societal goals.

The Fund may use additional ESG screens from time to time in order to exclude securities based on their involvement with an activity that is deemed non-compliant with one or more of such ESG criteria.

The specific list of applicable exclusions may evolve and may be amended.

The Fund further promotes environmental and social characteristics through its allocation of a portion of the portfolio to sustainable investments. In order for the security to qualify as a sustainable investment, it must be classified as a "Leader" or "Outperformer" as determined by the Investment Manager using the ESG score generated by its proprietary process.

In addition, the Fund promotes environmental and social characteristics by using an ESG ratings score to tilt the composition of the portfolio towards securities with favourable exposures to the relevant ESG criteria.

No reference benchmark has been designated to attain the environmental and social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The attainment of the environmental and social characteristics is measured through the ESG ratings score of the portfolio.

The attainment of the environmental characteristics promoted by the Fund is measured through:

- % of the portfolio invested in securities that are included in the negative and norms based screen specifically related to environmental characteristics, namely companies identified as being non-compliant with UNGC Principles in regards to the environment, companies associated with Severe ESG Controversies and companies which are active in thermal coal, arctic oil & gas exploration, and oil sands extraction.

The attainment of the social characteristics promoted by the Fund is measured through:

- % of the portfolio invested in securities that are included in the negative and norms based screen specifically related to social characteristics, namely companies identified as being non-compliant with UNGC Principles and companies associated with Severe ESG Controversies, controversial weapons, civilian firearms, and tobacco.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The objectives of the sustainable investments made by the Fund are to invest in securities that are classified as:

- Leaders or Outperformers according to the ESG score of the Investment Manager's proprietary ESG scoring system.

The ESG scoring system developed by the Investment Manager leverages multiple data sources and aligns them to widely accepted, transparent materiality frameworks to generate a unique ESG score for listed companies. It measures the performance of a company's business operations and governance as it relates to financially material ESG challenges facing the company's industry.

The Investment Manager draws on data from multiple ESG data providers and leverages the Sustainable Accounting Standards Board's ("SASB") widely accepted, transparent materiality framework to generate the unique score that measures the performance of a company's business operations and governance as it relates to industry-specific ESG Factors. The SASB materiality framework focuses on financial materiality of certain ESG metrics as defined by specific industry. The company's ESG score allows for a global comparison of companies' ESG performance within a sector or industry.

In order for the security to qualify as a sustainable investment, the company must be a "Leader" or "Outperformer" as determined by the Investment Manager using the ESG score generated by its proprietary process. Companies qualified as "Leaders" or "Outperformers" are deemed to manage and mitigate long-term, financially-material sustainable risks better than its peers and thus operate a more sustainable business model.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager applies a negative and norms-based screen to the Fund to screen out securities based on an assessment of their adherence to ESG criteria including securities of companies identified as being non-compliant with UNGC Principles (relating to environmental protection, human rights, labour standards, anti-corruption), and securities of companies associated with Severe ESG Controversies, controversial weapons, civilian firearms, thermal coal, arctic oil & gas exploration, oil sands extraction and tobacco. By applying the relevant negative and norms-based screen, the Investment Manager deems the Fund's sustainable investments not to cause significant harm to any environmental or social sustainable investment objective.

How have the indicators for adverse impacts on sustainability factors been taken into account?

As described below, the Fund considers Principal Adverse Impacts ("PAIs") on sustainability factors by applying the negative and norms-based ESG screen prior to the construction of the portfolio.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund excludes companies that the Investment Manager has identified as being non-compliant with UNGC Principles as part of the negative screening utilised by the Fund. The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are considered as part of the UNGC Principles assessment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

X **Yes,**

The Fund considers Principal Adverse Impacts ("PAI") on sustainability factors by applying the negative and norms-based ESG screen prior to the construction of the portfolio. Specifically, the Fund considers

- Exposure to companies active in the fossil fuel sector
- Violations of UN Global Compact Principles
- Exposure to controversial weapons

Further information on the PAIs will be found in the periodic reports for the Fund.

No

What investment strategy does this financial product follow?

The Investment Manager, on behalf of the Fund, will invest actively with limited risk parameters relative to the Index using the Quantitative Equity Strategy as further described in section 8.1 of the Prospectus and the Relevant Supplement. This strategy uses quantitative country allocation, stock selection and multi-factor models to evaluate the attractiveness of stocks and the Investment Manager uses the strategy to build a portfolio to aims to meet the investment objective and investment policy of the Fund.

In implementing this strategy, securities in the Fund are selected primarily from the constituents of the Index and the Investment Manager applies the negative and norms-based ESG screen prior to the construction of the portfolio of the Fund and on an ongoing basis. This results in the exclusion of any securities from the portfolio based on an assessment of their adherence to certain ESG criteria defined by the Investment Manager. The Fund will screen out securities that fail to comply with UNGC Principles (relating to environmental protection, human rights, labour standards and anti-corruption) and are associated with Severe ESG Controversies, controversial weapons, civilian firearms, tobacco, thermal coal, arctic oil & gas exploration, and oil sands extraction. The Fund may use additional ESG screens from time to time in order to exclude securities based on their involvement with an activity that is deemed non-compliant with one or more of such ESG criteria referred to in the previous sentence.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

In order to attain the environmental and social characteristics promoted by the Fund, the Investment Manager applies a binding negative and norms-based ESG screen prior to the construction of the portfolio and on an ongoing basis described in the previous section.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

N/A

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The assessment of good governance practices is implemented through the negative screening utilised by the Fund. Companies deemed by the Investment Manager comply with UNGC Principles are considered to exhibit good governance.

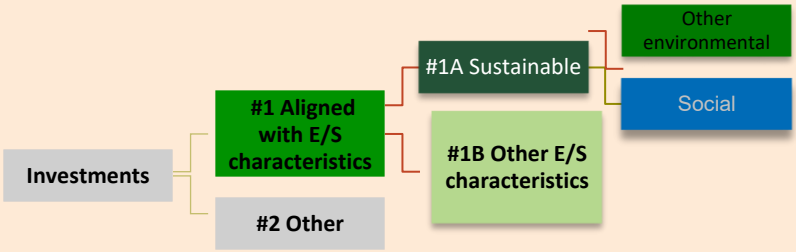

Asset allocation describes the share of investments in specific assets.

What is the asset allocation planned for this financial product?

The Investment Manager employs a binding ESG methodology which aims to build a portfolio where at least 90% of the Fund's assets are invested in securities which are #1 Aligned with environmental and social characteristics as outlined in the table below. It is intended that, within such portion of the portfolio, at least 25% of the Fund's assets are invested in securities which are sustainable investments with environmental and / or social objectives, at the point of rebalance of the portfolio which typically occurs on a monthly basis. The remaining portion (<10%) of the portfolio, consisting of cash as well as cash equivalents in place held at the Investment Manager's discretion, will be classified under #2 Other in the below table and will not be aligned with the promoted environmental and social characteristics.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

To the extent that the Fund may use financial derivative instruments, these will not be used to attain the environmental or social characteristics promoted by the Fund.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to invest in any "sustainable investment" within the meaning of the EU Taxonomy, but only within the meaning of the SFDR regulation. However, the position will be kept under periodic review giving due consideration to market developments as the availability of reliable data increases over time.

and waste management rules.

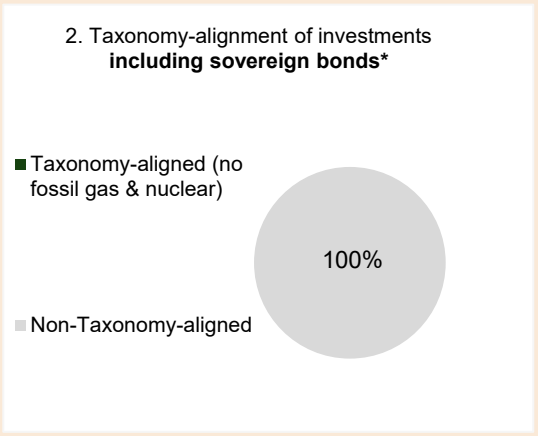

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]

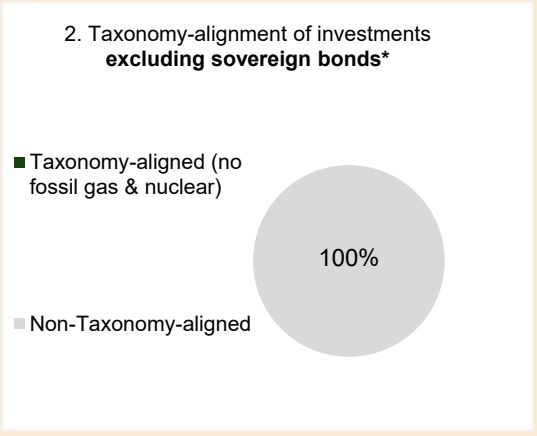

- [ ] **Yes:**
  - [ ] In fossil gas
  - [ ] In nuclear energy
- [x] **No**

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What is the minimum share of investments in transitional and enabling activities?

As the Fund does not commit to invest any "sustainable investment" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy is therefore also set at 0%.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The Fund intends to invest a minimum of 0% of the Fund's securities in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. The assessment of the Fund's investments qualifying as sustainable is determined on or around each portfolio rebalance which typically occurs on a monthly basis.

What is the minimum share of socially sustainable investments?

The Fund intends to invest a minimum of 0% of the Fund's securities in sustainable investments with a social objective that are not aligned with the EU Taxonomy. Theassessment of the Fund's investments qualifying as sustainable is determined on or around each portfolio rebalance which typically occurs on a monthly basis.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulations (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The Fund may hold a portion of its assets in cash or cash equivalents or use financial derivative instruments at the Investment Manager's discretion, which would be classified under #2 Other in the above table. Such assets will not be aligned with environmental and social characteristics nor will there be any environmental or social safeguards in place.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

N/A

Where can I find more product specific information online?

More product-specific information can be found on the website:

Fund Finder (ssga.com)

Please search for State Street Emerging Markets Screened Enhanced Equity Fund under the "Fund Groups" heading.

ANNEX 27

Template pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: State Street EMU Screened Equity Fund (the "Fund")

Legal entity identifier: 549300YX23AKK0P3RQ65

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☐ **Yes**

☐ It will make a minimum of **sustainable investments with an environmental objective**: ___%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of **sustainable investments with a social objective: ___%**

☒ **No**

☒ **It promotes Environmental/ Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 25% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The environmental and social characteristics promoted by the Fund is a negative and norms-based screen applied to the portfolio of the Fund to screen out securities based on an assessment of their adherence to ESG criteria, i.e. international norms in relation to environmental and social protection. Specifically, The Fund promotes certain environmental characteristics through exclusion of investments in companies which fail to comply with UNGC Principles relating to environment (Principles 7 to 9) companies associated with Severe ESG Controversies and which are active in thermal coal, arctic oil & gas exploration, and oil sands extraction.

The Fund also promotes certain social characteristics through exclusion of investments in companies which fail to comply with UNGC Principles relating to human rights (Principles 1 and 2), labour standards (Principles 3 to 6), anti-corruption (Principle 10) and companies associated with Severe ESG Controversies, controversial weapons, civilian firearms and tobacco. The UNGC Principles is the world largest corporate sustainability initiative aimed at companies to align their strategies and operations with universal principles on human rights, labour, environment and anti-corruption, and take actions that advance societal goals.

The Fund may use additional ESG screens from time to time in order to exclude securities based on their involvement with an activity that is deemed non-compliant with one or more of such ESG criteria.

The specific list of applicable exclusions may evolve and may be amended.

The Fund further promotes environmental and social characteristics through its allocation of a portion of the portfolio to sustainable investments. In order for the security to qualify as a sustainable investment, it must be classified as a "Leader" or "Outperformer" as determined by the Investment Manager using the ESG score generated by its proprietary process.

In addition, the Fund promotes environmental and social characteristics by using an ESG ratings score to tilt the composition of the portfolio towards securities with favourable exposures to the relevant ESG criteria.

No reference benchmark has been designated to attain the environmental and social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The attainment of the environmental and social characteristics is measured through the ESG ratings score of the portfolio.

The attainment of the environmental characteristics promoted by the Fund is measured through:

- % of the portfolio invested in securities that are included in the negative and norms based screen specifically related to environmental characteristics, namely companies identified as being non-compliant with UNGC Principles in regards to the environment, companies associated with Severe ESG Controversies and companies which are active in thermal coal, arctic oil & gas exploration, and oil sands extraction.

The attainment of the social characteristics promoted by the Fund is measured through:

- % of the portfolio invested in securities that are included in the negative and norms based screen specifically related to social characteristics, namely companies identified as being non-compliant with UNGC Principles and companies associated with Severe ESG Controversies, controversial weapons, civilian firearms, and tobacco.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The objectives of the sustainable investments made by the Fund are to invest in securities that are classified as:

- Leaders or Outperformers according to the ESG score of the Investment Manager's proprietary ESG scoring system.

The ESG scoring system developed by the Investment Manager leverages multiple data sources and aligns them to widely accepted, transparent materiality frameworks to generate a unique ESG score for listed companies. It measures the performance of a company's business operations and governance as it relates to financially material ESG challenges facing the company's industry.

The Investment Manager draws on data from multiple ESG data providers and leverages the Sustainable Accounting Standards Board's ("SASB") widely accepted, transparent materiality framework to generate the unique score that measures the performance of a company's business operations and governance as it relates to industry-specific ESG Factors. The SASB materiality framework focuses on financial materiality of certain ESG metrics as defined by specific industry. The company's ESG score allows for a global comparison of companies' ESG performance within a sector or industry.

In order for the security to qualify as a sustainable investment, the company must be a "Leader" or "Outperformer" as determined by the Investment Manager using the ESG score generated by its proprietary process. Companies qualified as "Leaders" or "Outperformers" are deemed to manage and mitigate long-term, financially-material sustainable risks better than its peers and thus operate a more sustainable business model.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager applies a negative and norms-based screen to the Fund to screen out securities based on an assessment of their adherence to ESG criteria including securities of companies identified as being non-compliant with UNGC Principles (relating to environmental protection, human rights, labour standards, anti-corruption) and securities of companies associated with Severe ESG Controversies, controversial weapons, civilian firearms, tobacco, thermal coal, arctic oil & gas exploration, and oil sands extraction. By applying the relevant negative and norms-based screen, the Investment Manager deems the Fund's sustainable investments not to cause significant harm to any environmental or social sustainable investment objective.

How have the indicators for adverse impacts on sustainability factors been taken into account?

As described below, the Fund considers Principal Adverse Impacts ("PAIs") on sustainability factors by applying the negative and norms-based ESG screen prior to the construction of the portfolio.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund excludes companies that the Investment Manager has identified as being non-compliant with UNGC Principles as part of the negative screening utilised by the Fund. The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are considered as part of the UNGC Principles assessment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

X **Yes,**

The Fund considers Principal Adverse Impacts ("PAI") on sustainability factors by applying the negative and norms-based ESG screen prior to the construction of the portfolio. Specifically, the Fund considers

- Exposure to companies active in the fossil fuel sector
- Violations of UN Global Compact Principles
- Exposure to controversial weapons

Further information on the PAIs will be found in the periodic reports for the Fund.

No

What investment strategy does this financial product follow?

The Investment Manager, on behalf of the Fund, will invest actively using the Quantitative Equity Strategy as further described in section 8.1 of the Prospectus and the Relevant Supplement. This strategy uses quantitative country allocation, stock selection and multi-factor models to evaluate the attractiveness of stocks and the Investment Manager uses the strategy to build a portfolio to aims to meet the investment objective and investment policy of the Fund.

In implementing this strategy, securities in the Fund are selected primarily from the constituents of the Index and the Investment Manager applies the negative and norms-based ESG screen prior to the construction of the portfolio of the Fund and on an ongoing basis. This results in the exclusion of any securities from the portfolio based on an assessment of their adherence to certain ESG criteria defined by the Investment Manager. The Fund will screen out securities that fail to comply with UNGC Principles relating to environmental protection, human rights, labour standards and anti-corruption and are associated with Severe ESG Controversies, controversial weapons, civilian firearms, tobacco, thermal coal, arctic oil & gas exploration, and oil sands extraction. The Fund may use additional ESG screens from time to time in order to exclude securities based on their involvement with an activity that is deemed non-compliant with one or more of such ESG criteria referred to in the previous sentence.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

In order to attain the environmental and social characteristics promoted by the Fund, the Investment Manager applies a binding negative and norms-based ESG screen prior to the construction of the portfolio and on an ongoing basis described in the previous section.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

N/A

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The assessment of good governance practices is implemented through the negative screening utilised by the Fund. Companies deemed by the Investment Manager to comply with UNGC Principles are considered to exhibit good governance.

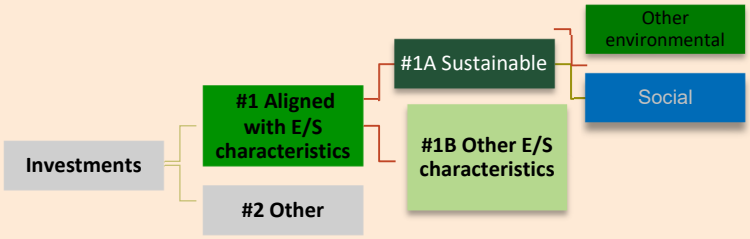

Asset allocation describes the share of investments in specific assets.

What is the asset allocation planned for this financial product?

The Investment Manager employs a binding ESG methodology which aims to build a portfolio where at least 90% of the Fund's assets are invested in securities which are #1 Aligned with environmental and social characteristics as outlined in the table below. It is intended that, within such portion of the portfolio, at least 25% of the Fund's assets are invested in securities which are sustainable investments with environmental and / or social objectives, at the point of rebalance of the portfolio which typically occurs on a monthly basis. The remaining portion (<10%) of the portfolio, consisting of cash as well as cash equivalents in place held at the Investment Manager's discretion, will be classified under #2 Other in the below table and will not be aligned with the promoted environmental and social characteristics.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

To the extent that the Fund may use financial derivative instruments, these will not be used to attain the environmental or social characteristics promoted by the Fund.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to invest in any "sustainable investment" within the meaning of the EU Taxonomy, but only within the meaning of the SFDR regulation. However, the position will be kept under periodic review giving due consideration to market developments as the availability of reliable data increases over time.

management rules.

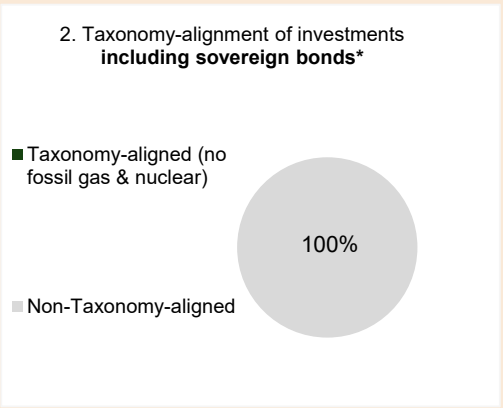

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]

	Yes:
	In fossil gas
	In nuclear energy
X	**No**

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What is the minimum share of investments in transitional and enabling activities?

As the Fund does not commit to invest any "sustainable investment" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy is therefore also set at 0%.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

The Fund intends to invest a minimum of 0% of the Fund's securities in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. The assessment of the Fund's investments qualifying as sustainable is determined on or around each portfolio rebalance which typically occurs on a monthly basis.

What is the minimum share of socially sustainable investments?

The Fund intends to invest a minimum of 0% of the Fund's securities in sustainable investments with a social objective that are not aligned with the EU Taxonomy. The assessment of the Fund's investments qualifying as sustainable is determined on or around each portfolio rebalance which typically occurs on a monthly basis.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulations (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The Fund may hold a portion of its assets in cash or cash equivalents or use financial derivative instruments at the Investment Manager's discretion, which would be classified under #2 Other in the above table. Such assets will not be aligned with environmental and social characteristics nor will there be any environmental or social safeguards in place.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX 28

Template pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: State Street Europe Small Cap Screened Equity Fund (the "Fund")

Legal entity identifier: 5493004X5UEROS74CB07

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☐ **Yes**

☒ **No**

☐ It will make a minimum of **sustainable investments with an environmental objective**: ___%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of **sustainable investments with a social objective: ___%**

☒ **It promotes Environmental/ Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 25% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The environmental and social characteristics promoted by the Fund is a negative and norms-based screen applied to the portfolio of the Fund to screen out securities based on an assessment of their adherence to certain ESG criteria, i.e. international norms in relation to environmental and social protection. Specifically, The Fund promotes certain environmental characteristics through exclusion of investments in companies which fail to comply with UNGC Principles relating to environment (Principles 7 to 9) companies associated with Severe ESG Controversies and which are active in thermal coal, arctic oil & gas exploration, and oil sands extraction.

The Fund also promotes certain social characteristics through exclusion of investments in companies which fail to comply with UNGC Principles relating to human rights (Principles 1 and 2), labour standards (Principles 3 to 6), anti-corruption (Principle 10) and companies associated with Severe ESG Controversies, controversial weapons, civilian firearms and tobacco. The UNGC Principles is the world largest corporate sustainability initiative aimed at companies to align their strategies and operations with universal principles on human rights, labour, environment and anti-corruption, and take actions that advance societal goals.

The Fund may use additional ESG screens from time to time in order to exclude securities based on their involvement with an activity that is deemed non-compliant with one or more of such ESG criteria.

The specific list of applicable exclusions may evolve and may be amended.

The Fund further promotes environmental and social characteristics through its allocation of a portion of the portfolio to sustainable investments. In order for the security to qualify as a sustainable investment, it must be classified as a "Leader" or "Outperformer" as determined by the Investment Manager using the ESG score generated by its proprietary process.

In addition, the Fund promotes environmental and social characteristics by using an ESG ratings score to tilt the composition of the portfolio towards securities with favourable exposures to the relevant ESG criteria.

No reference benchmark has been designated to attain the environmental and social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The attainment of the environmental and social characteristics is measured through the ESG ratings score of the portfolio.

The attainment of the environmental characteristics promoted by the Fund is measured through:

- % of the portfolio invested in securities that are included in the negative and norms based screen specifically related to environmental characteristics, namely companies identified as being non-compliant with UNGC Principles in regards to the environment, companies associated with Severe ESG Controversies and which are active in thermal coal, arctic oil & gas exploration, and oil sands extraction.

The attainment of the social characteristics promoted by the Fund is measured through:

- % of the portfolio invested in securities that are included in the negative and norms based screen specifically related to social characteristics, namely companies identified as being non-compliant with UNGC Principles and companies associated with Severe ESG Controversies, controversial weapons, civilian firearms, and tobacco.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The objectives of the sustainable investments made by the Fund are to invest in securities that are classified as:

- Leaders or Outperformers according to the ESG score of the Investment Manager's proprietary ESG scoring system.

The ESG scoring system developed by the Investment Manager leverages multiple data sources and aligns them to widely accepted, transparent materiality frameworks to generate a unique ESG score for listed companies. It measures the performance of a company's business operations and governance as it relates to financially material ESG challenges facing the company's industry.

The Investment Manager draws on data from multiple ESG data providers and leverages the Sustainable Accounting Standards Board's ("SASB") widely accepted, transparent materiality framework to generate the unique score that measures the performance of a company's business operations and governance as it relates to industry-specific ESG Factors. The SASB materiality framework focuses on financial materiality of certain ESG metrics as defined by specific industry. The company's ESG score allows for a global comparison of companies' ESG performance within a sector or industry.

In order for the security to qualify as a sustainable investment, the company must be a "Leader" or "Outperformer" as determined by the Investment Manager using the ESG score generated by its proprietary process. Companies qualified as "Leaders" or "Outperformers" are deemed to manage and mitigate long-term, financially-material sustainable risks better than its peers and thus operate a more sustainable business model.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager applies a negative and norms-based screen to the Fund to screen out securities based on an assessment of their adherence to ESG criteria including securities of companies identified as being non-compliant with UNGC Principles (relating to environmental protection, human rights, labour standards, anti-corruption) and securities of companies associated with Severe ESG Controversies, controversial weapons, civilian firearms, tobacco, thermal coal, arctic oil & gas exploration, and oil sands extraction. By applying the relevant negative and norms-based screen, the Investment Manager deems the Fund's sustainable investments not to cause significant harm to any environmental or social sustainable investment objective.

How have the indicators for adverse impacts on sustainability factors been taken into account?

As described below, the Fund considers Principal Adverse Impacts ("PAIs") on sustainability factors by applying the negative and norms-based ESG screen prior to the construction of the portfolio.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund excludes companies that the Investment Manager has identified as being non-compliant with UNGC Principles as part of the negative screening utilised by the Fund. The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are considered as part of the UNGC Principles assessment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

X **Yes,**

The Fund considers Principal Adverse Impacts ("PAI") on sustainability factors by applying the negative and norms-based ESG screen prior to the construction of the portfolio. Specifically, the Fund considers

- Exposure to companies active in the fossil fuel sector
- Violations of UN Global Compact Principles
- Exposure to controversial weapons

Further information on the PAIs will be found in the periodic reports for the Fund.

No

What investment strategy does this financial product follow?

The Investment Manager, on behalf of the Fund, will invest actively using the Quantitative Equity Strategy as further described in section 8.1 of the Prospectus and the Relevant Supplement. This strategy uses quantitative country allocation, stock selection and multi-factor models to evaluate the attractiveness of stocks and the Investment Manager uses the strategy to build a portfolio to aims to meet the investment objective and investment policy of the Fund.

In implementing this strategy, securities in the Fund are selected primarily from the constituents of the Index and the Investment Manager applies the negative and norms-based ESG screen prior to the construction of the portfolio of the Fund and on an ongoing basis. This results in the exclusion of any securities from the portfolio based on an assessment of their adherence to certain ESG criteria defined by the Investment Manager. The Fund will screen out securities that fail to comply with UNGC Principles (relating to environmental protection, human rights, labour standards and anti-corruption) and are associated with Severe ESG Controversies, controversial weapons, civilian firearms, tobacco, thermal coal, arctic oil & gas exploration, and oil sands extraction. The Fund may use additional ESG screens from time to time in order to exclude securities based on their involvement with an activity that is deemed non-compliant with one or more of such ESG criteria referred to in the previous sentence.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

In order to attain the environmental and social characteristics promoted by the Fund, the Investment Manager applies a binding negative and norms-based ESG screen prior to the construction of the portfolio and on an ongoing basis described in the previous section.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

N/A

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The assessment of good governance practices is implemented through the negative screening utilised by the Fund. Companies deemed by the Investment Manager to comply with UNGC Principles are considered to exhibit good governance.

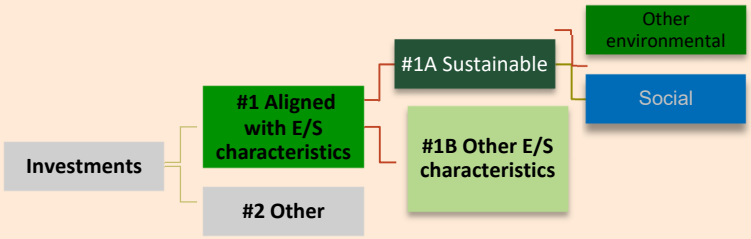

Asset allocation describes the share of investments in specific assets.

What is the asset allocation planned for this financial product?

The Investment Manager employs a binding ESG methodology which aims to build a portfolio where at least 90% of the Fund's assets are invested in securities which are #1 Aligned with environmental and social characteristics as outlined in the table below. It is intended that, within such portion of the portfolio, at least 25% of the Fund's assets are invested in securities which are sustainable investments with environmental and / or social objectives, at the point of rebalance of the portfolio which typically occurs on a monthly basis. The remaining portion (<10%) of the portfolio, consisting of cash as well as cash equivalents in place held at the Investment Manager's discretion, will be classified under #2 Other in the below table and will not be aligned with the promoted environmental and social characteristics.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

To the extent that the Fund may use financial derivative instruments, these will not be used to attain the environmental or social characteristics promoted by the Fund.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to invest in any "sustainable investment" within the meaning of the EU Taxonomy, but only within the meaning of the SFDR regulation. However, the position will be kept under periodic review giving due consideration to market developments as the availability of reliable data increases over time.

Does the financial product invest in fossil gas and/or nuclear energy related activities that

management rules.

comply with the EU Taxonomy[1]

☐ **Yes:**

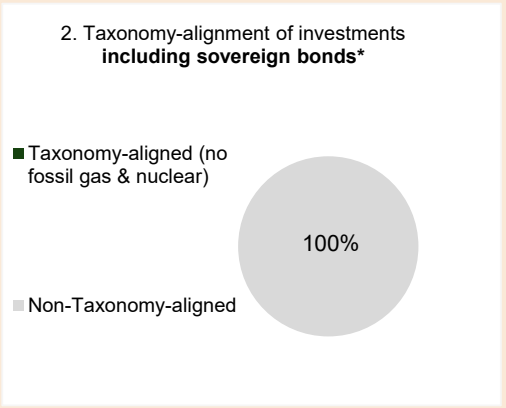

☐ In fossil gas ☐ In nuclear energy

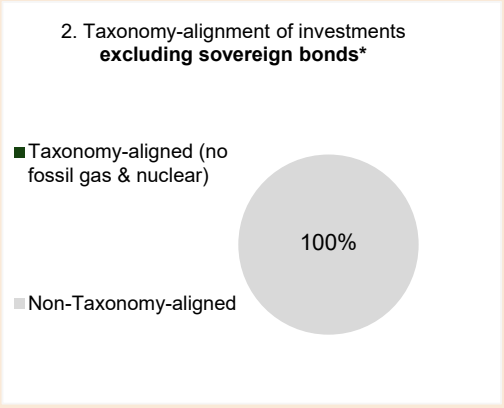

☒ **No**

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What is the minimum share of investments in transitional and enabling activities?

As the Fund does not commit to invest any "sustainable investment" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy is therefore also set at 0%.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

The Fund intends to invest a minimum of 0% of the Fund's securities in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. The assessment of the Fund's investments qualifying as sustainable is determined on or around each portfolio rebalance which typically occurs on a monthly basis.

What is the minimum share of socially sustainable investments?

The Fund intends to invest a minimum of 0% of the Fund's securities in sustainable investments with a social objective that are not aligned with the EU Taxonomy. The assessment of the Fund's investments qualifying as sustainable is determined on or around each portfolio rebalance which typically occurs on a monthly basis.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulations (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The Fund may hold a portion of its assets in cash or cash equivalents or use financial derivative instruments at the Investment Manager's discretion, which would be classified under #2 Other in the above table. Such assets will not be aligned with environmental and social characteristics nor will there be any environmental or social safeguards in place.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

N/A

Where can I find more product specific information online?

More product-specific information can be found on the website:

Fund Finder (ssga.com)

Please search for State Street Europe Small Cap Screened Equity Fund under the "Fund Groups" heading.

ANNEX 29

Template pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: State Street Emerging Markets Small Cap Screened Equity Fund (the "Fund")

Legal entity identifier: 549300SXZY3ZL2ZGEW73

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☐ **Yes**

☒ **No**

☐ It will make a minimum of **sustainable investments with an environmental objective**: ___%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of **sustainable investments with a social objective: ___%**

☒ **It promotes Environmental/ Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 15% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The environmental and social characteristics promoted by the Fund is a negative and norms-based screen applied to the portfolio of the Fund to screen out securities based on an assessment of their adherence to ESG criteria, i.e. international norms in relation to environmental and social protection. Specifically, The Fund promotes certain environmental characteristics through exclusion of investments in companies which fail to comply with UNGC Principles relating to environment (Principles 7 to 9) companies associated with Severe ESG Controversies and which are active in thermal coal, arctic oil & gas exploration, and oil sands extraction.

The Fund also promotes certain social characteristics through exclusion of investments in companies which fail to comply with UNGC Principles relating to human rights (Principles 1 and 2), labour standards (Principles 3 to 6), anti-corruption (Principle 10) and companies associated with Severe ESG Controversies, controversial weapons, civilian firearms and tobacco. The UNGC Principles is the world largest corporate sustainability initiative aimed at companies to align their strategies and operations with universal principles on human rights, labour, environment and anti-corruption, and take actions that advance societal goals.

The Fund may use additional ESG screens from time to time in order to exclude securities based on their involvement with an activity that is deemed non-compliant with one or more of such ESG criteria.

The specific list of applicable exclusions may evolve and may be amended.

The Fund further promotes environmental and social characteristics through its allocation of a portion of the portfolio to sustainable investments. In order for the security to qualify as a sustainable investment, it must be classified as a "Leader" or "Outperformer" as determined by the Investment Manager using the ESG score generated by its proprietary process.

In addition, the Fund promotes environmental and social characteristics by using an ESG ratings score to tilt the composition of the portfolio towards securities with favourable exposures to the relevant ESG criteria.

No reference benchmark has been designated to attain the environmental and social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The attainment of the environmental and social characteristics is measured through the ESG ratings score of the portfolio.

The attainment of the environmental characteristics promoted by the Fund is measured through:

- % of the portfolio invested in securities that are included in the negative and norms based screen specifically related to environmental characteristics, namely companies identified as being non-compliant with UNGC Principles in regards to the environment, companies associated with Severe ESG Controversies and companies which are active in thermal coal, arctic oil & gas exploration, and oil sands extraction.

The attainment of the social characteristics promoted by the Fund is measured through:

- % of the portfolio invested in securities that are included in the negative and norms based screen specifically related to social characteristics, namely companies identified as being non-compliant with UNGC Principles and companies associated with controversial weapons, civilian firearms, and tobacco.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The objectives of the sustainable investments made by the Fund are to invest in securities that are classified as:

- Leaders or Outperformers according to the ESG score of the Investment Manager's proprietary ESG scoring system.

The ESG scoring system developed by the Investment Manager leverages multiple data sources and aligns them to widely accepted, transparent materiality frameworks to generate a unique ESG score for listed companies. It measures the performance of a company's business operations and governance as it relates to financially material ESG challenges facing the company's industry.

The Investment Manager draws on data from multiple ESG data providers and leverages the Sustainable Accounting Standards Board's ("SASB") widely accepted, transparent materiality framework to generate the unique score that measures the performance of a company's business operations and governance as it relates to industry-specific ESG Factors. The SASB materiality framework focuses on financial materiality of certain ESG metrics as defined by specific industry. The company's ESG score allows for a global comparison of companies' ESG performance within a sector or industry.

In order for the security to qualify as a sustainable investment, the company must be a "Leader" or "Outperformer" as determined by the Investment Manager using the ESG score generated by its proprietary process. Companies qualified as "Leaders" or "Outperformers" are deemed to manage and mitigate long-term, financially-material sustainable risks better than its peers and thus operate a more sustainable business model.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager applies a negative and norms-based screen to the Fund to screen out securities based on an assessment of their adherence to ESG criteria including securities of companies identified as being non-compliant with UNGC Principles (relating to environmental protection, human rights, labour standards, anti-corruption) and securities of companies associated with Severe ESG Controversies, controversial weapons, civilian firearms, tobacco, thermal coal, arctic oil & gas exploration, and oil sands extraction. By applying the relevant negative and norms-based screen, the Investment Manager deems the Fund's sustainable investments not to cause significant harm to any environmental or social sustainable investment objective.

How have the indicators for adverse impacts on sustainability factors been taken into account?

As described below, the Fund considers Principal Adverse Impacts ("PAIs") on sustainability factors by applying the negative and norms-based ESG screen prior to the construction of the portfolio.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund excludes companies that the Investment Manager has identified as being non-compliant with UNGC Principles as part of the negative screening utilised by the Fund. The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are considered as part of the UNGC Principles assessment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

X **Yes,**

The Fund considers Principal Adverse Impacts ("PAI") on sustainability factors by applying the negative and norms-based ESG screen prior to the construction of the portfolio. Specifically, the Fund considers

- Exposure to companies active in the fossil fuel sector
- Violations of UN Global Compact Principles
- Exposure to controversial weapons

Further information on the PAIs will be found in the periodic reports for the Fund.

No

What investment strategy does this financial product follow?

The Investment Manager, on behalf of the Fund, will invest actively using the Quantitative Equity Strategy as further described in section 8.1 of the Prospectus and the Relevant Supplement. This strategy uses quantitative country allocation, stock selection and multi-factor models to evaluate the attractiveness of stocks and the Investment Manager uses the strategy to build a portfolio to aims to meet the investment objective and investment policy of the Fund.

In implementing this strategy, securities in the Fund are selected primarily from the constituents of the Index and the Investment Manager applies the negative and norms-based ESG screen prior to the construction of the portfolio of the Fund and on an ongoing basis. This results in the exclusion of any securities from the portfolio based on an assessment of their adherence to certain ESG criteria defined by the Investment Manager. The Fund will screen out securities that fail to comply with UNGC Principles relating to environmental protection, human rights, labour standards and anti-corruption and are associated with controversial weapons, civilian firearms, tobacco, thermal coal, arctic oil & gas exploration, and oil sands extraction. The Fund may use additional ESG screens from time to time in order to exclude securities based on their involvement with an activity that is deemed non-compliant with one or more of such ESG criteria referred to in the previous sentence.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

In order to attain the environmental and social characteristics promoted by the Fund, the Investment Manager applies a binding negative and norms-based ESG screen prior to the construction of the portfolio and on an ongoing basis described in the previous section.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

N/A

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The assessment of good governance practices is implemented through the negative screening utilised by the Fund. Companies deemed by the Investment Manager to comply with UNGC principles are considered to exhibit good governance.

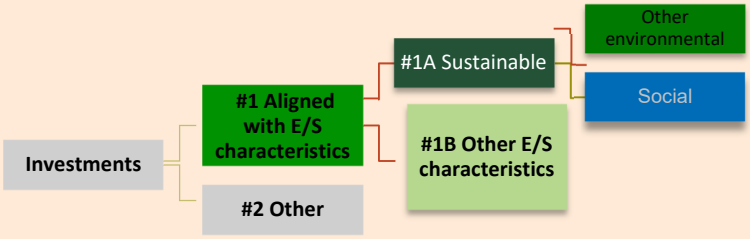

Asset allocation describes the share of investments in specific assets.

What is the asset allocation planned for this financial product?

The Investment Manager employs a binding ESG methodology which aims to build a portfolio where at least 90% of the Fund's assets are invested in securities which are #1 Aligned with environmental and social characteristics as outlined in the table below. It is intended that, within such portion of the portfolio, at least 15% of the Fund's assets are invested in securities which are sustainable investments with environmental and / or social objectives, at the point of rebalance of the portfolio which typically occurs on a monthly basis. The remaining portion (<10%) of the portfolio, consisting of cash as well as cash equivalents in place held at the Investment Manager's discretion, will be classified under #2 Other in the below table and will not be aligned with the promoted environmental and social characteristics.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy. **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

To the extent that the Fund may use financial derivative instruments, these will not be used to attain the environmental or social characteristics promoted by the Fund.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to invest in any "sustainable investment" within the meaning of the EU Taxonomy, but only within the meaning of the SFDR regulation. However, the position will be kept under periodic review giving due consideration to market developments as the availability of reliable data increases over time.

management rules.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]

☐ **Yes:**

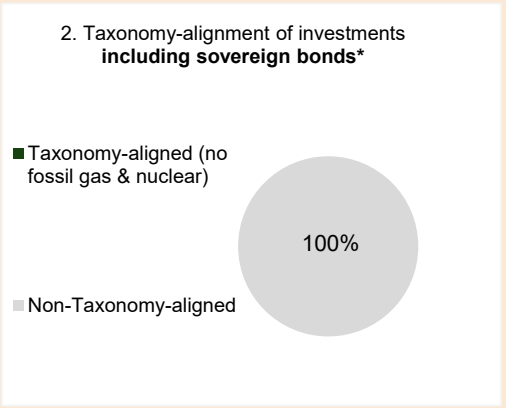

☐ In fossil gas ☐ In nuclear energy

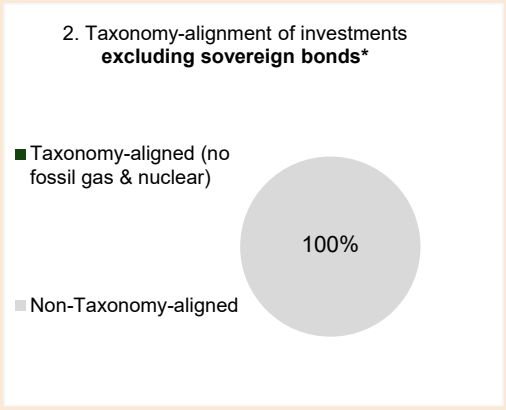

☒ **No**

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What is the minimum share of investments in transitional and enabling activities?

As the Fund does not commit to invest any "sustainable investment" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy is therefore also set at 0%.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The Fund intends to invest a minimum of 0% of the Fund's securities in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. The assessment of the Fund's investments qualifying as sustainable is determined on or around each portfolio rebalance which typically occurs on a monthly basis.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of socially sustainable investments?

The Fund intends to invest a minimum of 0% of the Fund's securities in sustainable investments with a social objective that are not aligned with the EU Taxonomy. The assessment of the Fund's investments qualifying as sustainable is determined on or around each portfolio rebalance which typically occurs on a monthly basis.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulations (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The Fund may hold a portion of its assets in cash or cash equivalents or use financial derivative instruments at the Investment Manager's discretion, which would be classified under #2 Other in the above table. Such assets will not be aligned with environmental and social characteristics nor will there be any environmental or social safeguards in place.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

N/A

ANNEX 30

Template pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: State Street Global Screened Managed Volatility Equity Fund (the "Fund")

Legal entity identifier: 549300SR9616JQE7CE72

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☐ **Yes**

☒ **No**

☐ It will make a minimum of **sustainable investments with an environmental objective**: ___%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ **It promotes Environmental/ Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 25_% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It will make a minimum of **sustainable investments with a social objective: ___%**

☐ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The environmental and social characteristics promoted by the Fund is a negative and norms-based screen applied to the portfolio of the Fund to screen out securities based on an assessment of their adherence to ESG criteria, i.e. international norms in relation to environmental and social protection. Specifically, the Fund promotes certain environmental characteristics through exclusion of investments in companies which fail to comply with UNGC Principles relating to environment (Principles 7 to 9), companies associated with Severe ESG Controversies and which are active in thermal coal, arctic oil & gas exploration, and oil sands extraction. The Fund also promotes certain social characteristics through exclusion of investments in companies which fail to comply with UNGC Principles relating to human rights (Principles 1 and 2), labour standards (Principles 3 to 6), anti-corruption (Principle 10), and companies associated with Severe ESG Controversies, controversial weapons, civilian forearms and tobacco. The UNGC Principles is the world largest corporate sustainability initiative aimed at companies to align their strategies and operations with universal principles on human rights, labour, environment and anti-corruption, and take actions that advance societal goals.
The Fund may use additional ESG screens from time to time in order to exclude securities based on their involvement with an activity that is deemed non-compliant with one or more of such ESG criteria.

The Fund further promotes environmental and social characteristics through its allocation of a portion of the portfolio to sustainable investments. In order for the security to qualify as a sustainable investment, it must be classified as a "Leader" or "Outperformer" as determined by the Investment Manager using the ESG score generated by its proprietary process.
No reference benchmark has been designated to attain the environmental and social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The attainment of the environmental characteristics promoted by the Fund is measured through:

- % of the portfolio invested in securities that are included in the negative and norms based screen specifically related to environmental characteristics, namely companies identified as being non-compliant with UNGC Principles in regards to the environment, companies associated with Severe ESG Controversies and companies which are active in thermal coal, arctic oil & gas exploration, and oil sands extraction.

The attainment of the social characteristics promoted by the Fund is measured through:

- % of the portfolio invested in securities that are included in the negative and norms based screen specifically related to social characteristics, namely companies identified as being non-compliant with UNGC Principles and companies associated with Severe ESG Controversies, controversial weapons, civilian firearms, and tobacco.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The objectives of the sustainable investments made by the Fund are to invest in securities that are classified as:

- Leaders or Outperformers according to the ESG score of the Investment Manager's proprietary ESG scoring system.

The ESG scoring system developed by the Investment Manager leverages multiple data sources and aligns them to widely accepted, transparent materiality frameworks to generate a unique ESG score for listed companies. It measures the performance of a company's business operations and governance as it relates to financially material ESG challenges facing the company's industry.

The Investment Manager draws on data from multiple ESG data providers and leverages the Sustainable Accounting Standards Board's ("SASB") widely accepted, transparent materiality framework to generate the unique score that measures the performance of a company's business operations and governance as it relates to industry-specific ESG Factors. The SASB materiality framework focuses on financial materiality of certain ESG metrics as defined by specific industry. The company's ESG score allows for a global comparison of companies' ESG performance within a sector or industry.

In order for the security to qualify as a sustainable investment, the company must be a "Leader" or "Outperformer" as determined by the Investment Manager using the ESG score generated by its proprietary process. Companies qualified as "Leaders" or "Outperformers" are deemed to manage and mitigate long-term, financially-material sustainable risks better than its peers and thus operate a more sustainable business model.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager applies a negative and norms-based screen to the Fund to screen out securities based on an assessment of their adherence to ESG criteria including securities of companies identified as being non-compliant with UNGC Principles (relating to environmental protection, human rights, labour standards, anti-corruption) and securities of companies associated with Severe ESG Controversies, controversial weapons, civilian firearms, tobacco, thermal coal, arctic oil & gas exploration, and oil sands extraction. By applying the relevant negative and norms-based screen, the Investment Manager deems the Fund's sustainable investments not to cause significant harm to any environmental or social sustainable investment objective.

How have the indicators for adverse impacts on sustainability factors been taken into account?

As described below, the Fund considers Principal Adverse Impacts ("PAIs") on sustainability factors by applying the negative and norms-based ESG screen prior to the construction of the portfolio.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund excludes companies that the Investment Manager has identified as being non-compliant with UNGC Principles as part of the negative screening utilised by the Fund. The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are considered as part of the UNGC Principles assessment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

[x] **Yes,** The Fund considers Principal Adverse Impacts ("PAI") on sustainability factors by applying the negative and norms-based ESG screen prior to the construction of the portfolio. Specifically, the Fund considers

- Exposure to companies active in the fossil fuel sector
- Violations of UN Global Compact Principles
- Exposure to controversial weapons

Further information on the PAIs will be found in the periodic reports for the Fund.

[ ] **No**

What investment strategy does this financial product follow?

The Investment Manager, on behalf of the Fund, will invest actively using the Managed Volatility Equity Strategy as further described in section 8.1 of the Prospectus and the Relevant Supplement. This strategy uses a multi-factor risk model to select securities that are assessed as having low exposure to market risk factors and are expected to

exhibit lower volatility than the Index with the potential to provide returns comparable with the Index.

In implementing this strategy, securities in the Fund are selected primarily from the constituents of the Index and the Investment Manager applies the negative and norms-based ESG screen prior to the construction of the portfolio of the Fund and on an ongoing basis. This results in the exclusion of any securities from the portfolio based on an assessment of their adherence to certain ESG criteria defined by the Investment Manager. The Fund will screen out securities of issuers that fail to comply with UNGC Principles relating to environmental protection, human rights, labour standards and anti-corruption and are associated with Severe ESG Controversies, controversial weapons, civilian firearms, tobacco, thermal coal, arctic oil & gas exploration, and oil sands extraction. The Fund may use additional ESG screens from time to time in order to exclude securities based on their involvement with an activity that is deemed non-compliant with one or more of such ESG criteria referred to in the previous sentence.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

In order to attain the environmental and social characteristics promoted by the Fund, the Investment Manager applies a binding negative and norms-based ESG screen prior to the construction of the portfolio and on an ongoing basis described in the previous section.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

N/A

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The assessment of good governance practices is implemented through the negative screening utilised by the Fund. Companies deemed by the Investment Manager to comply with UNGC Principles are considered to exhibit good governance.

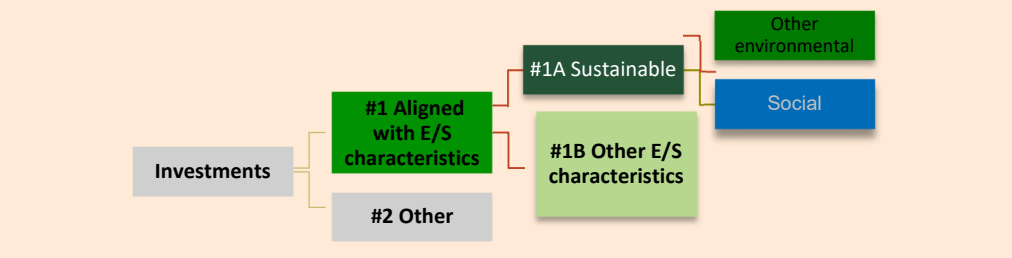

Asset allocation describes the share of investments in specific assets.

What is the asset allocation planned for this financial product?

The Investment Manager employs a binding ESG methodology which aims to build a portfolio where at least 90% of the Fund's assets are invested in securities which are #1 Aligned with environmental and social characteristics as outlined in the table below. It is intended that, within such portion of the portfolio, at least 25% of the Fund's assets are invested in securities which are sustainable investments with environmental and / or social objectives, at the point of rebalance of the portfolio which typically occurs on a quarterly basis. The remaining portion (<10%) of the portfolio, consisting of cash as well as cash equivalents in place held at the Investment Manager's discretion, will be classified under #2 Other in the below table and will not be aligned with the promoted environmental and social characteristics.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital**

expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

To the extent that the Fund may use financial derivative instruments, these will not be used to attain the environmental or social characteristics promoted by the Fund.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to invest in any "sustainable investment" within the meaning of the EU Taxonomy, but only within the meaning of the SFDR regulation. However, the position will be kept under periodic review giving due consideration to market developments as the availability of reliable data increases over time.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]

☐ **Yes:**

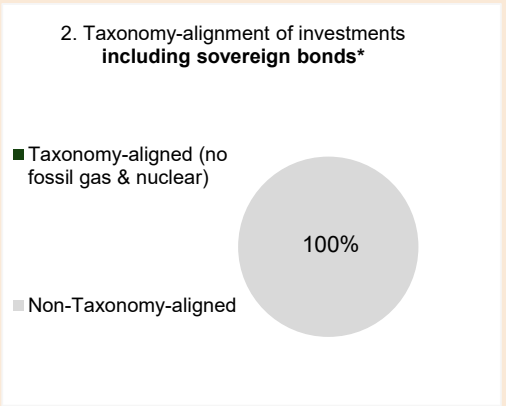

☐ In fossil gas ☐ In nuclear energy

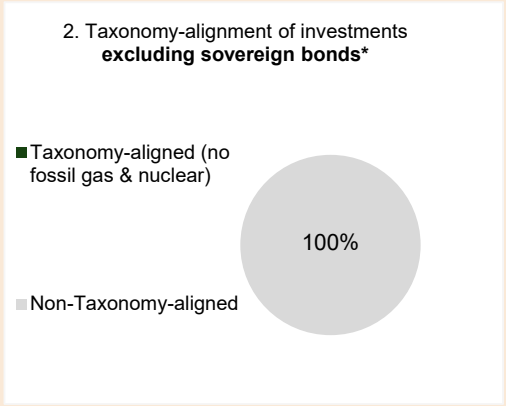

☒ **No**

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100% of the total investments.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulations (EU) 2022/1214.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What is the minimum share of investments in transitional and enabling activities?

As the Fund does not commit to invest any "sustainable investment" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy is therefore also set at 0%.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The Fund intends to invest a minimum of 0% of the Fund's securities in sustainable investments with an environmental objective, that are not aligned with the EU Taxonomy. The assessment of the Fund's investments qualifying as sustainable is determined on or around each portfolio rebalance which typically occurs on a quarterly basis.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of socially sustainable investments?

The Fund intends to invest a minimum of 0% of the Fund's securities in sustainable investments with a social objective, that are not aligned with the EU Taxonomy. The assessment of the Fund's investments qualifying as sustainable is determined on or around each portfolio rebalance which typically occurs on a quarterly basis.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The Fund may hold a portion of its assets in cash or cash equivalents or use financial derivative instruments at the Investment Manager's discretion, which would be classified under #2 Other in the above table. Such assets will not be aligned with environmental and social characteristics nor will there be any environmental or social safeguards in place.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Where can I find more product specific information online?

More product-specific information can be found on the website:

Fund Finder (ssga.com)

ANNEX 31

Template pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: State Street Global Screened Defensive Equity Fund (the "Fund")

Legal entity identifier: 549300C9I4720D0IDK69

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☐ **Yes**

☒ **No**

☐ It will make a minimum of **sustainable investments with an environmental objective**: ___%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of **sustainable investments with a social objective: ___%**

☒ **It promotes Environmental/ Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 25% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The environmental and social characteristics promoted by the Fund are a negative and norms-based screen applied to the portfolio of the Fund to screen out securities based on an assessment of their adherence to ESG criteria, i.e. international norms in relation to environmental and social protection. Specifically, the Fund promotes certain environmental characteristics through exclusion of investments in companies which fail to comply with UNGC Principles relating to environment (Principles 7 to 9), companies associated with Severe ESG Controversies and which are active in thermal coal, arctic oil & gas exploration, and oil sands extraction.

The Fund also promotes certain social characteristics through exclusion of investments in companies which fail to comply with UNGC Principles relating to human rights (Principle 1 and 2), labour standards (Principles 3 to 6), anti-corruption (Principle 10) and companies associated with Severe ESG Controversies, controversial weapons, civilian firearms and tobacco. The UNGC Principles is the world largest corporate sustainability initiative aimed at companies to align their strategies and operations with universal principles on human rights, labour, environment and anti-corruption, and take actions that advance societal goals.

The Fund may use additional ESG screens from time to time in order to exclude securities based on their involvement with an activity that is deemed non-compliant with one or more of such ESG criteria.

The Fund further promotes environmental and social characteristics through its allocation of a portion

of the portfolio to sustainable investments. In order for the security to qualify as a sustainable investment, it must be classified as a "Leader" or "Outperformer" as determined by the Investment Manager using the ESG score generated by its proprietary process.

In addition, the Fund promotes environmental and social characteristics by using an ESG ratings score to tilt the composition of the portfolio towards securities with favourable exposures to the relevant ESG criteria.

No reference benchmark has been designated to attain the environmental and social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The attainment of the environmental and social characteristics is measured through the ESG ratings score of the portfolio.

The attainment of the environmental characteristics promoted by the Fund is measured through:

- % of the portfolio invested in securities that are included in the negative and norms based screen specifically related to environmental characteristics, namely companies identified as being non-compliant with UNGC Principles in regards to the environment companies associated with Severe ESG Controversies and companies which are active in thermal coal, arctic oil & gas exploration, and oil sands extraction.

The attainment of the social characteristics promoted by the Fund is measured through:

- % of the portfolio invested in securities that are included in the negative and norms based screen specifically related to social characteristics, namely companies identified as being non-compliant with UNGC Principles and companies associated with Severe ESG Controversies, controversial weapons, civilian firearms, and tobacco.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The objectives of the sustainable investments made by the Fund are to invest in securities that are classified as:

- Leaders or Outperformers according to the ESG score of the Investment Manager's proprietary ESG scoring system.

The ESG scoring system developed by the Investment Manager leverages multiple data sources and aligns them to widely accepted, transparent materiality frameworks to generate a unique ESG score for listed companies. It measures the performance of a company's business operations and governance as it relates to financially material ESG challenges facing the company's industry.

The Investment Manager draws on data from multiple ESG data providers and leverages the Sustainable Accounting Standards Board's ("SASB") widely accepted, transparent materiality framework to generate the unique score that measures the performance of a company's business operations and governance as it relates to industry-specific ESG Factors. The SASB materiality framework focuses on financial materiality of certain ESG metrics as defined by specific industry. The company's ESG score allows for a global comparison of companies' ESG performance within a sector or industry.

In order for the security to qualify as a sustainable investment, the company must be a "Leader" or "Outperformer" as determined by the Investment Manager using the ESG score generated by its proprietary process. Companies qualified as "Leaders" or "Outperformers" are deemed to manage and mitigate long-term, financially-material sustainable risks better than its peers and thus operate a more sustainable business model.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager applies a negative and norms-based screen to the Fund to screen out securities based on an assessment of their adherence to ESG criteria including securities of companies identified as being non-compliant with UNGC Principles (relating to environmental protection, human rights, labour standards, anti-corruption) and securities of companies associated with Severe ESG Controversies, controversial weapons, civilian firearms, tobacco, thermal coal, arctic oil & gas exploration, and oil sands extraction. By applying the relevant negative and norms-based screen, the Investment Manager deems the Fund's sustainable investments not to cause significant harm to any environmental or social sustainable investment objective.

How have the indicators for adverse impacts on sustainability factors been taken into account?

As described below, the Fund considers Principal Adverse Impacts ("PAIs") on sustainability factors by applying the negative and norms-based ESG screen prior to the construction of the portfolio.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund excludes companies that the Investment Manager has identified as being non-compliant with UNGC Principles as part of the negative screening utilised by the Fund. The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are considered as part of the UNGC Principles assessment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

X **Yes,**

The Fund considers Principal Adverse Impacts ("PAI") on sustainability factors by applying the negative and norms-based ESG screen prior to the construction of the portfolio. Specifically, the Fund considers

- Exposure to companies active in the fossil fuel sector
- Violations of UN Global Compact Principles
- Exposure to controversial weapons

Further information on the PAIs will be found in the periodic reports for the Fund.

No

What investment strategy does this financial product follow?

The Investment Manager, on behalf of the Fund, will invest actively using the Defensive Equity Strategy as further described in section 8.1 of the Prospectus and the Relevant Supplement. This strategy uses quantitative country allocation, stock selection and multi-factor models to evaluate stocks. Securities for the portfolio are chosen based on their potential to produce returns in excess of the Index with reduced volatility relative to the Index.

In implementing this strategy, securities in the Fund are selected primarily from the constituents of the Index and the Investment Manager applies the negative and norms-based ESG screen prior to the construction of the portfolio of the Fund and on an ongoing basis. This results in the exclusion of any securities from the portfolio based on an assessment of their adherence to certain ESG criteria defined by the Investment Manager. The Fund will screen out securities of issuers that fail to comply with UNGC Principles relating to environmental protection, human rights, labour standards and anti-corruption and are associated with Severe ESG Controversies, controversial weapons, civilian firearms, tobacco, thermal coal, arctic oil & gas exploration, and oil sands extraction. The Fund may use additional ESG screens from time to time in order to exclude securities based on their involvement with an activity that is deemed non-compliant with one or more of such ESG criteria referred to in the previous sentence.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

In order to attain the environmental and social characteristics promoted by the Fund, the Investment Manager applies a binding negative and norms-based ESG screen prior to the construction of the portfolio and on an ongoing basis described in the previous section.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

N/A

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The assessment of good governance practices is implemented through the negative screening utilised by the Fund. Companies deemed by the Investment Manager to comply with UNGC Principles are considered to exhibit good governance.

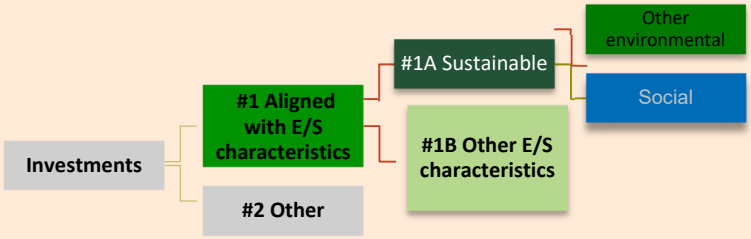

Asset allocation describes the share of investments in specific assets.

What is the asset allocation planned for this financial product?

The Investment Manager employs a binding ESG methodology which aims to build a portfolio where at least 90% of the Fund's assets are invested in securities which are #1 Aligned with environmental and social characteristics as outlined in the table below. It is intended that, within such portion of the portfolio, at least 25% of the Fund's assets are invested in securities which are sustainable investments with environmental and / or social objectives, at the point of rebalance of the portfolio which typically occurs on a monthly basis. The remaining portion (<10%) of the portfolio, consisting of cash as well as cash equivalents in place held at the Investment Manager's discretion, will be classified under #2 Other in the below table and will not be aligned with the promoted environmental and social characteristics.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
  operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

To the extent that the Fund may use financial derivative instruments, these will not be used to attain the environmental or social characteristics promoted by the Fund.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to invest in any "sustainable investment" within the meaning of the EU Taxonomy, but only within the meaning of the SFDR regulation. However, the position will be kept under periodic review giving due consideration to market developments as the availability of reliable data increases over time.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]

[ ] **Yes:**

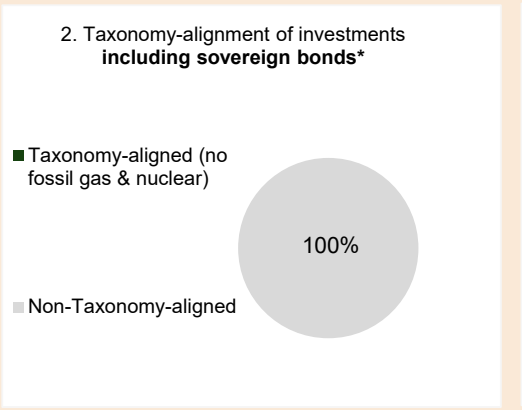

[ ] In fossil gas [ ] In nuclear energy

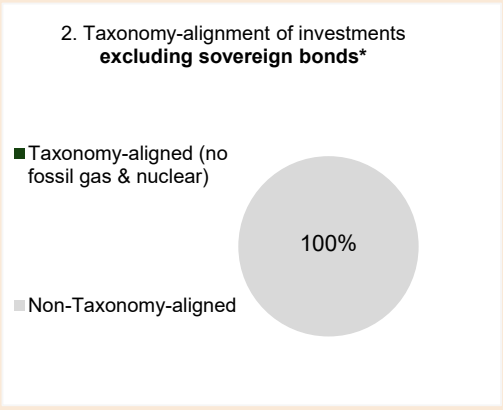

[X] **No**

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What is the minimum share of investments in transitional and enabling activities?

As the Fund does not commit to invest any "sustainable investment" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy is therefore also set at 0%.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulations (EU) 2022/1214.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The Fund intends to invest a minimum of 0% of the Fund's securities in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. The assessment of the Fund's investments qualifying as sustainable is determined on or around each portfolio rebalance which typically occurs on a monthly basis.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of socially sustainable investments?

The Fund intends to invest a minimum of 0% of the Fund's securities in sustainable investments with a social objective that are not aligned with the EU Taxonomy. The assessment of the Fund's investments qualifying as sustainable is determined on or around each portfolio rebalance which typically occurs on a monthly basis.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The Fund may hold a portion of its assets in cash or cash equivalents or use financial derivative instruments at the Investment Manager's discretion, which would be classified under #2 Other in the above table. Such assets will not be aligned with environmental and social characteristics nor will there be any environmental or social safeguards in place.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

N/A

ANNEX 32

Template pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: State Street Climate Transition World Equity Beta Fund (the "Fund")

Legal entity identifier: 549300UN2KRY0QD46M87

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☐ **Yes** ☒ **No**

☐ It will make a minimum of **sustainable investments with an environmental objective**: ___%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of **sustainable investments with a social objective: ___%**

☒ **It promotes Environmental/ Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 25% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The Fund promotes environmental characteristics through investments in companies that are on a clear path to climate transition and which exhibit lower carbon emissions in the way of current emissions and future emissions (measured by fossil fuel reserves), produce green revenues and are better positioned for the risks posed by climate change

In addition to this, the environmental and social characteristics promoted by the Fund are negative and norms-based screen applied to the portfolio of the Fund to screen out securities based on an assessment of their adherence to ESG criteria, i.e. international norms in relation to environmental and social protection. Specifically, the Fund promotes environmental characteristics through exclusion of investments in companies identified as being non-compliant with UNGC Principles relating to environment (Principles 7 to 9), companies associated with Severe ESG Controversies and which are active in thermal coal, arctic oil & gas exploration, and oil sands extraction. The Fund also promotes social characteristics through exclusion of investments in companies identified as being non-compliant with UNGC Principles relating to human rights (Principles 1 and 2), labour standards (Principles 3 to 6), anti-corruption (Principle 10) and companies associated with Severe ESG Controversies, controversial weapons, civilian firearms, and tobacco. The UNGC Principles is the world largest corporate sustainability initiative aimed at companies to align their strategies and operations with universal principles on human rights, labour, environment and anti-corruption, and take actions that advance societal goals.

The Fund may use additional ESG screens from time to time in order to exclude securities based on their involvement with an activity that is deemed non-compliant with one or more of such ESG criteria.

The Fund further promotes environmental and social characteristics through its allocation of a portion of the portfolio to sustainable investments. In order for the security to qualify as a sustainable investment, the company

must be a “Leader” or “Outperformer” as determined by the Investment Manager using the ESG score generated by its proprietary process.

No reference benchmark has been designated to attain the environmental and social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The attainment of the environmental characteristics is measured through the higher exposure of the Fund’s portfolio (relative to the MSCI World Index (“Index”)) to companies that are mitigating greenhouse gas emissions and adapting to climate related risks by constructing the portfolio that aims to:

a) minimise;
- carbon emission intensity (emissions scaled by revenue);
- brown revenues;
- fossil fuel reserves
- sensitivity to climate risks and
- climate value at risk.

.

b) maximise green revenues; and

c) target companies that are positioned to benefit from the transition to the low-carbon economy based on their Implied Temperature Rise.

Implied Temperature Rise (ITR) compares the current and projected greenhouse gas emissions of each company against its carbon budget (as calculated by the IPCC). MSCI calculates the carbon budget overshoot or undershoot, then converts it to an implied rise in global temperature. The Investment Manager uses a portfolio ITR as the Fund's climate transition pathway.

A further attainment of the environmental characteristics promoted by the Fund is measured through:

- % of the portfolio invested in securities that are included in the negative and norms based screen specifically related to environmental characteristics, namely companies identified as being non-compliant with UNGC Principles in regards to the environment, companies associated with Severe ESG Controversies and companies which are active in thermal coal, arctic oil & gas exploration, and oil sands extraction.

The attainment of the social characteristics promoted by the Fund is measured through:

- % of the portfolio invested in securities that are included in the negative and norms based screen specifically related to social characteristics, namely companies identified as being non-compliant with UNGC Principles and companies associated with, Severe ESG Controversies, controversial weapons, civilian firearms and tobacco.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The objectives of the sustainable investments made by the Fund are to invest in securities that are classified as:

- Leaders or Outperformers according to the ESG score of the Investment Manager’s proprietary ESG scoring system.

The ESG scoring system developed by the Investment Manager leverages multiple data sources and aligns them to widely accepted, transparent materiality frameworks to generate a unique ESG score for listed companies. It measures the performance of a company’s business operations and governance as it relates to financially material ESG challenges facing the company’s industry.

The Investment Manager draws on data from multiple ESG data providers and leverages the Sustainable Accounting Standards Board's ("SASB") - widely accepted, transparent materiality framework to generate the unique score that measures the performance of a company's business operations and governance as it relates to industry-specific ESG Factors. The SASB materiality framework focuses on financial materiality of certain ESG metrics as defined by specific industry. The company's ESG score allows for a global comparison of companies' ESG performance within a sector or industry.

In order for the security to qualify as a sustainable investment, the company must be a "Leader" or "Outperformer" as determined by the Investment Manager using the ESG score generated by its proprietary process. Companies qualified as "Leaders" or "Outperformers" are deemed to manage and mitigate long-term, financially-material sustainable risks better than its peers and thus operate a more sustainable business model.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager applies a negative and norms-based screen to the Fund to screen out securities based on an assessment of their adherence to ESG criteria including securities of companies identified as being non-compliant with UNGC Principles (relating to environmental protection, human rights, labour standards, anti-corruption),and securities of companies associated with Severe ESG Controversies, controversial weapons civilian firearms, tobacco, thermal coal, arctic oil & gas exploration, and oil sands extraction. By applying the relevant negative and norms-based screen, the Investment Manager deems the Fund's sustainable investments not to cause significant harm to any environmental or social sustainable investment objective.

— *How have the indicators for adverse impacts on sustainability factors been taken into account?*

As described below, the Fund considers Principal Adverse Impacts on sustainability factors as part of the Climate Transition Equity Beta Strategy and by applying the negative and norms-based ESG screen prior to the construction of the portfolio.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The Fund excludes companies that the Investment Manager has identified as being non-compliant with UNGC Principles as part of the negative screening utilised by the Fund. The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are considered as part of the UNGC Principles assessment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ **Yes,** The Fund considers Principal Adverse Impacts ("PAI") on sustainability factors as part of the Climate Transition Equity Beta Strategy and by applying the negative and norms-based ESG screens and climate transition targets prior to the construction of the portfolio. Specifically, the Fund considers

- Greenhouse Gas emissions

- Carbon footprint
- Greenhouse gas intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Share of non-renewable energy consumption and production
- Violations of UN Global Compact Principles
- Exposure to controversial weapons

Further information on the PAIs will be found in the periodic reports for the Fund.

No

What investment strategy does this financial product follow?

The Investment Manager, on behalf of the Fund, will invest actively using the Climate Transition Equity Beta Strategy as further described in section 8.1 of the Prospectus and the Relevant Supplement. This strategy uses a systematic methodology to provide higher exposure (relative to the Index) to companies that are mitigating and adapting to climate risk and are on a clear path to climate transition using ITR.

In implementing this strategy, the Investment Manager employs a quantitative process to construct a portfolio of securities taking into account certain ESG factors such as: carbon intensity (emissions scaled by revenue, fossil fuel reserves, green revenues, brown revenues, carbon risk ratings, sensitivity to climate risks, implied temperature rise and climate value at risk. The resulting portfolio of the Fund intends to provide higher exposure (relative to the Index) to companies that are mitigating and adapting to climate related risks and are on a clear path to climate transition using ITR. The securities in the Fund are selected primarily from the constituents of the Index and the Investment Manager applies the negative and norms-based ESG screens and climate transition targets prior to the construction of the portfolio of the Fund and on an ongoing basis.

Application of the ESG screens results in the exclusion of any securities from the portfolio based on an assessment of their adherence to ESG criteria defined by the Investment Manager. The Fund will screen out securities identified as being non-compliant with UNGC Principles relating to environmental protection, human rights, labour standards and anti-corruption, as well as companies associated with Severe ESG Controversies, controversial weapons, civilian firearms, tobacco, thermal coal, arctic oil & gas exploration, and oil sands extraction. The Fund may use additional ESG screening techniques from time to time in order to exclude securities based on their involvement with an activity that is deemed non-compliant with one or more of such ESG criteria referred to in the previous sentence.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

In order to attain the environmental and social characteristics promoted by the Fund, the Investment Manager implements the Climate Transition Equity Beta Strategy to build a portfolio of securities for the Fund that intends to provide higher exposure (relative to the Index) to companies that are mitigating and adapting to climate risk and are on a clear path to climate transition using climate ITR.

Another binding element of the investment strategy utilised by the Fund consists of the application of the ESG screens as above and further listed below:

1. UNGC Violations
2. Severe ESG Controversies
3. Controversial Weapons
4. Civilian Firearms
5. Tobacco
6. Thermal Coal
7. Arctic Oil & Gas Exploration
8. Oil Sands Extraction

The above list is a non-exhaustive set of exclusions and the Investment Manager may employ additional ESG screens from time to time in order to exclude securities from the portfolio based on an assessment of their non-compliance with one or more ESG criteria defined by the Investment Manager.
For the avoidance of doubt, the exclusions applied by the Fund are aligned with the Climate Transition Benchmark (CTB) exclusions contained in Article 12.(1)(a)-(c) of CDR (EU) 2020/1818, which are applied in the context of the ESMA Guidelines on funds' names.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

N/A

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The assessment of good governance practices is implemented through the negative screening utilised by the Fund. Companies deemed by the Investment Manager to comply with UNGC Principles are considered to exhibit good governance.

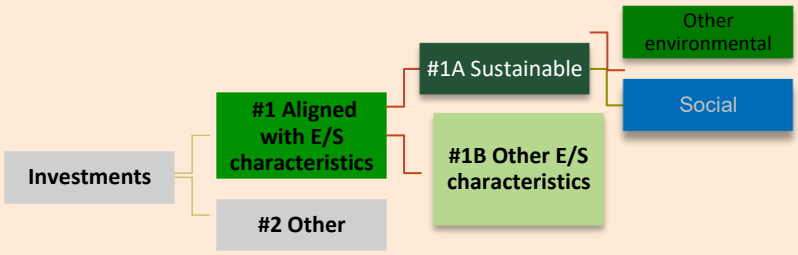

Asset allocation describes the share of investments in specific assets.

What is the asset allocation planned for this financial product?

The Investment Manager employs a binding ESG methodology which aims to build a portfolio where at least 90% of the Fund's assets are invested in securities which are "#1 Aligned with environmental and social characteristics as outlined in the table below. It is intended that, within such portion of the portfolio, at least 25% of the Fund's assets are invested in securities which are sustainable investments with environmental and / or social objectives, at the point of rebalance of the portfolio which typically occurs on a quarterly basis. The remaining portion (<10%) of the portfolio, consisting of cash as well as cash equivalents in place held at the Investment Manager's discretion, will be classified under #2 Other in the below table and will not be aligned with the promoted environmental and social characteristics.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product*?**

To the extent that the Fund may use financial derivative instruments, these will not be used to attain the environmental or social characteristics promoted by the Fund.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to invest in any "sustainable investment" within the meaning of the EU Taxonomy, but only within the meaning of the SFDR regulation. However, the position will be kept under periodic review giving due consideration to market developments as the availability of reliable data increases over time.

nuclear energy, the criteria include comprehensive safety and waste management rules.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]

☐ **Yes:**

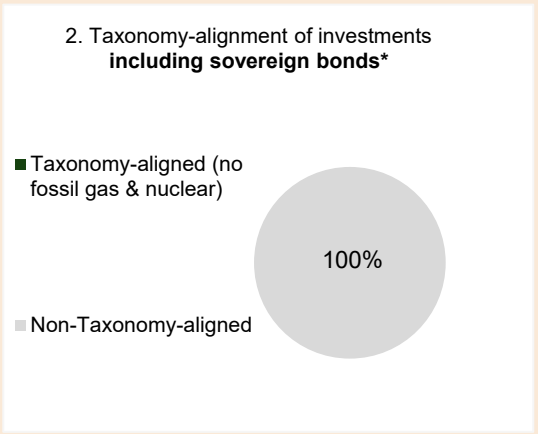

☐ In fossil gas ☐ In nuclear energy

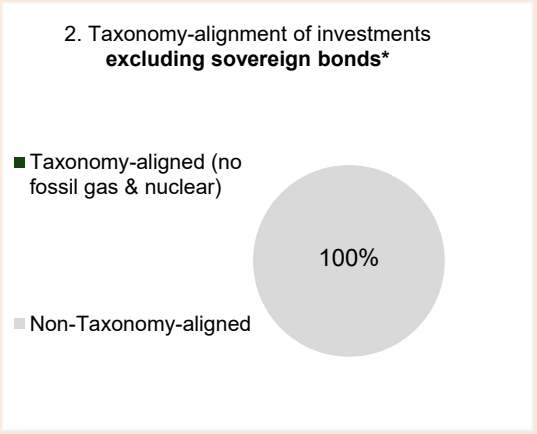

☒ **No**

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What is the minimum share of investments in transitional and enabling activities?

As the Fund does not commit to invest any "sustainable investment" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy is therefore also set at 0%.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The Fund intends to invest a minimum of 0% of the Fund's securities in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. The assessment of the Fund's investments qualifying as sustainable is determined on or around each portfolio rebalance which typically occurs on a quarterly basis.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulations (EU) 2022/1214.

What is the minimum share of socially sustainable investments?

The Fund intends to invest a minimum of 0% of the Fund's securities in sustainable investments with a social objective that are not aligned with the EU Taxonomy. The assessment of the Fund's investments qualifying as sustainable is determined on or around each portfolio rebalance which typically occurs on a quarterly basis.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The Fund may hold a portion of its assets in cash or cash equivalents or use financial derivative instruments at the Investment Manager's discretion, which would be classified under #2 Other in the above table. Such assets will not be aligned with environmental and social characteristics nor will there be any environmental or social safeguards in place.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

N/A

Where can I find more product specific information online?

More product-specific information can be found on the website:

Fund Finder (ssga.com)

Please search for State Street Climate Transition World Equity Beta Fund under the "Fund Groups" heading.

ANNEX 33

Template pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: State Street Climate Transition Euro Corporate Bond Beta Fund (the "Fund")

Legal entity identifier: 549300XZOKME431V8W03

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☐ **Yes**

☒ **No**

☐ It will make a minimum of **sustainable investments with an environmental objective**: ___%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of **sustainable investments with a social objective: ___%**

☒ **It promotes Environmental/ Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 25% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The Fund promotes environmental characteristics through investments in bonds of companies that are on a clear path to climate transition and which exhibit lower carbon emissions in the way of current emissions and future emissions (measured by fossil fuel reserves), green labelled and corporate bonds issued by companies that are better positioned for the risks posed by climate change.
In addition to this, the environmental and social characteristics promoted by the Fund are negative and norms-based screen applied to the portfolio of the Fund to screen out securities based on an assessment of their adherence to ESG criteria, i.e. international norms in relation to environmental and social protection. Specifically, the Fund promotes environmental characteristics through exclusion of investments in companies identified as being non-compliant with UNGC Principles relating to environment (Principles 7 to 9), companies associated with Severe ESG Controversies and which are active in thermal coal, arctic oil & gas exploration, and oil sands extraction. The Fund also promotes social characteristics through exclusion of investments in companies identified as being non-compliant with UNGC Principles relating to human rights (Principles 1 and 2), labour standards (Principles 3 to 6), anti-corruption (Principle 10) and companies associated with Severe ESG Controversies, controversial weapons, civilian firearms, and tobacco. The UNGC Principles is the world largest corporate sustainability initiative aimed at companies to align their strategies and operations with universal principles on human rights, labour, environment and anti-corruption, and take actions that advance societal goals.
The Fund may use additional ESG screens from time to time in order to exclude securities based on their involvement with an activity that is deemed non-compliant with one or more of such ESG criteria.

The Fund further promotes environmental and social characteristics through its allocation of a portion of the portfolio to sustainable investments. In order for the security to qualify as a sustainable investment, the company must be classified as aligned to the Climate Bond Initiative green bond database screening process and /

or be classified as a “Leader” or “Outperformer” as determined by the Investment Manager the ESG score generated by its proprietary process.

No reference benchmark has been designated to attain the environmental and social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The attainment of the environmental characteristics is measured through the higher exposure of the Fund’s portfolio (relative to the Bloomberg Euro Aggregate Corporate Index (“Index”)) to bonds of companies that are mitigating greenhouse gas emissions and adapting to climate related risks by constructing the portfolio that aims to:

a) minimise;
- carbon emission intensity (emissions scaled by revenue);
- brown revenues; and
  fossil fuel reserves;

b) maximise green bonds; and

c) target companies that are positioned to benefit from the transition to the low-carbon economy based on their Implied Temperature Rise.

Implied Temperature Rise (ITR) compares the current and projected greenhouse gas emissions of each company against its carbon budget (as calculated by the IPCC). MSCI calculates the carbon budget overshoot or undershoot, then converts it to an implied rise in global temperature. The Investment Manager uses a portfolio ITR as the Fund's climate transition pathway.

A further attainment of the environmental characteristics promoted by the Fund is measured through:

- % of the portfolio invested in securities that are included in the negative and norms based screen specifically related to environmental characteristics, namely companies identified as being non-compliant with UNGC Principles in regards to the environment, companies associated with Severe ESG Controversies, and companies which are active in thermal coal, arctic oil & gas exploration, and oil sands extraction.

The attainment of the social characteristics promoted by the Fund is measured through:

- % of the portfolio invested in securities that are included in the negative and norms based screen specifically related to social characteristics, namely companies identified as being non-compliant with UNGC Principles and companies associated with Severe ESG Controversies, controversial weapons, civilian firearms and tobacco.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The objectives of the sustainable investments made by the Fund are to invest in securities that are classified as:
- Aligned to the Climate Bonds Initiatives (CBI) green bond database screening process and / or
- Leaders or Outperformers according to the ESG of the Investment Manager’s proprietary ESG scoring system.

The CBI is a mature, globally accepted standard for screening and determining that a bond is financing assets consistent with achieving the goals of the Paris Climate Agreement. In order for the security to qualify as a sustainable investment, the bond must meet the standards required by the CBI to be included in its green bond database. Please note that the screening methodology applied to the portfolio of the Fund by the Investment Manager may not always fully apply to the green bonds held by the Fund that meet the standards required by the CBI to be included in the green bond database.

The ESG scoring system developed by the Investment Manager leverages multiple data sources and aligns them to widely accepted, transparent materiality frameworks to generate a unique ESG score for listed companies. It measures the performance of a company's business operations and governance as it relates to financially material ESG challenges facing the company's industry.

The Investment Manager draws on data from multiple ESG data providers and leverages the Sustainable Accounting Standards Board's ("SASB") - widely accepted, transparent materiality framework to generate the unique score that measures the performance of a company's business operations and governance as it relates to industry-specific ESG Factors. The SASB materiality framework focuses on financial materiality of certain ESG metrics as defined by specific industry. The company's ESG score allows for a global comparison of companies' ESG performance within a sector or industry.

In order for the security to qualify as a sustainable investment, the company must be a "Leader" or "Outperformer" as determined by the Investment Manager using the ESG score generated by its proprietary process. Companies qualified as "Leaders" or "Outperformers" are deemed to manage and mitigate long-term, financially-material sustainable risks better than its peers and thus operate a more sustainable business model.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager applies a negative and norms-based screen to the Fund to screen out securities based on an assessment of their adherence to ESG criteria including securities of companies identified as being non-compliant with UNGC Principles (relating to environmental protection, human rights, labour standards, anti-corruption), securities of companies associated with Severe ESG Controversies, thermal coal, arctic oil & gas exploration, oil sands extraction civilian firearms, controversial weapons and tobacco. By applying the relevant negative and norms-based screen, the Investment Manager deems the Fund's sustainable investments not to cause significant harm to any environmental or social sustainable investment objective.

— *How have the indicators for adverse impacts on sustainability factors been taken into account?*

As described below, the Fund considers Principal Adverse Impacts on sustainability factors as part of the Climate Transition Corporate Bond Beta Strategy and by applying the negative and norms-based ESG screen prior to the construction of the portfolio.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The Fund excludes companies that the Investment Manager has identified as being non-compliant with UNGC Principles as part of the negative screening utilised by the Fund. The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are considered as part of the UNGC Principles assessment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

X **Yes,** The Fund considers Principal Adverse Impacts ("PAI") on sustainability factors as part of the Climate Transition Corporate Bond Beta Strategy and by applying the negative and norms-based ESG screen and climate transition targets prior to the construction of the portfolio. Specifically, the Fund considers

- Greenhouse Gas emissions
- Carbon footprint
- Greenhouse gas intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Share of non-renewable energy consumption and production
- Violations of UN Global Compact Principles
- Exposure to controversial weapons

Further information on the PAIs will be found in the periodic reports for the Fund.

No

What investment strategy does this financial product follow?

The Investment Manager, on behalf of the Fund, will invest actively using the Climate Transition Corporate Bond Beta Strategy as further described in section 8.1 of the Prospectus and the Relevant Supplement. This strategy uses a systematic methodology to provide higher exposure (relative to the Index) to bonds issued by companies that are mitigating and adapting to climate risk and are on a clear path to climate transition using ITR.

In implementing this strategy, the Investment Manager employs a quantitative process to construct a portfolio of bonds taking into account certain ESG factors such as: carbon intensity (emissions scaled by revenue), fossil fuel reserves, allocation to green bonds, brown revenues, implied temperature rise and ratings for climate adaptation. The resulting portfolio of the Fund intends to provide higher exposure (relative to the Index) to bonds of companies that are mitigating and adapting to climate related risks and are on a clear path to climate transition using ITR. The securities in the Fund are selected primarily from the constituents of the Index and the Investment Manager applies the negative and norms-based ESG screens and climate transition targets prior to the construction of the portfolio of the Fund and on an ongoing basis.

Application of the ESG screens results in the exclusion of any securities from the portfolio based on an assessment of their adherence to ESG criteria defined by the Investment Manager. The Fund will screen out securities of issuers identified as being non-compliant with UNGC Principles relating to environmental protection, human rights, labour standards and anti-corruption, as well as companies associated with Severe ESG Controversies, civilian firearms, controversial weapons, tobacco, thermal coal, arctic oil & gas exploration, and oil sands extraction. The Fund may use additional ESG screening techniques from time to time in order to exclude securities based on their involvement with an activity that is deemed non-compliant with one or more of such ESG criteria referred to in the previous sentence.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

In order to attain the environmental and social characteristics promoted by the Fund, the Investment Manager implements the Climate Transition Corporate Bond Beta Strategy to build a portfolio of securities for the Fund that intends to provide higher exposure (relative to the Index) to bonds of companies that are mitigating and adapting to climate risk and are on a clear path to climate transition using climate ITR.

Another binding element of the investment strategy utilised by the Fund consists of the application of the ESG screens as above and further listed below:

1. UNGC Violations
2. Severe ESG Controversies
3. Controversial Weapons
4. Civilian Firearms
5. Tobacco
6. Thermal Coal
7. Arctic Oil & Gas Exploration
8. Oil Sands Extraction

The above list is a non-exhaustive set of exclusions and the Investment Manager may employ additional ESG screens from time to time in order to exclude securities from the portfolio based on an assessment of their non-compliance with one or more ESG criteria defined by the Investment Manager.

For the avoidance of doubt, the exclusions applied by the Fund are aligned with the Climate Transition Benchmark (CTB) exclusions contained in Article 12.(1)(a)-(c) of CDR (EU) 2020/1818, which are applied in the context of the ESMA Guidelines on funds' names.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

N/A

What is the policy to assess good governance practices of the investee companies?

The assessment of good governance practices is implemented through the negative screening utilised by the Fund. Companies deemed by the Investment Manager to comply with UNGC Principles are considered to exhibit good governance.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

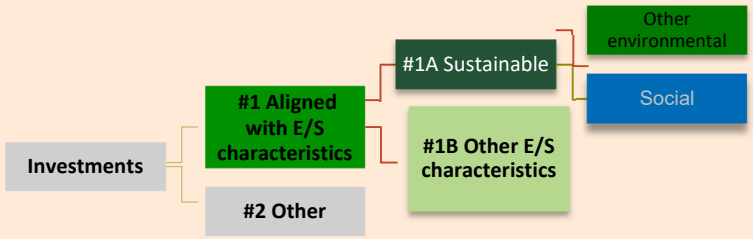

What is the asset allocation planned for this financial product?

Asset allocation describes the share of investments in specific assets.

The Investment Manager employs a binding ESG methodology which aims to build a portfolio where at least 90% of the Fund's assets are invested in securities which are "#1 Aligned with environmental and social characteristics as outlined in the table below. It is intended that, within such portion of the portfolio, at least 25% of the Fund's assets are invested in securities which are sustainable investments with environmental and / or social objectives, at the point of rebalance of the portfolio which typically occurs on a monthly basis. The remaining portion (<10%) of the portfolio, consisting of cash as well as cash equivalents in place held at the Investment Manager's discretion, will be classified under #2 Other in the below table and will not be aligned with the promoted environmental and social characteristics.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product*?**

To the extent that the Fund may use financial derivative instruments, these will not be used to attain the environmental or social characteristics promoted by the Fund.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to invest in any "sustainable investment" within the meaning of the EU Taxonomy, but only within the meaning of the SFDR regulation. However, the position will be kept under periodic review giving due consideration to market developments as the availability of reliable data increases over time.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]

☐ **Yes:**

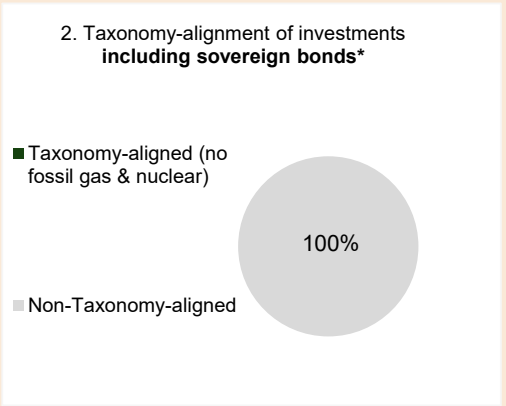

☐ In fossil gas ☐ In nuclear energy

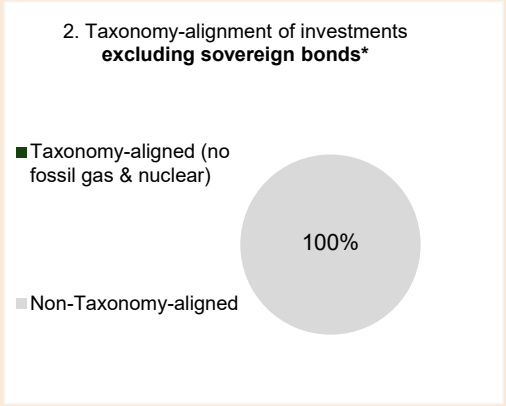

☒ **No**

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulations (EU) 2022/1214.

What is the minimum share of investments in transitional and enabling activities?

As the Fund does not commit to invest any "sustainable investment" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy is therefore also set at 0%.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The Fund intends to invest a minimum of 0% of the Fund's securities in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. The assessment of the Fund's investments qualifying as sustainable is determined on or around each portfolio rebalance which typically occurs on a monthly basis.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of socially sustainable investments?

The Fund intends to invest a minimum of 0% of the Fund's securities in sustainable investments with a social objective that are not aligned with the EU Taxonomy. The assessment of the Fund's investments qualifying as sustainable is determined on or around each portfolio rebalance which typically occurs on a monthly basis.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The Fund may hold a portion of its assets in cash or cash equivalents or use financial derivative instruments at the Investment Manager's discretion, which would be classified under #2 Other in the above table. Such assets will not be aligned with environmental and social characteristics nor will there be any environmental or social safeguards in place.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

N/A

Where can I find more product specific information online?

More product-specific information can be found on the website:

Fund Finder (ssga.com)

ANNEX 34

Template pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: State Street Climate Transition US Corporate Bond Beta Fund (the "Fund")

Legal entity identifier: 5493008SOKGTNM21F646

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☐ **Yes**

☒ **No**

☐ It will make a minimum of **sustainable investments with an environmental objective**: ___%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of **sustainable investments with a social objective: ___%**

☒ **It promotes Environmental/ Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 25% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The Fund promotes environmental characteristics through investments in bonds of companies that are on a clear path to climate transition and which exhibit lower carbon emissions in the way of current emissions and future emissions (measured by fossil fuel reserves), green labelled and climate-aligned bonds and corporate bonds issued by companies are better positioned for the risks posed by climate change.
In addition to this, the environmental and social characteristics promoted by the Fund are negative and norms-based screen applied to the portfolio of the Fund to screen out securities based on an assessment of their adherence to ESG criteria, i.e. international norms in relation to environmental and social protection. Specifically, the Fund promotes environmental characteristics through exclusion of investments in companies which fail to comply with UNGC Principles relating to environment (Principles 7 to 9), companies associated with Severe ESG Controversies and which are active in thermal coal, arctic oil & gas exploration, and oil sands extraction. The Fund also promotes social characteristics through exclusion of investments in companies which fail to comply with UNGC Principles relating to human rights (Principles 1 and 2), labour standards (Principles 3 to 6), anti-corruption (Principle 10) and companies associated with Severe ESG Controversies, controversial weapons, civilian firearms and tobacco. The UNGC Principles is the world largest corporate sustainability initiative aimed at companies to align their strategies and operations with universal principles on human rights, labour, environment and anti-corruption, and take actions that advance societal goals.
The Fund may use additional ESG screens from time to time in order to exclude securities based on their involvement with an activity that is deemed non-compliant with one or more of such ESG criteria.

The Fund further promotes environmental and social characteristics through its allocation of a portion of the portfolio to sustainable investments. In order for the security to qualify as a sustainable investment, the company

must be it must be classified as aligned to the Climate Bond Initiative green bond database screening process and/or a “Leader” or “Outperformer” as determined by the Investment Manager using ESG score generated by its proprietary process.

No reference benchmark has been designated to attain the environmental and social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The attainment of the environmental characteristics is measured through the higher exposure of the Fund’s portfolio (relative to the Bloomberg US Corporate Bond Index (“Index”)) to bonds of companies that are mitigating greenhouse gas emissions and adapting to climate related risks by constructing the portfolio that aims to:

a) minimise;
- carbon emission intensity (emissions scaled by revenue);
- brown revenues; and
  fossil fuel reserves;

b) maximise green bonds; and

c) target companies that are positioned to benefit from the transition to the low-carbon economy based on their Implied Temperature Rise.

Implied Temperature Rise (ITR) compares the current and projected greenhouse gas emissions of each company against its carbon budget (as calculated by the IPCC). MSCI calculates the carbon budget overshoot or undershoot, then converts it to an implied rise in global temperature. The Investment Manager uses a portfolio ITR as the Fund's climate transition pathway.

A further attainment of the environmental characteristics promoted by the Fund is measured through:

- % of the portfolio invested in securities that are included in the negative and norms based screen specifically related to environmental characteristics, namely companies identified as being non-compliant with UNGC Principles in regards to the environment, companies associated with Severe ESG Controversies and companies which are active in thermal coal, arctic oil & gas exploration, and oil sands extraction.

The attainment of the social characteristics promoted by the Fund is measured through:

% of the portfolio invested in securities that are included in the negative and norms based screen specifically related to social characteristics, namely companies identified as being non-compliant with UNGC Principles and companies associated with Severe ESG Controversies, controversial weapons, civilian firearms and tobacco.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The objectives of the sustainable investments made by the Fund are to invest in securities that are classified as:
- Aligned to the Climate Bonds Initiatives (CBI) green bond database screening process and / or
- Leaders or Outperformers according to the ESG score of the Investment Manager’s proprietary ESG scoring system.

The CBI is a mature, globally accepted standard for screening and determining that a bond is financing assets consistent with achieving the goals of the Paris Climate Agreement. In order for the security to qualify as a sustainable investment, the bond must meet the standards required by the CBI to be included in its green bond database. Please note that the screening methodology applied to the portfolio of the Fund by the Investment Manager may not always fully apply to the green bonds held by the Fund that meet the standards required by the CBI to be included in the green bond database.

The ESG scoring system developed by the Investment Manager leverages multiple data sources and aligns them to widely accepted, transparent materiality frameworks to generate a unique ESG score for

listed companies. It measures the performance of a company's business operations and governance as it relates to financially material ESG challenges facing the company's industry.

The Investment Manager draws on data from multiple ESG data providers and leverages the Sustainable Accounting Standards Board's ("SASB") - widely accepted, transparent materiality framework to generate the unique score that measures the performance of a company's business operations and governance as it relates to industry-specific ESG Factors. The SASB materiality framework focuses on financial materiality of certain ESG metrics as defined by specific industry. The company's ESG score allows for a global comparison of companies' ESG performance within a sector or industry.

In order for the security to qualify as a sustainable investment, the company must be a "Leader" or "Outperformer" as determined by the Investment Manager using the ESG score generated by its proprietary process. Companies qualified as "Leaders" or "Outperformers" are deemed to manage and mitigate long-term, financially-material sustainable risks better than its peers and thus operate a more sustainable business model.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager applies a negative and norms-based screen to the Fund to screen out securities based on an assessment of their adherence to ESG criteria including securities of companies identified as being non-compliant with UNGC Principles (relating to environmental protection, human rights, labour standards, anti-corruption), securities of companies associated with Severe ESG Controversies, thermal coal, arctic oil & gas exploration, oil sands extraction civilian firearms, controversial weapons and tobacco. By applying the relevant negative and norms-based screen, the Investment Manager deems the Fund's sustainable investments not to cause significant harm to any environmental or social sustainable investment objective.

— *How have the indicators for adverse impacts on sustainability factors been taken into account?*

As described below, the Fund considers Principal Adverse Impacts on sustainability factors as part of the Climate Transition Corporate Bond Beta Strategy and by applying the negative and norms-based ESG screen prior to the construction of the portfolio.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The Fund excludes companies that the Investment Manager has identified as being non-compliant with UNGC Principles as part of the negative screening utilised by the Fund. The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are considered as part of the UNGC Principles assessment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

x	**Yes,**	The Fund considers Principal Adverse Impacts ("PAI") on sustainability factors as part of the Climate Transition Corporate Bond Beta Strategy and by applying the

negative and norms-based ESG screens and climate transition targets prior to the construction of the portfolio. Specifically, the Fund considers

- Greenhouse Gas emissions
- Carbon footprint
- Greenhouse gas intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Share of non-renewable energy consumption and production
- Violations of UN Global Compact Principles
- Exposure to controversial weapons

Further information on the PAIs will be found in the periodic reports for the Fund.

No

What investment strategy does this financial product follow?

The Investment Manager, on behalf of the Fund, will invest actively using the Climate Transition Corporate Bond Beta Strategy as further described in section 8.1 of the Prospectus and the Relevant Supplement. This strategy uses a systematic methodology to provide higher exposure (relative to the Index) to bonds issued by companies that are mitigating and adapting to climate risk and are on a clear path to climate transition using ITR.

In implementing this strategy, the Investment Manager employs a quantitative process to construct a portfolio of bonds taking into account certain ESG factors such as: carbon intensity (emissions scaled by revenue, fossil fuel reserves, allocation to green bonds, brown revenues, implied temperature rise and ratings for climate adaptation. The resulting portfolio of the Fund intends to provide higher exposure (relative to the Index) to bonds of companies that are mitigating and adapting to climate related risks and are on a clear path to climate transition using ITR. The securities in the Fund are selected primarily from the constituents of the Index and the Investment Manager applies the negative and norms-based ESG screens and climate transition targets prior to the construction of the portfolio of the Fund and on an ongoing basis.

Application of the ESG screens results in the exclusion of any securities from the portfolio based on an assessment of their adherence to ESG criteria defined by the Investment Manager. The Fund will screen out securities of issuers identified as being non-compliant with UNGC Principles relating to environmental protection, human rights, labour standards and anti-corruption, as well as companies associated with Severe ESG Controversies, civilian firearms, controversial weapons, tobacco, thermal coal, arctic oil & gas exploration, and oil sands extraction. The Fund may use additional ESG screening techniques from time to time in order to exclude securities based on their involvement with an activity that is deemed non-compliant with one or more of such ESG criteria referred to in the previous sentence.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

In order to attain the environmental and social characteristics promoted by the Fund, the Investment Manager implements the Climate Transition Corporate Bond Beta Strategy to build a portfolio of securities for the Fund that intends to provide higher exposure (relative to the Index) to bonds of companies that are mitigating and adapting to climate risk and are on a clear path to climate transition using climate ITR .

Another binding element of the investment strategy utilised by the Fund consists of the application of the ESG screens as above and further listed below:

1. UNGC Violations
2. Severe ESG Controversies
3. Controversial Weapons
4. Civilian Firearms
5. Tobacco
6. Thermal Coal
7. Arctic Oil & Gas Exploration
8. Oil Sands Extraction

The above list is a non-exhaustive set of exclusions and the Investment Manager may employ additional ESG screens from time to time in order to exclude securities from the portfolio based on an assessment of their non-compliance with one or more ESG criteria defined by the Investment Manager.

For the avoidance of doubt, the exclusions applied by the Fund are aligned with the Climate Transition Benchmark (CTB) exclusions contained in Article 12.(1)(a)-(c) of CDR (EU) 2020/1818, which are applied in the context of the ESMA Guidelines on funds' names.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

N/A

What is the policy to assess good governance practices of the investee companies?

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

The assessment of good governance practices is implemented through the negative screening utilised by the Fund. Companies deemed by the Investment Manager to comply with UNGC Principles are considered to exhibit good governance.

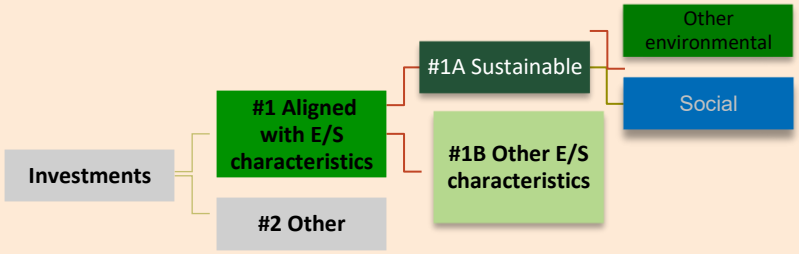

What is the asset allocation planned for this financial product?

Asset allocation describes the share of investments in specific assets.

The Investment Manager employs a binding ESG methodology which aims to build a portfolio where at least 90% of the Fund's assets are invested in securities which are "#1 Aligned with environmental and social characteristics as outlined in the table below. It is intended that, within such portion of the portfolio, at least 25% of the Fund's assets are invested in securities which are sustainable investments with environmental and / or social objectives, at the point of rebalance of the portfolio which typically occurs on a monthly basis. The remaining portion (<10%) of the portfolio, consisting of cash as well as cash equivalents in place held at the Investment Manager's discretion, will be classified under #2 Other in the below table and will not be aligned with the promoted environmental and social characteristics.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

To the extent that the Fund may use financial derivative instruments, these will not be used to attain the environmental or social characteristics promoted by the Fund.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to invest in any "sustainable investment" within the meaning of the EU Taxonomy, but only within the meaning of the SFDR regulation. However, the position will be kept under periodic review giving due consideration to market developments as the availability of reliable data increases over time.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]

☐ **Yes:**

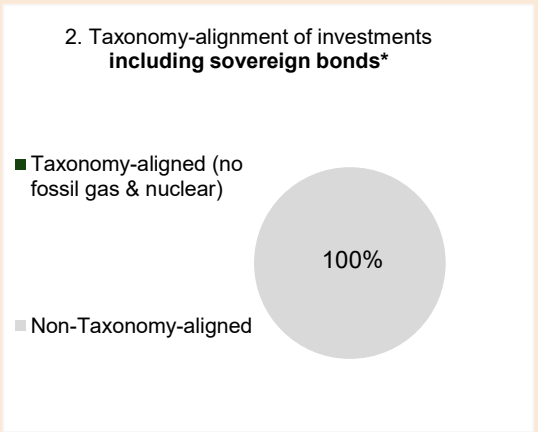

☐ In fossil gas ☐ In nuclear energy

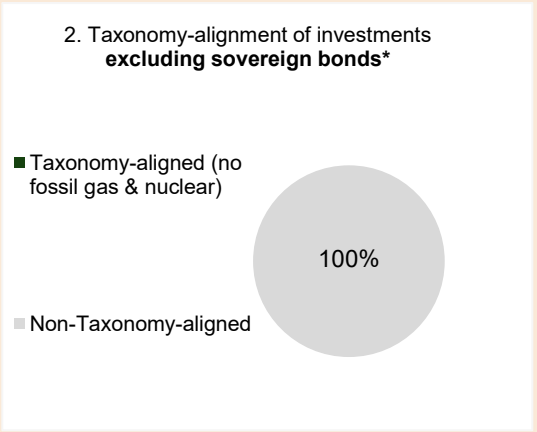

☒ **No**

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What is the minimum share of investments in transitional and enabling activities?

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulations (EU) 2022/1214.

As the Fund does not commit to invest any "sustainable investment" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy is therefore also set at 0%.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The Fund intends to invest a minimum of 0% of the Fund's securities in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. The assessment of the Fund's investments qualifying as sustainable is determined on or around each portfolio rebalance which typically occurs on a monthly basis.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of socially sustainable investments?

The Fund intends to invest a minimum of 0% of the Fund's securities in sustainable investments with a social objective that are not aligned with the EU Taxonomy. The assessment of the Fund's investments qualifying as sustainable is determined on or around each portfolio rebalance which typically occurs on a monthly basis.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The Fund may hold a portion of its assets in cash or cash equivalents or use financial derivative instruments at the Investment Manager's discretion, which would be classified under #2 Other in the above table. Such assets will not be aligned with environmental and social characteristics nor will there be any environmental or social safeguards in place.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Country supplement
Additional information for investors in the Federal Republic of Germany

This Country Supplement forms part of and should be read in the context of the prospectus dated **20 October 2025** (the "Prospectus"), as may be amended from time to time.

For the following investment compartments, no notification for marketing in the Federal Republic of Germany has been filed with the Federal Financial Supervisory Authority (BaFin), so that units of these investment compartments may not be marketed to investors within the jurisdiction of the Investment Code:

- All sub-funds are currently registered in the Federal Republic of Germany

Words and terms defined in the Prospectus for the Company have the same meaning in this Country Supplement.

Facility Agent in the Federal Republic of Germany

State Street Bank International GmbH, Solmsstraße 83, 60486 Frankfurt am Main ("State Street Bank") has undertaken the role as the Company's facility agent in Germany and will cover the tasks listed in Section 306a paragraph 1 KAGB, namely:

(a) process subscription, repurchase and redemption orders and make other payments to unit-holders relating to the units of the Company, in accordance with the conditions set out in the documents required pursuant to section 297 paragraph 4 sentence 1 KAGB;

(b) provide investors with information on how orders referred to in point (a) can be made and how repurchase and redemption proceeds are paid;

(c) facilitate the handling of information and access to procedures and arrangements referred to in Section 28 paragraph 2 number 1 KAGB relating to the investors' exercise of their rights arising from their investment in the Company in Germany (complaints support);

(d) make the information and documents required pursuant to Section 297 paragraph 4 sentence 1 KAGB available to investors under the conditions laid down in Section 298 paragraph 1 KAGB, and Section 301, for the purposes of inspection and obtaining copies thereof;

(e) provide investors with information relevant to the tasks that the facilities perform in a durable medium; and

(f) act as a contact point for communicating with the Federal Financial Supervisory Authority (BaFin).

Conversion and redemption requests from German resident investors can be addressed to State Street Bank for processing in accordance with the provisions of the Prospectus. German resident investors can request that the proceeds of such redemption, possible dividends and other payments due to them be paid through State Street Bank.

The Prospectus, the Key Investor Information Documents, copies of Articles of Incorporation of the Company, the annual and the semi-annual reports are available in paper form free of charge at the offices of State Street Bank.

The following material contracts and other relevant documents concerning the Company are available to view free of charge at the offices of State Street Bank:

- The Investment Management Agreement;
- The Administration Agreement;
- The Custodian Agreement;

The latest subscription, conversion and redemption prices and the Net Asset Value as well as possible information to the investors are available free of charge upon request at the offices of State Street Bank.

Publication

The subscription and redemption prices as well as notices to shareholders will be published in the Federal Republic of Germany in the “www.fundinfo.com”.

Tax information for Germany

The below information is merely an overview of the taxation of German resident investors. No warranty is given as to the accuracy of this information and it is not intended under any circumstances to be a replacement for detailed professional financial and/or tax advice which an investor may seek. The information is based on an interpretation of the legislation and the opinion of the German fiscal authorities at the date of publication of the Prospectus. Since it cannot be excluded that between this date and the date of an investor’s ultimate investment decision the legal situation or the view of the German fiscal authorities may have changed, it is for the investors to consider the financial and tax consequences of making an investment and to seek professional advice if necessary.

Investment Fund tax regime

As of 1 January 2018, the new German Investment Tax Act (GITA) is in effect. The new tax regime distinguishes between "Investment Funds" as defined in section 1 paragraph 2 of the GITA and "Special Investment Funds" as defined in section 26 of the GITA. All Funds of the Company should be treated as "Investment Funds" pursuant to the GITA and should not be subject to the "Special Investment Fund" tax regime.

The following details of the new tax regime therefore relate exclusively to the rules applicable to “Investment Funds” as defined under the GITA. “Investment Funds” are subject to an “opaque taxation”, meaning that the taxation at fund level is separated from the taxation at investor level.

Taxation at fund level

As of 1 January 2018, German and non-German Investment Funds are taxed at fund level with respect to certain German source income, including in particular German dividend income

and German real estate income. In the case of German dividend income, German withholding tax as a rule has to be withheld at source.
For Investment Funds that are in possession of a valid fund status certificate, the withholding tax rate to be applied on German dividend income is 15.0% (including 5.5% solidarity surcharge). No further German taxes will be due on income subject to German withholding tax.
German source income which is not subject to German withholding tax (e.g. German real estate income, manufactured income) will be taxed in the course of a tax assessment at a rate of 15.825% (including solidarity surcharge).

Taxation at investor level

Under the GITA, the following events are considered as taxable for the investors of an Investment Fund:

- Dividends distributed by the Investment Fund
- Capital gains resulting from disposals/redemptions of the units of the Investment Fund
- The value of the Investment Fund at calendar year-end (annual minimum taxation known as the "Vorabpauschale")

In principle, all taxable events should be subject to a final withholding tax of 25% (plus solidarity surcharge and church tax, if applicable) at the level of individual investors holding units of the Investment Fund as private assets. In the case of business investors (i.e. investors holding the Investment Fund units as business assets) the personal income tax rate should apply and in the case of corporate investors the corporate tax rate of 15.0% (plus solidarity surcharge) should be applicable. In addition, in the two latter cases, the income may be subject to German trade tax.

The investors of an Investment Fund may benefit from a partial tax exemption on all taxable events of the Investment Fund (i.e. distributions, capital gains from a disposal / redemption of units and the annual "Vorabpauschale") depending on the categorisation of the relevant Investment Fund as either an "**equity fund**" or a "**mixed fund**" under the GITA.

The categorisation of an Investment Fund as "equity fund" or "mixed fund" pursuant to the GITA depends on whether the Investment Fund meets certain requirements defined by the GITA:

- An "**equity fund**" must pursuant to its investment terms (i.e. article of incorporation, prospectus of the Investment Fund) be continuously invested in equity participations to more than 50% of the value of its assets.
- A "**mixed fund**" must pursuant to its investment terms (i.e. article of incorporation, prospectus of the Investment Fund) be continuously invested in equity participations to at least 25% of the value of its assets.

Changes to the investment policy and restrictions of the Investment Fund might lead to a recategorisation. The legal and fiscal treatment of the Investment Fund by the German tax authorities may change in a way that is unforeseeable and beyond the reasonable control of the Company.

The partial tax exemption rates are set out in the following table:

	Investors holding fund units as private assets	Investors holding fund units as business assets	Corporate investors

Equity fund	30%	60%	80%
Mixed fund	15%	30%	40%

Additionally, where an investor of an "equity fund" or "mixed fund" is subject to German trade tax, half of the aforementioned tax exemptions apply for trade tax purposes.

The Company intends to make reasonable efforts to provide all information relevant for the taxation of the German resident investors under the GITA via a reporting to WMDatenservice. This reporting includes the publication of the partial tax exemption status of the Funds, the NAV-frequent equity participation quota ("Kapitabeteiligungsquote") of the Funds as well as other relevant investor tax information. The annual tax information is also available on our homepage: https://ssga.com.

Partial tax exemption status of the Funds

1) Equity funds

The following Funds of the Company adhere to the investment restrictions required to qualify as "equity funds" pursuant to section 2 paragraph 6 GITA and continuously invest more than 50% of the value of their assets in equity participations within the meaning of section 2 paragraph 8 GITA (see for a definition further below).
Nevertheless, the targeted investment in equity participations may be higher than the minimum of 50% as shown in the table below. The actual equity participation quota of the Funds is determined on each valuation day of the Funds and is published on WM Datenservice.

Fund	Minimum percentage of the net asset value invested in equity participations ("minimum equity participation quota")
State Street EMU Screened Equity Fund	65
State Street Emerging Markets SRI Enhanced Equity Fund	75
State Street Emerging Markets Screened Enhanced Equity Fund	75

2) **Mixed funds**

There is currently no Fund of the Company qualifying as "mixed fund" pursuant to section 2 paragraph 7 GITA.

Determination of the equity participation quota

Equity participations within the meaning of section 2 paragraph 8 GITA are:

- Shares of a corporation which are admitted to official trading on a stock exchange or listed on an organised market,

- Shares of a corporation which does not qualify as a real-estate company and which:

    - is resident in a EU or EEA Member State and is subject to corporate income taxation in that state and is not exempt from such a taxation, or

    - is resident in a third state and is subject to corporate income taxation in that state at a rate of at least 15% and is not exempt from such a taxation,

- Investment fund units of an equity fund with 51% of the value of the investment fund units or, if the investment conditions of the equity fund provide for a higher minimum equity participation quota, with the prescribed higher percentage of the value of the investment fund units,

- Investment fund units of a mixed fund with 25% of the value of the investment fund units or, if the investment conditions of the mixed fund provide for a higher minimum equity participation quota, with the prescribed higher percentage of the value of the investment fund units.

Investments in Real Estate Investment Trusts (REITs), depository receipts and (as a rule) also securities lent out under a securities loan are not eligible equity investments for this purpose.

When calculating the equity participation quota, any loans raised by the Funds are deducted from the equity participations in proportion to the amount of equity participations in the value of the assets of the fund.

In addition fund of funds may take into account the actual equity participation quotas published by their target investment funds on each valuation day. For this purpose, only equity participation quotas of target funds that have at least one valuation per week will be taken into consideration.
